SURFACE TEMPERATURE RISE AT HOT SPOT VS. LOAD

SPECIFICATIONS

MIL-R-11 Style Equivalent for Physical Size Only: RC32

Resistance, Standard: 0.10Ω thru 2400Ω.

Resistance Tolerances, Standard: ±5%, ±10%.

Power Rating: 2 watts @ 70°C
1 watt @ 115°C
½ watt @ 137°C; derating to 0 @ 160°C

Maximum Continuous Working Voltage: $\sqrt{PR}$

Minimum Insulation Resistance — Dry: 10,000 Megohms

Minimum Insulation Resistance — Wet: 100 Megohms

Minimum Dielectric Withstanding Voltage: Atmospheric Pressure 1000 Volts R.M.S.; Reduced Pressure 625 Volts R.M.S.

Hot Spot Temperature Rise at 2 Watts: 115°C

Current Noise: Negligible

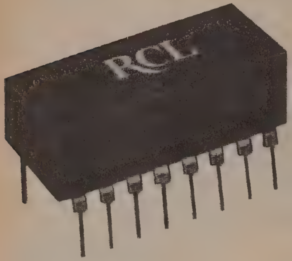
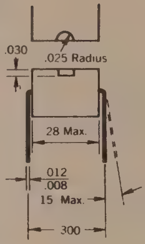
wire-wound networks (dual-in line package)



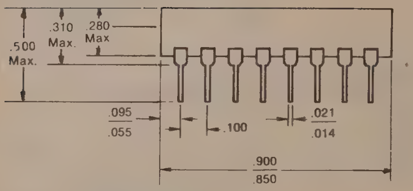


TYPE DPW 16

- Designed for automatic insertion
- Up to 8 resistors in a 16-pin package
- Optimum heat dissipation in small package
- High temperature stability
- Precision tolerance and T.C.

ELECTRICAL SPECIFICATIONS

Power Rating: 4 watts (up to .5 watts/resistor)
Resistance Range: .5Ω to 1.000Ω per resistor
Temperature Coefficient Match: 10 PPM/°C Standard
Available to 2.5 PPM/°C
Tolerance: 1% Standard Available to .05%
Temperature Coefficient: 10Ω to 1000Ω ±20 PPM/°C
.5Ω to 9.9Ω ±50 PPM/°C
Tolerance Match: .05%
Dielectric Strength: 500 VAC
Insulation Resistance: 1000 Megohms minimum.
100 Megohms minimum after moisture test



TYPICAL SCHEMATICS

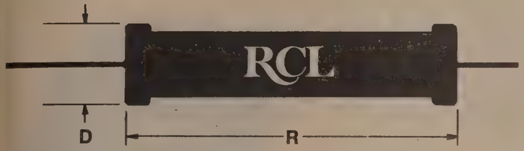
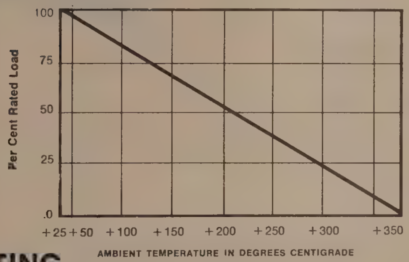
"black jack" vitreous enamel axial lead wire-wound resistors





DERATING

Wattage ratings are based on 25°C Free Air Rating. For higher ambient temperatures, use derating chart.

- Extremely rugged vitreous construction for military and aerospace circuit applications.
- Meets or exceeds MIL-R-26 specifications.
- Special RCL rugged conformal coating protects against extreme humidity and temperature cycling.
- All-welded construction.
- Ideal for machine insertion.

Standard tolerance ±5% in wattage ratings of 1, 2, 3, 5, 6, 7, and 11 watts. Dielectric breakdown voltage is 1 KV (500 V for 1 W types), T.C. 0 ±30 PPM/°C (typ.).

MECHANICAL

☐ **Terminal Strength:** Meets or exceeds MIL-R-26.

ELECTRICAL

☐ **Tolerance:** ±5% std.; ±1% to ±10% available.
☐ **Temperature Coefficient:** 0 ±30ppm/°C typical for 10Ω or greater.
☐ **Dielectric Withstanding Voltage:** 1 KV (500 V for 1 W types). Overload, Short Time: 10X rated wattage for 5 sec. (5 W size & larger); 5X rated wattage for 5 sec. (under 5 W).
☐ **Wattage:** See Table.
☐ **Inductance:** Varies with no. of turns and wire size. Std. units have single layer winding. Non-inductive (Aryton-Perry) windings available.

MATERIALS

☐ **Core:** Ceramic, resistant to thermal shock and wide variations in temperature.
☐ **Resistance Element:** High grade resistance alloy wire, single layer winding. Leads and resistance element welded to metal end caps.
☐ **Coating:** Consistent, uniform, high performance black vitreous enamel.
☐ **Leads:** Solder coated.

special products

RCL engineers have designed and produced thousands of unique products to meet special customer applications. Shown are a few typical examples. RCL has an application engineering group directed toward solving and producing unusual products to fit custom requirements. Our capabilities include extended resistance ranges, extremely low reactance, low thermal EMF and special configuration.

computer resistors

High-density power resistors specifically designed to meet demanding space requirements. Ideal for memory termination. Isolates line drive impulses and terminates lines. RCL engineers can meet all design requirements by adapting nearly any type of configuration. Particularly suited to very low resistance requirements for interface with integrated circuitry.

POWER RATING: 23 WATTS WHEN MOUNTED ON HEAT SINK MAINTAINED AT 75°C.

Resistance Range: From .01Ω to 100Ω.

Tolerances: 5% standard. Closer tolerances available. Consult factory.

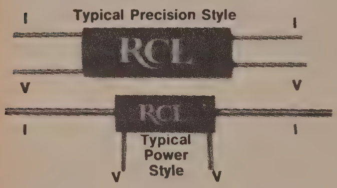
Dimensions: .5 x .5 x .062. (Millimeters: 12.7 x 12.7 x 1.6)

T.C.: ±100 PPM/°C. Closer tolerances available on request.

Terminals: Wire leads.

Max. Temp.: (on open side) 125°C.

4-terminal resistors



RCL manufactures 4-Terminal Resistor assemblies in both precision and power styles. They are used in current sensing circuits primarily with low resistance values to minimize the effects of lead resistance and lead temperature coefficient. This unique construction is essential for tight tolerance low value resistors where lead material characteristics are critical.

To order, specify "4-Terminal Construction" with any RCL Resistor Series 7000 (Precision Styles) or Series "T" (Power Styles).

Consult factory for application details or special packaging configurations.

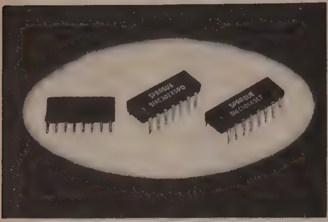
SPRAGUE RESISTORS

METANET® PRECISION RESISTOR NETWORKS



216C **914C** **916C**

- Designed for use in signal and data processing applications where repetitive resistance values and patterns are required.
- Cut package count, reduce equipment size, minimize costs.
- Up to 28 metal-film resistors on single ceramic base.
- High packaging density – Fewer components to stock, handle, inspect, install.
- Standard resistance tolerance, ±2%.†
- Typical temp. coefficient, with 250 ppm/°C. Tracking between resistors, ±50 ppm/°C.
- Type 216C has single in-line configuration for vertical installation on high-density boards. Continuous total power dissipation is 1.5W at +25 C. Derating is linear to +150 C.
- Types 914C and 916C have dual in-line packages compatible with ICs. Continuous power dissipation at 25 C is 3W and 3.5W, respectively. Derating is linear to +150 C.
- Cat. No. Series ending in PE and SR available to 500KΩ on special order.
- For data on Type 216C, see Bulletin 7041. For data on 941C/916C, see Bulletin 7042.

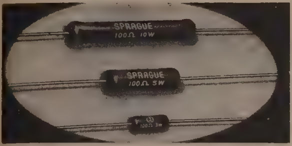
SPRAGUE RESISTORS

BLUE JACKET® VITREOUS-ENAMEL WIREWOUND RESISTORS



- Matched Coefficient of Expansion Allows Uniform Expansion of Vitreous Enamel Coating, Ceramic Base, and End Caps, Eliminating Crazing, Cracks, and Protects From Fumes and Humidity
- Standard Resistance Tolerance: ±5%
- Improved Minified Resistors Designed for Thorough Reliability and Stability Under Extreme Operating Conditions
- Windings and Leads Welded to End-Caps for Superior Mechanical Strength
- Fractional-Ohm Values Down to 0.10 Available on Special Order

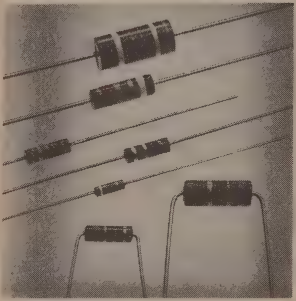
EEM-58-EIAF

TRW® IRC RESISTORS

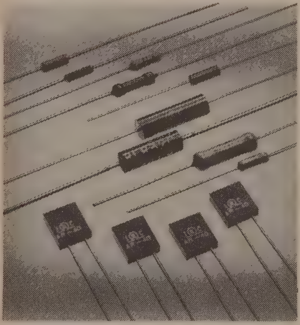
You get exactly the resistor you need for your application.

No compromises. No "favorites." Just quality.



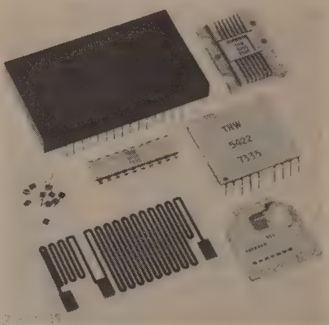
Carbon comp.

Billions used in consumer, industrial, military applications. TRW/IRC carbon comp. capability ranges from standard commercial types through established reliability RCR's, to ultra-high range (10^{11} ohms). Where you're using carbon comp.'s in automated assembly, TRW/IRC packaging options can help cut the cost of interfacing with your machines. Card packs, lead tape reels, cut and formed leads…we'll be glad to explore the potential economies with you.



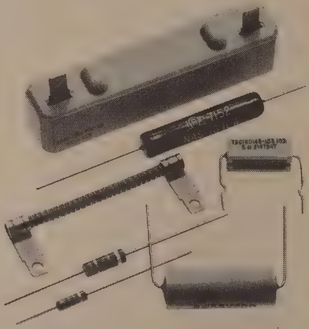
Metal Film

TRW/IRC has brought the state of the art in thin-film to a performance level equaling high-stability wirewounds. Capabilities include resistors with tolerances to ± 0.01% and ± 3 PPM T.C. …high-rel units… precision subminiatures…and, of course the popular RN's. You can also look at alloy films offering high-temperature and high-voltage capability at low cost.



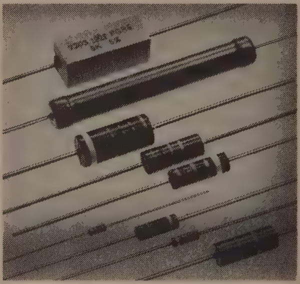
Resistive Networks

Advanced resistor technology here. These IC compatible, precision tantalum-film circuits provide inherent low noise, excellent stability, and hermetic performance without hermetic cost. Tolerances from 5% to 0.05% available in custom designs.
TRW/IRC also offers the industry's most complete line of discrete fixed resistors.



Wirewound

The line starts with molded wirewound resistors—"space-savers" that bridge the cost-performance gap between composition resistors and precision wirewounds.
It proceeds to standard, non-insulated types for appliance/automotive use…to precision subminiatures offering high power density… to low cost fusible, flameproof units for consumer and industrial applications… to tubular and flat power wirewounds with ratings to 250 W.



Metal Glaze™

This is TRW/IRC's thick-film technology—for all types of low power resistor applications. Metal Glaze is widely accepted for its built-in power handling reliability, resistance range, and cost effectiveness. Numerous standard and special designs—precision, semi-precision, flameproof, high-rel, high-voltage.

All types…all technologies…
one source

To wrap it up, TRW/IRC offers you the most complete line of fixed resistors in the business, with many of the popular types available from one source—your local TRW/IRC distributor. Having a direct pipeline to each of our plants, he can give you fast delivery.

Contact your local TRW *sales office* for application assistance, custom designs, and special engineering help when you need it. TRW/IRC Resistors, an Electronic Components Division of TRW, Inc. Plants at Boone, N.C., Burlington, Iowa, and Philadelphia, Pa. Write TRW/IRC Resistors, 401 N. Broad St., Philadelphia, Pa. 19108. Or call (215) 923-8230.

TRW® IRC RESISTORS

TRW/IRC RESISTORS

On the shelf... When you want them. Where you want them.

The TRW/IRC resistors listed in the table below are those usually carried in stock by our distributors. They're the resistors you're most likely to need, or at least, need in a hurry. When you do, chances are your nearby TRW/IRC distributor can fill your order from his shelves. Other parts and styles are available as well, although not always from stock. Ask your distributor, he'll be happy to discuss your special local stock needs with you.

TRW® IRC RESISTORS

GENERAL PURPOSE MOLDED CARBON COMPOSITION RESISTORS (RC & RCR)

Performance advantages include **strong** lead assemblies. TRW's ribbed shoulder leads are **deeply** imbedded in the molding, defy twisting or pull-out.

TRW leads feature a uniform surface—thanks to an exclusive alloy electroplating process (no hot dipping). You'll find no lumps or voids to degrade solderability.

Moisture protection is another TRW feature. With the element thermally bonded to glass body and embedded in TRW's Selectrez™ mold jacket, you get a more than 50% boost in moisture protection.

TRW carbon comp.'s also offer outstanding high-temperature characteristics. This results from the resistance element's being bonded to the glass substrate at 500°C, plus the internal heat-sinking action of the talon lead construction.

Altogether, these features—plus superior high-frequency characteristics (see facing page)—mean a top quality resistor with outstanding reliability.

Superior high frequency characteristics

The best high frequency characteristics in a fixed composition resistor are achieved when the ratio of cross-sectional area to resistor length is minimized. TRW/IRC's element has the smallest cross section and fewest carbon binder contacts of any carbon composition resistors.

The low mass resistance element assures low shunt capacitance and superior performance at high frequencies. In high frequency equipment, this results in better pulse shaping with less broadening and truncation and faster response.

TRW/IRC resistors significantly outperform other brands, as shown on the chart.

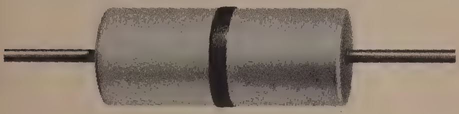
ZEROHM Molded Jumper Wires



Molded jumper wires or crossovers, as they are sometimes called, are basically interconnection devices between points on a P.C. Board.

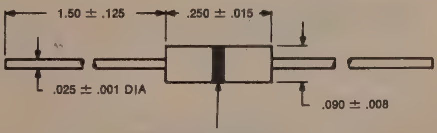
Generally they are used for the following reasons:

- —Inability to connect two points on a P.C. Board due to other circuit paths which must be crossed over.
- —An after-the-fact design change that requires new point connections.
- —Circuit tuning by changing point connections.

TRW's molded jumper wires offer a quick simple solution to these problems. They are especially suited for automatic machine insertion on lead tape or available in all packaging styles including pre-cut and formed for manual insertion.

SPECIFICATIONS

Maximum resistance	0.01 Ω
Lead material	30/70 tin/lead solder-coated copper wire.
Body material	Electrical grade, high performance, molding compound
Min. Insulation resistance—Dry	10,000 meg Ω
Wet	100 meg Ω
Min. Dielectric withstanding voltage	
Atmospheric	500V RMS
Reduced	325V RMS
Insulation flammability	Resistor insulation is self extinguishing within 10 seconds after externally applied flame is removed.



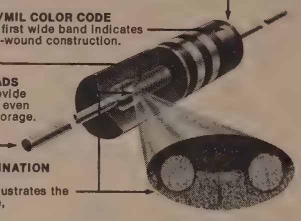
Single black color band denotes zero resistance.

TRW® IRC RESISTORS

GENERAL PURPOSE WIREWOUND MOLDED RESISTORS

Type BW-20 (1 Watt) and BWH (2 Watt)

The TRW/IRC Type BWH bridges the cost-performance gap between composition resistors and premium wirewounds. Its 2 watt rating in 1-watt size lets you replace 2 watt units and save space, or use it in 1 watt space with the advantages of a two-times safety factor and wirewound stability. BW-20s come in six types of packaging to cut assembly costs. They fit ½ watt inserting machines, and can be ordered with a wide variety of cut-and-formed lead configurations.



ALLOY RESISTANCE WIRE
Continuously wound on a fiberglass core for greater uniformity and extremely low inductances.

HEAVY MOLD JACKET
Exclusive phenolic plastic jacket provides superior strength and moisture protection.

EIA/MIL COLOR CODE
The first wide band indicates wire-wound construction.

ELECTROPLATED LEADS
Tin/lead coated to provide excellent solderability even after extended shelf storage.

HOT CLAMP TERMINATION
Actual unretouched photomicrograph illustrates the positive termination, inherent stability.

Patent No. 3,319,210

TRW® IRC RESISTORS

BWF FLAMEPROOF FUSIBLE WIREWOUND RESISTOR

The BWF is an economical fusible/flameproof resistor designed to handle ½, 1 and 2 watt applications where dependable circuit and equipment protection is essential.

The BWF has predictable overload *Fusing* Characteristics and is *Flameproof* under fault conditions up to 1000X rated power. (1000V maximum).

Rated at 2 watts and physically a 1 watt size, the BWF provides space savings and is suited for lead forming or automatic insertion equipment on reels of 2000 units. Other packaging styles are available.

TRW-BT348 FLAMEPROOF RESISTOR SPECIFICATION HIGHLIGHTS

1. INSTANTANEOUS OVERLOAD

   Overloads from 0 to 15 minutes duration. From 4X to 1000X rated power, (or 1000V, whichever is smaller)
   —No flaming of resistor
   —A paper tissue (Kimwipe #900-S) shall not ignite when resting across or beneath the unit.

2. DYNAMIC OVERLOAD

   Wattage increased at 100% increments of rated power every 2 seconds, (after a 1 minute warmup at rated power).
   —Same as 1 above.

3. CURRENT LIMITING

   Overload applied as in 1. Up to 1000X rated power (or 1000V).
   —Current shall limit to less than 1% of the ohms law value.

4. INSULATION FLAMMABILITY

   Resistor insulation is self extinguishing after externally applied flame is removed.
   —Extinguishes within 10 seconds.
   —Smoking is considered acceptable.

TRW® IRC RESISTORS

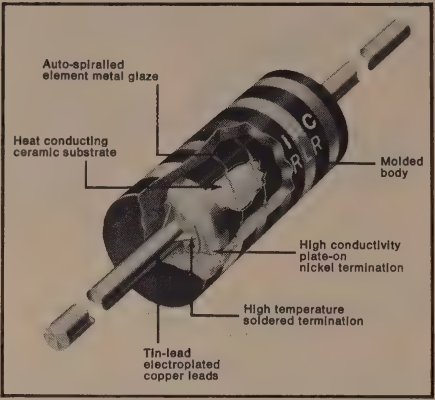
RG GENERAL PURPOSE SEMI PRECISION AND PRECISION METAL GLAZE™ RESISTORS

Cost effective IRC molded thick film Metal Glaze resistors are designed to provide a combination of ruggedness and performance unmatched anywhere for the price.

The secret is in the proprietary glaze systems, the unique design, and automated production techniques.

Metal Glaze resistors by the billions are in use worldwide, in all types of applications from missile guidance computers to truck anti skid systems, from telephone receivers to process control instrumentation.

Metal Glaze resistors meet or far exceed such MIL specifications as MIL-R-22684(RL), 10509(RN), 39017(RLR), 55182(RNR). Power Load △R's are often less than ±1%, even after 10,000 hours—equivalent to years of equipment life. And these units remain within tolerances even after extended periods of shelf or equipment storage.



Auto-spiralled element metal glaze
Heat conducting ceramic substrate
IRC
Molded body
High conductivity plate-on nickel termination
High temperature soldered termination
Tin-lead electroplated copper leads

PRODUCT FEATURES

- **Metal Glaze™ Thick Film Element**—Fused to core at 2000°F—extremely rugged and reliable system—up to 100 times thickness of oxide or evaporated films.
- **Solid Ceramic Substrate**—Provides optimum thermal conductivity—permits maximum power density, lowest T.C. △R's, overload protection, and freedom from mechanical breakage.
- **End-Plated and Soldered Terminals**—Prevents movement, provides excellent electrical and thermal contact. Withstands 20 lb. pull for 5 seconds.
- **Uniform Molded Body**—Best mechanical strength for automated lead forming and insertion equipment.
- **Stability**—Above built-in features provide design tolerances of as low as ±1.5% (depending on purchase tolerance, style, and T.C. selection—see design tolerance discussion, page 6).

TRW/IRC RESISTORS, AN ELECTRONIC COMPONENTS DIVISION OF TRW INC., P.O. BOX 393, BOONE, N.C. 28607 (704) 264-8861

TRW® IRC RESISTORS

M&C SERIES HIGH STABILITY METAL FILM RESISTORS

Evolved from the industry's original metal film process. These resistors are manufactured to the tightest controls for best performance with respect to low noise, high stability, and the ultimate in TCs and tolerances for precision applications. Standard tolerances and TCs are available to ± 0.1% and ±25 PPM°C respectively. Resistance values are to 100 megohms.

These evaporated metal film resistors will exceed all MIL-R-specification requirements, including the highest reliability level of MIL-R-55182. Voltage coefficient when measured between 1/10 and full rated voltage is typically less than 0.5 PPM/Volt for all values and essentially zero for low and medium values. Typical △ R for long term life is less than .04%.

The design concept of these resistors offer high strength characteristics for potting applications and automatic insertion.

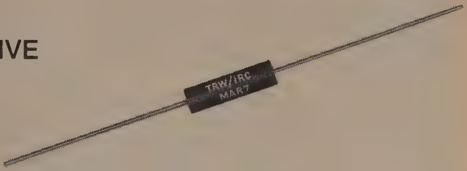
TRW® IRC RESISTORS

MAR ULTRA PRECISION, NON-INDUCTIVE METAL FILM RESISTORS

"Where speed and precision count"
MAR ultra-precision resistors have all of the advantages of evaporated metal film resistors and in addition, precision tolerances to .01% and temperature coefficients to 5 PPM/°C are standard. The inherent low inductance and low capacitance of this design make it ideally suited to high-speed applications requiring a high degree of stability. The rugged epoxy encapsulation provides excellent environmental protection.

Tailored TCs from —100 PPM/°C to +150 PPM/°C are available with TC tolerances to ± 5 PPM/°C.



TYPICAL PERFORMANCE

Load Life 1000 hrs. @ 85°C	.01% ΔR
Temperature Cycle	.002% ΔR
Humidity	.02% ΔR
Noise Index	−40 db
Voltage Coefficient	.02ppm/volt
1 year shelf life	±15 ppm

**Higher power ratings available. Contact factory.
†Thread length 1.00 ± .062.

AR40 ULTRA-PRECISION METAL FILM RESISTORS

The AR40 ultra-precision metal film resistor is designed to satisfy those critical design requirements where virtually zero temperature coefficient, stability and absolute accuracy are needed. Temperature coefficients of ± 5 PPM/°C and ± 2 PPM/°C are standard. Standard tolerances are available to .01%. The radial lead design and small case size require a minimum of printed circuit board space. Proven end cap termination assures essentially no degradation during normal circuit board insertion practices.

TRW® IRC RESISTORS

AR 90 ULTRA-PRECISION HIGH RANGE RESISTORS

The AR90 ultra precision metal film resistor is designed to satisfy those critical design requirements where resistance values between 1 meg Ω and 10 meg Ω are required. Temperature coefficients to 5 PPM/°C and tolerances to .05% are standard. Applications include ultra precision voltage dividers and input attenuators.

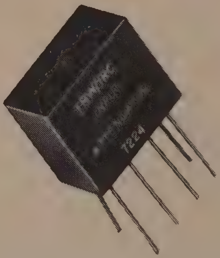
AR ULTRA-PRECISION RESISTOR NETWORKS

AR Resistor Networks provide the best performance and packaging density for a circuit requiring multiple, interdependent precision resistors. The rugged epoxy encapsulation provides maximum environmental protection. AR networks are designed to specific circuit requirements using one of the standard sizes available or special sizes where required.

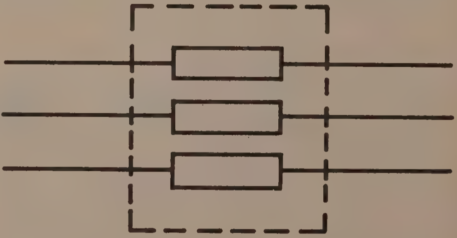
Features include:
- Lower Effective Cost
- High Density Packaging
- Ratio Matching to 0.005%
- Resistors thermally tied together
- Deliveries comparable to discretes
- All-welded construction
- TC Matching to ±1 PPM/°C



AR MATCHED RESISTOR SETS

AR Matched Resistor Sets provide ultra-precision resistor performance at the lowest possible cost. Tolerance matching to 0.005% and TC matching to 1 PPM/°C can be specified.

Any TRW/IRC metal film resistors may be obtained as matched sets. The AR series, MAR and AR40 styles are recommended for the most precise tolerance and TC matching requirements.



TRW® IRC RESISTORS

TaNFilm™ PRECISION FILM RESISTOR NETWORKS

TRW/IRC TaNFilm precision subminiature resistor networks are made of sputtered tantalum nitride, using proprietary equipment and processes.

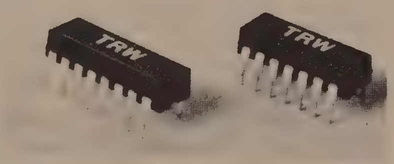
TaNFilm is inherently resistant to electrolytic attack, since each resistor is passivated with an anodized surface layer. The processes used in manufacture allow routine tolerances of 0.1% and make tolerances of 0.05% economically feasible. The continuous sputtering process makes TaNFilm very uniform, so resistors track over the full temperature range to a few parts per million. Many hours of test data allow accurate performance prediction. A variety of networks are available, and others can be fabricated to your packaging requirements. Standard configurations are the DIP sandwich pack shown on page 16, and TO-88 type flat packs.

TYPICAL TaNFilm Design CRITERIA[1]

Resistance Value	50Ω to 100,000Ω	Drift	$\leq$0.25% per year
Tolerance	±0.05% to ±1.0%	Noise	$\leq$−25dB
TCR	−100±25 ppm/°C	Voltage Coefficient	$\leq$5 ppm/V
TCR Tracking	to 5 ppm/°C	Series Inductance	$\leq$5 nH
Settling Time	to 20nSec.	Shunt Capacitance	$\leq$0.1 pF

[1] These are not absolute units. Contact factory for your specific requirements.

RESISTOR NETWORKS DUAL IN-LINE PACKAGE



TRW/IRC TaNFilm* resistor networks utilize a Tantalum Nitride resistor film deposited on a high alumina ceramic substrate. Units are molded in standard TO-116 DIP form-factor with 14 and 16 pin terminations.

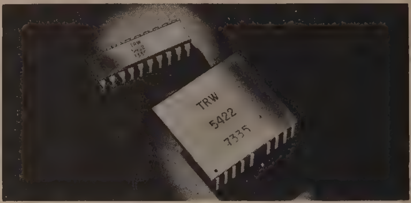
TRW® IRC RESISTORS

TaNFilm© R-2R LADDERS

- 12 BIT RESOLUTION
- FULL MIL PERFORMANCE
- TWO PACKAGE STYLES
- FOUR RESISTANCE VALUES
- 12 BIT OR 10 BIT ACCURACY



DESIGN

These 12 Bit R-2R Ladders feature the inherent passivation, low noise and premium performance of TaNFilm. They provide ±½ LSB accuracy over the full mil temperature range (−55 to +125°C) and retain this accuracy after long operating life in extreme environments. Unlike competitive devices this military grade performance demands no price premium. TaNFilm networks provide hermetic performance without the cost and disadvantages of hermetic sealing, because the tantalum nitride film is anodically passivated.

Resistors are sputtered tantalum nitride on 99.5% Alumina ceramic and are anodically passivated. Interconnections are 99.9% pure gold and the gold plated leads are welded to the interconnection film. Complete absence of silver and solder provides absolute insurance against silver and tin migration. The 5430 series features standard dual in-line packaging with rugged, gold plated, copper alloy, shouldered leads for ease of insertion. The 5420 series has two rows of leads .900" apart and is pin compatible with Beckman 811 series networks. The 5200 series are identical with the 5400 except for accuracy.

CIRCUIT AND APPLICATION

The circuit and pinout diagram is shown on the right. The characteristic "R" value may be 5K, 10K, 20K or 25K. Other values may be provided on special order. Standard switch compensation of 5 ohms is built into the four most significant bits. This also may be changed on special order. Three extra application resistors are provided for bipolar operation, Op Amp feedback or output attenuation. Switch or offset compensation may be provided in these resistors if required.

SPECIFICATIONS:

Ladder Resistance Values (R)	5K, 10K, 20K, 25K
Ladder Resistance Tolerance	±1%
Maximum Input Voltage	20V
Settling Time (to 0.1% of final value)	100n sec.
External Switch Compensation (Note 1)	5Ω
Temperature Range	−55° to 125°C
Ladder Voltage Accuracy	P/N 5200 is ±488 ppm; 5400 is ±122 ppm
Application Resistor Voltage Ratio	P/N 5200 is ±488 ppm; 5400 is ±122 ppm
Lead Material	Gold Plated Copper Alloy

STABILITY

TaNFilm 12 Bit Ladders Exhibit specified Maximum Voltage Ratio Error after the following tests:

Operating Life	1000 Hrs. Full Load 100°C
Short Time Overload	10 Seconds 2.5 x Rated Voltage
Thermal Shock	10 Cycles −65°C to +150°C
Temperature Cycling	10 Cycles −65°C to +150°C
Moisture Cycle - Load/Polar	10 Days 90/98% R.H. Full Load (202-106)
Soldering Heat	10 Seconds @ 260°C
Shock	3000 g's for 0.2 Milliseconds
Vibration	20 g's
Terminal Strength	Per Mil 202-211B

NOTE 1 — CONSULT FACTORY FOR OTHER SWITCH COMPENSATION

TRW® IRC RESISTORS

TaNFilm© 10 BIT BCD ARRAY

- FULL MIL PERFORMANCE
- TWO PACKAGE STYLES
- COMPATIBLE WITH FAIRCHILD μ A722

DESIGN

These BCD Arrays feature the inherent passivation, low noise and premium performance of TaNFilm. They exhibit the specified accuracy over the full Mil temperature range (–55 to +125°C) and retain this accuracy after long operating life in extreme environments. Unlike competitive devices this military grade performance demands no price premium. TaNFilm networks provide hermetic performance without the cost and disadvantages of hermetic sealing, because the tantalum nitride film is anodically passivated.

Resistors are sputtered tantalum nitride on 99.5% Alumina ceramic and are anodically passivated. Interconnections are 99.9% pure gold and the gold plated leads are welded to the interconnection film. Complete absence of silver and solder provides absolute insurance against silver and tin migration. Part No. 1107 features standard dual in-line packaging with rugged, gold plated, copper alloy, shouldered leads for ease of insertion. Part No. 1105 has two rows of leads .900" apart and is compatible with Beckman Model 863 networks.

CIRCUIT AND APPLICATION

The circuit and pinout diagram is shown on the right. The resistance values are as specified in the Fairchild μ A 722 Data Sheet and the layout is compatible with the Fairchild layout. In addition to the 10 basic current controlling resistors, four application resistors are provided for bipolar operation, feedback or output scaling.

TRW® IRC RESISTORS

MV GENERAL PURPOSE HIGH VOLTAGE RESISTORS

MV resistors are designed for high voltage requirements where high resistance and power are needed. TRW/IRC's exclusive composition film type resistance coating is applied in helical form on a ceramic tube to provide a conducting tube of long effective length.

MV resistors are particularly suited for voltmeter multipliers, bleeders, electrostatic filters, X-ray equipment, probes, voltage dividers, TV high voltage circuits, and similar applications.

CR SEMI-PRECISION CARBON ALLOY RESISTORS HIGH TEMPERATURE/HIGH VOLTAGE

CR resistors are economically priced, high-voltage/high-temperature resistors developed for ballast and bleeder applications. This resistor series was originally designed to operate in inert, vacuum, or oil environments. Construction is completely inorganic with no outgassing, and these uncoated carbon alloy resistors will withstand an open flame of 1600°F.

CR resistors are currently being manufactured in three sizes. Other sizes and protective coatings are available upon request.

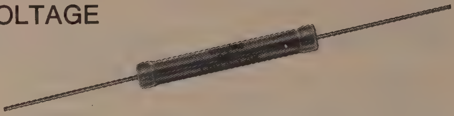
TRW® IRC RESISTORS

CGH PRECISION HIGH RANGE, HIGH VOLTAGE METAL GLAZE RESISTORS



The CGH resistor uses the superior qualities of precision thick film, fired at high temperatures on an extremely stable ceramic substrate. This results in a resistor capable of operating in high ambient temperatures and with excellent high voltage load stability.

CGH resistors are particularly suited for precision high voltage and high impedance applications, such as voltage multipliers, X-ray equipment, and high voltage power supplies where precision tolerances and TCs are required.

*These high resistance values, being above the highest MIL-R-10509 top values, have higher temperature coefficients, but otherwise are designed to meet the requirements of the specification. These high resistance values must be measured carefully under controlled conditions of humidity and temperature, to reduce possible variations due to test conditions and temperature coefficients. Due to higher temperature coefficient, value above approximately two times MIL maximum will be supplied with a standard tolerance of ±2.0%.

TRW/IRC RESISTORS, AN ELECTRONIC COMPONENTS DIVISION OF TRW INC., P.O. BOX 887, BURLINGTON, IOWA 52601 (319) 754-8491

TRW® IRC RESISTORS

BR HIGH POWER DENSITY PRECISION THIN FILM RESISTORS

The BR series precision metal film power resistors offer an excellent power-to-size ratio, high frequency response, and exceptionally stable performance. They have power ratings 50% to 100% greater for a given size than formerly was available in metal films. This increased capability is obtained with no performance degradation.

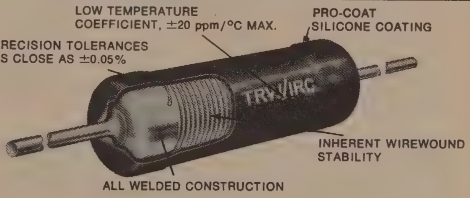
AS MINIATURE PRECISION POWER WIREWOUND RESISTORS



LOW TEMPERATURE COEFFICIENT, ±20 ppm/°C MAX.
PRO-COAT SILICONE COATING
PRECISION TOLERANCES AS CLOSE AS ±0.05%
TRW/IRC
INHERENT WIREWOUND STABILITY
ALL WELDED CONSTRUCTION

Type AS resistors expand circuit design limits significantly by carrying full power even at 125°C ambient. These resistors meet MIL Characteristic V (MIL-R-26) with an allowable 350°C hot spot. They also feature TRW's Pro-Coat silicone coating, offering high heat capability in a tough, smooth, solvent-resistant coating with high dielectric strength. Available in standard or non-inductive windings.

PGR METAL GLAZE GENERAL PURPOSE FLAMEPROOF RESISTORS

PGR resistors are inorganically filled, ceramic insulated resistors for use wherever economical flameproof resistors are required, particularly in resistance values 1K and above.

The two main flameproof characteristics are that the resistors open cleanly under overloads and/or will not support combustion.

TRW/IRC
TYPE FRW
27Ω
30W

Flat power wirewound resistors offer a higher power-to-space ratio than tubular configurations. They are offered in self-stacking and snap-in assembly mounting brackets, and quick disconnect male terminals are available. NOTE: Stack-mounted resistors must be derated to limit the hotspot of the hottest unit to 350°C. For more efficient ventilation, resistors should be mounted with their flat sides (short axis) on a vertical axis.

TRW® IRC RESISTORS

AW COMMERCIAL WIREWOUND RESISTORS

Type AW resistors are available in a wide range of configurations to meet low-cost, high volume applications in the automotive and appliance fields. A range of terminal styles is available, and others can be made to user specifications at a nominal cost. Power ratings are 4.5 watts per inch between mounting centers on the standard AW, and 6 watts per inch between mounting centers on the Hi-Wattage AW resistor.

CONCENTRIC DISCS and STRIPS

Concentric discs and strips are available in power ratings of up to 1 watt per square inch. These resistors are carbon composition film screen on various flat substrates. Available 20Ω-100KΩ/sq. Standard tolerances are ± 20%.

Disc resistors are die stamped from resistance strips. Inner and outer rings of colloidal silver are applied to provide contact with coaxial line fixtures. Special configurations and tolerances to ± 10% are available. Applications are variable speed controls in automotive and appliance products, antenna rotor controls wherever a low cost special configuration pot element is required in quantity.

TRW/IRC RESISTORS, AN ELECTRONIC COMPONENTS DIVISION OF TRW INC., P.O. BOX 393, BOONE, N.C. 28607 (704) 264-8861

TRW/IRC APPLICATION/DESIGN CAPABILITY

It is impossible to describe in this catalog all the product variations available from TRW/IRC Resistors. Selected TC's, special tolerances, fixed rise times . . . the unique configurations variations are limited only by our mutual ability to work together.

Beyond this, TRW also offers an application/design capability second to none in the industry—and ready to meet virtually any resistive need you might have.

This technology embraces both thin and thick metal film, networks, wirewounds, high-voltage and ultra-precision resistors. In thin-film, for example, it includes tolerance and TC matching down to .01% and 5 PPM/°C respectively. In thick-film, it includes design capabilities in subminiature, tubular substrates — for relays, LED's, and connector applications. In wirewound resistors and assemblies, it includes specialized TC's, fusible units, and custom configurations.

Too, TRW technology also takes in high-precision tantalum-nitride networks. Because of the high circuit density possible with tantalum units, this technology offers opportunities for extreme miniaturization.

* * *

The foregoing scarcely touches the highlights of TRW/IRC's application/design capability. But most important, whatever your performance, configuration or environmental problem, we urge that you let us work with you at the **design** stage. It's at this point, we believe, that we can offer the greatest help in application and cost effectiveness.

TRW® IRC RESISTORS

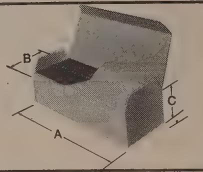
PACKAGING STYLES

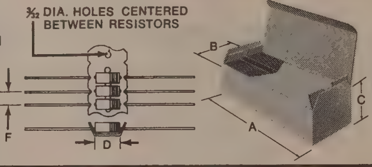
Consult factory for standard package available for the resistor of your choice.

Oriented Bulk: Preferred by manufacturers with their own feeding or taping arrangements. Resistors are axially oriented.



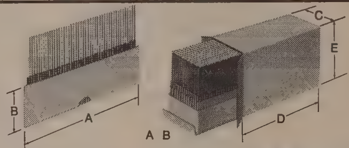
Type	Wattage	Standard Quantity Per Box	A	B	C
GBT-¼	¼	2500	10⁷⁄₁₆″	3¹¹⁄₁₆″	1⁵⁄₁₆″
GBT-½	½	2000	10⁷⁄₁₆″	4⅛″	2⁵⁄₁₆″
GBT-½V	½	2000	10⁷⁄₁₆″	4⅛″	2⁵⁄₁₆″
GBT-1	1	1000	10⁹⁄₁₆″	4¼″	2¹¹⁄₁₆″
BW-20	1	2000	10⁷⁄₁₆″	4⅛″	2⁵⁄₁₆″
BWH	2	1000	10⁹⁄₁₆″	4¼″	2¹¹⁄₁₆″

Grip Strip® A TRW exclusive. Resistors are held without adhesive in strips for ease of handling and counting.



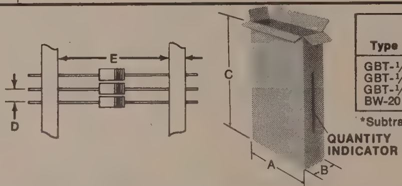
Type	Wattage	Standard Per Box	Quantity Per Strip	A	B		D	F
GBT-½	½	1000	50	10⁷⁄₁₆″	4⅛″	2⁵⁄₁₆″	.182″	⁷⁄₁₆″
GBT-½V	½	1000	50	10⁷⁄₁₆″	4⅛″	2⁵⁄₁₆″	.182″	⁷⁄₁₆″
GBT-1	1	1000	40	12″	4⁵⁄₁₆″	4″	.260″	⁹⁄₁₆″
BW-20	1	1000	50	10⁷⁄₁₆″	4⅛″	2⁵⁄₁₆″	.182″	⁷⁄₁₆″
BWH	2	1000	40	12″	4⁵⁄₁₆″	4″	.260″	⁹⁄₁₆″

Corrugated Card Pack: Resistors are inserted into the flutes of corrugated cards.



Type	Wattage	Standard Quantity Per Box	Quantity Per Strip	A	B	C	D	E
GBT-¼	¼	1000	50	6⅜″	1½″	2¹³⁄₁₆″	6⅞″	3½″
GBT-½	½	1000	50	8⅛″	1½″	3¹¹⁄₁₆″	8⅝″	3⅝″
BW-20	1	1000	50	8½″	1½″	3¹¹⁄₁₆″	8⅝″	3⅝″

Ammo-Pak®: 10,000 resistor package is a continous lead tape belt. Each lead of the resistor is held between two sets of pressure sensitive tape.



Type	Wattage	Standard Quantity Per Box	A*	B*	C**	D ±.015″	E ±¹⁄₁₆″	F

*Other spacing available.

Cut and formed leads

TRW/IRC offers the widest selection of pre-cut and formed units in the industry.

Purchasing of pre-cut units offers the user very significant savings in labor and assembly, as well as savings in valuable plant space, since units take only half the space of other packaging styles.

Drawings shown are for carbon composition types. These packaging styles are available for many wirewound and film resistors with some dimensional variations. Consult your sales representative or the factory for specifications, availability and costs.

FULL SCALE ACCURACY TO **0.001%**

RISE TIME
LESS THAN **10** NANOSECONDS

SETTLING TIME
LESS THAN **50** NANOSECONDS

TEMPCO
LESS THAN **1** PPM/°C
FOR ALL VALUES (0°C TO 60°C)

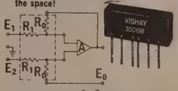
TRACKING TO **1/2** PPM/°C

STABILITY **25** PPM OVER 3 YRS.

BCD TO 4 DIGITS

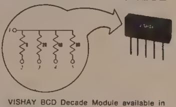
UNITIZED RESISTOR CIRCUITS SAVE *ALL* THESE OPERATIONS:

- Multi-component receiving inspection
- Sorting for TCR or ratio match
- Pre-packaging or binning
- Multi-insertions. With only ONE INSERTION you can assemble up to 4 resistors on a PC board, and in ⅛ the space!

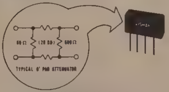


Typical op-amp feedback resistors showing how one VISHAY pre-packaged 4 resistor assembly can be used to replace precision wirewounds.

VISHAY pre-packaged 2 resistor voltage divider. Other configurations available with up to 4 discreet resistors



VISHAY BCD Decade Module available in any coding system: 1-2-2-4, 1-2-4-8, etc., up to 100K per resistor



ATTENUATOR MODULES

Virtually noiseless with no cross coupling Available in "L", "U", "Pi", "O", "T", Balanced "U", and bridged "T" configurations, with stability of 25ppm/yr., T.C.R. of ±1ppm/°C, and 10 nanoseconds rise time.

HIGH ACCURACY RATIO MATCH

- Each Resistor: 100Ω to 75K
- Absolute Tol. each R: To .005%,
- Absolute TCR each R: ±5ppm/°C (−55°C to +125°C)
- Tol. Match: To .005%
- TCR Match: Within 3ppm/°C (−55°C to +125°C)

VICTOREEN MINI-MOX RESISTORS

*"A" SERIES FOR SUPERIOR RELIABILITY

- **VOLTAGE RATING TO 5 kV**
- **POWER RATING TO 1 WATT**
- **±100 ppm TCR**
- **FULL LOAD STABILITY ±2% FOR 1000 HOURS AT 70°C**
- **RESISTANCE VALUES TO 10,000 MEGOHMS**

For design of high-voltage, highly-stable miniaturized electronic networks and equipment, the new MINI-MOX resistors have all the ingredients you need for ultra-critical applications. For instance, MINI-MOX resistors are a fraction the size of conventional types . . . 100 ppm TCR or less to 600 megohm; stability better than ±2% for 1000 hours at full load. In addition, typical quantech noise at 20 megohms is less than 1.5 microvolt/volt. All these characteristics combine to provide extremely-rugged and highly-stable resistor configurations that are virtually immune to environmental extremes. MINI-MOX resistors — where power and voltage to size ratios are critical.

RESISTANCE RANGE

See Table I.

VOLTAGE COEFFICIENT

Voltage coefficient depends on a number of resistor parameters, the most influential of which is resistor value. In general, the higher the resistance value, the higher the voltage coefficient. Victoreen tries to maintain a maximum voltage coefficient of 5 ppm/volt over the complete voltage range of the resistor.

STABILITY

Full load drift (rated wattage at 70°C) is less than 2% in 1000 hours. Shelf life or dry circuit drift is less than 0.1% per year.

TEMPERATURE COEFFICIENT

In accordance with Table II, the temperature range for calculating temperature coefficients is −55°C to +125°C.

VOLTAGE RANGE

Below critical resistance values, the voltage is limited by the wattage rating of the resistor. Application of the power formula $E^2 = WR$ will indicate the permissible maximum voltage. (Refer to Table I for additional data.)

WATTAGE RATING

Wattage ratings calculated on the basis of 70°C ambient temperature. MOX Series A resistors are derated to zero watts at 180°C.

RESISTOR CONSTRUCTION

Metal oxide glaze on a solid alumina core. A gold termination is used which accommodates a close fitting pressed on welded cap and lead assembly. Leads are tinned dumet. Other type leads including tinned copper and gold plated can be supplied. Resistors are marked with Type, Resistance Value and Tolerance. Customer marking available as an option.

COATING

Epoxy Resin

- Resists most industrial solvents.
- Excellent moisture resistance.
- High dielectric and low outgassing.
- Maximum hot spot temperature of 180°C.

***A high power MINI-MOX Resistor is available but its use is recommended only where the additional power dissipation is clearly indicated. Consult the factory for details.**

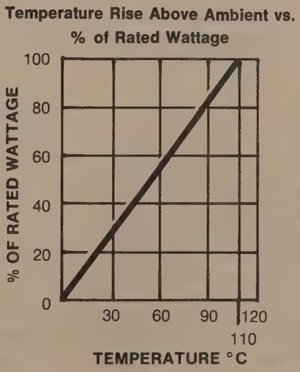
Temperature Derating Curves



Temperature Rise Above Ambient vs. % of Rated Wattage

These resistors are capable of dissipating higher wattages than rated if ambient temperatures are lower than 70°C or if forced air or oil cooling is employed. This additional capability can be determined in accordance with the temperature rise and the derating curves.

VICTOREEN

VICTOREEN MAXI-MOX RESISTORS

*"A" SERIES FOR SUPERIOR RELIABILITY

SUPERIOR RELIABILITY

- WIDE RESISTANCE RANGE — 10 K OHMS TO 5000 MEGOHMS
- FULL LOAD STABILITY BETTER THAN ±1% FOR 2000 HOURS AT 70°C
- EXCELLENT HIGH VOLTAGE, HIGH TEMPERATURE AND HIGH FREQUENCY OPERATION
- FULL PROTECTION AGAINST ROUGH HANDLING AND ENVIRONMENTAL EXTREMES
- TOLERANCE TO 1%
- POWER RATINGS TO 7.5 WATTS

MAXI-MOX resistors are available in a range of resistance values, voltage and power ratings which will handle most high voltage applications. From 7.5 kV to 37.5 kV, their high voltage parameters are unexcelled.

VOLTAGE RANGE

Below critical resistance values, the voltage is limited by the wattage rating of the resistor. Application of the power formula $E^2 = WR$, will indicate the permissible maximum voltage. (Refer to Table I for additional data.)

STABILITY

Full load drift (rated wattage at 70°C) is less than 1% in 2000 hours. Shelf or dry circuit drift is less than .1% per year.

RESISTOR CONSTRUCTION

Metal oxide glaze fired on an alumina core at temperatures in excess of 800°C. A gold termination is fired on over the glaze which accommodates a close fitting, pressed on welded cap and lead assembly. Standard lead material is tinned copper, other material including tinned dumet and gold plating can be supplied. An alternate end cap containing a 6-32 threaded hole can also be supplied, in this case the ends of the caps are not coated with protective material. Resistors are marked with Type, Resistance Value and Tolerance. Customer marking available as an option.

VOLTAGE COEFFICIENT

Voltage coefficient depends on a number of resistor parameters, the most influential of which is resistor value. In general, the higher the resistance value, the higher the voltage coefficient. Victoreen tries to maintain a maximum voltage coefficient of 5 ppm/volt over the complete voltage range of the resistor.

WATTAGE RATING

Wattage ratings calculated on the basis of 70°C ambient temperature. MOX Series A resistors are derated to zero watts at 180°C.

TEMPERATURE COEFFICIENT

In accordance with Table II, the temperature range for calculating temperature coefficients is −55°C to +125°C.

COATING

Epoxy Resin

- Resists most industrial solvents.
- Excellent moisture resistance.
- High dielectric and low outgassing.
- Maximum hot spot temperature of 180°C.

***A high power MAXI-MOX Resistor is available but its use is recommended only where the additional power dissipation is clearly indicated. Consult the factory for details.**

- FULL LOAD STABILITY — TYPICALLY BETTER THAN ±0.5% FOR 1000 HOURS AT 70°C
- EXCELLENT HIGH VOLTAGE, HIGH TEMPERATURE AND HIGH FREQUENCY OPERATION

Victoreen Metal Oxide Glaze Resistors are the culmination of years of experience in the manufacture of resistors for many special applications requiring precision and reliability. The MOX resistive element is composed of highly stable metal oxides in a special glass matrix fired on high alumina substrates at temperatures in excess of 800°C. The end product is a highly stable resistor that gives improved parameters in all important areas including stability, temperature coefficients, voltage coefficients and power handling capability.

For design of high voltage, highly stable miniaturized electronic networks and equipment, the new SLIM-MOX resistors have all the ingredients you need for ultra-critical applications. For instance, SLIM-MOX resistors are a fraction the size of conventional types; 250 ppm TCR or less to 5000 megohms, stability better than ±1.5% for 1000 hours at full load, low voltage coefficient less than 5 ppm/volt. All these characteristics combine to provide extremely rugged and highly stable resistor configurations that are virtually immune to environmental extremes.

RESISTANCE RANGE

See Table I.

VOLTAGE COEFFICIENT

Voltage coefficient depends on a number of resistor parameters, the most influential of which is resistor value. In general, the higher the resistance value the higher the voltage coefficient. Victoreen tries to maintain a maximum voltage coefficient of 5 ppm/volt over the complete voltage range of the resistor.

STABILITY

Full load drift (rated wattage at 70°C) is typically 0.5% and conservatively stated as less than ±1.5% in 1000 hours. Shelf life or dry circuit drift is less than 0.1% per year.

VOLTAGE RANGE

In accordance with Table I, except below critical resistance values, the voltage is limited by the wattage rating of the resistor. Application of the power formula $E^2 = WR$, will indicate the permissible maximum voltage.

TEMPERATURE COEFFICIENT

In accordance with Table II. The temperature range for calculating temperature coefficients is −55°C to +125°C.

WATTAGE RATING

Wattage ratings are calculated on the basis of 70°C ambient temperature and derated to zero watts at 150°C. See temperature rise and derating curves. See Table I for ratings.

VICTOREEN

VICTOREEN INSTRUMENT DIV.

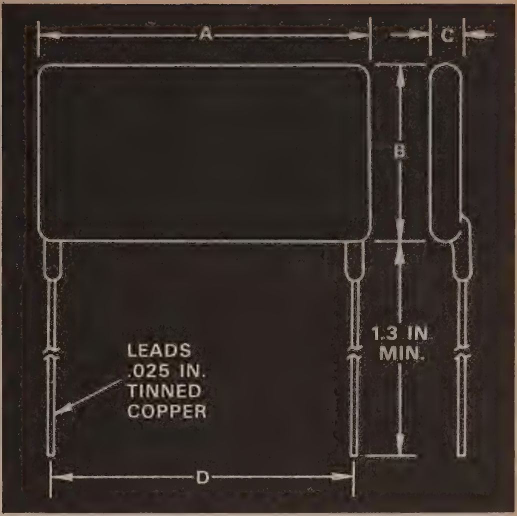
SG SHELLER-GLOBE CORPORATION



RESISTOR CONSTRUCTION

Metal oxide glaze on a solid alumina substrate. Leads are tinned copper.

COATING

Excellent environmental protection is afforded. SLIM-MOX resistors, through the use of a conformal epoxy coating, are moisture resistant and resist most industrial solvents. This coating has excellent high temperature properties allowing a maximum hot spot temperature of 150°C. It is compatible with most commonly used potting compounds, offers high dielectric and low outgassing properties.

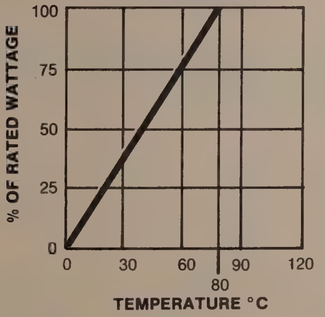
SPECIFICATIONS

Table I — Resistor Specifications

Model	Resistance Range	Critical Resistance	Power Rating @ 70°C	Maximum* Operating Volts	Available Tolerance	Maximum Surface Temp.	Dimensions (Inches)			
							A	B	C	D
SLIM-MOX 204	1M-5000M	50M	2W	10,000V	15%	150°C	1.03 ±.050	.54 ±.050	.095 ±.050	.835 ±.025

*Applicable above critical resistance.

Temperature Rise Above Ambient vs. % of Rated Wattage



Temperature Derating Curve

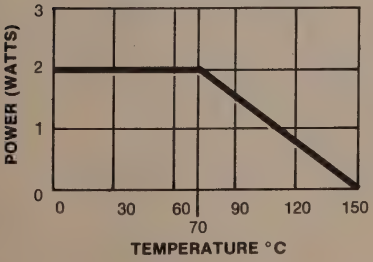


Table II — Temperature Coefficient

Standard Temperature Coefficient	SLIM-MOX 204
±250 ppm	1M to 5000M

The following resistance values are available from stock as "standard" values. Other values can be supplied where quantities warrant special set-up.

Table III — Resistance Values

Standard Resistance Values (Megohms)			
1	10	100	1000
2	20	200	2000
5	50	500	5000

These resistors are capable of dissipating higher wattages than rated if ambient temperatures are lower than 70°C or if forced air or oil cooling is employed. This additional capability can be determined in accordance with the temperature rise and the derating curves.

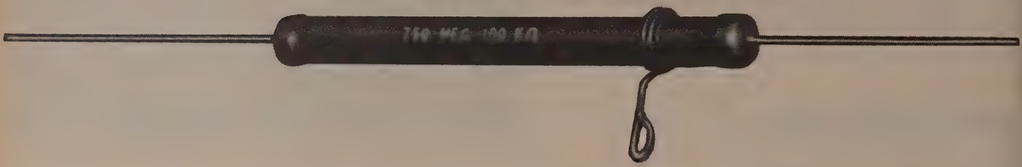
VICTOREEN

HIGH VOLTAGE DIVIDERS

VICTOREEN DIVIDER-MOX RESISTORS

RD SERIES HIGH VOLTAGE DIVIDERS

- INPUT VOLTAGES TO 30 kV
- RATIOS OF 10,000 TO 1
- OUTPUT VOLTAGE STABILITY OF ±0.1%
- TEMPERATURE RANGE, −55°C TO +125°C



Victoreen DIVIDER-MOX represents an advanced concept in the area of high voltage resistive divider networks. Through the use of a unique manufacturing process, Victoreen is able to produce a divider network utilizing the basic information available to the design engineer. The effects of T-C matching, V-C, self generated heat and other hard to define and control variables are minimized. The following basic information will enable us to supply a divider tailored to your application.

A) Total resistance value of the divider
B) Input Voltage
C) Output voltage and tolerance
D) Output voltage stability over operating temperature extremes (expressed in percent allowable change)

The limits of each of the above parameters are listed below.

RESISTANCE RANGE

See Table I. In order to enhance output voltage stability the total resistance of the divider should be as high as possible in order to minimize self-heating.

VOLTAGE RANGE

Below critical resistance values, the voltage is limited by the wattage rating of the resistor. Application of the power formula $E^2=WR$ will indicate the permissible maximum voltage. (Refer to Table I for additional data.)

WATTAGE RATING

Wattage ratings are calculated on the basis of 70°C ambient temperature. DIVIDER-MOX resistors are derated to zero watts at 180°C.

INPUT/OUTPUT VOLTAGE RATIOS

As indicated in Table I, any ratio between the maximum and minimum specified is available, except for those maximum ratios that exceed our manufacturing limitations.

INPUT VOLTAGE

Maximum in accordance with Table I. Minimum consistent with Input/output voltage ratios.

OUTPUT VOLTAGE

Determined only by input voltage limitations and Input/Output voltage ratios. The best available tolerance is 1%.

OUTPUT VOLTAGE STABILITY

This is the parameter which really defines the precision of a divider and is expressed in terms of percent allowable change over the operating temperature range. Stability is dependent on a number of factors including power dissipation and operating temperature range. While Victoreen DIVIDER-MOX resistors are capable of operating over the full range of characteristics indicated, if power dissipation is limited to 10% of the maximum values indicated, (not an unreasonable figure since most dividers are high resistance devices) stabilities of .1% are obtainable. Operation at higher wattage levels will effect initial (turn-on) stability and additional time must be allowed for the divider to reach temperature equilibrium.

OPERATING TEMPERATURE RANGE

The normal maximum operating temperature extremes used to calculate output voltage stability are −55°C to +125°C. Generally speaking, narrower extremes means better stability, wider extremes, of course, sacrifice stability.

DIVIDER CONSTRUCTION

A single high alumina core is utilized with a metal oxide resistive element. The end terminations are gold and accommodate close fitting, pressed on welded cap and lead assembles. The third terminal is mechanically fastened to a gold termination and the whole assembly is epoxy coated with the same high quality material used on other MOX resistors. Threaded end caps available on MAXI-MOX are available on DIVIDER-MOX as well. Resistors are marked with Type, Resistance Value and Tolerance. Customer marking available as an option.

COATING EPOXY RESIN

- Resists most industrial solvents
- Excellent moisture resistance
- High dielectric and low outgassing
- Maximum hot spot temperature of 180°C

VICTOREEN DIVIDER-MOX RESISTORS

SELECTING THE PROPER VICTOREEN DIVIDER

1. Select the proper divider based on input voltage limitations
2. Determine that the input/output voltage ratio falls within the specified limits.
3. Choose the highest possible divider resistance value commensurate with circuit parameters, the wattage limitations of the divider, and within the specified resistance range.
4. Divide the resistance value selected by the input-output voltage ratio to obtain the tap resistance value. If this is greater than the minimum tap resistance for the divider selected, the divider can be fabricated. If the tap resistance value is less than the minimum, the divider resistance value must be increased or other parameters adjusted.

Example:

1. MOX-2RD; 7.5kV.
   Input voltage cannot exceed 7.5 kV (maximum operating volts).
2. Output Required; 7.5V.

   $$\frac{7.500\text{V}}{7.5\text{V}} = \text{I/O ratio } 1000{:}1.$$

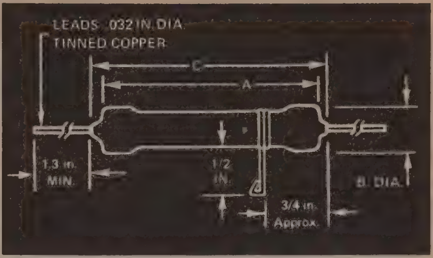
   (Ratio limits from 500-5000 maximum permissible).
3. Total Divider resistance selected. Resistance selected 100MΩ (resistance range 5 Megs to 500 Megs).

   Wattage Limitation; 1.5W.

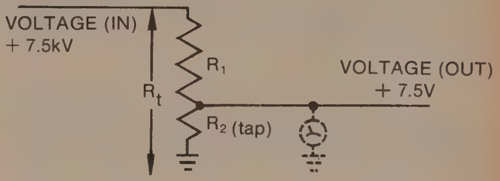
   High Stability Wattage; .15W or less.

   $$W = \frac{E^2}{R} = \frac{(7.5 \text{ x } 10^3)^2 \text{ volts}}{1 \text{ x } 10^8 \text{ ohms}} = 56.25 \text{ x } 10^{-2} = .5625$$

   Wattage does not fall within high stability power rating. However, it does not exceed maximum power rating of 1.5 watts.



4. To select the proper tap resistance, the following formula applies. (Figure 1).



$$R2 = \frac{V(\text{Out})}{V(\text{In})} \text{ x } R_t = \frac{7.5\text{V}}{7500\text{V}} \text{ x } 100 \text{ Megs}$$

$$= \frac{1}{1000} \text{ x } 100 \text{ Megs } R2 = {}^*100\text{k}\Omega$$

*This value must be greater than stated minimum tap resistances of:

MOX-2RD — 10kΩ MOX-4RD — 20kΩ
MOX-3RD — 15kΩ MOX-5RD — 25kΩ

5. Measurement.
   When testing MOX-RD Dividers with low impedance meters please note:

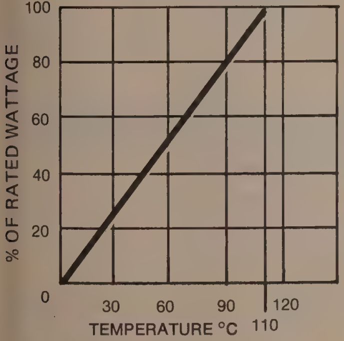
   $$V\text{ (Out)} = V(\text{In}) \text{ x } \frac{R2 \text{ (parallel with R meter)}}{R1 + R2 \text{ (parallel with R meter)}}$$

Table I — Resistor Specifications

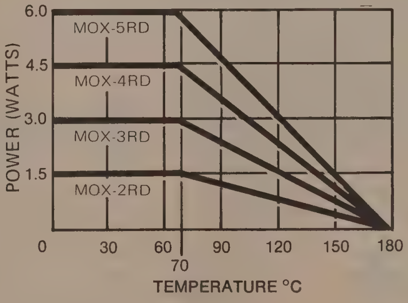
Model	[1]Resistance Range	[2]Power Rating @ 70°C	High Stability Power Rating[3]	[4]Max. Oper. Volts	Input/Output Voltage Ratio		Critical Resistance	Minimum Tap Resistance	Maximum Dimensions Inches		
					Min.	Max.			A	B	C
MOX-2RD	5 - 500 Megs	1.5W	0.15W	7.5 kV	500	5,000	37.5 Megs	10K ohms	2.140	.345	2.20
MOX-3RD	4.5-1000 Megs	3.0W	0.30W	15 kV	300	10,000	75 Megs	15K ohms	3.140	.345	3.20
MOX-4RD	6 -1500 Megs	4.5W	0.45W	22.5 kV	300	10,000	112.5 Megs	20K ohms	4.140	.345	4.20
MOX-5RD	7.5-2000 Megs	6.0W	0.60W	30 kV	300	10,000	150 Megs	25K ohms	5.140	.345	5.20

[1] Minimum total divider resistance dependent on maximum input/output voltage ratio.
[2] Derated to 0 watts @ 180°C.
[3] Recommended maximum power dissipation for highest stability.
[4] Applicable above critical resistance.

Temperature Rise Above Ambient vs. % of Rated Wattage



Temperature Derating Curve



These resistors are capable of dissipating higher wattages than rated if ambient temperatures are lower than 70°C or if forced air or oil cooling is employed. This additional capability can be determined in accordance with the temperature rise and the derating curves.

PRECISION GLASS ENCAPSULATED RESISTORS

Type RX-1 Hi-Meg Resistors

VICTOREEN HI-MEG RESISTORS

Were originally designed for use in electrometer circuits where a high order of performance is required. HI-MEG resistors achieve a high degree of accuracy and stability, and operate at this high level for a long period of time. The HI-MEGS are manufactured in accordance with MIL-R-14293A, characteristic T, and therefore are measured at 20 volts ±1 volt. Reference to the average voltage coefficient curve below will indicate that deviations from the marked resistance value may be encountered when used at higher voltages. By special order, Victoreen can supply resistors with resistance measurements at specified voltages.

ELEMENT

The resistor element is a carbon coated glass rod, the ends of which are banded with silver to obtain the best electrical contact. Wire leads extend from the ends of the element.

NOISE

The noise level is negligible for most uses.

GLASS SEAL

HI-MEGS are vacuum sealed in a glass envelope which is treated with a special silicone varnish which keeps the resistor relatively free from the effects of moisture. Care should be exercised however, to avoid contamination in handling, such as fingerprints, which might result in reduced effective resistance.

POWER RATING

The power rating for any HI-MEG resistor is equal to one divided by the resistance in megohms.

RESISTANCE

HI-MEG resistors are available in values from 10^7 to 10^{14} ohms.

TOLERANCE

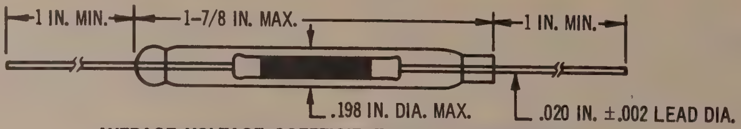
HI-MEG resistors can be supplied in the following tolerances; 1% below 10^{12} ohms, 2% and 5% below 10^{13} ohms, and 10% over the entire range. Refer to the price list for standard tolerance availability.

MAXIMUM WORKING VOLTAGE

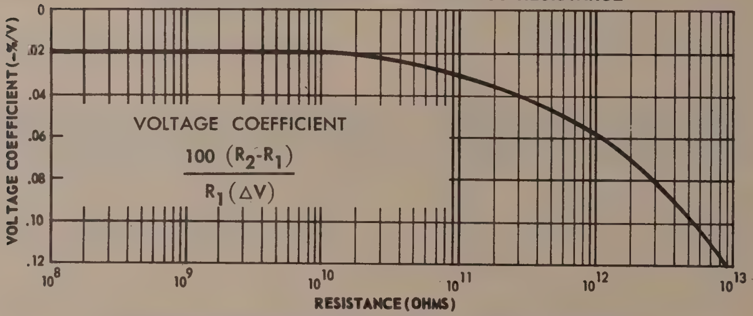
1000 volts.

MAXIMUM OPERATING AMBIENT TEMPERATURE

100°C.

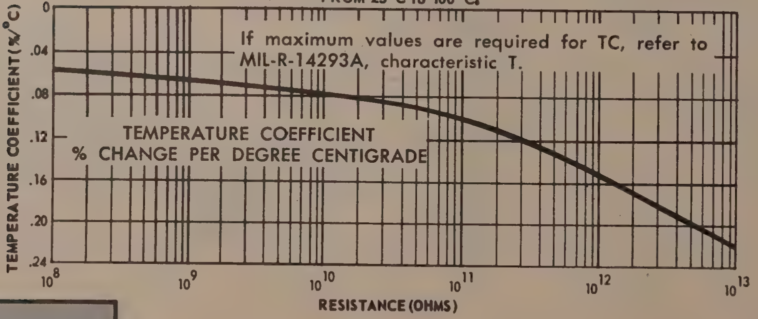


AVERAGE VOLTAGE COEFFICIENT VERSUS RESISTANCE



AVERAGE TEMPERATURE COEFFICIENT VERSUS RESISTANCE

FROM 25°C to 100°C.



If maximum values are required for TC, refer to MIL-R-14293A, characteristic T.

VICTOREEN RESISTORS

CARBON FILM • GLASS ENCAPSULATED • CONFORMAL COATED

GLASS ENCAPSULATED • HIGH VOLTAGE • HIGH WATTAGE

Types RX-2, RX-3, RX-3HV, RX-4, RX-5 and RX-8

RESISTANCE ELEMENT: Ceramic rod, selected for high quality of composition and surface texture, has pure crystaline carbon deposited on its surface through pyrolysis of hydrocarbon vapor. No filler or binder is used with the carbon.

TERMINALS: Contact terminals are silver plated brass caps securely gripping the ends of the element which are also silvered to obtain the best electrical conductivity.

GLASS SEALS: All resistors are glass-sealed. The deposited carbon resistors are encased in glass envelopes from which the air has been exhausted and a dry, inert gas substituted.

MARKING: All resistors are plainly marked with the type designation, the resistance value and the tolerance.

TOLERANCE: Resistors are made to specified values within the limits shown in the data table. Limited quantities of resistors of any value can be furnished from stock for immediate delivery.

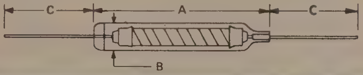
TEMPERATURE COEFFICIENT: ±500 ppm maximum over temperature range −55° to +125°C. TCR is effected by resistance value and resistor type.

VOLTAGE COEFFICIENT: The coefficient is −.0002 for all types and values of resistors listed in the table below.

POWER RATING: The power rating of these resistors should be determined from the "TEMPERATURE DE-RATING CURVES" and/or the "POWER VERSUS RESISTANCE VALUE" curves for the particular application.

CRITICAL RESISTANCE: Resistor performance may be adversely affected by (1) overheating due to overwattage or (2) the application of excessive voltage. Since $W = E^2/R$, the term "critical resistance" applies to that value of resistance at which both maximum voltage and maximum wattage may be applied. Below this value, the voltage must be limited to that voltage which will produce the maximum rated wattage; above this value, the wattage must be restricted to that wattage which will be produced by the application of maximum rated voltage.

HIGH VOLTAGE SHIELDING: The RX-3HV is designed to meet the difficult requirements encountered when the resistor operates at more than 10 kv above ground. Examples of this would be a resistor used as a series filter in a high voltage power supply or as bleeder strings across such supplies.



Type	Watts Max.	Resistance Min.	Resistance Critical	Resistance Max.	Max. Working Voltage	Tolerance %	Max. Temp. °C	Dimensions (Inches) A Max.	B Max.	C Min.	Lead Diam.

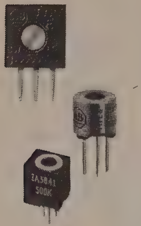
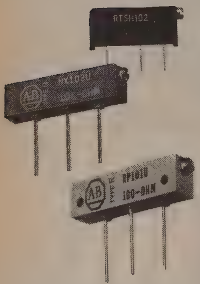
Allen-Bradley Trimming Potentiometers



TYPE E:
Cermet, single turn, 0.5W at 70°C, 10 ohms to 2 megs, ±10%, pin terminals, linear taper.

TYPE S:
Cermet, single turn, 0.5W at 85°C, 50 ohms to 1 meg, ±10%, pin terminals, linear taper.

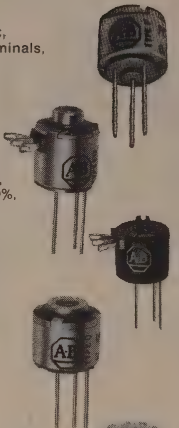
TYPE Z:
Cermet, single turn, 0.5W at 70°C, 50 ohms to 1 meg, ±10% and ±20%, pin terminals, linear taper.



TYPE RT:
Cermet, 20 turns, 0.75W at 70°C, 10 ohms to 2.0 megs, ±10%, pin terminals, linear taper, .250″ or .340″ high types.

TYPE N:
Hot-molded composition, 25 turns, 0.33W at 50°C, 100 ohms to 2.5 megs, ±10% and ±20%, pin terminals, linear taper.

TYPE R:
Hot-molded composition, 25 turns, 0.25W at 70°C, 100 ohms to 2.5 megs, ±10% and ±20%, pin or solder lug terminals, linear taper.



TYPE F:
Hot-molded composition, single turn, 0.25W at 70°C, 100 ohms to 5 megs, ±10% and ±20%, pin or solder lug terminals, 5 standard tapers.

TYPE FD:
Dual version of Type F; front section: solder lug only, rear: pin or lug. Well suited for Bridged-T or L-pad attenuator applications.

TYPE BT:
An all plastic version of the Type FD for excellent performance at high frequencies. Two types available for top or side adjustments. Also well suited for Bridged-T or L-pad attenuator applications.

TYPE O:
Hot-molded composition, single turn, 0.4W at 70°C, 100 ohms to 5 megs, ±10% and ±20%, pin or solder lug terminals, 5 standard tapers.

TYPE Y:
Hot-molded composition, single turn, 0.25W at 50°C, 100 ohms to 5 megs, ±10% and ±20%, pin terminals, 5 standard tapers.

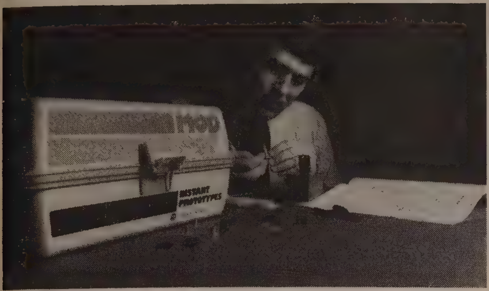
Allen-Bradley Variable Resistors



MOD POT Instant Prototypes (MPIP) puts a wide range of MOD POT components at your fingertips. MPIP available from your A-B distributor. Then get your production quantities of MOD POT fast from A-B distributors, assembled to exacting factory standards.

SERIES 70 MOD POT®: Unique modular design offers virtually unlimited configurations: single, double, triple or quadruple. Options include: PC or solder lug terminals, variety of switches, vernier drive, concentric shafts, composition or cermet resistance elements. 50 ohms to 10 megs, ±10% and ±20% (composition); 100 ohms to 1 meg, ±10% (cermet). 1.0W at 70°C (composition); 2.0W at 70°C (cermet).

SERIES 72 MOD POT®: Similar to Series 70 except the case, bushing and shaft are non-metallic for electrical isolation. Available in single or dual combinations only. Power rating is 0.5W at 70°C.

SERIES 73 MOD POT®: Another version of Series 70 for applications that require single or dual section controls.

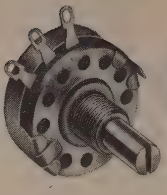
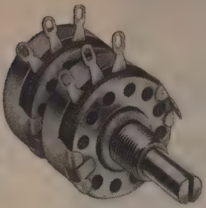
SP	5216		50 Ohms to 1 Megohm ±10% (5% available)	1.0 Watt @ 70°C	300V	−65°C to +150°C		0.438 *(11,11)* Deep by 0.375 *(9,52)* Diameter	

TYPE J (RV4):
Standard of the industry for for quality. Hot-molded composition, 50 ohm to 5 megs, ±10% and ±20% (special values to 1000 megs available), 2.25W at 70°C, single, dual, triple sections available, variety of switch types for single or dual sections.

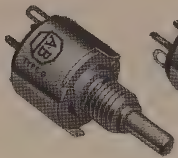


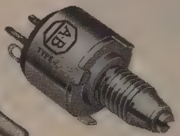


TYPE EJ:
Extra long life version of the Type J with rotational life exceeding one million rotations, single or dual configurations.

TYPE K:
A 3.0W (at 70°C) version of the popular Type J. −55°C to +150°C.

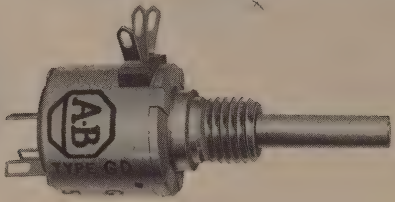
TYPE G (RV6):
Hot-molded composition, 100 ohms to 5 megs, ±10% and ±20%, 0.5W at 70°C, single section available with or without SPST switch.



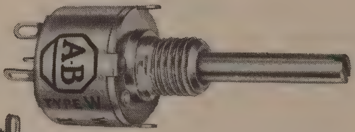


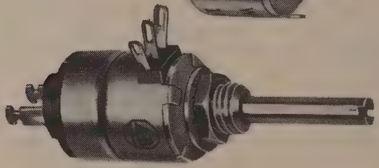
TYPE L:
Hot-molded composition, 100 ohms to 5 megs, ±10% and ±20%, 0.8W at 70°C, single section.

TYPE GD:
Dual section version of Type G. The smallest dual available.



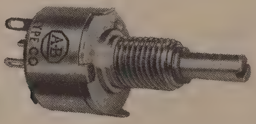
TYPE W:
Hot-molded composition, 100 ohms to 5 megs, ±10% and ±20%, 0.5W at 70°C, single section.

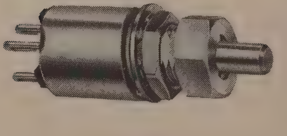




TYPE WR:
Radial-lead version of Type W. Available with switch with contacts that close at start of clockwise rotation (TYPE WRS) or with switch with contacts that close at start of counter-clockwise rotation (TYPE WRH).

TYPE CQ:
Cermet, 100 ohms to 5 megs, ±10%, 0.5W at 125°C, single section.



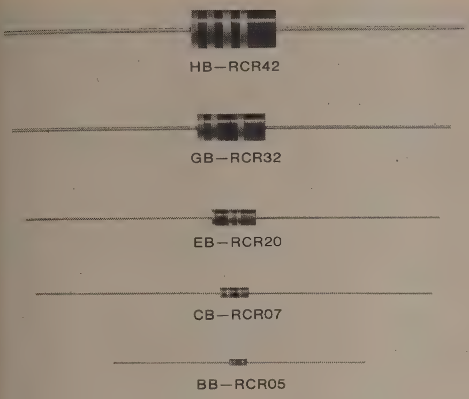


TYPE SP:
Cermet, 50 ohms to 1 meg, ±10%, 1.0W at 70°C, single section. Only ⅜″ diameter.

Standard options for all types include a variety of shafts, bushings, shaft endings, shaft lengths, and hardware.

Types FD, GD, J and the multi-section MOD POT with composition tracks are well suited for attenuator applications.

Allen-Bradley Hot-Molded Fixed Resistors



Allen-Bradley hot-molded composition resistors are high-quality units intended for general purpose use in the electronics industry.

Allen-Bradley Style RCR resistors not only meet all requirements of MIL-R-39008 but also exceed the S level (best level) of Established Reliability of 0.001% failure rate per 1000 hours. And only Allen-Bradley resistors are available in S level reliability in all five wattage sizes over the entire resistance range. The S reliability level is indicated by a yellow 5th color band on the resistor body.

Metal-clad hot-molded resistors (Types GM and HM) are fitted with metal clamps which surround the major portion of the resistor. The metal clamps provide rigid mounting and efficient heat transfer from the resistors to the metal chassis or panels on which they are mounted.

For more information request Publication EC21.

Allen-Bradley Cermet Film Fixed Resistors

This one resistor can shrink your inventory costs

Capless design provides a reliable termination that does away with problems associated with end cap construction.

Leads are designed for both soldering and welding to give you freedom of choice about attachment, and long term storage capability.

Cores are high purity alumina with outstanding physical and thermal properties to reduce the incidence of fractures.

Coating is specially formulated to maintain outstanding insulation properties throughout environmental exposures.

Markings are clear, crisp and precise; dual resistance marking for easy identification, and durable to withstand production handling.

For more information request Publication EC33.

Order part #314A102.

STANDARD • PARALLEL • TERMINATION • NETWORKS

APPLICATIONS:

Series 314E and 316E networks are used in digital IC logic circuits and are especially suited for ECL and TTL applications. For ECL applications the network's circuit configuration serves a dual purpose. The R2 resistors are pull-down resistors and are normally tied to the most negative supply voltage. The R1 resistors, in parallel with the R2 resistors, provide the characteristic impedance for proper transmission line matching. In TTL logic the networks are used in pulse squaring applications.

STANDARD • SENSE AMP • INTERFACE • NETWORKS

APPLICATIONS:

- Designed for use with 7520 series core memory sense amplifiers.
- Series 314M110 combines a threshold setting divider with balanced sense line termination and far end termination of two sense lines.
- Series 314M120 and 314M125 combine threshold setting dividers with four sense line termination. Following resistor values provide different threshold setting:

STANDARD "O" PAD (BALANCED π) ATTENUATORS

APPLICATIONS:
These networks are used primarily in the communications industry where a fixed voltage attenuation is required with impedance matching. Voltage attenuation in steps of 0.5 dB from 0.5 dB to 31.5 dB can be obtained from the Series 314Z networks by the use of one "O" pad, or by placing two or more in series. For example, 20 dB is obtained by placing the 4 dB and 16 dB sections in series.

FN226

APPLICATIONS:

- A/D and D/A conversion.
- FN111*—10 bit binary operation.
- FN112*—3 place BCD operation (0 to 399).
- FN215—12 bit conversion—designed for use with Fairchild μA9650 IC.
- FN226**
- FN227**

*Both designed for use with Fairchild μA722 IC.

**Both designed for use with Intersil ICL 8018, 8019, 8020 IC's. FN226 gives 8 bit conversion. FN226 plus FN227 gives 12 bit conversion.

VOLTAGE DIVIDER NETWORK FN207

Resistance Tolerance on Total Resistance (R_T) at +25°C:
$R_T = R_1 + R_2 + R_3 + R_4 + R_5$ = 10 Megohms ±0.05%.

Ratio Tolerance at +25°C and from 0 to 1000 volts:

$$\frac{R_1 + R_2 + R_3 + R_4}{R_T} = \frac{1 \text{ Megohm}}{10 \text{ Megohms}} = 0.1 \pm 0.03\%$$

$$\frac{R_1 + R_2 + R_3}{R_T} = \frac{100 \text{ K ohms}}{10 \text{ Megohms}} = 0.01 \pm 0.03\%$$

$$\frac{R_1 + R_2}{R_T} = \frac{10 \text{ K ohms}}{10 \text{ Megohms}} = 0.001 \pm 0.03\%$$

$$\frac{R_1}{R_T} = \frac{1 \text{ K ohm}}{10 \text{ Megohms}} = 0.0001 \pm 0.03\%$$

Temperature Coefficient of Resistance . . . . ±25 ppm/°C

Speed Production and Reduce Labor Costs —

Once you've set one Vista-Trim trimmer to a given value, the same (approximate) value can be set on others by visual measurement.

Saves Valuable Time —

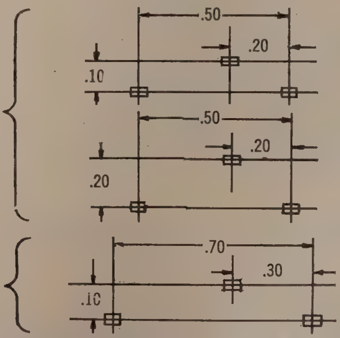
Both the element and contact carrier are visible through the semi-transparent top. Approximate final settings can be made with or without an ohmmeter. Example: For 50 ohms, set the contact at half the length of its travel along a 100 ohm element.

Reduce Field Service Time —

The repair of installed equipment is speeded up because the same advantages apply as for new equipment. The technician can visually adjust all units to approximate final settings. This saves time, aids him considerably by allowing quick easy final adjustments to balance the circuits.

Optional 0.100″ or 0.200″ Pin Spacing on ¾″ Commercial Trimmers

Amphenol has expanded its entire line of ¾″ rectangular cermet, Film-Met™ and wirewound trimmers to include 0.200″ pin spacing. You can now specify 0.100″ or 0.200″ pin spacing as standard on the following models. To order, indicate the appropriate terminal designation -P, K or Y- in Amphenol's part numbering system for the spacing desired, e.g. 3810**P**-101 or 6034**K**-101.



Models Available	Termination Designation	Pin Spacing
3805 3815 6034 3811 3810	P	0.100″
	K	0.200″
6034	Y	0.100″

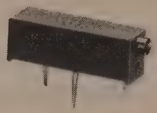
TRIMMING POTENTIOMETER

BUNKER RAMO AMPHENOL

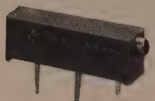
6034 Series — Cermet

FEATURES:

- Low-cost, commercial cermet trimmer offers infinite resolution . . . wide resistance range.
- TC of 100 ppm/°C is standard.
- Multi-finger contact reduces CRV to a minimum and enhances rotational life.
- Commercial ¾″ rectangular style with solvent-resistant nylon case and popular PC pin spacing.
- Sealed construction . . . ideal for use in automated board cleaning processes.
- Commercial.
- Temperature to 125°C.
- Sealed construction
- ¾″ rectangular.
- Cermet.



6034K



6034P

6034Y

How to Order

When requesting a quotation or placing an order for Standard Micropot® Trimmers refer to part number listed under STANDARD RESISTANCE SPECIFICATIONS.

Special Options

Special resistances, performance tolerances and markings are available upon request. Refer to SPECIAL OPTIONS Catalog Sheet.

TOLERANCES

.00 ±.010

.000 ±.005

Fractions ±1/64

Electrical Characteristics:

Resistance Values: 10 to 1 megohm (See Standard Resistance Specifications).

Resistance Tolerance: ±10%.

Resolution: Infinite.

End Resistance: 1% or 20 ohms whichever is greater.

Contact Resistance Variation: 3% of total resistance or 20 ohms, whichever greater.

Continuity: Continuous and unidirectional; maintained for full mechanical range.

Usable Potentiometer Range: 100%.

Insulation Resistance: 1,000 megohm minimum.

Electrical Output: Linear with shaft adjustment.

Mechanical Characteristics:

Number of Shaft Adjustment Turns: 15 turns.

Mechanical Stops: Contact idles with no electrical discontinuity.

Shaft Torque: 8.0 oz. in. maximum.

Rotational Life: 200 cycles min. with no discontinuity.

Terminal Type: Printed circuit pins.

Weight: Approximately 1.3 grams.

Volume: .0399 cu. in.

Markings: Standard manufacturer marking: Mfrs. name and nomenclature, resistance, date code. (Special marking optional.)

Environmental Characteristics:

Operating Temperature Range: −55°C to +125°C (−67°F to +257°F).

Power Rating: ½ watt at 85°C derated to zero at 125°C.

Temperature Coefficient Potentiometer: 100 ppm/°C.

Vibration: Per MIL-STD-202B, Method 204A — Condition D.

Shock: Per MIL-STD-202B, Method 213—Condition I.

Humidity: Per MIL-STD-202, Method 103.

Immersion: Sealed construction.

Dielectric Strength: 900 volts RMS at room temperature.

Load Life: 1,000 hours ½ watt at 85°C.

TRIMMING POTENTIOMETER

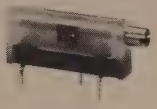
BUNKER RAMO AMPHENOL

3810 Series — Wirewound

FEATURES:

- A low-cost, quality trimmer for general purpose application.
- Permanently seals out dust and humidity.
- Full length mandrel provides optimum resolution.
- Corrosion-proof, gold-plated circuit pins are silver-brazed to resistance element for rugged long-life.
- Commercial.
- Temperature to 125°C.
- Sealed construction.
- ¾″ rectangular.
- Wirewound.

3810P



3810K

VISTA-TRIM Allows Visual Settings of Approximate Desired Values . . .

SAVES VALUABLE TIME

Both the element and contact carrier are visible through the semi-transparent top. Approximate final settings can be made with or without an ohmmeter. Example: For 50 ohms, set the contact at half the length of its travel along a 100 ohm element.

How to Order

When requesting a quotation or placing an order for Standard Micropot® Trimmers refer to part number listed under STANDARD RESISTANCE SPECIFICATIONS.

Special Options

Special resistances, performance tolerances and markings are available upon request.

Standard Resistance Specifications:

Resistance (Ohms) Resistance Tol. ±10%	Resolution		Max. Volts at 40°C Amb.	Amphenol Part Number †

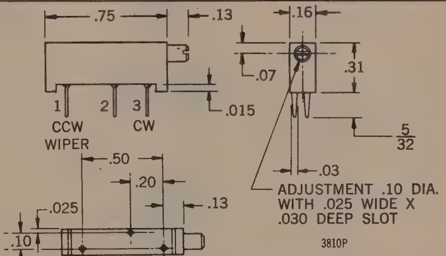
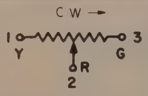
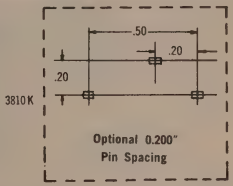
† Last three digits of the part number represent the resistance in Standard Code.





TOLERANCES
.00 ±.010
.000 ±.005
Fractions ±1/64



Electrical Characteristics:

Resistance Values: 10 to 20,000 ohms (see Standard Resistance Specifications).

Resistance Tolerance: ±10%.

Resolution: .22% to 1.78% (see Standard Resistance Specifications).

End Resistance: 1% or 1 ohm, whichever greatest.

Noise During Adjustment: 100 ohms ENR maximum.

Continuity: Continuous and Unidirectional; maintained for full mechanical range.

Usable Potentiometer Range: 100%.

Insulation Resistance: 1,000 megohm minimum.

Electrical Output: Linear with shaft adjustment.

Mechanical Characteristics:

Number of Shaft Adjustment Turns: 20 turns.

Mechanical Stops: Contact idles with no electrical discontinuity.

Shaft Torque: 8.0 oz. in. max.

Rotational Life: 200 cycles min. with no discontinuity.

Terminal Type: P & K = Printed circuit pins.

Weight: Approximately 1.2 grams.

Volume: .0372 cu. in.

Markings: Standard manufacturer marking: Mfrs. name and nomenclature, resistance, date code. (Special marking optional)

Environmental Characteristics:

Operating Temperature Range: −65°C to +125°C (−85°F to +257°F).

Power Rating: 1 watt at 40°C derated to zero at 125°C.

Temperature Coefficient Resistance Wire: 20 ppm maximum.

Temperature Coefficient of Potentiometer: 100 ppm/°C max. 50 ppm/°C nom.

Vibration: Per MIL-R-27208.

Shock: Per MIL-R-27208.

Humidity: Per MIL-STD-202, Method 103.

Immerson: Sealed construction.

Dielectric Strength: 1,000 volts RMS.

Load Life: 1,000 hours, 1 watt at 40°C.

MICROPOT® INFINITE RESOLUTION TRIMMING POTENTIOMETERS

BUNKER RAMO AMPHENOL

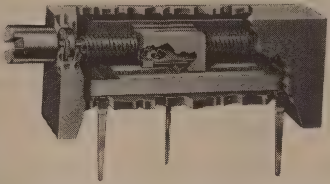
Humidity-proof trimmers pass MIL-R-27208A moisture resistance test.

▲ 1K and up

Film-Met™ by Amphenol*



It's the first major improvement in infinite resolution trimmers since cermets. Film-Met is an exclusive Amphenol resistance element completely different from wirewound and cermet types.

100% METAL ELEMENT — Amphenol's exclusive Film-Met element uses the same vacuum deposition process as precision metal-film fixed resistors. Continuous monitoring techniques during deposition assure maintenance of established performance levels and continuing high quality.

ENDS COMPROMISE—This new trimmer won't always replace wirewounds and cermets. Their characteristics fit many design parameters perfectly. But not all!

TEMPERATURE COEFFICIENT — Film-Met has a low TCR of ±50 ppm/°C maximum as standard. Perfect for applications requiring extremely low TCR.

NOISE—For applications requiring critical low noise levels, Film-Met must be your choice. This is especially true in applications where other components feature low thermal noise. Film-Met is now available for that critical job.

SETABILITY—Film-Met contact setability is improved over cermet because of lower contact resistance variation, and vastly improved over the resolution inherent in wirewound trimmers which have limited setability due to the turns of the resistance wire. The lower CRV of Film-Met results from the smooth metallic element surface which provides a low resistance interface with the precious metal contact.

OTHER FEATURES — Your choice for high frequency and pulse applications should also be Film-Met because of its excellent performance characteristics in these areas. Investigate Film-Met performance features for solutions to your circuit problems.

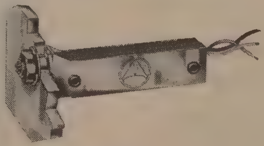
*U.S. Patent No. 3,354,134; also foreign patents.

SPECIAL OPTIONS

The following trimmer panel mounts are available for the designated Amphenol trimmers. If the panel mount is desired to be pre-assembled to an Amphenol trimmer at the factory, the Amphenol trimmer part number should be specified with the suffix "M". e.g.: 2750P-502M denotes a 2750 trimmer with printed circuit pins, 5000 ohms resistance, and mounted to the applicable panel mount shown below. If the panel mount is desired as a separate item, simply specify the panel mount part number shown below.

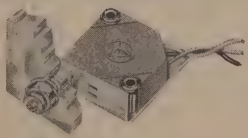
2799 PANEL MOUNT

For 2750 Trimmers



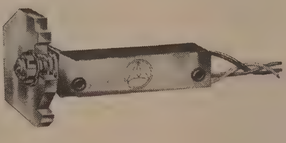
2949 PANEL MOUNT

For 2900, 2901 and 2905 Trimmers



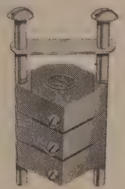
999 PANEL MOUNT

For 992, 994, 2850, 2851 and 2855 Trimmers



29-63816 STACK STRAP

For 2900, 2901 and 2905 Trimmers



PRECISION LINEAR WIREWOUND & CONDUCTIVE-PLASTIC POTENTIOMETERS

NOTE:

The wirewound and conductive-plastic precision potentiometers described above are also available in a wide range of non-linear functions. Amphenol specializes in customizing potentiometers to fulfill your specific needs. Combinations of potentiometers, torque motors, switches and detent assemblies are but a few of the products that have been engineered and used successfully in military and industrial markets. We welcome your inquiries.

ADJUSTABLE PRESSURE SWITCHES

BUNKER RAMO AMPHENOL

MINIATURE ADJUSTABLE SNAP ACTION PRESSURE SWITCHES

- Miniature size reduces total system weight.
- Field adjustable lowering both installation and maintenance costs.
- Compatible with most pressure medias.
- Reduced size and weight decreases total system package.

MINIATURE PRECISION POTENTIOMETER

BUNKER RAMO AMPHENOL

ScotPot™ 4200 SERIES

FEATURES

- Miniature Precision Potentiometer
- 10 Turn, wire wound
- ⅞″ dia. x ¾″ short.
- Low cost!
- Improved performance. Dissipates 2 watts @ 70°C for 1,000 hours.
- Over 1,000,000 revolution life.
- Gold-plated terminations.
- Glass filled nylon case with molded element grooves assures a perfect helix, high linear accuracy.
- Precious metal spring-loaded wiper prevents corrosion and noise.

HOW TO ORDER

When placing an order for Standard Scot Pot™ Potentiometers, refer to part number listed under STANDARD RESISTANCE SPECIFICATIONS.

SPECIAL OPTIONS

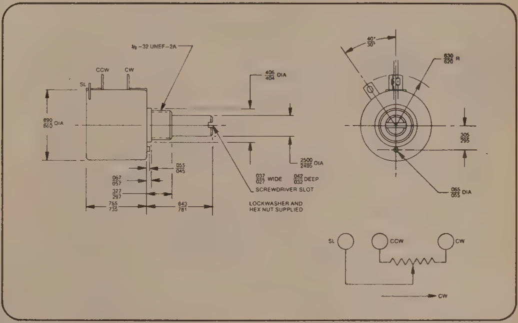
Many models are offered with special resistances, linearities, tolerances, mountings, markings, taps and shafts upon request. Refer to SPECIAL OPTIONS section.

ELECTRICAL CHARACTERISTICS

Resistance Range: 100 ohms to 100K ohms.
Standard Resistance Tolerance: ±5%.
Linearity Type: Independent.
Standard Linearity Tolerance: ±0.25%.
Power Dissipation: 2 Watts at 70°C.
Electrical Rotation: 3600° +10° −0°.
Absolute Minimum Resistance: 0.1% or 1 Ω whichever is greater.
Standard End Resistance: 0.25% or .1 Ω whichever is greater.
Standard Resolution Range (see standard resistance specification): 0.008% to 0.005%
Insulation Resistance: 1000 megohms minimum.
Noise: 100 ohms ENR maximum.

MECHANICAL CHARACTERISTICS

Mounting Type: Bushing.
Physical Dimensions: ⅞″ dia. x ¾″ long.
Bearing Type: Sleeve.
Weight: 1 oz. maximum.
Coil Length: 21.8″.
Mechanical Rotation: 3600° +10° −0°.
Stop Strength: 50 in. oz.
Torque: Start — 1.0 oz. in. Run — 1.0 oz. in.
Materials: Housing: Nylon; End Caps: Nylon; Shaft: Stainless Steel; Terminals: Gold Plated; Nut: Brass Nickel Plated; Washer: Steel Cadmium Plated.
Terminal Type: Solder lug.
Rotational Life: 1,000,000 Revolutions.
Backlash: None
Terminal Marking and Location: See Outline Dimensions.
Shaft: Length — 13/16″.
Diameter — .2500/.2495.
Max. End Play — .010
Radial Play — .003 T.I.R.
Runout — .005 T.I.R.
Mounting Diameter: Pilot Diameter Runout — .004 T.I.R.
Standard Marking: Manufacturers name and nomenclature, resistance value and tolerance, linearity type and tolerance, schematic, and date code.



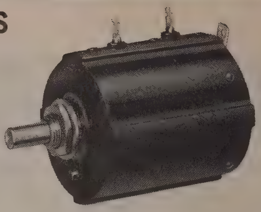
ENVIRONMENTAL CHARACTERISTICS

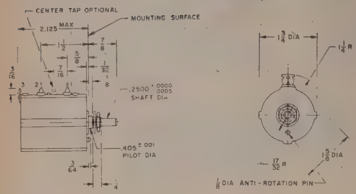
Operating Temperature Range: −55°C to +125°C.
Power Rating: 2 watts @ 70°C to Zero @ 125°C.
Temperature Cycling: 5 cycles −55°C to +125°C, 30 minutes @ each temperature per cycle.
High Temperature Exposure: 125°C for 100 Hours.
Low Temperature Exposure: −55°C for 24 hours.
Vibration: 10/500 Hz, .06 DA for ½ hour in each of three (3) planes.
Acceleration: 30 G's for one (1) minute in each of three (3) planes.
Shock: 18 shocks in three (3) planes of 30g's.
Humidity Cycling: 95% relative humidity for 12 hours under cycling conditions of −20°C to +75°C, six (6) hours at each temperature for a total of six (6) cycles.
Load Life: 2 Watts at 70°C for 1,000 Hours.
Dielectric Strength: At atmospheric pressure, 1,000 VRMS for one (1) minute.

PRECISION POTENTIOMETERS

BUNKER RAMO AMPHENOL

205 SERIES





Fraction Tol. are ±1/64 unless noted. Decimal Tol. as noted.

Furnished with
3/8-32 Hex Nut
3/8 Lockwasher

FEATURES

- Resistance element and terminal lugs permanently molded into case.
- Zero-based linearity eliminates phasing to electrical zero.
- Extra-long resistance element gives up to 64% better resolution.
- Double-threaded leadscrew provides, low-torque, smooth rotation and ultra-accurate repeatable setting without hysteresis.
- Anti-backlash drive mechanism has single point contact of wiper-element.
- Dual bearings on rotor assembly provide accurate and permanent positioning.
- 1% zero-based linearity.
- Military-industrial.
- Ten turns.
- Wirewound.
- 3/4″ diameter.

ELECTRICAL CHARACTERISTICS

Standard Resistance Range: 1.15 to 300K ohms.
Standard Resistance Tolerance: Less than 50 ohms ±10% 50 to 100K ohms ±3%; Over 100K ohms ±5%.
Linearity Types Available: Zero-based and Independent 25 ohms through 300K ohms: Independent only 1.15 ohms and 2.9 ohms.
Standard Linearity: Zero-based 25 ohms through 300K ohms, Independent below 25 ohms.
Standard Linearity Tolerance: ±0.1%.
Power Dissipation: 5 watts at 40°C.
Electrical Rotation: 3600° +14.4° −0°.
Standard End Resistance: CW: 0.5% max. CCW: 0.1% max. End Resistance shall be .1 ohm max. for slide wire units.
Standard Resolution (see Standard Resistance Specifications): Inf. to .0037%.
Additional Taps: Center Tap only.
Tap Tolerance: ±2°.
Insulation Resistance: 1,000 megohm minimum.
Noise: 100 ohms ENR maximum.

MECHANICAL CHARACTERISTICS

Mounting Type Available: Bushing.
Physical Dimensions (see Outline Dimensions): 1¾″ dia. x 2⅛″.
Bearing Type: Sleeve.
Weight: 5 oz. max.
Coil Length: 43.5″.
Mechanical Rotation: 3600° +15° −0°.
Stop Strength: 15 in/ lbs.
Moment of Inertia: 58 gm. cm².
Torque: 3 oz. in. starting; 1.5 oz. in. running.
Materials: Housing — Phenolic
End Caps — Phenolic
Shaft — Stainless steel.
Mounting Hardware — Nut; brass, nickel plated — Washer; steel cadmium plated.
Bearing — Anodized Aluminum.
Terminals — Brass, Cadmium Plated.

Terminal Type: Solder Lug (Center tap; turret type).
Rotational Life: 1,000,000 revolutions.
Backlash: None.
Terminal Marking and Location: See Outline Dimensions:
Shaft: Standard Length — 7/8″.
Standard Diameter — .2500 +.0000 −.0005
Max. End Play — .014″.
Mounting Diameter (Pilot): See Outline Dimensions.
Standard Marking: Manufacturers' name and nomenclature, resistance value and tolerance, linearity tolerance, schematic, date code. (Special marking optional).

ENVIRONMENTAL CHARACTERISTICS

Operating Temperature Range: −55°C to +105°C (−67°F to +221°F).
Power Rating: 5 Watts at 40°C derated to 0 Watts at 105°C.
Temperature Cycling: Per MIL-R-12934, para. 4.6.18, Test Method MIL-STD-202B, Method 102A, Condition D.
High Temperature Exposure: +85°C for 1000 Hours Per MIL-R-12934, para. 4.6.23.
Low Temperature Exposure: −65°C for 24 Hours Per MIL-R-12934, para. 4.6.22.
Vibration: 10-55 Hz .06 DA, 10-500 Hz 10g's, MIL-STD-202B, Method 204A, Condition A.
Shock: 18 shocks at 15g's 11 milliseconds; 18 shocks at 30g's 11 milliseconds; MIL-STD-202B, Method 205, Condition A & B.
Acceleration: 30g's 3 planes Per MIL-STD-12934, para. 4.6.24.2.
Humidity: Per MIL-R-12934, para. 4.6.28, MIL-STD-202B, Method 103A Condition B.
Dielectric Strength: 1,000 volts RMS Per MIL-R-12934, para. 4.6.13. MIL-STD-202B, Method 301.
Sand and Dust: Per MIL-E-5272C, para. 4.11.
Salt Spray: Per MIL-STD-202B, Method 101A, Condition A, (Note: Requires special processing to comply).
Fungus: Per MIL-E-5272C, para. 4.8 Proc. I (Note: Requires special processing to comply).
Load Life: 1,000 hours Per MIL-R-12934, para. 4.6.20.

ELECTRICAL CHARACTERISTICS

Standard Resistance Range: 1 ohm to 100,000 ohms (see Standard Resistance Specifications).
Standard Resistance Tolerance: ±10% 1 to 25 ohms; ±5% 50 ohms; ±3% 100 to 100,000 ohms.
Linearity Types Available: Independent, Zero-Based, Absolute, Terminal.
Standard Linearity Type & Tolerance: ±0.1% Absolute.
Power Dissipation: 5 watts at 40°C.
Electrical Rotation: 3600° (90° electrical overtravel optional).
Standard End Resistance: 0.1% maximum. End Resistance shall be .5% max. for slide wire units.
Standard Resolution Range (see Standard Resistance Specifications): Infinite to .005%.
Additional Taps: Center Tap.
Standard Tap Tolerance: ±2°.
Insulation Resistance: 1,000 Megohms Minimum.
Noise: 100 ohms ENR maximum.

MECHANICAL CHARACTERISTICS

Mounting Types Available: Servo and Bushing (see Outline Dimensions).
Physical Dimensions: See Outline Dimensions.
Bearing Types: Servo and Tapped Hole — Ball Bearing.
Bushing — Sleeve Bearing.
Weight: Servo, Tapped Hole, and Bushing — Single Section, 5.9 oz. max. Each additional section, 3.85 oz. max.
Ganging Capability: 3 sections maximum.
Coil Length: 49.062″.
Mechanical Rotation: 3600° +10° −0° (90° Mechanical overtravel optional).
Stop Strength: 10 in./lbs.
Moment of Inertia: 20 gm cm².
Torque (Single Section): Servo and Tapped Hole — 1.5 oz/in. Starting, 1.0 oz/in. Running. Bushing Mount — 1.5 oz/in. Starting, 1.0 oz./in. Running.
Materials: Housing — Phenolic.
Shaft — Stainless Steel.
End Caps: Anodized Aluminum.
Mounting Hardware — Nut, Brass, Nickel Plated. Washer; Steel, Cadmium Plated.
Terminals — Hot Tin Dipped.
Terminal Type: Turret.
Rotational Life: 2,000,000 revolutions.
Backlash: None.
Terminal Marking and Location: See Outline Dimensions:

FEATURES

- ±0.1% absolute linearity.
- ±0.025% terminal, zero-based or independent linearity.
- Unique "scanning" wiper improves rotational life up to 2,000,000 revolutions.
- Long 49-inch mandrel gives ultra-high resolution.
- Patented precision Leadscrew gives ultra-accurate repeatable setting without hysteresis.
- Screw adjustments position contact to 100% output.
- Spring-loaded carrier arms insure zero-backlash.
- Molded in element and terminals for high concentricity and resistance to shock and vibration.
- 2″ diameter
- Ten turns.
- Wirewound
- Military-industrial.

Mounting Type	"L" Dimension and Model Number Per Number of Ganged Cups 1	2	3
Bushing, One End	2.250 - 901B	4.125 - 902B	5.968 - 903B
Bushing, Both Ends	2.656 - 901BB	4.531 - 902BB	6.359 - 903BB
Bushing, Rear Shaft	2.250 - 901BK	4.125 - 902BK	5.968 - 903BK
Servo, One End	2.062 - 901S	3.937 - 902S	5.781 - 903S
Servo, Both Ends	2.281 - 901SS	4.156 - 902SS	6.000 - 903SS
Servo, Rear Shaft	2.062 - 901SK	3.937 - 902SK	5.781 - 903SK

Shaft: Standard Length — Bushing Mount 7/8″; Servo and Tapped Hole Mount 5/8″.
Standard Diameter — .2500 +.0000 −.0005.
Max. End Play — Bushing .010; Servo .005.
Max. Radial Play — Bushing .003; Servo .001.
Shaft Runout — Bushing .002 T.I.R.; Servo .001 T.I.R.
Mounting Diameter (Pilot): (See Outline Dimensions) —
Pilot Diameter Runout — Bushing .003 T.I.R. Servo .001 T.I.R.
Pilot Diameter Face Runout — Bushing .002 T.I.R. Servo .002 T.I.R.
Standard Marking: Manufacturers' name and nomenclature, resistance value and tolerance, linearity tolerance, schematic, date code. (Special marking optional).

ENVIRONMENTAL CHARACTERISTICS

Operating Temperature Range: −55°C to +125°C (−67°F to +257°F).
Power Rating: 5 Watts at 40°C derated to 0 Watts at 125°C.
Temperature Cycling: Per MIL-R-12934, para. 4.6.18, Test Method MIL-STD-202B, Method 102A, Condition D.
High Temperature Exposure: +85°C for 1000 Hours Per MIL-R-12934, para. 4.6.23.
Low Temperature Exposure: −65°C for 24 Hours Per MIL-R-12934, para. 4.6.22.
Vibration: 10 to 55 Hz, .06 DA through 50 to 2,000 Hz, 15g's Per MIL-R-12934, para. 4.6.24, Test Method MIL-STD-202B, Method 204.
Shock: 18 shocks, 50g's 11 MS; MIL-R-12934, para. 4.6.25, MIL-STD-202, Method 205.
Acceleration: 30g's 3 Planes Per MIL-R-12934, para. 4.6.24.2.
Humidity: Per MIL-R-12934, para. 4.6.28.
Dielectric Strength: 1,000 volts RMS at room conditions, 350 volts RMS at 70,000 feet per MIL-R-12934, para. 4.6.13.
Sand and Dust: Per MIL-E-5272C, para. 4.11.
Salt Spray: Per Test Method MIL-STD-202B, Method 101A, Condition A (Requires special processing to comply).
Fungus: Per MIL-E-5272C, Proc. I, para. 4.8.
Load Life: 1,000 hours Per MIL-R-12934, para. 4.6.20.

†If ordering a ganged unit, specify model number under outline dimensions, and give specifications for each cup, eg. 902B, Cup A: 1000Ω, Cup B: 2000Ω. (Cup A refers to mounted cup). 1 For bushing mount with rear shaft extension, specify BK. eg. 901BK-010. 2 For servo mount with rear shaft extension, specify SK. eg. 901SK-010.

HOW TO ORDER

When placing an order for Standard Micropot® Potentiometers, refer to part number listed under STANDARD RESISTANCE SPECIFICATIONS.

SPECIAL OPTIONS

Many models are offered with special resistances, linearities, tolerances, mountings, markings, taps and shafts upon request. Refer to SPECIAL OPTIONS section.

TRIMMING POTENTIOMETERS

BUNKER RAMO AMPHENOL

2855 SERIES

FEATURES

- Meets or exceeds all requirements of MIL-R-22097 style RJ11.
- Cermet element offers infinite resolution . . . wide resistance range.
- TC of 100 ppm/°C is standard.
- Multi-finger contact reduces CRV to a minimum and enhances rotational life.
- Gold strap terminations welded directly to resistance element.
- Temperature to 150°C.
- Humidity-Proof.
- 1¼″ Rectangular.
- Cermet.

†The last three digits of the part number represent the resistance in standard code. For panel mount add letter M after part number, e.g. —2855P-501M.

Electrical Characteristics

Resistance Values: 20 to 1 megohm (see Standard Resistance Specifications).

Resistance Tolerance: ±10%.

Resolution: Infinite.

End Resistance: 2% of total resistance or 20 ohms, whichever is greater.

Contact Resistance Variation: 3% of total resistance or 20 ohms, whichever is greater.

Continuity: Continuous and unidirectional; maintained for full mechanical range.

Usable Potentiometer Range: 100%

Insulation Resistance: Per MIL-R-22097.

Electrical Output: Linear with shaft adjustment.

Mechanical Characteristics

Number of Shaft Adjustment Turns: 22 Turns.

Mechanical Stops: Contact idles with no electrical discontinuity.

Shaft Torque: 8.0 oz. in. max.

Rotational Life: 200 cycles min. with no discontinuity.

Terminal Types: P per MIL-R-22097, Style RJ11, plus S configuration. P = Printed circuit; L = Teflon insulated stranded leads; S = Solder lugs.

Mounting Bracket Available: Amphenol Model 999; Refer to Trimmer Mounting Hardware Catalog Sheet.

Stacking: Mounting holes provided (see Outline Dimensions).

Terminal Strength: Per MIL-R-22097.

Weight: 5 grams approx.

Volume: 109 cu. in.

Marking: Standard manufacturer marking: Mfrs. name and nomenclature, wiring diagram, resistance, date code. (Special marking optional.)

Solderability: Per MIL-R-22097.

Environmental Characteristics

Operating Temperature Range: —55°C to +150°C (—67°F to +302°F).

Power Rating: ¾ watt at 85° derated to zero at 150°C

Temperature Coefficient of Potentiometer: ±100 ppm/°C.

Temperature Cycling (Thermal Shock): Per MIL-R-22097.

Low Temperature Operation: —55°C per MIL-R-22097.

High Temperature Exposure: +150°C per MIL-R-22097.

Vibration: Per MIL-R-22097.

Humidity-Moisture Resistance: Per MIL-R-22097.

Immersion (Leak Test): Per MIL-R-22097.

Dielectric Strength: 900 volts RMS at room conditions, 350 volts RMS at 80,000 feet per MIL-R-22097.

Salt Spray: Per MIL-R-22097.

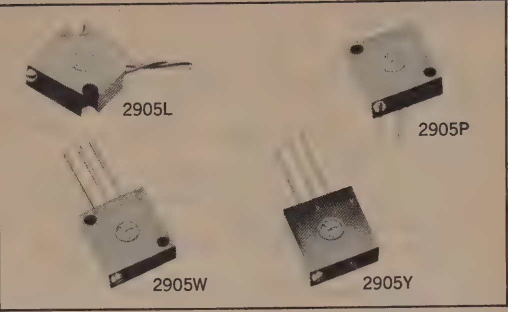
Fungus: Non-nutrient materials per MIL-E-5272.

Load Life: 1,000 hours per MIL-R-22097.

TRIMMING POTENTIOMETERS

BUNKER RAMO AMPHENOL

2905 SERIES



2905L
2905P
2905W
2905Y

FEATURES

- Meets or exceeds all requirements of MIL-R-22097 style RJ22.
- Cermet element offers infinite resolution . . . wide resistance range.
- TC of 100 ppm/°C is standard.
- Molded-in terminal pins for greater strength and reliability.
- Gold strap terminations welded directly to resistance element minimizing IR loss.
- MIL-R-22097 RJ22.
- Temperature to 150°C.
- Humidity-Proof.
- ½″ Square.
- Cermet.

How to Order

When requesting a quotation or placing an order for Standard Micropot® Trimmers refer to part number listed under STANDARD RESISTANCE SPECIFICATIONS

Special Options

Special resistances, performance tolerances, markings, and lead lengths are available upon request. Refer to SPECIAL OPTIONS Catalog Sheet.

TOLERANCES
.00 ±.010
.000 ±.005
Fractions ±1/64

Electrical Characteristics

Resistance Values: 10 ohms to 10 megohms (see Standard Resistance Specifications).

Resistance Tolerance: ±10%.

Resolution: Infinite.

End Resistance: 2% of total resistance or 20 ohms, whichever is greater.

Contact Resistance Variation: 3% of total resistance or 20 ohms, whichever is greater.

Usable Potentiometer Range: 100%

Insulation Resistance: Per MIL-R-22097.

Electrical Output: Linear with shaft adjustment.

Mechanical Characteristics

Number of Shaft Adjustment Turns: 25 turns.

Mechanical Stops: Contact idles with no electrical discontinuity.

Shaft Torque: 5.0 oz. in. max.

Rotational Life: 200 cycles min. with no discontinuity.

Terminal Types: P and L per MIL-R-22097, Style RJ22, plus W, X and Y configuration. P = Printed circuit pins; L = Teflon insulated stranded leads; W, X & Y = Printed circuit pins.

Mounting Bracket Available: Amphenol Model 2949; refer to Trimmer Mounting Hardware Catalog Sheet.

Stacking: Mounting holes provided (see Outline Dimensions). Pads provide air space between units.

Terminal Strength: Per MIL-R-22097.

Weight: Approx. 3 grams.

Volume: .055 cu. in.

Marking: Standard manufacturer marking: Mfrs. name and nomenclature, wiring diagram, resistance, date code. (Special marking optional.)

Solderability: Per MIL-R-22097.

Environmental Characteristics

Operating Temperature Range: —55°C to +150°C (—67°F to +302°F).

Power Rating: ½ watt at 85°C derated to zero at 150°C.

Temperature Coefficient of Potentiometer: ±100 ppm/°C.

Thermal Shock: Per MIL-R-22097.

Low Temperature Operation: Per MIL-R-22097.

High Temperature Operation: Per MIL-R-22097.

Vibration: Per MIL-R-22097.

Shock: Per MIL-R-22097.

Humidity-Moisture Resistance: Per MIL-R-22097.

Immersion (Leak Test): Per MIL-R-22097.

Dielectric Strength: 900 volts RMS at room conditions, 350 volts RMS at 80,000 feet per MIL-R-22097.

Salt Spray: Per MIL-R-22097.

Fungus: Non-nutrient materials per MIL-E-5272.

Load Life: 1,000 hours per MIL-R-22097.

TRIMMING POTENTIOMETERS

BUNKER RAMO AMPHENOL

2305 SERIES

FEATURES

- **Meets or exceeds all requirements of MIL-R-22097 style RJ24.**
- **Cermet element offers infinite resolution . . . wide resistance range.**
- **TC as low as 100 ppm/°C is standard.**
- **Precious metal contact reduces CRV to a minimum and enhances rotational life.**
- **Molded-in terminal pins for greater strength and reliability.**
- **Gold strap terminations welded directly to resistance element.**
- **MIL-R-22097 RJ24.**
- **Temperature to 150°C.**
- **Humidity-Proof.**
- **3/8" Square.**
- **Cermet.**

How to Order

When requesting a quotation or placing an order for Standard Micropot® Trimmers refer to part number listed under STANDARD RESISTANCE SPECIFICATIONS

Special Options

Special resistances, performance tolerances, markings, and lead lengths are available upon request. Refer to SPECIAL OPTIONS Catalog Sheet.

TRIMMING POTENTIOMETERS

BUNKER RAMO AMPHENOL

2901 SERIES

FEATURES

- Exclusive 100% metallic element offers infinite resolution with excellent low noise characteristics unsurpassed by other infinite resolution elements.
- Performance characteristics compatible with other metal film components.
- Low 50 ppm/°C is standard.
- Internal component design provides low inductance and capacitance.
- Molded-in terminal pins for greater strength and reliability.
- Military-Industrial.
- Temperature to 150°C.
- Humidity-Proof.
- ½″ Square.
- Film-Met™.

U.S. Patent No. 3,353,134; also foreign patents.

How to Order

When requesting a quotation or placing an order for Standard Micropot® Trimmers refer to part number listed under STANDARD RESISTANCE SPECIFICATIONS

TRIMMING POTENTIOMETERS

BUNKER RAMO AMPHENOL

2850 SERIES

FEATURES

- Meets or exceeds all requirements of MIL-R-27208 style RT11.
- Design provides a mandrel of maximum length for superior resolution characteristics.
- "Window" design case and silicon "O" ring permanently seals out humidity and dust.
- High temperature diallyl phthalate case functions easily as a stable body for internal circuit components up to 150°C.
- Temperature to 150°C.
- Humidity-Proof.
- 1¼" Rectangular.
- Wirewound.

How to Order

When requesting a quotation or placing an order for Standard Micropot® Trimmers refer to part number listed under STANDARD RESISTANCE SPECIFICATIONS

Special Options

Special resistances, performance tolerances, markings, and lead lengths are available upon request. Refer to SPECIAL OPTIONS Catalog Sheet.

TOLERANCES

.00 ±.010

.000 ±.005

Fractions ±1/64

Electrical Characteristics

Meets All Requirements of MIL-R-27208, Style RT11

Resistance Values: 10 to 20,000 ohms (see Standard Resistance Specifications).

Resistance Tolerance: ±5%.

Resolution: .15% to 1.631% (see Standard Resistance Specifications).

End Resistance: 0.1% or .5 ohm, whichever greatest.

Absolute Minimum Resistance: 0.1% or .5 ohm, whichever greatest.

Noise During Adjustment: 100 ohms ENR maximum.

Continuity: Continuous and unidirectional; maintained for full mechanical range.

Usable Potentiometer Range: 100%.

Insulation Resistance: Per MIL-R-27208.

Electrical Output: Linear with shaft adjustment.

Mechanical Characteristics

Meets All Requirements of MIL-R-27208, Style RT11

Number of Shaft Adjustment Turns: 22 Turns.

Mechanical Stops: Contact idles with no electrical discontinuity.

Shaft Torque: 0.1 oz. in. min.; 8.0 oz. in. max.

Rotational Life: 500 cycles min., with no discontinuity (200 cycles over 50K).

Terminal Types: P and L per MIL-R-27208, Style RT11 plus S. P = Printed circuit pins; L = Teflon insulated stranded leads; S = Solder lugs.

Mounting Bracket Available: Model No. 999, Refer to SPECIAL OPTIONS.

Stacking: Mounting holes provided (see Outline Dimensions).

Terminal Strength: Per MIL-R-27208.

Weight: Approx. 5 grams.

Volume: .109 cu. in.

Markings: Standard manufacturer marking: Mfrs. name and nomenclature, wiring diagram, resistance, date code. Marking per MIL-R-27208 where applicable. (Special marking optional).

Solderability: Per MIL-R-27208.

Environmental Characteristics

Meets All Requirements of MIL-R-27208, Style RT11

Operating Temperature Range: −65°C to +150°C (−85°F to +302°F).

Power Rating: 1 watt at 70°C derated to zero at 150°C.

Temperature Coefficient Resistance Wire: 20 ppm max.

Temperature Coefficient of Potentiometer: 70 ppm/°C max. 30 ppm/°C nom.

Temperature Cycling (Thermal Shock): Per MIL-R-27208.

Low Temperature Operation: Per MIL-R-27208.

High Temperature Exposure: Per MIL-R-27208.

Vibration: Per MIL-R-27208.

Shock: Per MIL-R-27208.

Humidity-Moisture Resistance: Per MIL-R-27208.

Immersion (Leak Test): Per MIL-R-27208.

Dielectric Strength: 900 volts RMS at room conditions, 350 volts RMS at 80,000 feet per MIL-R-27208.

Salt Spray: Per MIL-R-27208.

Fungus: Non-nutrient materials per MIL-E-5272.

Load Life: 1,000 hours, Per MIL-R-27208.

TRIMMING POTENTIOMETERS

BUNKER RAMO AMPHENOL

2851 SERIES

FEATURES

- Exclusive 100% metallic element offers infinite resolution with excellent low noise characteristics unsurpassed by other infinite resolution elements.
- Performance characteristics compatible with other metal film components.
- Low 50 ppm/°C temperature coefficient.
- Internal component design provides low inductance and capacitance.
- Military-Industrial.
- Temperature to 150°C.
- Humidity-Proof.
- 1¼" Rectangular.
- Film-Met™.

U.S. Patent No. 3,353,134; also foreign patents.

How to Order

When requesting a quotation or placing an order for Standard Micropot® Trimmers refer to part number listed under STANDARD RESISTANCE SPECIFICATIONS

Special Options

Special resistances, performance tolerances, markings, and lead lengths are available upon request. Refer to SPECIAL OPTIONS Catalog Sheet.

Electrical Characteristics

Resistance Values: 20 to 20,000 ohms (see Standard Resistance Specifications).

Resistance Tolerance: ±10%.

Resolution: Infinite.

End Resistance: 10 ohms or 10% whichever is less.

Contact Resistance Variation: 2% or 20 ohms, whichever is greater.

Continuity: Continuous and unidirectional; maintained for full mechanical range.

Usable Potentiometer Range: 100%

Insulation Resistance: Per MIL-R-22097.

Electrical Output: Linear with shaft adjustment.

Mechanical Characteristics

Number of Shaft Adjustment Turns: 22 turns.

Mechanical Stops: Contact idles with no electrical discontinuity.

Shaft Torque: 8.0 oz. in. max.

Rotational Life: 200 cycles min. with no discontinuity.

Terminal Types: P & L per MIL-R-22097, Style RJ11, plus S configuration. P = Printed circuit; L = Teflon insulated stranded leads; S = Solder lugs.

Mounting Bracket Available: Amphenol Model 999; Refer to Trimmer Mounting Hardware Catalog Sheet.

Stacking: Mounting holes provided (see Outline Dimensions).

Terminal Strength: Per MIL-R-22097.

Weight: 5 grams approx.

Volume: .109 cu. in.

Marking: Standard manufacturer marking: Mfrs. name and nomenclature, wiring diagram, resistance, date code. (Special marking optional.)

Solderability: Per MIL-R-22097.

Environmental Characteristics

Operating Temperature Range: —55°C to +150°C (—67°F to +302°F).

Power Rating: ¾ watt at 85° derated to zero at 150°C

Temperature Coefficient of Potentiometer: 100ppm/°C.

Temperature Cycling (Thermal Shock): Per MIL-R-22097.

Low Temperature Operation: —55°C per MIL-R-22097.

High Temperature Exposure: +150°C per MIL-R-22097.

Vibration: Per MIL-R-22097.

Shock: Per MIL-R-22097.

Humidity-Moisture Resistance: Per MIL-R-22097.

Immersion (Leak Test): Per MIL-R-22097.

Dielectric Strength: 900 volts RMS at room conditions, 350 volts RMS at 80,000 feet per MIL-R-22097.

Salt Spray: Per MIL-R-22097.

Fungus: Non-nutrient materials per MIL-E-5272.

Load Life: 1,000 hours per MIL-R-22097.

Trimming Potentiometer Selection...Simplified:

The six index tables on the facing page provide a convenient method of selecting the Helitrim® Cermet Trimming Potentiometer Model best suited to a specific application. These tables relate, in sets of two, four key parameters, i.e., adjustment turns, power rating, unit size, and maximum operating temperature for all trimming potentiometer models. After locating the model which meets your parameter requirements, refer to the detail specification tables. Reliable Helitrim® Cermet Trimming Potentiometers are available in a wide range of sizes, pin spacings, and performance characteristics. For information on non-standard models, contact your local Beckman distributor or sales engineering representative.

Resistance Ordering Information:

After selecting a specific trimmer, list the resistance value desired (10 — 2 MegΩ) after the model number.

Example: 89P R10K

Model — 89P

Resistance Value — R10K

Standard Resistance Values Available Include:

10	100	1K	10K	100K	1 Meg
20	200	2K	20K	200K	2 Meg
—	—	—	25K	250K	
50	500	5K	50K	500K

Beckman

MILITARY TRIMMERS

Military Cermet Trimming Potentiometers

Over 80% of the trimmers listed (military & industrial) are locally distributor stocked. Beckman sales representatives carry in-depth stocks of trimmers and offer same-day deliveries on many quantities. Two additional aids are included in this catalog which further simplify trimmer selection. First, note in the general specifications tables (pp 2 & 4) the column with trimmer outlines. These outlines immediately indicate adjustment screw location for each trimmer. Second, a pin specification chart (pp 6 & 7) is included which will provide useful information, by each individual model, on all pin dimensions and spacings.

	MODEL	DIMENSION INCH (MM) (LxWxH)
	50	1¼ (31,8) x 0.297 (7,54) x 5/16 (7,95)
	53	1¼ (31,8) x 0.292 (7,42) x 19/64 (7,54)
	54	1¼ (31,8) x 0.292 (7,42) x 19/64 (7,54)
	55L	1¼ (31,8) x 0.290 (7,37) x 11/32 (8,74)
	55P	1¼ (31,8) x 0.290 (7,37) x 11/32 (8,74)
	55S	1¼ (31,8) x 0.290 (7,37) x 11/32 (8,74)
	56L	1.25 (31,8) x 0.195 (4,95) x 0.320 (8,13)
	56P	1.25 (31,8) x 0.195 (4,95) x 0.320 (8,13)
	58P	1.25 (31,8) x 0.195 (4,95) x 0.320 (8,13)
	58S	1.25 (31,8) x 0.195 (4,95) x 0.320 (8,13)
61M 61P 61PA	61M	¼ (6,35) Dia. x 9/32 (7,14)
	61P	¼ (6,35) Dia. x ¼ (6,35)
	61PA	9/32 (7,14) x 9/32 (7,14) x ⅜ (9,53)
	63L	⅜ (9,53) x ⅜ (9,53) x 0.240 (6,10)
	63P	⅜ (9,53) x ⅜ (9,53) x 3/16 (4,76)
	63W	⅜ (9,53) x 0.240 (6,10) x 0.410 (10,4)
	63X	⅜ (9,53) x 0.240 (6,10) x 0.410 (10,4)
	64P	¼ (6,35) x ¼ (6,35) x 0.170 (4,318)

TRIMMER PANEL MOUNT ADAPTERS

Panel Mounted Models:

Helitrim® Cermet Trimming Potentiometers may be ordered pre-assembled with panel mounting adapter or separately. The following examples and model by model listing should simplify ordering. Beckman sales representatives will provide additional information upon request.

Example: When ordering Model 56L pre-assembled, specify 56LBW.

Example: When ordering Model 56L with separate unassembled panel mounting adapter, specify 56BW plus 56L trimmer.

Helitrim Trimming Potentiometer Models	To Order Panel Mounting Adapter Pre-Assembled With Trimmer	To Order Panel Mounting Adapter Separately

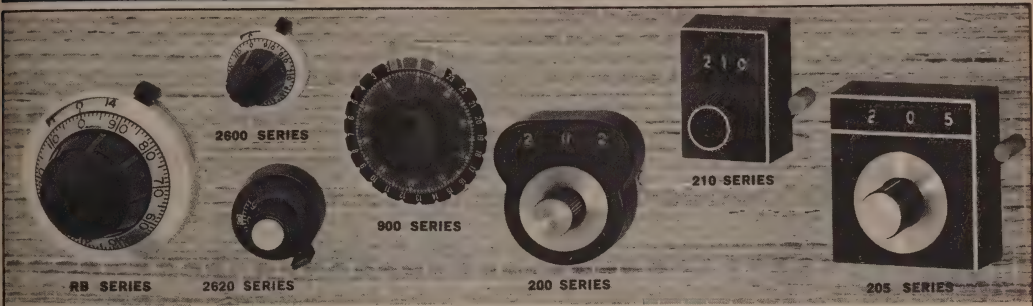
Duodial® & Digidial®

TURNS-COUNTING DIALS



Duodial®

RB SERIES—1¹³⁄₁₆″ diameter dials finished in satin chrome with black-filled numerals and divisions (RBD has matte black finish and white-filled numerals and divisions). Built-in vibration-proof locking mechanism—knob and locking lever cap made of black nylon. Models can be used with most potentiometers, or other device, having from 1 to 15 mechanical turns.

2600 SERIES—Miniature ⅞″ diameter versions of the RB Series. Ideally suited for applications where panel space is limited. Primarily for use with ⅞″ diameter multi-turn potentiometers but can be used with devices of any size having from 1 to 15 mechanical turns. All models have satin chrome finish, black-filled numerals and divisions, vibration-proof locking mechanism with black nylon cap, and black nylon knob.

2620 SERIES—Compact 1″ diameter provides panel space savings while retaining excellent readability. White numerals on black background for fiftieths of a turn, and black numerals on white background for full turns. May be used with devices with from 1 to 10 adjustment turns. Positive locking mechanism prevents accidental changes of setting, due to vibration or sudden shock. Rugged black housing and knob help assure long life and carefree operation. Model 2621 is designed for mounting on ⅛″ shafts, Models 2626 and 2627 mount on ¼″ shafts.

900 SERIES—Ideally suited to applications where precise settings and readability are required. 4¾″ diameter permits greater accuracy of setting. Outer dial is graduated in complete turns, inner vernier dial is graduated in hundredths. Settings can be made easily to three significant figures and estimated accurately to a fourth. For rapid changing of settings, an eccentric finger-hole is provided in the adjustment knob. The inner vernier dial and knob are made of plastic to eliminate body capacitance which might affect the setting. Since the knob is connected to the potentiometer shaft, backlash is thereby eliminated.

Digidial®

200 SERIES—Lightweight, compact dials for fast, accurate readings in hundredths of a turn. Reading units are completely encased in a snapon plexiglass cover for convenient indexing. White numerals against a black background may be easily read from a wide angle. No built-in mechanical stops so rotation is limited only by the potentiometer, or other device, to which it is coupled. Locking mechanism in the dial permits settings to be accurately locked into place. Series 200 dials are available in three different knob and housing colors (Model 201—blue cover & knob, Model 202—black cover & knob, Model 203—grey cover & knob). All models have an aluminum knob with an insulating vinyl grip.

205 SERIES—Ideally suited for applications requiring maximum readability, or where large diameter potentiometers are used. ⁵⁄₃₂″ numerals are slightly recessed for protection from glare. Area surrounding the knob is recessed with a fine textured black finish. Friction type locking lever accurately locks dial settings into place.

210 SERIES—Miniature dials that have the same distinctive styling as the 205 Series, yet occupy less than 50% of the panel area. Their small size and excellent readability make them an ideal choice for use with potentiometers having a 1¹³⁄₁₆″ diameter or less. They have die cast zinc case finish with matte black anemel. Brushed aluminum locking lever prevents accidental movement and can be actuated without disturbing the setting.

TAPERS: CARBON ELEMENT

GRAPH EXPLANATION COMPOSITION ELEMENT CONTROLS

Taper S	Straight or uniform resistance change with rotation.
Taper T	Right-hand 30% resistance at 50% of C.C.W. rotation.
Taper V	Right-hand 20% resistance at 50% of C.C.W. rotation.
Taper W	Left-hand 20% resistance at 50% of C.W. rotation.
Taper Z	Left-hand (Log. audio) 10% resistance at 50% C.W. rotation.
Rev. Z	Right-hand 10% resistance at 50% C.C.W. rotation.
Taper Y	Left-hand 5% resistance at 50% of C.W. rotation.

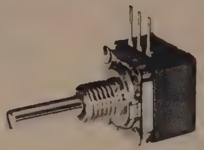
CLAROSTAT THICK FILM CONDUCTIVE PLASTIC (CARBON) POTENTIOMETERS

BUSHING MOUNTED

½" SQUARE MODULAR/0.5 WATT
SERIES 388

The series 388 is a completely new potentiometer with characteristics exceeding those costing many times more. Manufactured in a controlled environment, the process includes exclusive Clarostat TempMaturing™ to insure a reliable, homogeneous and strain-free resistance element. The modular design allowing free interchange of resistive elements. The potentiometers are manufactured to meet MIL-R-94C specifications where applicable.



388N

SPECIFICATIONS

Resistance Tolerance: ±10% up to 500K, ±20% above. **Electrical and Mechanical Rotation:** 295° ± 5°. **Effective Rotation:** 265° ± 5°. **End Resistance:** 4Ω max. linear. **Dielectric Strength:** 750 VAC for 60 sec atm. **Working Voltage:** 350 Vdc across terminals. **Dynamic Noise:** 1.5% total resistance. **Static Noise:** to 30K Ω: −20 DB, 100K Ω: −12 DB, 1 Meg and over: + 3 DB. **Linearity (Independent):** ±5%. **Voltage Coefficient:** .008%/volt (max.). **Rotational Life:** 50,000 cycles. **Power Rating:** .5 watt at 70°C. **Torque Range:** .2 to 4.5 oz.-in. **Stop Torque:** 3 lb. in. **Weight:** .018 lb. (typical). **Functional Output:** Linear. **Insulation Resistance:** 1,000 Meg per MIL std. 202. **Resolution:** Infinite. **Shaft Seal:** Yes. **Corrosion Resistant:** Yes. **Terminal Style:** PC pins.

KIT AVAILABLE
A versatile prototype kit featuring a wide variety of assemblies, will soon be available. Watch for further details.

0.5 WATT/SPECIAL ORDER
SERIES 470

Series 470 is an extremely versatile family of high-quality potentiometers. Its multiple configurations and adaptability to any mounting requirements have established its wide use in industry. Particularly, the Series 470 is applicable to radio, television instrumentation and audio work where low noise, close linearity and long rotational life are required. The Series 470 offers a reliable, homogeneous and strain-free conductive plastic resistive element with 2% dynamic noise and 5% independent linearity.

SPECIFICATIONS

Resistance Range: 150 Ohms to 5 megohms linear; 1K Ohms to 2.5 megohms tapered. **Resistance Tolerance:** Linear up to 500K Ohms, ±10%, Above 500K Ohms, ±20%, Tapers up to 100K Ohms, ±10%, Above 100K Ohms, ±20%. **Linearity:** ±5% Independent. **Power Rating:** Linear—0.5 watts at 40°C., Tapered—0.25 watts at 40°C., Ganged—Panel section is ¾ of single section rating and each additional section is 2/3 of single section rating. Full rating at 40°C derated linearly to zero watts at 120°C. **Electrical Rotation:** 300° ±5° with and without switch. **Tapers:** Right and left hand available. See Chart A. **End Resistance:** Linear Units; 4 Ohms maximum for total resistances up to 250K Ohms, 10 Ohms for resistances 250K Ohms and above. **Dielectric Strength:** 1000 Vac for 60 Seconds at 760 mm Hg., 450 Vac for 60 Seconds at 86 mm Hg. **Working Voltage:** 500 Vdc maximum but power not to exceed rating. **Noise:** 2% of total resistance. 1% available. **Insulation Resistance:** 50 megohms minimum. **Mechanical Rotation:** 300° ±5° without swtich, 330° ±5° with switch, standard. **Stop Torque:** 8 lb.-in. minimum, Standard, 10 lb.-in. minimum, Special. **Operating Torque Range:** Standard bushing each section 0.5 to 6 oz.-in. High torque 6 to 20 oz.-in. Locking bushing 30 oz.-in. minimum with jam nut tightened to 10 lb.-in. **Weight:** .069 lb. **Life:** 50,000 cycles (500 cycles locking bushing types) 10 cycles per minute maximum. **Operating Temperature Range:** −55°C to +120°C.

SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

Note: The Series 470 is available on special order only.

Series RV6 are high-resolution, highly stable potentiometers for applications requiring miniaturization and reliability. Test equipment, industrial instrumentation, military communications and missiles are some of the areas in which this series meets requirements successfully. Commercial version is Series 382 available on special order. Military version Type 63C.

SPECIFICATIONS

Resistance Tolerance: ±10%. **Power Rating:** 0.5 watt at 70°C. Derated to zero power at 120°C. **Electrical and Mechanical Rotation:** 295° ±5°. **End Resistance:** 5 Ω max. up to 750 Ω. 10 Ω max. above 750 Ω. **Functional Output:** Linear. **Dielectric Strength:** 750 Vac for 60 Seconds at ATM. 350 Vac for 60 Seconds 3.44 in. Hg. **Working Voltage:** 350 Vdc maximum, but power not to exceed rating.

Cat. No.	Description
381N	Bushing, Plain, ¼" long. Shaft, ¾" long. FMS SD slotted.
381NS	Bushing (same as 381N) but equipped with a factory attached SPST switch. 1a, 125V (ac or dc).
*381N-Z	Bushing—Z-Taper (see pg. 1)
381L	Locking Bushing, 3/8" long. Shaft, 7/16" long. FMS screwdriver slotted.
D381N	Dual ganged Bushing and shaft same as 381N.

*Note: Insert Resistance value between N and Z for complete Catalog No. eg. 381N-10K-Z.

Series 381, The "Quiet One" is a completely new potentiometer with characteristics exceeding those costing many times more. Manufactured in a controlled environment, the process includes exclusive Clarostat Temp-Maturing(TM) to insure a reliable, homogeneous and strainfree resistance element with 1% dynamic noise and 5% independent linearity. Precision-machine finishing of mechanical parts ensures smoother operation and outstanding mechanical life. Series 381 Potentiometers manufactured to MIL-R-94 specification.

SPECIFICATIONS

Resistance Tolerance: Linear, up to 500K Ω ±10%, above 500K Ω ±20%. Tapers, up to 100K Ω ±10%, above 100K Ω ±20%. **Power Rating (Watts):** 1 watt maximum continuous power rating for linear taper, but voltage not to exceed rating. Full rating at 70°C, derated linearly to zero watts at 120°C. Derate all non-linear tapers by multiplying wattage rating by 0.5. **Mechanical and Electrical Rotation:** 300° ±5° without switch, 325° ±5° with switch. **Dynamic Noise:** Linear single controls maximum initial noise level of 1% of total resistance. Measurement made using a constant current source and oscilloscope detection technique. **Linearity:** ±5% Independent. **Working Voltage:** 350 Vdc across end terminals, but power not to exceed rating. **Effective Rotation:** 270° +0° −10°. **Tapers:** Yes. **Dielectric Strength:** 1,000 VAC for 60 Sec. ATM. **Torque Range:** 0.2-6 oz.-in. **Stop Torque:** 6 lb. min. **Weight:** .017 lb. typical. **Functional Output:** Linear or Taper (see Catalog No's.). **Insulation resistance:** 1,000 Meg Min. **Corrosion Resistant:** Yes.

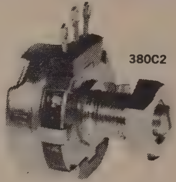
BUSHING MOUNTED

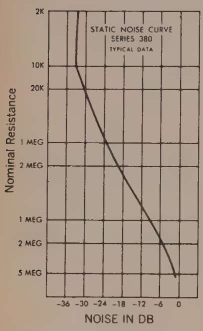
LOW NOISE, LONG LIFE 2 WATT—SERIES 380

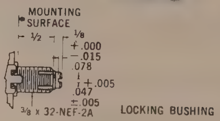
380C1



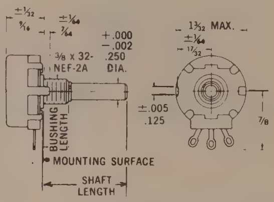
380C2

Like the Series 381 the Series 380 is a "Quiet One". A completely new potentiometer with characteristics exceeding those costing many times more. Manufactured in a controlled environment, the process includes exclusive Clarostat Temp-Maturing$^{(TM)}$ to insure a reliable, homogeneous and strainfree resistance element with 1% dynamic noise and 5% independent linearity. Precision-machine finishing of mechanical parts ensures smoother operation and outstanding mechanical life. Series 380 Potentiometers manufactured to exceed MIL-R-94 specifications. Series 380 C-line Potentiometers feature stainless steel shafts.





LOCKING BUSHING



SPECIFICATIONS

Resistance Tolerance: Up to 1 Megohm ±10%, above 1 Megohm ±20%. **Electrical and Mechanical Rotation:** 312° ±3°. **Effective Rotation:** 270° +10° −0°. **End Resistance:** 4Ω maximum for total resistances up 250K, 10Ω for resistances 250K and higher. **Dielectric Strength:** 1000 Vac for 60 Seconds at ATM pressure. 450 Vac for 60 Seconds 3.4 in. Hg. **Working Voltage:** 500 Vdc across end terminals, but power not to exceed rating. **Power Rating:** 2 watts at 70°C. **Shaft Material:** Stainless steel. **Torque Range:** 1-4 oz.-in. **Operating Temp.:** −55°C to +120°C. **Stop Torque:** 12 lb. in min. **Weight:** .072 lb. (typical). **Functional Output:** Linear. **Insulation Resistance:** 100 Meg. min. **Dynamic Noise:** Linear single controls maximum initial noise level of 1% of Rt. Measurement made using a constant current source and oscilloscope detection technique. **Static Noise:** See Chart. **Linearity:** ±5% Independent. **Voltage Coefficient:** .005%/Volt. maximum. **Rotational Life (Standard):** Rotational life for linear control; 100,000 cycles for units up to and including 100,000 Ohms, except locking type bushing, change not to exceed 5%ΔR, above 100,000 Ohms change not to exceed 10%ΔR.

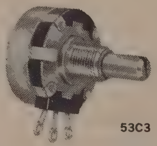
MIL GRADE (STYLE RV4)

2 WATT—SERIES 53

53C2



53C3

A 2-watt potentiometer totally enclosed and sealed against moisture and other environmentals. Meets the need for a high quality resistance device incorporating high-stability under extreme climatic and operational conditions. 1-1/16" diameter and 9/16" deep, brass nickel plated shaft, bushing and stainless steel cover. Terminals, hot tinned.

SPECIFICATIONS (Dimensions same as Series 380)

Resistance Tolerance: Up to 1 megohm ±10%, above 1 megohm ±20%. **Electrical and Mechanical Rotation:** 312° ±3° without switch, 333° ±3° with switch. **End Resistance:** Per MIL-R-94. **Working Voltage:** 500 Vdc across end term, but power not to exceed rating. **Fabricated in accordance with MIL-R-94 Style RV4.** Items not listed are special, prices and information supplied upon request. **Effective Rotation:** 270° −10° +0°. **Dielectric Strength:** 1,000 VAC, 60 Sec. ATM. **Rotational Life:** 25,000 Cycles. **Power Rating:** 2 watt at 70°C. **Torque Range:** 1-4 oz.-in. **Operating Temp.:** −55°C to +120°C. **Stop Torque:** 12 lb.-in. **Weight:** .072 lb. **Functional Output:** Linear. **Insulationg Resistance:** Per MIL-R-94C. **Corrosion Resistant:** MIL-R-94C.

Cat. No.	Description
53C1	2" round shaft FMS; 3/8" long bushing with 3/8 x 32-NEF-2A thread.
53C2	5/8" screwdriver slotted shaft FMS; with a 1/2" split locking bushing.
53C3	7/8" screwdriver slotted shaft FMS; 3/8" long bushing with 3/8 x 32-NEF-2A thread.
53C1SW	Unsealed version of 53C1 available for use with field assembled switches. Order as 53C1 SW see table 1 for switch ordering.
53C1-Z	Same as 53C1 but with Z taper (see chart pg. 2).
53C1-RZ	Same as 53C1 but with Reversed Z taper (see chart pg. 2).
D53C1	Dual ganged. Bushing and shaft same as 53C1.
RV4N	MIL equivalent of Series 53 with plain bushing (see table below).
RV4L	MIL equivalent of Series 53 with shaft lock bushing (see table below).

SLOT SHOWN IN EXTREM CCW POSITION (SLOT IN LINE WITH WIPER)

Cat. No. 383-5 is a new, high-resolution, highly stable potentiometer for applications requiring miniaturization and reliability.

SPECIFICATIONS

Resistance Range: 100 ohms to 2.5 megohms linear, only. **Resistance Tolerance:** ±20%. **Power Rating (Watts):** .375 watt maximum continuous power rating for linear tapers, but voltage not to exceed rating. Full rating at 70°C derated linearly to zero watts at 120°C. **Linearity:** ±10% independent. **End Resistance:** Linear 15 ohms maximum. **Dielectric Strength:** 750 Vac for 60 Seconds at ATM. 350 Vac for 60 Seconds 3.44 in H.g. **Working Voltage:** 350 Vdc maximum, but power not to exceed rating. **Resistance-Temperature Characteristics:** See Chart A. **Mechanical Rotation:** 295° ±5°. **Stop Torque:** 2 in. lbs. maximum. **Torque Range:** 0.5 to 4 oz. in. **Max. No. of Sections:** One. **Weight:** .004 lbs.

High performance potentiometer packaged in a 1/2" diameter housing. Quality construction throughout. Available in two models; Cat No. 57M rated at 1.5 watts at 40°C and Cat. No. 57EJ rated at 2 watts at 70°C. The high-temperature Cat. No. 57EJ features glass-sealed terminals. Both units are corrosion resistant.

Opens new application areas for the inherent advantages of multi-turn potentiometer design. A precise 10-turn potentiometer offering electrical operating characteristics comparable to units costing far more. The Series 62 was designed specifically for the industrial instrumentation market, based upon the setability and resolution of a quality ten-turn potentiometer including better instrument control and settings for all types of electronic equipment.

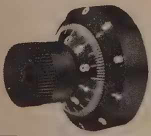
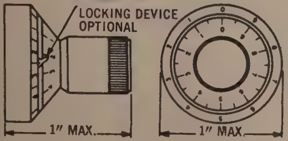
CLARODIALS
TEN TURN CONCENTRIC SCALE DIALS





LOCKING DEVICE OPTIONAL
1" MAX.
1" MAX.

Calibrated dials designed for multi-turn potentiometers up to ten turns or other rotary devices. Requires only one inch of panel space. The knob attaches directly to the shaft, and the body of the dial is mounted rigidly to the panel. Therefore, accurate readings with a ratio of 1,000 to one for ten turns are provided with zero backlash and reading error.

Material is anodized aluminum.

Mounting requirements 1/4" shaft and 3/8" 32-NEF-2A bushing.

Adapter available for 1/8" diameter shaft.

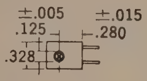
76JA-2	Solder Lug Termination
76JA-3	PC Termination



Super Setability! ... made possible through 10 times the resolution ever offered in this popular trimmer configuration. A new approach has made it possible to incorporate approximately 15 times greater winding length. The net result to the user is greater setability on the production line and in the field. Trimming costs in critical circuits drop. Performance of the circuit improves. The package shrinks in size when the Series 76 replaces other high resolution trimmers of several times the size. Panel mounting assembly available.

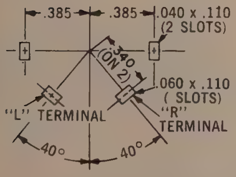
BUSHINGLESS
2 WATT—SERIES U39



Universal "Humdinger" Control 2W. Wire-Wound Series U39 is a shaftless potentiometer with the contact arm grounded to the housing. The design of terminals and mounting tabs, meets the following requirements: Above chassis mounting, as a potentiometer or rheostat; printed circuit mounting, as a potentiometer or rheostat. The terminal layout meets the popular industry standards. A fiber adapter plate is furnished with each control for above chassis mounting. Series U39 is ideally suited for radio and television requirements, as well as many industrial applications. Resistance tolerance ±20%. Linear only.

SPECIFICATIONS

Resistance Tolerance: ±20%. **Effective Rotation:** 220° ±5°. **Power Rating:** 2 watts at 40°C. **Terminals:** PC mount. **Torque Range:** 2-10 oz.-in. **Stop Torque:** 3 in.-lbs. max. **Weight:** .009 lb. (typical). **Functional Output:** Linear. **Insulation Resistance:** Ground to case.

CLAROSTAT CERMET POTENTIOMETERS

BUSHING MOUNTED

1/2" SQUARE MODULAR 1 WATT

SERIES 389

The series 389 is a completely new potentiometer with characteristics exceeding those costing many times more. Manufactured in a controlled environment, the process includes exclusive Clarostat TempMaturing™ to insure a reliable, homogeneous and strain-free resistance element. The modular design allowing free interchange of resistive elements. These potentiometers are manufactured to meet MIL-R-94C specifications where applicable.

Resistance Tolerance: ±10%. **Electrical and Mechanical Rotation:** 295° ±5°. **Effective Rotation:** 250° ±5°. **End Resistance:** 4Ω max. linear. **Dielectric Strength:** 900 VAC for 60 Sec. ATM. **Working Voltage:** 350 Vdc across terminals. **Dynamic Noise:** 3% total resistance. **Static Noise:** 100Ω/sq es −24 DB, 10K Ω/sq es −9 DB, 100K Ω/sq es +1 DB. **Linearity (Independent):** ±5%. **Voltage Coefficient:** .008%/volt (max.). **Rotational Life:** 25,000 cycles. **Power Rating:** 1 watt at 85°C. **Torque Range:** .2 to 4.5 oz.-in. **Operating Temperature:** −55°C to +150°C. **Stop Torque:** 3 lb.-in. **Weight:** .018 lb. (typical). **Functional Output:** Linear or tapered. **Insulation Resistance:** 100 Meg per MIL std 202. **Resolution:** Infinite. **Shaft Seal:** Yes. **Corrosion Resistant:** Yes. **Terminal Style:** PC pins.

Cat. No.	Description
389N	Plain Bushing (3/4" FMS screwdriver slotted shaft with 1/4" plain bushing)
389L	Locking Bushing (7/16" FMS screwdriver slotted shaft with 3/8" locking bushing).
389N-Z*	Z—taper. Same as 389N mounting

*For complete catalog number add resistance value from chart between N- and -Z.

BUSHINGLESS PC MOUNTED

1/2 WATT SERIES 389-5

CAT. NO. 389-5 and 389-5-Z

The potentiometer 389-5 and 389-5-Z are similar in characteristics to the 389 Series (see above). However, they are designed for bushingless mounting on a PC board and have a flush screwdriver slot for adjustment. Check the appropriate specifications for the 389 series. Note that 389-5 and 389-5-Z have power ratings of 0.5 watt at 85°C.

CLAROSTAT POWER RESISTORS

FIXED RESISTORS TUBULAR

VITREOUS ENAMEL/GREEN OHM V™

Vitreous enamel, wire-wound power resistors are engineered to meet highest quality specifications. Wire windings are finest grade resistance alloy. Designed for utmost reliability and stability under adverse conditions. Teal green enamel finish withstands over-heating without peeling or cracking. Tolerance, ±5% except values under 1 ohm, ±10%. VPR types (up to 20 watts) have wire lead and lug terminals. VP and VK types (25 watts and up) have lug terminals, and mounting bracket.

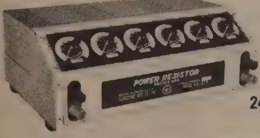
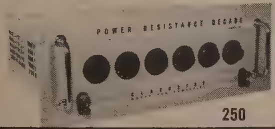
POWER RESISTOR DECADE BOX



240C



250

The Resistance Decade Box, Model 240-C for bench use — Model 250 for rack mounting, provides any resistance from 1 to 999,999 ohms for working circuits at the flip of a switch. Six front-panel dials enable selection in 1 ohm increments, the total value being read directly from the dial. Each decade has a power rating of 225 watts maximum, 1,000 Vdc or 660 Vac maximum.

Resistance changing switches are of the type that prevent a resistance breakdown between steps, thus protecting delicate meters and measuring instruments in the circuit. Knobs indicate the resistance value being used at a glance.

Clarostat GREENOHM Power Resistors are used throughout. These components are wire-wound power resistors on ceramic tubes and coated with an exclusive Clarostat inorganic cold-setting cement, providing the most rugged, long-lasting, trouble-free power resistor available. The resistors are mounted in rigid metal supports. Overall length: 240C: 13″ long x 8½″ deep x 5¾″ high, weight 11½ lbs. 250: 19″ long x 13¾″ deep x 7″ high (fits in standard 19″ relay rack), weight 18½ lbs.

Suggested Uses: Resistance determination, Load Resistance, Meter Multiplier, Calibrating Meters, providing any desired ohmage as a universal power resistor.

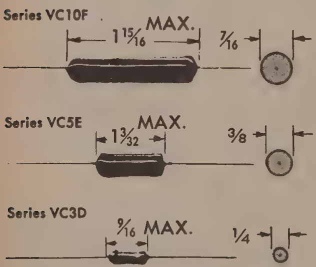
FIXED RESISTORS AXIAL LEAD

AXIAL LEAD 3.25, 6.5 AND 11 WATTS —SERIES VC



Lead Length: 1½"   Lead Diameter: .032

Axial lead resistors are particularly adapted to printed circuit, terminal board, and point-to-point wiring applications. These resistors save considerable space because of the elimination of mounting brackets and terminal lugs. Standard resistance tolerance is ±5% for 1 ohm and higher and tolerance below 1 ohm is ±10%. Finished with Clarostat's new vitreous shade of teal green.

PRECISION RESISTANCE DECADE BOX

MINIATURIZED CLARO-DEC

The most flexible innovation yet in precision resistance decade boxes, the Claro-Dec serves many applications with all the versatility needed for the job. Claro-Decs (within established parameters of current) are used whenever accurate steps of resistance values between .1 ohms and 900K ohms, ±1%* are required. Selection of desired steps of resistance is accomplished by insertion of a banana plug into the proper, marked front panel hole on the unit. Individual or multiple Claro-Dec units are flush panel or breadboard mounted with equal ease. Units may be physically ganged by sliding the molded-in tongue-and-groove together and electrically series connected with a supplied wire jumper or accessory banana plug.

Model	Total Res. of Decade (Ohms)	Resistance Per Step (Ohms)	Accuracy (+C)*	Maximum Current
260-1	0.9	0.1	±5%	1 Amp
260-2	9	1.0	±1%	350 Ma
260-3	90	10	±1%	100 Ma
260-4	900	100	±1%	35 Ma
260-5	9K	1K	±1%	10 Ma
260-6	90K	10K	±1%	3.5 Ma
260-7	900K	100K	±1%	1.0 Ma

*C-Contact resistance, .005-.03 ohms, typical, .01 ohms.

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

CARTER POTENTIOMETERS

RECTILINEAR / WIRE WOUND / CONDUCTIVE PLASTIC

Carter Manufacturing Corp. is an organization of engineers and craftsmen specializing in the unusual in potentiometers and switch engineering and their manufacture. Since our founding in 1955 we have developed full capability in wire wound and conductive plastic potentiometers. We welcome the opportunity to work with you for your unique requirements as well as standard commercial or mil types.

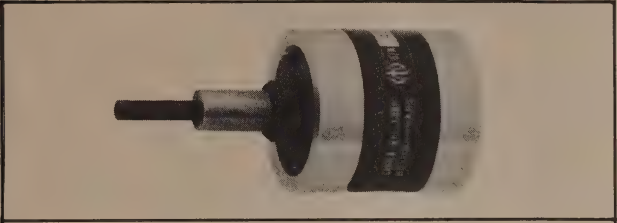
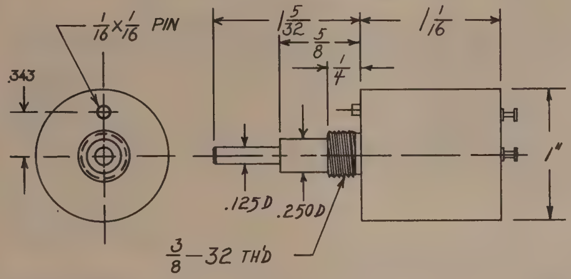
CARTER
MANUFACTURING CORPORATION

VERNIER DRIVE potentiometers

TYPE CP651 1" DIA.
conductive plastic standard

TYPE 651 1" DIA.
wire wound available





These specifications are Carter Manufacturing Corporation standards, however, they do not express the limit of our capability. Frequently applications call for requirements not illustrated by the catalog sheet. Carter welcomes the opportunity to supply your unique needs.

Carter offers the greatest versatility in instrument potentiometers featuring dual control with a direct drive outer shaft and a vernier drive inner shaft. A directly calibrated dial can be mounted on the outer shaft and fine smooth control obtained on the inner shaft.

Vernier ratios of 10:1 and 5:1 are available as standard. The resistance elements are conductive plastic but wire wound can be made. Functions are linear as standard but non-linear can be designed.

These potentiometers are ideal for instruments where fine, smooth control is required such as RC tuning in signal generators, variable frequency filters and wherever fine rotating control of output is desired.

The types and sizes shown are present standards but the dual drive feature can be incorporated into your custom designed potentiometers.

ELECTRICAL SPECIFICATIONS

ELEMENT:
Conductive Plastic
RESISTANCE VALUES:
1000 Ω, 2500Ω, 5000Ω standard
Other values available
RESISTANCE TOLERANCE:
±10%, tighter tolerances available
FUNCTION:
Linear ±2% standard, ±1% & .5% available
non-linear available

ELECTRICAL ANGLE:
300° ±3° standard
Any angle less than 345° available
ROTATION:
Continuous, stops available
TAPS:
None. Available at center or other angles
POWER:
1W at 85°C derated to 0 at 125°C

GENERAL SPECIFICATIONS

HIGH VOLTAGE BREAKDOWN:
1000 VRMS
AMBIENT TEMPERATURE RANGE:
−50°C to +125°C
TEMPERATURE COEFFICIENT
−50°C to +85°C −200 PPM MAX.
+85°C to +125°C −300 PPM MAX.

LOAD LIFE:
2000 Hours
SERVICE LIFE
1,000,000 Revolutions
ENVIRONMENTAL PERFORMANCE AND OTHER DESIGN CRITERIA PER MIL-R-39023

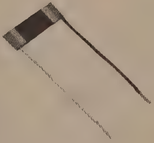
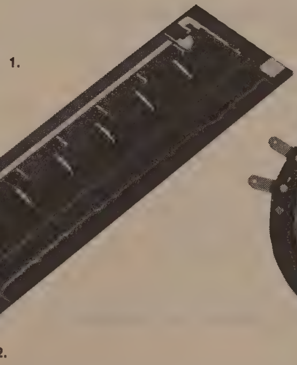
Potentiometers Elements

For those applications in which space and/or cost is at a premium C.I.C. can provide custom resistive elements with wiper assemblies designed for use as position sensors in high performance strip chart and graphic recorders, DC torquers, process controllers, accelerometers, gyros, pressure transducers, electronic weighing instruments, volume controls, and studio broadcast equipment. These elements are available with track lengths to 12″ with linear and non-linear outputs including sine-cosine and log functions to accuracies of 0.001″. Low noise is assured with mirror-smooth finish. Wire leads, terminals or special mounting features are readily provided.

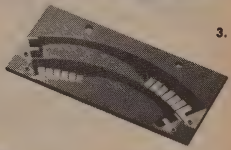
The following elements are typical of units recently produced. For technical details including standard element specifications and pricing information, please contact our sales engineering staff.



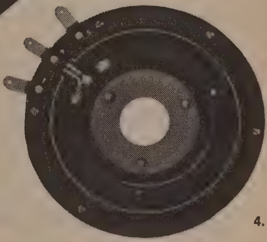
1.



2.



3.



4.

1. Pointer or stylus pen feedback position with ½″ track accurate to 0.25% linearity with over 25 million cycles life.
2. 100db function generator over 5″ track for graphic recorder accurate to ±0.4db with linear retransmitting element.
3. Sine and cosine elements for quadrasonic panner used in studio recording.
4. Low torque element mounted on scale pointer shaft indicates weight to better than 0.02%.

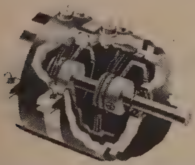
5. Immersion proof – sealed for board washing, leak tested in 70° C water
6. Immersion proof per MIL-R-22097



PRECISION POTENTIOMETERS – SINGLE TURN

• Precision machined anodized aluminum cups • Molded Diallyl Phthalate liners • Welded tap and terminal construction • Precious metal wipers and slip rings • Flush clamp bands • Gold-plated terminals • Precision sleeve or ball bearings • Centerless ground stainless steel shafts • Single or ganged units.

SPECIFICATIONS:
- Meet requirements of MIL-R-12934 and NAS-710
- Eight physical sizes, 3/4″ to 3″ diameter
- Electrical angles and functions to specification
- Special mechanical configurations available

DEPENDABLE DALE® TRIMMERS

LOW COST - HIGH PERFORMANCE
LOW PROFILE - CERMET

FEATURES

- All-metal screw and one-piece clutch prevents overtravel damage
- Patented side collector provides excellent setting stability by allowing use of larger element
- A full watt in less space at 70° C
- Three terminal spacings identical to larger models.
- Sealed for production soldering
- 25-turn screwdriver adjustment for better adjustability
- 1% contact resistance variation

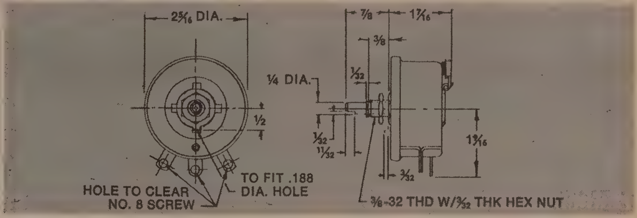
3500	.119	510
5000	.100	442
8000	.079	560
10000	.070	567



FEATURES:
- Vitreous enamel bonds core and base together for uniform heat dissipation and structural integrity.
- Wiper tracks are buffed and polished to assure smooth rotation and uniform wiper contact.
- High strength ceramic hub is used to insulate the shaft and bushing from live parts.
- Wiper design assures minimum backlash.
- The cores on larger rheostats are enameled prior to winding to increase core strength and impove bond between wire and core.
- Rheostats are provided with three terminals to allow use as potentiometers.
- UL approved.
- All wattage sizes are available to MIL-R-22.
- Welded terminals and termination guarantees positive electrical connections.
- Available with quick connect terminals.

SPECIFICATIONS:
- Resistance Tolerance ±10% . . . Closer Tolerances Available.
- Running Torque - .25 To 2 Inch Pound.
- Rotation 300° ±5%.
- Standard Resistance 1 - 10,000 Ohm.
- Mounting For Panels Up To ¼″.

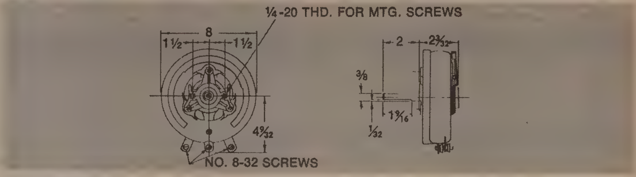
1000	.707	771
1500	.577	935
2000	.500	980
2500	.447	968



FEATURES:

- Vitreous enamel bonds core and base together for uniform heat dissipation and structural integrity.
- Wiper tracks are buffed and polished to assure smooth rotation and uniform wiper contact.
- High strength ceramic hub is used to insulate the shaft and bushing from live parts.
- Wiper design assures minimum backlash.
- The cores on larger rheostats are enameled prior to winding to increase core strength and impove bond between wire and core.
- Rheostats are provided with three terminals to allow use as potentiometers.
- UL approved.
- All wattage sizes are available to MIL-R-22.
- Welded terminals and termination guarantees positive electrical connections.
- Available with quick connect terminals.

SPECIFICATIONS:

- Resistance Tolerance ±10% . . . Closer Tolerances Available.
- Running Torque - 4.5 To 7 Inch Pound.
- Rotation 325° ±3%.
- Mounting For Panels Up To 1¼″. Two ¼″-20 By 1½″ Flat Head Screws Are Supplied.
- Standard Resistance 1 - 2500 Ohm.

HOW TO ORDER MEMCOR RHEOSTATS

1. Give Memcor type and wattage
   i.e. R25 = Rheostat 25 watt
2. Give ohmic value and resistance tolerance required
3. Specify if any mounting hardware is required
4. Specify if any other special features are required
   i.e. Special tapers for rheostats

If there are special requirements, a two or three digit alpha call out will appear after the ohmic value; these digits will be assigned by the factory.

PRECISION POTENTIOMETERS

PRODUCTS AVAILABLE FROM FACTORY STOCK
VOLUME PRODUCTION CAPABILITIES • HYBRID DESIGNS

IMPORTANT

The products shown on the next three pages are low cost precision conductive plastic potentiometers which are available from factory stock. These products are not sold through distributors. Deliveries range from a few days to two weeks.

The last two NEI pages show our custom design capabilities in wirewound and conductive plastic.

In both custom and standard products, NEI has volume production facilities capable of handling millions of units.

"HYBRID" PRECISION POTENTIOMETERS

Since 1958, NEI has been supplying precision potentiometers with either conductive plastic or wirewound elements, depending on each customer's requirements. Each type of element excels in certain characteristics. In general, wirewound elements have lower temperature coefficients of resistance, lower end voltages, and closer as-manufactured linearity. Conductive plastic elements have better resolution (virtually infinite); they can be trimmed to achieve superior linearities because of their infinite resolution; and the smoother surface and higher wear-resistance of the conductive plastic materials yield at least an order of magnitude superiority in mechanical life. (There are additional differences affecting performance and manufacturing cost, but they relate primarily to the design philosophies and manufacturing techniques of the various manufacturers.)

Usually, customer needs can be met by one or the other ... conductive plastic or wirewound technology. Occasionally, however, a requirement comes along which calls for performance characteristics achievable only by using a combination of the two technologies. Until fairly recently, this was not feasible, and the customer had to settle for the better of the two. Over the past few years, techniques have been developed which not only make this "hybrid" approach feasible, but could make it one of the most important developments in the history of potentiometers.

NEI's debut in the hybrid field involved certain types of recorders and x-y plotters that had been using wirewound potentiometer elements for many years. The recorder manufacturers knew that conductive plastic elements would improve the performance of their instruments; however, replacement of the wirewound elements would have necessitated complete redesign of the span-adjusting circuits in the instruments, using active as well as passive elements. NEI developed a means of coating the wirewound elements with conductive plastic in such a way that the superior temperature coefficient characteristics of the wire were retained, while overall performance was improved through the infinite resolution and superior wear characteristics of the conductive plastic.

"Hybrid" elements have since been developed which combine the better features of each technology with virtually no degradation of performance from the better of the two. These elements yield combined performance characteristics which cannot be attained through any "pure" element technology.

Currently, all "hybrid" elements are produced by coating the wiper path of a wirewound element with conductive plastic. The materials and geometries are usually chosen so that nearly all the current flows in the wirewound element, thereby yielding performance similar to that of "pure" wirewounds for most electrical characteristics except noise and resolution. Noise, resolution, and wear characteristics are similar to those for "pure" conductive plastic elements.

Resistance per inch of stroke length:	50K ohms per inch maximum
Stroke length, Standard:	up to 30"
Special:	up to 100"
Number of Elements:	single or dual
Total Resistance Tolerance:	±10%
Independent Linearity, Standard:	±1%
Special:	±0.1% (for stroke lengths over 4")
Power Rating:	0.5 watts per inch stroke at 25°C
Resolution:	essentially infinite
Insulation Resistance:	1000 megohms minimum

MECHANICAL

Case Width, Standard:	1" or 1¼" square & ½" O.D. round
Starting Torque:	4 oz.-in.
Taps:	available (specify location & type i.e.: current or voltage)
Mounting:	flanges or brackets available
Connectors:	available

Note: The shaft can be rotated without detrimental effect to the unit.

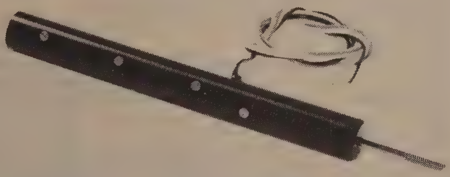
OTHER LINEAR MOTION DESIGNS AVAILABLE

HIGH RELIABILITY DUAL-ELEMENT UNITS

Originally designed to be a rocket propellant valve position monitor, this unit has two potentiometer elements (one for control and one for telemetry), plus a single-pole double-throw switch. Linearity tolerance is only ±0.001" and position reference must be maintained after repeated linear shaft accelerations of 3000 G's. 24 were used in each rocket.

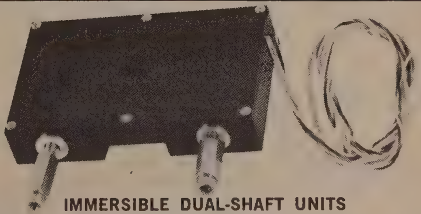
MINIATURE DOUBLE-ENDED UNITS

LMFL-101 Dimensions: ¼"W x 5⁄16"D x 1¼"L. This conductive plastic design features a double-ended shaft extension and can be actuated from either end, sensing a stroke length of 0.18". High accuracy, long life and infinite resolution characterize this unit. Total resistance is 10K ohms.



WIREWOUND ROUND CROSS-SECTION UNITS

LMWS-205 This wirewound unit is typical of linear motion units designed to meet specific configuration requirements. It features a precisely located center tap, a resistance of 2K ohms ±5%, 0.1% resolution, and an absolute linearity of 0.5%. Mechanical stroke length is 2".



IMMERSIBLE DUAL-SHAFT UNITS

LMFT-121 Dimensions: 1¾"L x 2⅞"W x ½"D. This unique package was designed specifically for total immersion in water. It features two separate elements independently actuated. Both are center tapped, with leads provided. Total resistance is 5K ohms with 1% accuracy and ¾" stroke length.

PRECISION POTENTIOMETERS

CUSTOM DESIGNS
SINGLE-TURN PRECISION WIREWOUND TYPES

RELATIVE MERITS OF CONDUCTIVE PLASTIC AND WIREWOUND

The major advantages of conductive plastic potentiometers over wirewounds are infinite resolution and longer life. In most other respects, the two types are comparable. NEI has made it a strong point over the years to maintain **balanced** capability in conductive plastic and wirewound potentiometers. Each has its advantages in given applications, and NEI is the **only** company that can objectively recommend and supply either type.

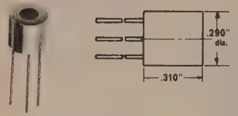
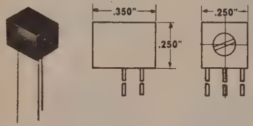
Minelco Miniature Trimmer Potentiometers

Minelco Miniature Trimmers are recognized as the smallest potentiometers in the world. They are available in a variety of mountings, termination and adjusting styles, and satisfy most installation requirements. They meet all applicable environmental specifications for military systems. Because of their small size, lightness of weight, sturdy construction and high reliability, these potentiometers lend themselves to airborne and space exploration applications.

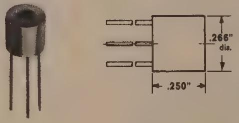


Model MP2

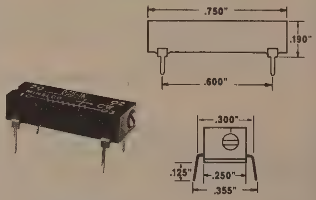


Model MP5

Model MF2
Model MF2S



Model DC5
Model DW5



Models MP2 and MP5
WIREWOUND

Designed for printed circuit mounting and utilize a precious metal alloy wiper. Both are single turn units that rotate 360 degrees mechanically, are O-Ring sealed and humidity sealed. Standard resistance values range from 20 to 15K ohms.
Model MP2 is a top adjustment trimmer.
Model MP5 offers right angle adjustment.
See Bulletin TP-11 for detailed specifications.

Models MF2 and MF2S
METAL FILM

These Metalic Film Trimmers are designed for printed circuit use. They are the smallest trimmer available incorporating the following features in a micro-miniature package: infinite resolution, temperature coefficient <100 ppm, 10 to 100K ohms standard resistance values, and a .250'' x .270'' size.
Model MF2 rotates 360° continuous.
Model MF2S rotates 300° with stop.
See Bulletin MF2 and MF2S for detailed specifications.

Models DC5 and DW5
CERMET and WIREWOUND

Cermet and Wirewound trimmer pots can be manually or automatically inserted. They are sealed against humidity, liquids, potting and soldering compounds. Operating temperatures range from -55°C to +125°C, with a T.C. of 50 ppm/°C on Wirewound and 100 ppm/°C on Cermet. Standard resistance range: 10 to 2 megohms. Designed with stand-off for more efficient circuit board cleaning.
See Bulletins TP14 and TP15 for detailed specifications.

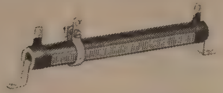
OHMITE® dividohm® type 210 adjustable vitreous enameled resistors

SERIES 210



"Dividohm" resistors make ideal voltage dividers for original equipment and replacement in transmitters, rectifiers and other apparatus. Such tapped "bleeders" are made by using one or more adjustable lugs, as required. "Dividohms" are also handy for obtaining odd resistance values, for adjusting circuits, and for use on equipment which must be set to meet various line voltages.

"Dividohm" resistors are vitreous enameled resistors on which a narrow strip has been left uncovered to expose a portion of each turn. Contact to any wire in this strip is made by an embossed contact on the adjustable lug (supplied).

WATT RATING: **The stated wattage rating applies only when the entire resistance is in the circuit.** When the adjustable lug is set at an intermediate point, the wattage rating is reduced in approximately the same proportion, i.e., if the lug is set at half the resistance, the wattage is reduced by one-half. A safe rule to follow is to make sure that the maximum rated current is not exceeded. This should be carefully checked particularly if the resistor will be used as a voltage divider with several adjustable lugs. Resistance tolerance is ±10% for the total resistance value.

* Mounting brackets are automatically supplied in individual unit packs; supplied only when specified in bulk packs.

[1] Popular items appear in BOLD print and are usually in stock at authorized Ohmite stocking distributors. Items in LIGHT FACE print are available from stocking distributors but are not normally stocked in depth. Parentheses indicate non-stock standard items subject to a minimum handling charge per item.

adjustable lugs

One "Screw Driver Type Adjustable Lug" is supplied with each unit. Lugs with a silver contact button can be ordered from the table shown below.

MOVING THE LUGS: Lugs always should be loosened completely before moving and not moved except while the current is off, in order to protect the exposed wire from mechanical or electrical injury and to protect the operator from dangerous voltages.

STANDARD

Core Diam. Inches	Screw Driver Type New Cat. No.	Screw Driver Type Old Cat. No.	Bakelite Knob Type New Cat. No.	Bakelite Knob Type Old Cat. No.

¾	2127	2166	2128	2167
1⅛	2135	2170	2136	2171

This adjustable lug, while is illustrated at left, features two advantages — ease of adjustment and less chance of damaging the resistance wire while moving lugs. Available for 1⅛" cores.
Catalog No. **2160**

OHMITE® vitreous enameled rheostats (potentiometers)

Now, Ohmite offers TWELVE sizes in its line of famous rheostats.

In all Ohmite rheostats, the resistance wire is wound on a solid ceramic core. The turns are locked in place with tough, protective vitreous enamel or Ohmicone® silicone ceramic. Pivoted, universal action mounting of the brush, assures perfect contact. Metal-graphite contact brushes, varied to fit current and resistance, insure good contact with negligible wear of the wire. Terminals at each end of the winding permit connection of the unit as a potentiometer.

Model C
7½ Watts

NOW, FOR ITS RATING, INDUSTRY'S SMALLEST RHEOSTAT!

Items in LIGHT FACE print are available from stocking distributors but are not normally stocked in depth. Parentheses indicate non-stock standard items subject to a minimum handling charge per item.

OHMITE® molded composition potentiometers

STYLE CMU MIL STYLE RV4N

Ohmite molded composition potentiometers (Type AB) provide high quality and dependable performance.

Because the resistance element is a thick, solid-molded ring, longer life and smoother operation are obtained. This is due also to the molded composition contact. Units are dust and splash proof, fungus and corrosion resistant and meet the requirements of military specification MIL-R-94.

STOCK "POTS" — MIL Units are stamped with MIL and Commercial Designations.

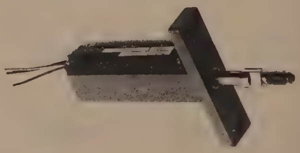
SPECIAL DESIGNS



The Spectrol group offers a unique capability in providing special designs to meet individual customer requirements and has an engineering and manufacturing record for specials that is unsurpassed in the industry. Unlimited options are available on the basic models listed in this Short Form Catalog In cases where required, completely special designs are created.

Non-standard configurations, non-linear functions, spring return mechanisms, special torque devices, detents, sector potentiometers, linear motion potentiometers, concentric shaft controls, clutch–brake mechanisms and many other specials have been furnished.

Contact your Spectrol representative for further information.

SUBMINIATURE SWITCHES

Model 87-11-XX

Model 87-21-XX

Model 87-31-XX

MODEL NO.[1]	NOMINAL DIA. (INCHES)	SWITCH ACTION	CONTACT CURRENT RATING	LIFE AT RATED CURRENT	CONTACT RESISTANCE (OHMS)	DESCRIPTION	U.S. 50 PC. UNIT PRICE*
87-11-XX	.500	Positive Detent, 36° Indexing, Stops	250MA @ 28VDC	4,000 Switching Operations, Per Position	.05 Maximum	Screwdriver Adjust	3.25
87-21-XX	.550	Positive Detent, 36° Indexing, Stops	250MA @ 28VDC	4,000 Switching Operations, Per Position	.05 Maximum	Knob Adjust	3.80
87-31-XX	.500	Positive Detent, 36° Indexing, Stops	250MA @ 28 VDC	4,000 Switching Operations, Per Position	.05 Maximum	Bushing Panel Mounting	4.20

TYPICAL SWITCH APPLICATIONS

- Logic switching.
- Internal switching device for optional equipment add-ons.
- Test point switching.
- Adapting main-frame computers to peripheral equipment.
- Standardizing printed circuit boards.
- Selecting operational voltages.
- Selecting calibration resistors.

TRW® IRC POTENTIOMETERS

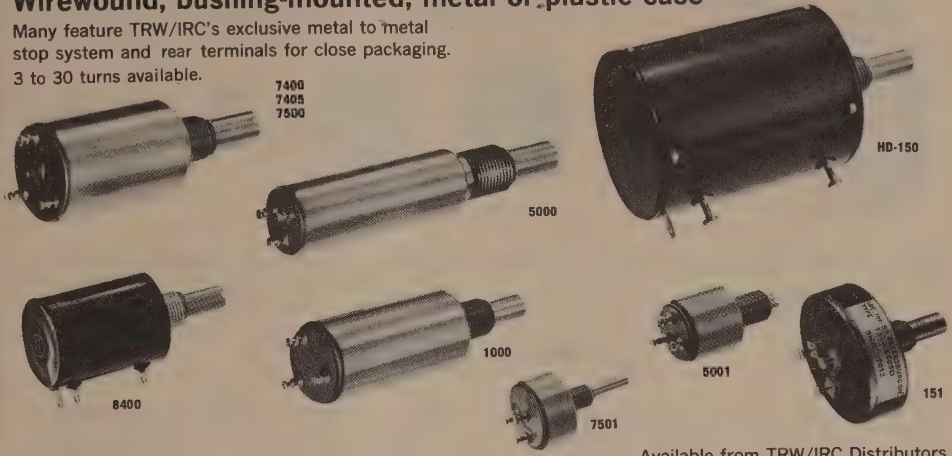
PRECISION SINGLE TURN and MULTI-TURN POTENTIOMETERS

Wirewound, bushing-mounted, metal or plastic case

Many feature TRW/IRC's exclusive metal to metal stop system and rear terminals for close packaging. 3 to 30 turns available.



Available from TRW/IRC Distributors

REVODEX® TURNS COUNTING DIALS

Eliminate reading errors.

RD-400
Series
1″ Dia. 10 Turns

RDK-400
Series
1″ Dia. 15 Turns

Revodex® Dials are adaptable to all IRC Precision Potentiometers without need for extra panel holes. Life tested for one quarter million cycles. Available in black or clear anodized finish, with or without lock.

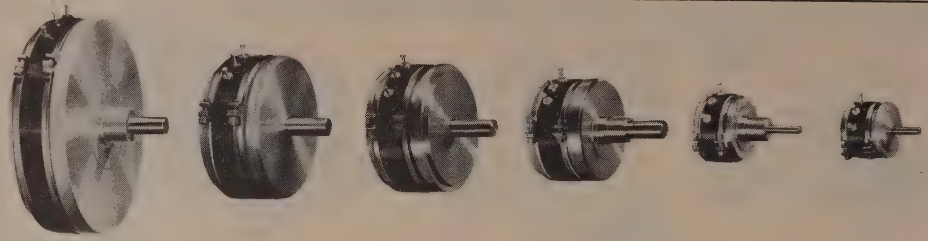
TRW/IRC POTENTIOMETERS, an ELECTRONIC COMPONENTS DIVISION OF TRW INC. 2801 — 72nd St. North, ST. PETERSBURG, FLA. 33733 (813) 347-2181 TWX 810-863-0357

For your local distributor, see EEM pages 2-898 and 2-899.

TRW® IRC POTENTIOMETERS

PRECISION POTENTIOMETERS

7/8″ to 3″ Diameter 1 to 6 Watts



These high performance devices will equal or exceed the appropriate military specifications, as well as those of competitive devices.

Factory services will supply a wide range of mechanical, electrical and environmental modifications. Standard options include special shafts, shaft seals, stops, anti-rotation pins . . . multicup assembly, voltage taps, 1% T.R. tolerance and independent linearity as low as 0.1%.

ELECTRICAL CHARACTERISTICS

Resistance Tolerance: ±3%
Effective Electrical Angle: 350° ±2°
End Settings: 1Ω or 0.1% whichever is greater
Noise Ohms ENR: 100 maximum
Dielectric Strength: MIL-R-12934
Sea Level: 1,000 volts AC minimum
Insulation Resistance, 500 volts DC: 1,000 megohms min.

MECHANICAL & PHYSICAL CHARACTERISTICS

Mechanical Angle: Continuous
Shaft Runout: .001 in. (.025mm) T.I.R.
Shaft End Play: .005 in. (.127mm) T.I.R.
Shaft Radial Play: .002 in. (.051mm) T.I.R.
Pilot Surface Runout: .0015 in. (.0381mm) T.I.R.
Lateral Runout: .002 in. (.051mm) T.I.R.
Rotational Life: 1,000,000 shaft revolutions

MECHANICAL & PHYSICAL CHARACTERISTICS (Cont'd)

Moment of Inertia: 16.0 gm cm^2
Ganging: 15 cups maximum
Terminals: Gold plated turrets

ENVIRONMENTAL CHARACTERISTICS

Operating Temperature Range: −65°C to 125°C
Temperature Coefficient of Wire: 20 ppm/°C maximum
Humidity: MIL-R-12934, humidity cycling
Vibration: MIL-R-12934, high frequency
Wiper Bounce: 0.1 millisecond maximum
Wiper Shift: 1.0% maximum
Shock: MIL-R-12934, 100G
Wiper Bounce and Wiper Shift: Same as vibration
Rotational Load Life: MIL-R-12934 par. 4.6.20.2, 1,000 hrs.
Resistance Shift: 5.0% maximum
Salt Spray: MIL-R-12934

PRECISION TRIMMERS — HIGH PRECISION

Vishay Bulk Metal® trimmers feature a unique combination of precision, stability, TCR, resolution and setability not available elsewhere. These trimmers are designed to conform to Mil-R-39035, types RJR12 and RJR26.

1200 Series
1¼″ rectangular

1240 Series
¼″ Square

Model	Description	Term Style	Mil Style	Resistance	Tol	TCR (ppm/°C)	Power	No. of Turns

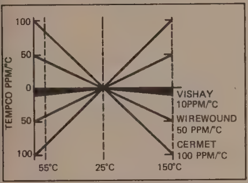
1240X	¼″ Square Edge Mt. Side Adj.	TO-5 Pins	RJR26	5Ω to 5K	5%	10	¼ w @ 85°/C	20
1240W	¼″ Square Edge Mt. Top Adj.	TO-5 Pins	RJR26	5Ω to 5K	5%	10	¼ w @ 85°/C	20
1240P	¼″ Square Side Adj.	TO-5 Pins	RJR26	5Ω to 5K	5%	10	¼ w @ 85°/C	20

THE BEST TEMPCO

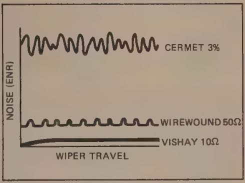
10 ppm/°C



Self compensating characteristics are inherent in the proprietary Bulk Metal® process and produce a dome-shaped T.C. curve with a typical TCR of 5ppm/°C (absolute maximum TCR of 10ppm/°C for all values).

THE LOWEST NOISE

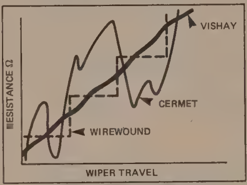
10 Ω ENR



A multi-fingered precious metal alloy wiper in contact with the highly conductive surface of multiple resistance paths virtually eliminates both dynamic noise and catastrophic failures.

THE BEST RESOLUTION SETABILITY

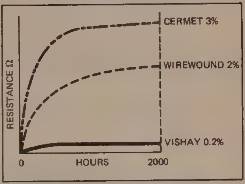
0.05%



The Vishay Bulk Metal® process and the unique patented design assures an accurate setability of less than 0.05% regardless of value while wirewound technology ranges from 1.55% to 0.25%.

THE BEST LOAD LIFE

0.2 %



Only the Vishay Bulk Metal® element can provide a stability of 0.2% max. △R through a 2,000 hour load life.

REON POTENTIOMETERS — ½″ DIA. HOT-MOLDED CARBON

Reon hot molded carbon potentiometers provide stepless and infinitely adjustable resistance values. These lightweight units are made with a unique one-piece cast aluminum alloy housing which provides for their ruggedness and excellent heat dissipating characteristics.

A special carbon collector brush is designed to provide for minimum element wear, long rotational life, and low operating noise.

ELEMENT:
½″ diameter molded carbon

RESISTANCE RANGE:
100Ω to 5 Megohms

TOLERANCE:
10%, 20%

ROTATION:
295° ±5°

RESOLUTION:
Infinite

END RESISTANCE:
Less than the requirements of Mil-R-94 D

NOISE:
3% max., 1% avg.

INSULATION RESISTANCE:
100 Megohm min.

DIELECTRIC WITHSTANDING VOLTAGE:
750 Vrms for 1 min at Atmospheric pressure

RESISTANCE TAPER:
A, B, C, D, E, F

POWER RATING:
RV6, B Series 1/2W at 70°C
H, CL, CK Series 1/4W at 70°C
Derate linearly to 0 W at 120°C

TERMINAL TYPES:
RV6, B Series — Lug Type
H Series — $\frac{5}{64}$″ PC Pin Type
CL, CK Series — $\frac{3}{16}$″ PC Pin Type

SHAFTS:
RV6, B Series — Stainless Steel slotted (⅜″ to 1″)
CL Series — Plastic screwdriver adj.
CK Series — Plastic thumb knob adj.
H Series — Stainless Steel slotted ($\frac{3}{32}$″)

STANDARD SHAFT OPTIONS:
⅜″ (slotted) Military "SL," Reon "S12"
½″ (slotted) Military "SB," Reon "S16"
⅝″ (slotted) Military "SA," Reon "S20"
⅞″ (slotted) Military "SD," Reon "S28"

STANDARD BUSHING OPTIONS: (Plain and Waterseal)
¼″ Military NA, SA, Reon BA2B, BS2B
⅜″ (Locking) Military None, Reon BL3B
½″ (Locking) Military LA, TA, Reon BL4B, BT4B

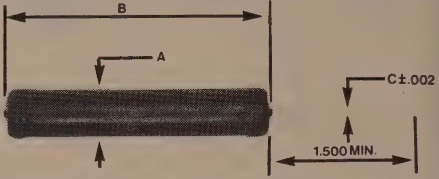
TYPE EL silicone power



MEET OR EXCEEDS MIL-R-26

Silicone coated units with axial leads provide maximum power dissipation using the smallest package.

These may be made using standard inductive winding or non-inductive winding. Care must be taken when specifying non-inductive winding as it is possible to achieve only one half the resistance value specified for inductive winding.

A cost savings may be realized as compared to many other precision type units.

Resistance tolerances to 0.05% are available in this series.

Same derating as shown on opposite page.

Units are manufactured using stainless steel end caps, all welded construction and high quality resistance wire.

Coating is of high quality silicone to withstand high temperature operation.

Standard tolerances and temperature coefficient as well as specials are available.

Units are supplied with axial leads.

Non-Inductive (Aryton-Perry) specify as "BLN". Maximum resistance (per chart below) would have to be divided by two.

TYPE EH chassis mount aluminum housed

All welded construction

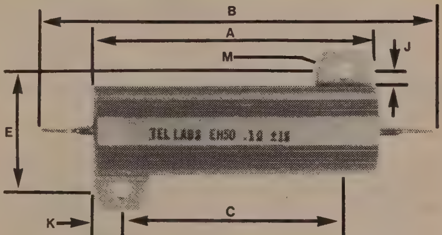
Special molding compound and process assures positive transfer of heat to the case and mounting chassis.

Resistance ranges — per chart below and lower values upon investigation.

Tolerances — .01% thru 5% — close tolerances on low ohms per application only.

For Non-Inductive, add "N" to style number. Maximum resistance value must be decreased by at least one half of maximum value listed in chart.

Units manufactured to meet or exceed the requirements of MIL-R-18546D.



Also available Non-Inductively Wound

TYPE CR CA CL series

CERAMIC CORE RESISTORS
"CR" Ceramic Radial Leads
"CA" Ceramic Axial Leads
"CL" Ceramic Lugs

Ceramic spool type unit. Windings sealed in varnish. Hole provided for screw mounting. Operate from -65°C to 105°C. Inherently good stability.

Excellent for use under laboratory conditions and most commercial applications.

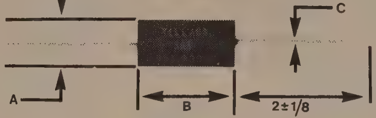
TYPE SA epoxy



DESIGNED TO MEET OR EXCEED MILR93D
All units represented may be modified for minimum inductance and capacitive effects at frequencies above the audio range. Rise and decay time characteristics are measured from 10% to 90% of peak pulse amplitude with a 100 kilocycle pulse input.

Temperature coefficients are available to 0 ± 4PPM/ °C. and T.C. matches are available to 2PPM/°C.

Stabilities of 0.005% per year are available on a production basis.

50GS	Extra Long Needle Nose, Coiled Spring	5¾"	6.80

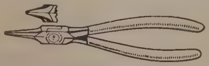
Specially Designed ELECTRONICS PLIERS

Four matched, long-reach pliers with precision matched jaws, hand honed cutting edges. Drop forged of special analysis steel, properly heat treated. Polished finish. Smooth, dipped plastic, blue grips.

No.	Size	Net
718G	8"	$6.00
728G	7½"	7.00
738G	8"	6.00
748G	8"	6.00

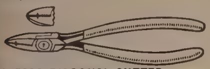
NO. 718G FLAT NOSE PLIERS

Precision-matched jaws give firm grip in hard-to-reach places.



NO. 738G ROUND NOSE PLIERS

You can pick up a hair with these precision machined points.



NO. 728G DIAGONAL CUTTER

Patented wire-stripping notch that **really works!**

NO. 748G END CUTTER

Fine enough to cut a human hair, sturdy enough to cut 12 gauge copper wire.

SCREWDRIVERS

Blades forged from tough chrome vanadium steel. Tips ground lengthwise for greater end strength and snug fit in screw slot. Opaque blue plastic (UL) handles are shockproof, breakproof and shaped for non-slip grip.

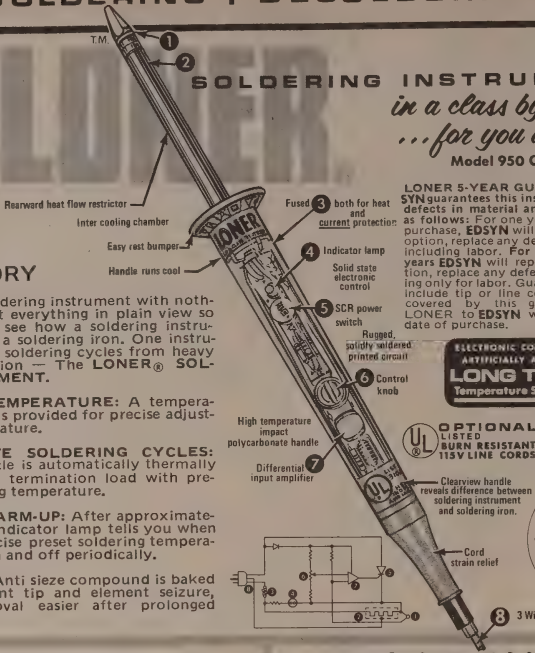
SOLDERING + DESOLDERING + RESOLDERING

FOR HOME AND INDUSTRY EDSYN® PRODUCTS

LONER T.M. SOLDERING INSTRUMENT

in a class by itself ...for you alone!

Model 950 CL080



① Temperature sensor
② 50 watt forward flow heat element
Rearward heat flow restrictor
Inter cooling chamber
Easy rest bumper
Handle runs cool
Fused ③ both for heat and current protection
④ Indicator lamp
Solid state electronic control
⑤ SCR power switch
Rugged, solidly soldered printed circuit
⑥ Control knob
High temperature impact polycarbonate handle
Differential ⑦ input amplifier
Clearview handle reveals difference between soldering instrument and soldering iron.
Cord strain relief
⑧ 3 Wire Cord

LONER® STORY

FEATURES: A soldering instrument with nothing to hide, we left everything in plain view so that you can best see how a soldering instrument differs from a soldering iron. One instrument performs all soldering cycles from heavy to micro termination — The **LONER® SOLDERING INSTRUMENT.**

SETTING THE TEMPERATURE: A temperature control knob is provided for precise adjustment of tip temperature.

FAST ACCURATE SOLDERING CYCLES: Each soldering cycle is automatically thermally balanced to match termination load with precise preset soldering temperature.

FAST INITIAL WARM-UP: After approximately 45 seconds an indicator lamp tells you when you are at the precise preset soldering temperature by blinking on and off periodically.

NO STICK TIPS: Anti sieze compound is baked onto tip to prevent tip and element seizure, making tip removal easier after prolonged operation.

LONER 5-YEAR GUARANTEE: EDSYN guarantees this instrument against defects in material and workmanship as follows: For one year from date of purchase, **EDSYN** will repair or, at its option, replace any defective part **free** including labor. **For an additional 4 years EDSYN** will repair, or at its option, replace any defective part charging only for labor. Guarantee does not include tip or line cord. For service covered by this guarantee return LONER to **EDSYN** with evidence of date of purchase.

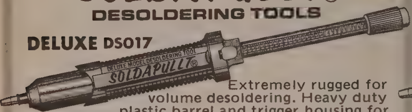
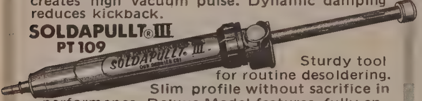
SOLDAPULLT® DESOLDERING TOOLS

DELUXE DS017



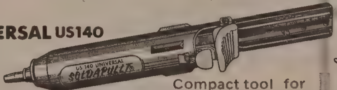
Extremely rugged for volume desoldering. Heavy duty plastic barrel and trigger housing for long, dependable operation. Simple twist-lock separation for fast cleaning. Oversize plunger fully enclosed for safety. Heavy mainspring creates high vacuum pulse. Dynamic damping reduces kickback.

SOLDAPULLT® III PT 109



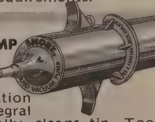
Sturdy tool for routine desoldering. Slim profile without sacrifice in performance. Deluxe Model features; fully enclosed plunger shaft; dynamic damping for very low recoil. Preferred by many technicians. Quickly desolders average size components and wiring.

UNIVERSAL US140



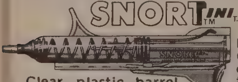
Compact tool for convenient tool box storage. Precision molded plastic barrel and low mass plunger creates rapid vacuum impulse with negligible recoil. Three position plunger adjusts loading span to fit large or small hands. Ample vacuum for most circuit board desoldering requirements.

SNORT™ AIR and VACUUM PUMP SN104



Operates similiary to bellows or squeeze bulb. Two-piece plastic construction with built-in spring. Integral cleaning shaft automatically cleans tip. Tool snaps apart easily for routine cleaning.

SNORTINI™ MINI VACUUM PUMP MV 124



Clear plastic barrel shows when cleaning is necessary.

Mini size less than 6". Ideal for desoldering IC's, transistors, etc. yet ample for larger ¼ watt resistors.

SOLDAVAC® DESOLDERING TOOLS

DELUXE DS101

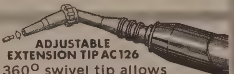
For home electronics projects and appliance repair technicians. Ample power for desoldering most consumer products. Special features include fully enclosed plunger shaft for safety, clear plastic barrel for inspecting moving parts. Plunger depresses for compact storage.

STANDARD SV026

Designed for the hobbiest and home electronics enthusiast. Simplified construction for a low priced but effective desoldering tool. Ample vacuum for removing solder from small wiring and miniature components found in transistor radios and Hi-Fi's.

MICRO EXTENSION TIP insert into regular tip

Tip cleaner needle and spot-tie aid.



ADJUSTABLE EXTENSION TIP AC126

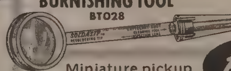
360° swivel tip allows angular adjustment without loss of vacuum. Quickly snaps on or off regular tips.

SOLDASIP® RESOLDERING WICK

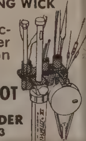
SW091

Press braid against faulty connection with heated tip, old solder is drawn up leaving connection clean for resoldering.

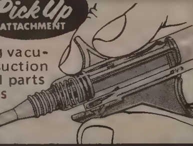
BURNISHING TOOL
BT028



TOOL DEPOT HANDY TOOL HOLDER
TD123



VACUUM *Pick Up* ATTACHMENT



Miniature pickup easily snaps onto designated vacuum pump tips. Plunger creates strong vacuum at the small rubber suction cup. Easily retrieves small parts as ball bearings, transistors and IC packs from recessed areas.

with all these New! features that make it the first fully Engineered Soldering Station!

Again **EDSYN**® projects the Soldering Technician into the 21st Century, with the NEW Deluxe Base 1 **IDLE-REST**® Professional Soldering Tool Holder. COMPLETE for storing instruments in a clean, safe, energy saving, static environment, protected by dual safety locks. At your finger tips NEW conveniences as wider base, fluid reservoir, force pump, larger sponge, and twin cleaning sinks, speed up your job performance as you orbit your work station. Blast off with the first fully engineered soldering station to reach your technical sphere – make the quickest recovery with a sound turn around – Base 1, **IDLE-REST**® Tool Holder.

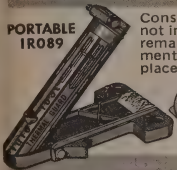
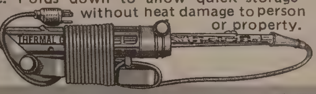
PORTABLE IR089



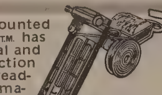
THERMAL GUARD

Consumes only 9 watts of power when not in use. Polycarbonate outer jacket remains cool. Tips and heating element last longer. Safety lock holds tool in place. Folds down to allow quick storage without heat damage to person or property.



idle-rest®

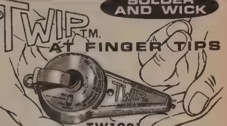
Bench mounted IDLE-REST T.M. has same thermal and Polycarbonate construction as portable model. Threaded bushing allows permanent installation on bench top. Two spools of solder, accessory apron and sponge included.



BENCH MOUNTED IR088

SOLDER AND WICK

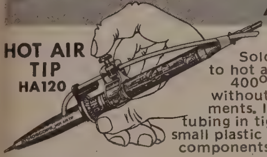
TWIP T.M. AT FINGER TIPS



TW108

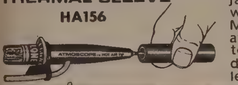
ATMOSCOPE T.M. ACCESSORIES

HOT AIR TIP HA120



Converts LONER Soldering Instrument to hot air generator up to 400°F. Solder as usual without removing attachments. Ideal for shrinking tubing in tight areas, forming small plastic parts, heat testing components, etc. Operates on low pressure air.

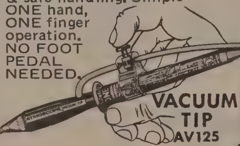
Silicone Rubber THERMAL SLEEVE HA156



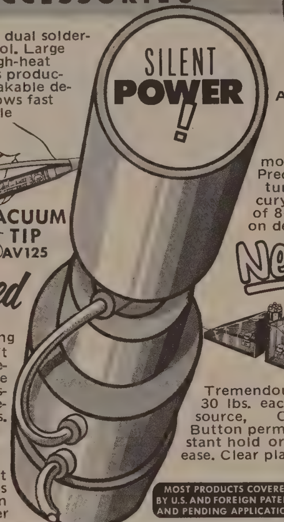
LONER
ATMOSCOPE T.M. HOT AIR TIP

Complete protection of adjacent components or wiring when using ATMOSCOPE Hot Air Tip attachment. Resists hi-temperature, keeps radiated heat to a safe level.

Converts LONER to a dual soldering and desoldering tool. Large mass head provides high-heat reserve for continuous production line work. Unbreakable desoldering chamber allows fast & safe handling. Simple ONE hand, ONE finger operation. NO FOOT PEDAL NEEDED.



VACUUM TIP AV125



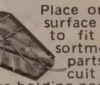
SILENT POWER!

New!

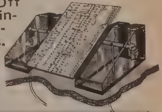
VACUUM PUMPS
Automatic Closed-Loop Self Regulating Vacuum Control 100% Pneumatic

High vacuum without motors or electrical parts. Precision trouble-free venturi, vacuum to 22" mercury, from shop air supply of 80 to 120 PSI. Operates on demand, compact, whisper quiet.

New! **VACUUM HOLDING FIXTURES**



Place on any flat surface as desired to fit wide assortment of parts and circuit boards. Tremendous holding power up to 30 lbs. each. Connect to vacuum source. On/Off Button permits instant hold or release. Clear plastic.



MOST PRODUCTS COVERED BY U.S. AND FOREIGN PATENTS AND PENDING APPLICATIONS

ERSA Tip 16

INDUSTRIAL SOLDERING TOOL

- FAST WARM UP AND RECOVERY
- EASY TO HANDLE PENCIL PROFILE

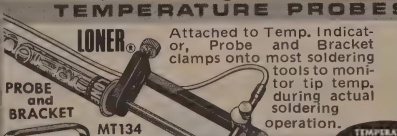
TEMPERATURE PROBES and ACCESSORIES

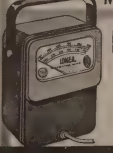


LONER® PROBE and BRACKET MT134

Attached to Temp. Indicator, Probe and Bracket clamps onto most soldering tools to monitor tip temp. during actual soldering operation.

Essential for obtaining tip temp. Sensitive probe measures temp. on any flat or curved surface. Slim handle, long tip reaches into recessed areas. Burn resistant cord.

LONER® TEMPERATURE PROBE TP110



LONER® ANALOG (DIAL) METER LTM95

Dial meter, accurate °C and °F scale covers soldering tip temp. range 400°F to 900°F. Type J Thermocouple lead, calibration seals included.

TEMPERATURE Monitoring ACCESSORIES

MOST PRACTICAL SOLDER HANDLING TOOLS

ALL NEW
BLOW PROOF

PROBE IV

Check four functions with one instrument! GC's new PROBE IV lets you test for:

✓Continuity	✓Polarity
✓Voltage	✓Digital Logic

without carrying a multitude of instruments AND . . . PROBE IV is lightweight, pocket-size, and comes with its own self-protective carrying pouch. Features positive overvoltage protection in the continuity mode.

5104 **$14.95**

CONECUT . . . MAKES CHASSIS PUNCHES OBSOLETE!

Drill a burr-free hole in seconds in sheet or tube. Saves time—no center punch hole—no pilot hole. Any number of diameter holes can be drilled—the further the tool advances, the larger the hole.

CONECUT SIZES:

3400	Drills holes from 1/4" – 13/16"	**$12.95**
3405	Drills holes from 5/8" – 1-3/16"	**19.95**
3425	Cutting Compound (1 oz. tube)	**2.50**

3400

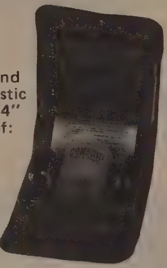
3405

3425

Set of two Conecut burr-free drills and cutting compound in convenient plastic carrying pouch. Hole size range: 1/4" to 1-3/16". Kit contains one each of:

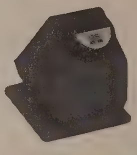
3400	No. 1 Drill
3405	No. 2 Drill
3425	Cutting Compound
3420	**CONECUT KIT**

$34.95



RE-TIP®

Cleans soldering iron tips instantly. Simply insert hot iron tip into RE-TIP and then withdraw—all contaminants are instantly removed. Uniformly cleans tips up to 1/4" dia.—prevents contaminated solder joints. Prolongs life tip; tips solder faster, longer. With base for use in shop, or hand held for portable use and tool box.



9482	RE-TIP base & cartridge	$6.25
9483	Portable RE-TIP (Refill Cartridge Only; Bubble Carded)	2.65
9484	Refill Cartridge only (Boxed)	2.65

PUL-N-INSERTIC®

Inserts or extracts I.C.'s quickly, easily—without damage, while providing maximum protection to I.C.'s leads. Also acts as a heat sink when desoldering I.C.'s. Constructed of high impact plastic. Versatile—for use on the product line, in rework area in the field.

9481 **$4.95**

INSERTIC®

Designed to allow quick, accurate positioning for insertion of I.C.'s. Easy to load—will not damage I.C. and provides maximum protection to leads. Scientifically shaped for sure, fatigue-free handling—speeds up I.C. insertion time. Constructed of high impact plastic for years of service. Ideal for use in manufacturing or by the service technician.

9480 **$2.95**

QUICK PICK

Fast, easy method of removing transistors and capacitors. Quick Pick leaves hands free to desolder leads and hold circuit board. Made of non-magnetic material. 7 different tools fit more than 25 outlines of transistors and can capacitors. Each tool is approx. .028 size, larger than part being removed. Color coded for fast, easy selection.

9216	(Kit of 7 tools)	$6.55
9217	(Red, size: .312-.335")	.94
9218	(White, size: .287-.310")	.94
9219	(Blue, size: .262-.285")	.94
9220	(Yellow, size: .212-.235")	.94
9221	(Green, size: .222-.245")	.94
9222	(Mustard, size: .162-.185")	.94
9223	(Orange, size: .183-.206")	.94

AUTOMATIC WIRE STRIPPER

Equipped with "Trig-O-Matic" stay-open feature, this stripper is especially suited for stripping fine and stranded wires. Stay-open feature keeps wires from being crushed. "Off" and "On" mechanism enables use as automatic or standard model. At touch of thumb, trigger releases and jaws go back in place. Interchangeable blades. Patent No. 2,622,461.

744	12 to 22 wire	$8.84	744-D	16 to 22 wire	$8.84
744-A	14 to 30 wire	8.84	744-I	8 to 22 wire	8.84
744-B	10 to 18 wire	8.84			

SOLDER-WICK 5' spool

Desolder any connection in seconds. Solder-Wick absorbs molten solder instantly. Eliminates component damaging heat buildup.

684 Size 2—yellow label for miniature printed circuit boards. Pad Size: .060 to .125. $1.64

685 Size 4—blue label for commercial Printed circuit boards and connectors. Pad size: .190 and larger. $1.85

GARDNER DENVER Wire-Wrap* TOOLS

FOR SOLDERLESS WRAPPED CONNECTIONS

AIR POWERED WIRE-WRAP* TOOLS

Air powered tools from Gardner-Denver feature low maintenance and dependability for high production service. Bearing mounted, precision engineered rotary vane motors require only air line lubrication for long, dependable operation. Pistol grip or straightline models are available. The tools will wrap 18 thru 32 gauge wire. A backforce nose assembly is an optional feature.

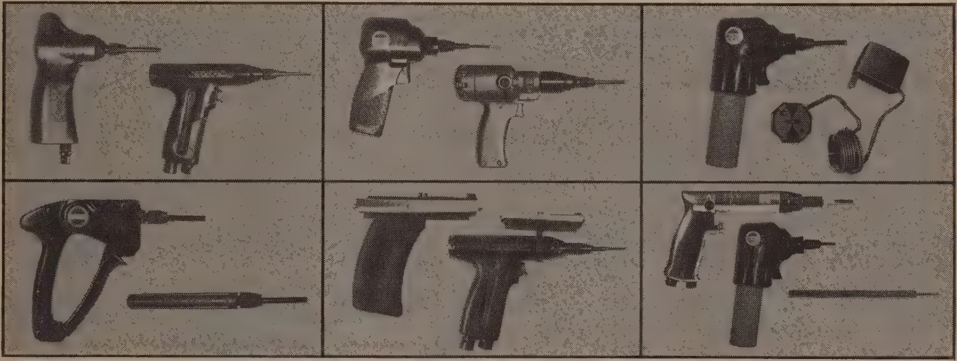
The 14TA1 Strapping Tool (upper left) economically and efficiently makes continuous wire strapping to interconnect terminals with 18 thru 30 gauge bare wire, forming a buss bar of permanent, wrapped connections.

ELECTRIC POWERED WIRE-WRAP TOOLS

The 110 Volt 14B1, with heavy duty aluminum housing, is recommended for high production applications. The 110 Volt 14XA2, lightweight, solid state model, is double insulated and recommended for limited production and service work. Both styles are available with backforce nose assemblies.

BATTERY POWERED WIRE-WRAP TOOLS

Gardner-Denver battery powered Wire-Wrap tools have been designed for installation, service, repair, or special production, and are especially suited for 30 gauge wire application. They are equipped with a rechargeable nickel-cadmium battery and battery charger package. Thousands of connections are possible from one battery charge, depending on the size of wire being wrapped.



MANUALLY OPERATED WIRE-WRAP TOOLS

The new 14HP-1C hand squeeze Wire-Wrap tool is ideal for telephone installers, electronic technicians and servicemen, when air or electric power is not available. It features a strong, lightweight Lexan housing and a universal collet for all wrapping bits. This tool makes quality wrapped connections with 22 thru 26 gauge wire.

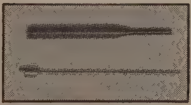
The manual Wire-Wrap tool is excellent for repair or service work in hard-to-reach locations and is designed to wrap 18 thru 30 gauge wire.

CUTTING AND SKINNING TOOLS

The cutting and skinning tool can be either a completely independent hand-held tool or an accessory for mounting on all Gardner-Denver air, electric, or battery powered Wire-Wrap tools. It is designed for cutting and skinning 24 thru 30 gauge wire.

WIRE-WRAP UNWRAPPING TOOLS

Unwrap tools are offered in air powered, electric, battery, hand squeeze and manual styles, with models for removing either right-hand or left-hand wraps.



WRAPPING BITS AND SLEEVES

Gardner-Denver offers the latest technology and largest selection of wrapping bits and sleeves for making solderless wrapped electrical connections. This list shows only a representative assortment. For complete specifications and application information, contact your nearest Gardner-Denver representative or our Grand Haven, Michigan factory.

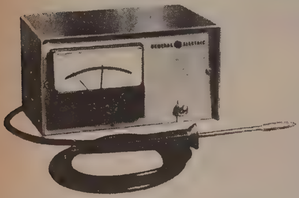
SOLDERING IRONS

TEMPERATURE CONTROLLED SOLDERING IRON — 120 VOLTS; UP TO 135 WATTS



2½-ounce temperature controlled soldering iron maintains selected temperature which can be varied for wide range of work without changing irons or tips. The iron's 135-watt capacity enables it to handle high-mass joints, yet its precision temperature control makes it suitable for the smallest of microminiature jobs without exceeding temperature limitations. Ideal for high production and high quality work, laboratory use, service shops, and wherever temperature limits are specified.

Description	Cat. No.
Complete Iron — Includes Control Box, Handle and Cordset, and ⅛-inch and ³⁄₁₆-inch Chisel Tip and Heater	6A490

PENLINE-120 SOLDERING IRONS — 120 VOLTS; 25, 30, 40 AND 45 WATTS

Lowest cost GE iron; ideally suited for light to medium production in electronics, communications, and allied industries, for repair and maintenance operations, and by the "do-it-yourself" electronics kit builder.

	⅛" Cone Tip	25 watts	6A213
	3/16" Pyramid Tip	25 watts	6A215
	3/16" Chisel Tip	25 watts	6A217
	⅜" Chisel Tip	45 watts	6A211G31
Heater for Threaded Tips			
	25 watts		6A221
Transformers for Midget Iron — 115-volt Primary‡			
	Single Tap 6.3-volt secondary		6A362G2
	Four Tap 5.4/5.7/6.0/6.3-volt secondary		6A364G2
	With 3-conductor Cordset & Hubbell No. 5246 Plug		6A364G3
	With Three-heat Switch 4.9/6.3/6.9-volt secondary For use only with Handle and Cordset 6A203G2.		6A434

‡ Single- and four-tap transformers are available with 240-volt primary in quantities of 36 or more, specify catalog number desired and note on order, "except with 240-volt primary." Use interchangeable threaded tips.

MIGHTY MIDGET SOLDERING IRON — 12 VOLTS; 100 WATTS

A lightweight iron with high heat capacity for heavy soldering where larger irons, up to 200 watts, prove unwieldy for rapid repetitive soldering, such as production soldering of tuner chassis, tinware, can seams, etc.

Handle and Cordset — Two-conductor			
			6A210G61
Tip and Heater Unit — Ironclad			
	½" Chisel Tip	60 watts	6A211G54
	½" Chisel Tip	80 watts	6A211G50
	½" Chisel Tip	100 watts	6A211G33
Transformer for Mighty Midget — 115-volt primary			
	Four Tap — for 55/70/85/100 watts (115-volt primary, 12-volt secondary)		6A364G7

* UL Listed.

6A160 SERIES SOLDERING IRONS — 120 VOLTS§, 75 TO 140 WATTS

Ideal for medium to heavy production, and maintenance and repair operations. Available with any of 12 different tips, calorized or ironclad.

Description		Cat. No.
Complete Iron Less Tip — Includes 6-foot two-conductor cordset		
	75 Watts	6A161*

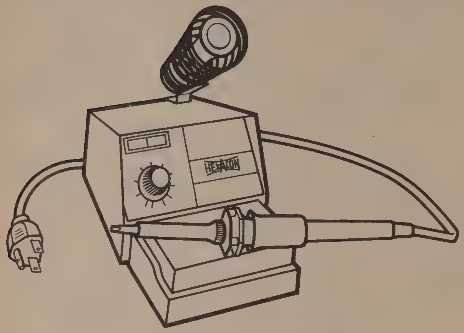
SOLDERING IRONS

HEXACON

VOLTAGE RANGE: 6 to 240 • OPERATE IDENTICALLY ON A.C. OR D.C., ANY CYCLE
STANDARD VOLTAGES 110/120, 220/240 • SPECIFY VOLTAGE ON ORDER

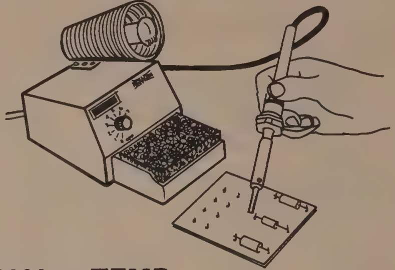
Equipped with extra flexible, high temperature approved cords. Three wire cords available with all irons. Nickel chromium replaceable heating elements, insulated with finest mica, protected by rugged outer housing. Replaceable tips.

POSI-GROUND® AVAILABLE TO PROTECT VOLTAGE SENSITIVE COMPONENTS



THERM-O-TRAC 1001
Controlled Heat Soldering Station

- Temperature sensor "up front" where it belongs
- All solid state electronic switching
- Dial selected temperatures from 500° F to 720° F
- Variation of no more than + 10° F at 720° F idling
- No magnetic field or voltage leakage—safe for sensitive circuitry
- Wide selection of XTRADUR Long Life Tips



DIAL-a-TEMP
Soldering Station

- Isolated, low voltage power supply
- Posi-Ground® construction eliminates all voltage leakages for protection of sensitive components
- Internally fused for added safety
- Infinitely variable temperatures from 350° F to 950° F easily selected by dialing
- On-Off Switch with Indicator Light
- Two standard models available:
  Catalog No. 1520—Uses 3/16" Tip
  Catalog No. 1524—Uses 1/4" Tip
- No special tip requirements—uses standard Xtradur and Durotherm Long-Life plug tips

HEXACON MINIRONS

DUROTHERM and XTRADUR tips

- Rugged quality construction that will withstand production line conditions
- Slim-line case promotes maximum visibility
- Lightweight—perfect balance
- Full wattage range 15 to 60 watts

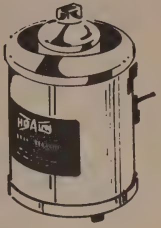
CATALOG NOS. shown are for DUROTHERM. For XTRADUR substitute "X" for "D"; cost approximately 10% less than DUROTHERM.

SAMPLE TIPS for your evaluation. Ask for new Tip Sketch Catalog with detailed sketches of 250 Standard Coated Tips.

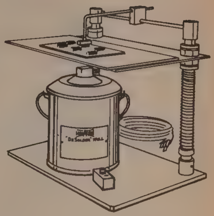
HEXACON SOLDERING ACCESSORIES

MICRO-CIRCUITRY DESOLDER WELL



- Safe operation . . . will not damage components or boards
- Desolders whole areas at a time
- Semi-automatic . . . plugs in anywhere 110-120 volts or 220-240 volts AC
- Light, portable, all parts replaceable
- 3 wire grounded construction
- No training required . . . simple operation

MODEL 9100
Work Position Stage



- Adjustable locator with detachable head can be changed to accommodate wide variety of components
- Lightweight inexpensive fixturing board can be cut to fit different sizes and shapes of PC boards
- Tension easily adjustable to weight of individual board assemblies
- Precision designed and manufactured for maximum flexibility and long use

Temperature Control Units

- Controlled AC input provided from 0-95% of line voltage
- Capacity 300 watts on 115 volts
- Solid state circuitry includes built-in fuse protection
- Idling temperature may be readily controlled
- Thermal working zones may be varied by adjusting input control
- Use same iron for different capacity jobs
- Calibrate control settings to maintain proper working ranges as required by government specifications
- Rugged design provides long maintenance, free operational life

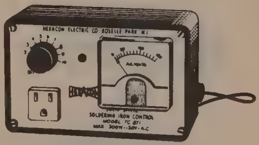
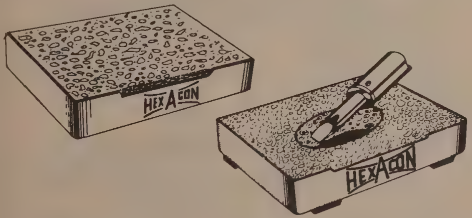
Weight 10 oz.



HEXACON ELECTRIC CO ROSELLE PARK N.J.
SOLDERING IRON CONTROL MODEL TC 871 MAX 300W - 120V - AC

Model 871
3 wire design. Comes with voltmeter for visual indication of voltage input to iron. Size 2" x 6¼".
Weight 18 oz.



TIP CLEANING SPONGE

Insures reliability of soldered joints and extends tip life. Eliminates contamination caused by wiping rags. Low-sulfur, pure cellulose fine pore sponge. New dross reservoir promotes cleaner sponge surface and prevents overwiping.

No. 810 Complete unit (solid sponge)
No. 812 Complete unit (sponge with hole)
No. 8101 Solid sponge only
No. 8121 Sponge with hole

DE-SOLDERING TIPS

For the fast removal and replacement of "I.C." or "T.O." units on multilayer boards.

940 SERIES MINI-POT
4 models (temperatures 500° F-800° F)

- Designed for stripping, tinning and soldering heat strippable wires
- Precision wound elements. Entire assembly is grounded for safety
- 3-wire, grounded HI-TEMP (SP3N) cords with NEMA type plugs
- Cool, green, porcelain base, rubber nonskid mount. Can be used in clean room without marring bench
- Compact, lightweight, will not tip over
- All parts are replaceable

Longer lengths available.

HEX-WIK SOLDER REMOVER

- The easiest and most economical method of desoldering printed wiring boards without measling, delamination or lifted pads.
- Simplifies removal and replacement of components
- Can be used for solder removal on plated thru and multi-layer printed wiring board assemblies
- Braid processed for long shelf life insures greater capillary action
- Available in 2 sizes 1/16″ for micro work; 1/8″ for larger connections
- Meets all military and government specifications

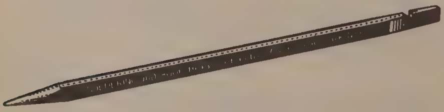
HEAT SINKS with Chrome Plated Copper Tipped Clips

Protect heat sensitive components such as transistors and diodes from thermal damage.

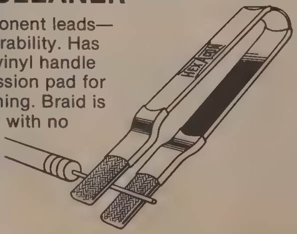


FIBERGLASS SOLDER AID

For inspecting, probing, unsoldering and assembly of printed circuits and other components. Non-conductive. Eliminates scratched circuit boards, broken wire strands.
Cat. No. 800G

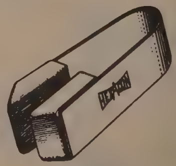
BRAID CLEANER

Cleans component leads—insures solderability. Has comfortable vinyl handle grip; compression pad for contour cleaning. Braid is held securely with no loose ends.
Cat. No. 860



ERASER CLEANER

Designed primarily for the removal of oxides and contamination from P.C. boards and component leads.
Cat. No. 850



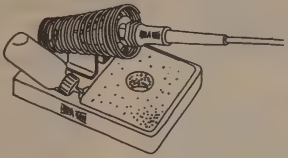
SOLDERING IRON HOLDERS

HEAT GUARD SOLDERING IRON HOLDERS

- Cool, safe holder assembly
- Full operator protection
- Protect iron and tip
- Conserve energy — nonheat sinking

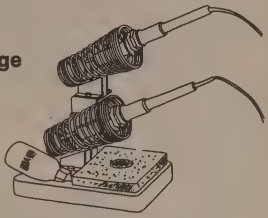
MODEL 890
Ceramic Base with Reservoir and Sponge

- For instrument irons
- Water injection keeps sponge wet
- Non-skid base — can be used in clean room without marring bench
- Base easily cleaned



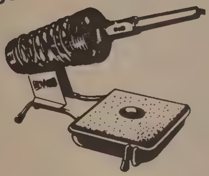
MODEL 891
Ceramic Base with Reservoir and Sponge

- Same features as Model 890
- Holds two irons
- Irons positioned to prevent cord tangling



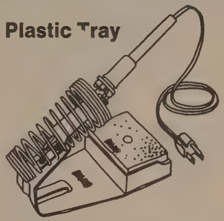
MODEL 892
Chrome Base with Sponge

- For instrument irons
- Non-skid stand — can be used in clean room without marring bench
- Sturdy wire construction
- Easily cleaned



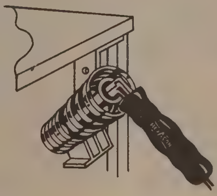
MODEL 892A
Plated Steel Base with Plastic Tray

- Designed for instrument irons
- Stable, safe, sturdy construction
- Detachable high temperature plastic tray — easily cleaned



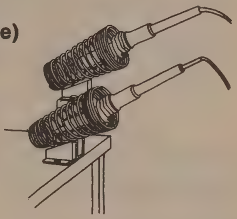
MODEL 893
Bench Mounted

- For under-bench mounting
- Angle adjustable for operator convenience and safety
- Sturdy construction — easily cleaned



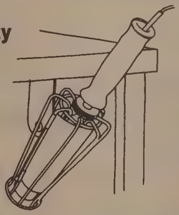
MODEL 894
Bench Mounted (Double)

- Irons positioned to prevent cord tangling
- Sturdy construction — easily cleaned
- May be adapted for under-bench mounting



MODEL 899
Bench Mounted Heavy Duty

- Rugged design for heavy duty irons
- May be mounted above or below bench
- Holder angle easily adjustable
- Open frame results in cooler iron operation



MODEL 8900
Sturdi-Stand

- Frees operators hands for work handling
- Angle and height of iron easily adjusted
- Sturdy, rigid construction insures stability

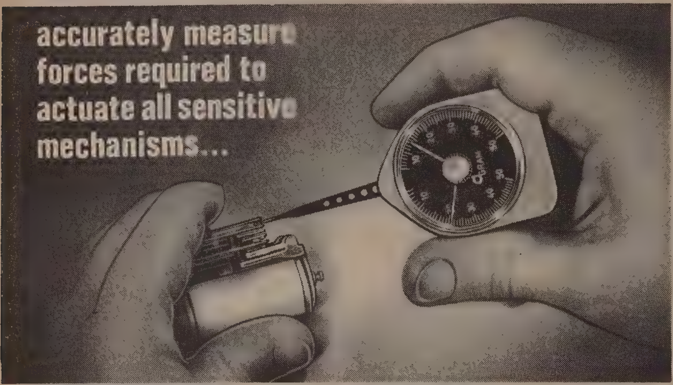
HEXACON ELECTRIC CO. 156 West Clay Ave., Roselle Park, N.J. U.S.A.

JONARD GAUGES: Dynamometer dial - Spring tension - Push-pull type

gauges are a must in all departments...



- ■ RESEARCH & DEVELOPMENT
- ■ PRODUCTION
- ■ QUALITY CONTROL
- ■ MAINTENANCE & REPAIR

use them for:

- ● TELECOMMUNICATION EQUIPMENT
- ● PRECISION INSTRUMENTS
- ● BUSINESS MACHINES

Produced in 2 sizes and a total of 13 ranges . . . Simple to use. Just place point of gauge arm perpendicular to force to be measured and read clockwise or counter-clockwise.

All gauges retain reading after measurement . . . No need to look at dial while measuring. Max. reading pointer moves to max. reading +0.01% and remains there until reset.

Small Gauges						Large Gauges		
Jonard type	Range (grams)	Conv. in ounces	Jonard type	Range (grams)	Conv. in ounces	Jonard type	Range (grams)	Conv. in ounces
GD-1	0-10	⅜	GD-10	10-100	3½	GD-50	61-500	18
GD-2	2-20	¾	GD-15	15-150	5¼	GD-100	100-1000	32
GD-3	4-35	1-5/16	GD-20	20-200	7	GD-200	200-2000	70
GD-5	6-50	1¾	GD-25	30-250	9	GD-400	400-4000	140
			GD-30	40-350	12			

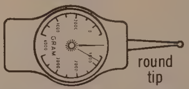
dynamometer type

Indispensable for adjustment of pressure, starting torque or spring tension, where accuracy is required for proper operation. Simple to operate. Measures in both directions—clockwise and counter-clockwise. Gauges are equipped with maximum reading, pointer that retains reading.

Extreme precision and durability built in . . . Made of hard-tempered annealed beryllium copper springs, unbreakable glass face and protected by rigid fitted plastic case.

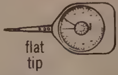
LARGE GAUGE

1½" dial
Weight: 14 oz.



SMALL GAUGE

2½" dial
Weight: 4½ oz.



spring type

set and accurately check tension of relay springs, electro-mechanical devices and delicate electronic components

made in 3 basic types:

CENTER ZERO, HEAVY DUTY and PRESET TYPE

All have engraved scales, front and back and can be used both vertically and horizontally.

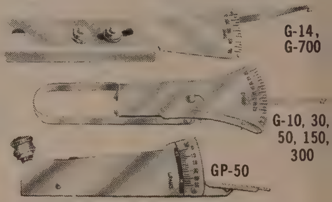
CENTER ZERO—Reads left or right. Adjustable blade, handle closes for protection. 1½" w. × 5" lg. overall.

G-10, 30, 50, 150 & 300
G-10 0-10 gr. **(Weco #70F)** ....1 gr. cal.
G-30 0-30 gr. **(Weco #70H)** ....2 gr. cal.
G-50 0-50 gr. **(Weco #70D)** ....5 gr. cal.
G-150 0-150 gr. **(Weco #70J)**.........10 gr. cal.
G-300 0-300 gr. ....25 gr. cal.

HEAVY DUTY—Measure tension of heavier springs. Long spring arm for easy reach.

G-700 0-700 gr. **(Weco #62B)** Cal. in 50 gr. steps

G-14 0-1,400 gr. **(Weco #158A)** Cal. in 100 gr. steps
1½" w. × 7½" lg. overall.

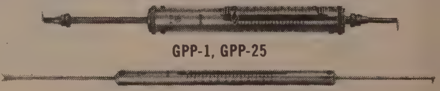


PRESET TYPE—Set to required tension by turning screw. Accurate and precise indication that will go no farther than your setting.

GP-50 (Weco dwg. #KN-102873) 0-50 Cal. in 5 gr. steps. Overall length 5¼".

push-pull type

Easy to use in confined areas. With adjustable shafts. Tubular construction with full scale accuracy. Engraved scales. Measure tension or compression of spring loaded devices, actuated levers, relays, microswitches, triggers, pull-pins, pull tests of fine wires, etc.



GPP-1 0-1,000 gr. **(Weco #79B) (Dwg #KN-102874)** Cal. in 50 gr. steps, ⅝" × 9¼" lg.
GPP-2 0-110 gr. **(Weco #79C)** Cal. in 5 gr. steps, ⅜" × 11" lg.

GPP-5 Two scales, 0-500 gr. and 0-16 oz. in. Cal. in 50 gr. and 1 oz. in. steps. ⅜" × 11" lg.

GPP-25 Two scales, 0-2,500 gr. and 0-80 oz. in. Cal. in 100 gr. and 4 oz. in. steps. ⅝" × 9¼" lg.

JONARD BURNISHERS AND CLEANERS

diamond abrasive - contact burnishing tools

cleans contacts effectively!

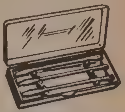
Exclusive advantages:

- Powerful diamond abrasive
- Flexible
- Long lasting
- Dielectric
- Non-clogging

Only minimum pressure needed to produce perfectly polished contact faces, due to uniformity of diamond particles. Nominal removal of material will not alter gap. Flexible-dielectric plastic shaft permits access to awkward areas. Relays can be serviced without power shutoff. **Single spatulas supplied in plastic vial.**

D-200 Coarse —.019" thick, double faced. 6" lg.
D-300 Medium —.017" thick, double faced, 6" lg.
D-400 Fine —.011" thick, single face, 6" lg.

K-234 "Diamfile" Kit: Consists of 3, assorted or all of one type of above spatulas, in rigid plastic case:



complete assortment of pocket type burnishers for every application...

ECONOMY BURNISHERS. Leave no grit or dust and will not affect contact points. Plastic handles for working on live contacts.

OB-1 For fine contacts. Abrasive coated, 3½" lg. 3/16" wide, .007" thick. Pkg. 12 pcs.
Pkg. 48 pcs.

OB-2 For extra-fine contacts. 3½" lg. x ¼" wide. .010" thick . . . . Pkg. 12 pcs.
Pkg. 48 pcs.

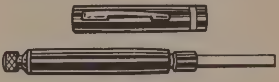
OB-3 General purpose type. Abrasive, coated plated. Hard molded handle. 3½" lg., ¼" wide, .010" thick. Pkg. 12 pcs. • Pkg. 24 pcs.

OB-4 For industrial use. Abrasive, coated plated. Hard molded handle. 3½" lg. ¼" wide, .020" thick. .Pkg. 12 pcs.
Pkg. 24 pcs.

POCKET-TYPE BURNISHERS. Used for cleaning general type contacts. Supplied with 6 non-residual abrasive replaceable blades and/or 6 rods stored in pen barrel, as noted. Pen made of sturdy plastic for dielectric work. Length 4½". Diameter ⅜". Blade: 3/16" wide, 1¾" long, .007" or .0035" thick.

PB-3 Pen with 6 blades, .0035" thick.
PB-3R (Weco #265C) Same as PB-3 plus 6 abrasive rods.
PB-7 Pen with 6 blades, .007 thick.
B-3 (Weco #266E) Pkg. 25 Repl. blades for PB-3 and PB-3R (.0035")
B-3R (Weco #266C) Pkg. 50 Repl. rods for PB-3R.

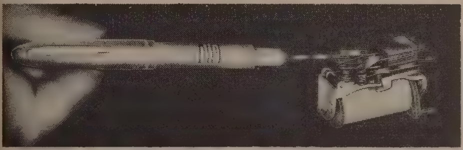
B-7 Pkg. 25 Repl. blades for PB-7 (.007").



PB TYPE

no grit or dust left on contacts with penfile type units

PENFILE POCKET CLEANER-BURNISHER WITH 12 REPLACEMENT BLADES



For all type contacts. Non-residual, do not leave grit or dust on contacts. Hard-tempered steel blade surface insures minimum contact wear. Adjustment of blade—length and rigidity—by varying depth in chuck. Plastic cap for work on "live" contacts. Length 5½", Dia. ⅜".

P-4 PENFILE with 12 blades, ¼" wide, 1¼" long, .007" thick.
P-6 PENFILE with 12 blades, 3/16" wide, 1¾" long, .007" thick.
RB-4 Replacement blades for **P-4**, Pkgs. 25 pcs.

RB-6 Replacement blades for **P-6**, Pkgs. 25 pcs.

Also available with diamond blades on request.

BC-23

BC-23 BANK CLEANER TOOL

For rotary switches and stepping relays. Dielectric handle for work on "live" equipment. Curved blade has fine abrasive coating. Dia. 1½", overall length 6"

after burnishing: *wash* and *clean* with our effective sprays...

KONTACT 60-SPRAY CLEANER

Specially formulated for contacts, switches, controls, etc. Dissolves oxidation and carbonaceous build-up. Leaves protective film. Non-conductive. Will not break circuit or harm insulation. Has injector for hard-to-reach areas. Net Wt. 6 oz.
K-60

JIC-22 ELECTRO-WASH and DEGREASER

Eliminates: Grease—Dirt—Oil and oxidation by powerful flushing spray. Quickly, safely, effectively.

- LEAVES NO RESIDUE
- SAFE ON ALL MAT'LS
- HARMLESS TO PLASTICS
- NON-CONDUCTIVE
- NON-FLAMMABLE
- DOES NOT CONTAIN CARBON-TET

Leaves components like NEW! Especially made for: P.C.'s, tuners, phone, switching systems, instrumentation, central-office equipment, motors, relays & many other complex mechanisms. 24 oz. Economy can.
JIC-22 Standard pkg: 6 pcs. —12 pcs.

JIC-33 ELECTRO LUBRI-FOAM

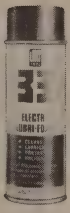
Cleans • Lubricates • Protects • Polishes

For ALL electronic/electro-mechanical actuated devices and components.
• EXCLUSIVE FOAMING ACTION • WILL NOT RUN, DRIP, DRY OUT OR CAKE UP • CLEANS, POLISHES AND LUBRICATES CONTACTS • ELIMINATES DISTORTION AND NOISE • SAFE ON ALL PLASTICS • NON-FLAMMABLE

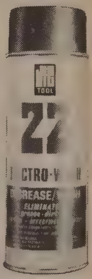
Primarily designed for GOLD, SILVER and precious metal contacts.

New synthetic chemical provides long lasting lubrication which will withstand extremes of temperature and keep contacts clean, polished and lubricated. 8 oz. can.
JIC-33 Standard pkg: 12 pcs. —24 pcs.

6 oz.



8 oz.



24 oz.

JONARD

UNIVERSAL INSTALLATION, SERVICE, ADJUSTMENT & MAINTENANCE KIT- TK-500

NOW! with just ONE kit...| you can INSTALL, SERVICE, ADJUST & MAINTAIN - Telecommunication Systems - Central Office Systems (inside and outside the plant) and switchboards.

This specially designed kit contains ALL the ESSENTIAL and BASIC tools required for the above jobs

Now work on Cross-Bar, PBX, PABX, Penta Conta, cross-bar switch/Casino, springs relays, rotary stepping switches and many other jobs out of ONE kit!

A carefully made SELECTION of tools to fill your needs and simplify your work.

FEATURES:

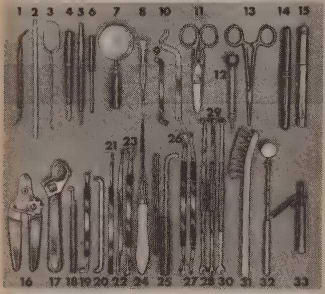
TOP QUALITY TOOLS: Precision, finely machined and finished to give dependable, durable service.

REMOVABLE BOARDS: Easy selection and instant use of ALL tools.

● EXTRA POCKETS FOR YOUR TOOLS. ●SEPARATE COMPARTMENTS FOR NOTES & PAPERS. ● HANDY PLASTIC BOX FOR SMALL PARTS.

All 76 tools are securely mounted in individual pockets in a highly durable, scratch resistant BARCO case. Withstands years of abuse. Complete kit weighs only 16 lbs. and is 5-½"h. x 18-¼"w. x 16-¼"d.

TK-500	Complete set of tools with case
TK-500NC	Tools alone without case
TK-500M	Complete set of tools with case and meter
TKC-50	Tool Case alone
MK-650	Meter and accessories



All 3 boards can be removed---for INSTANT SELECTION of ALL tools!

TOOL NO.	JONARD TYPE	DESCRIPTION

HG-752	1000/1150	230	9.5

Los Angeles approved and chrome models also available

- ★ **CONTOURED, COMFORT-FIT HANDLE.** Gives operator secure grip and balance — at all times. Insures firm, positive control of gun.
- ★ **CONVENIENT 3-WAY SWITCH.** Provides the option of hot, cold or off at the flick of a finger.
- ★ **DOUBLE-JACKETED HEATER HOUSING.** Inner barrel is chrome-plated to prevent rust, corrosion.
- ★ **POWERFUL, HI-SPEED UNIVERSAL MOTOR.** None better made! Perfectly balanced.
- ★ **STURDY, DIE-CAST ALUMINUM HOUSING.** Gives the protection needed against hard knocks in the shop. Lightweight. Reduces arm fatigue.
- ★ **QUIET, EFFICIENT TURBO-FAN.** Cools Motor. Delivers correct heat and velocity where you need it.
- ★ **ADJUSTABLE AIR-INTAKE SHUTTER.** Gives you exact degree of heat you want. Varies velocity — open shutter to decrease temperature, close shutter to increase temperature.
- ★ **ADJUSTABLE, REMOVABLE "SLIDE-ON" BASE.** Standard equipment. 5¾" triangular. Adjusts to support gun in various positions.*
- ★ **FLUSH BRUSH HOLDERS.** Brushes can be changed in 60 seconds; easy access — no need to disassemble unit.
- ★ **BIG 1-3/16" DIAMETER NOZZLE.** Designed to direct a powerful flow of heat on the *exact area* you want. Accommodates a variety of attachments.
- ★ **8-FOOT CORD, OIL RESISTANT NEOPRENE, 3-WIRE MOLDED PLUG.** Size of cord complies with safety code for each gun's amperage requirements. Lighter cords than those provided by Master are potentially dangerous to operator. Special cord lengths and plugs to your specifications are available.

UL Listed Models

MASTER Heat Guns are U.L. & CSA. listed, Models HG1201U, HG1301U, HG1501U. L.A. listed Models available for all heat guns. Specify "U.L. listed" or "L.A. listed". All U.L. and L.A. models have same basic Specifications shown on chart.

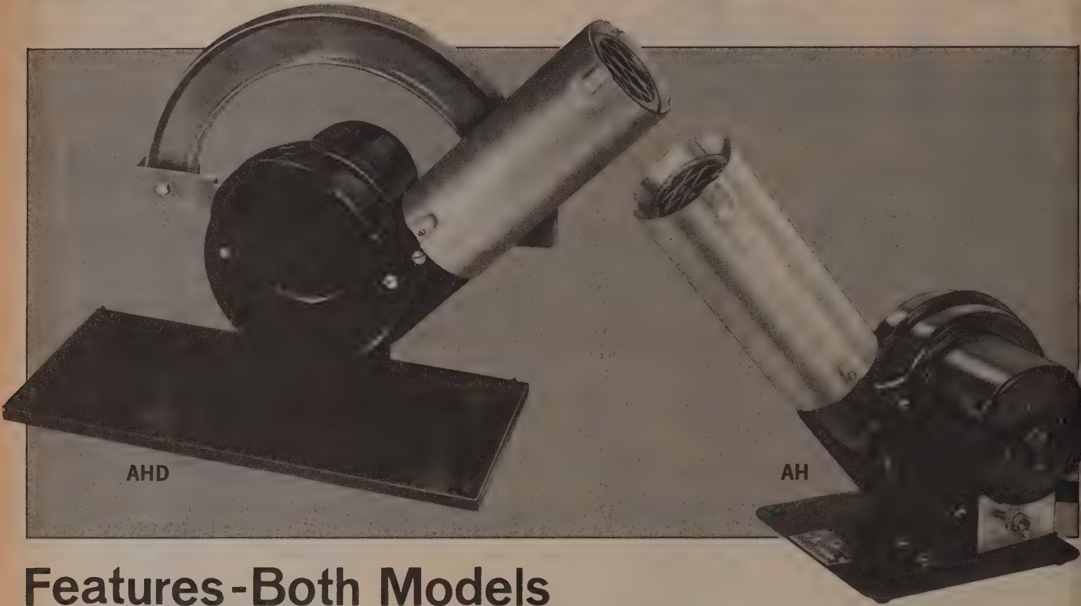
MASTER Appliance Corporation FLAMELESS HEAT BLOWERS

Continuous flow of air up to 800° F.



Features-Both Models

- ★ **HEAVY-DUTY INDUCTION-TYPE MOTOR FOR CONTINUOUS OPERATION.** Rugged construction insures steady, dependable service day-in, day-out. No brushes to wear out.
- ★ **OVERSIZE TURBO FAN.** Cools the motor. Maintains correct velocity. Built for longer life, peak heat-output efficiency.
- ★ **BIG 2" DIAMETER NOZZLE.** Speeds the job. Directs a steady flow of the correct heat on the work area.
- ★ **CONVENIENT 3-WAY MASTER CONTROL SWITCH.** Lets you switch from hot to unheated air to off at the flick of a finger. Doubles as cooling fan or hot air blower.
- ★ **STURDY 6" x 6" BASE.** Tailor-made for mounting on benches, walls, machines, presses. Perfect for assembly/production line operations.
- ★ **ADJUSTABLE INTAKE ORIFICE.** Controls temperature to heat range required. Open orifice wide for lowest temperature, close partly to reduce air volume and increase the temperature.
- ★ **CONVENIENT REMOVABLE HANDLE.** For portable use, hold blower in any position with this curved well balanced handle. For easy mobility, carry the blower from one place to another.
- ★ **ADJUSTABLE REMOVABLE 6" x 13" BASE.** Provides full 90-degree flexibility. Suited for bench, machine or wall mounting. Large size provides extra secure base when not permanently mounted.

MASTER Appliance Corporation FLAMELESS HEAT TORCHES

Compressed Air for Pinpoint Concentrated Heat

FLAMELESS COMPRESSED-AIR HEAT TORCHES — Lightweight, portable MASTER compressed air torches pinpoint intense flameless heat precisely where you want it. Ideal for shrink tubing, plastic welding, application of heat to microparts or constricted areas. Your choice of easy snap-in elements provides temperature ranges from 250° to 1000° plus. Use compressed air, nitrogen or inert gas for perfect plastic welding. The Master torch weighs only 1 pound. Can easily be handled by women workers. Low cost economy model and 3 other models to choose from. The perfect tools for concentrated heat — *without* a flame — by Master.

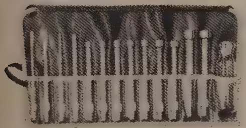
VACOMBO KITS



No. 99000 Vacombo Kit with Interchangeable Blades includes special heavy duty handle; 3/16 and 1/4" regular bits; #1 and #2 Phillips bits; and 3/16, 7/32, 1/4, 9/32, 5/16, 11/32, 3/8, 7/16, and 1/2" hex nut driver bits. Specially designed for electronic technicians. Size, 12-3/4 x 7".

New 99000 Series Components are available individually for replacement use. Specify by number. Packed 6 to a box.

No. ZS60 Kit—A versatile and complete hex nut driver kit for radio, TV or any work requiring speedy nut setting. Super hard sockets. Size, 6-1/2 x 7". Wt. 1 lb.

No. ZSX61 Kit—Same as ZS60 except includes 5" blade extension.

No. ZA70 Hex Key Set—Ideal for service technician in any trade. Includes 1/16, 5/64, 3/32, 1/8, 5/32 and 3/16" hex bits plus handle. Wt. 1 lb.

No. ZF40 (Bristol Type) Kit—Designed to service all popular sizes of fluted spline or Bristol Type recess head screws used on electronic and electrical equipment, air conditioning, refrigeration, and office machines.

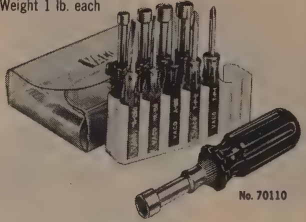
TORQUE COMMANDER SETS

Standard Package 1
Individually Boxed
Weight 1 lb. each



No. 70110

No. 70101

No. 70105

No. 70101 8-Piece Screw Driver Set consists of Torque Commander handle and one each of: #0, #1, and #2 genuine Phillips, 3/32, 1/8, 3/16, 1/4, and 5/16" regular straight slot drivers.

No. 70103 10-Piece Nut Driver Set consists of Torque Commander handle and one each of: 3/32, 1/8, 5/32, 3/16, 7/32, 1/4, 9/32, 5/16, 11/32, and 3/8" nut drivers.

No. 70105 10-Piece (Allen Type) Hex Key Set consists of Torque Commander handle and one each of: 1/16, 5/64, 3/32, 7/64, 1/8, 9/64, 5/32, 3/16, 7/32, and 1/4" hex recess drivers.

No. 70110 10-Piece Combination Set (Screw Drivers and Nut Drivers) consisting of Torque Commander handle and one each of: #1 and #2 genuine Phillips, 1/8, 3/16, and 1/4" regular slot, 3/16, 1/4, 5/16, 11/32, and 3/8" nut drivers.

No. 70137 10-Piece Square Recess Set consists of Torque Commander handle and one each of: #00, #0, #1, #2, and #3 square recess (Robertson), 1/8, 3/16, and 1/4" regular slot, and #1 and #2 Phillips drivers.

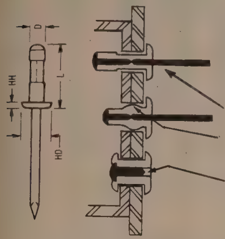
No. 70139 10-Piece Mobile Home Set consists of Torque Commander handle and one each of: 3/32, 1/8, 3/16, and 1/4" regular slot, #1 and #2 Phillips, 1/4" hex nut driver, 5/32" clutch head, and #1 and #2 square recessed drivers.

No. 70170 10-Piece Metric Hex Key Set consists of Torque Commander handle and one each of: 1.27 mm, 1.55 mm, 2 mm, 2.5 mm, 3 mm, 4 mm, 4.5 mm, 5 mm, 5.5 mm, and 6 mm drivers.

Specialty Fasteners & Application Tools

UNCONDITIONALLY GUARANTEED

POW'RIVETS AND POW'RIVETERS



VACO POW'RIVETS are the only blind rivets to adapt to hole size variance, and pull up snug regardless of material thickness (within grip range). That's why 4 sizes do the job of 14 ordinary rivets.

Steps To Apply

Step 1—Insert Pow'Rivet into hole.

Step 2—Mandrel is drawn by Pow'Riveter. Pow'Rivet expands to fill hole.

Step 3—Mandrel snaps off when Pow'Rivet is headed over.

Illustration	Stock No.	Dia. "D"	Lgth. "L"	Grip Range	Head Dia. "HD"	Head Ht. "HH"	Hole Size

SNAP RINGS & SNAP RING PLIERS

Snap rings serve one major function—they fit into grooves and furnish a shoulder for holding, locking, or positioning components in housings and bores (internal type) and on shafts and studs (external type). As hard tempered springs, their shear strength—and thus their thrust and impact cpaacity—is unusually high.

Snap Rings Available in 2 Convenient Pak Sizes

"D" PAKS—Ideal for small quantity user. Plastic boxes packed 5 to standard package.

"C" PAKS—100 rings per box for larger user. Packed 5 to a standard carton.

Internal Snap Rings

External Snap Rings

HD Type and WH Type Heavy-duty Irons

Wallbrand heavy-duty irons are engineered for highest efficiency performance. Rugged construction assures long-life for demanding production line needs. No radionic interference. Triple-life resistance wire wound on pure mica and constant tip temperature with extra fast recovery permits continuous heavy-duty use. 120 volts AC or DC. Other voltages available on request. Handles remain cool after long hours of operation. Tips are easily changed. Special irons customized to particular requirements.

XLS PENCIL IRON

Versatile . . . reliable . . . efficient . . . ideal for production lines. One, ever-cool handle accepts nine elements from 11w to 75w. Solve your production line slow-downs with Wall's XLS pencil iron series.

LIGHTWEIGHT PENCIL-TYPE IRON FOR HEAVY DUTY SOLDERING 80 to 100 WATTS

638 XLS

A much needed model between the heavy-duty irons and the light pencils – a sturdy tool for high performance. Cool, comfortable, unbreakable polycarbonate handle. Elements are industrial quality precision wound on highest quality mica, easily replaced in the field. 2 or 3 wire neoprene cord.

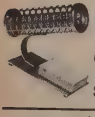
Model	Tip Size	Watts	Volts
638XLS	3/8”	80-100	120

214LT

Trig-R-Heat Gun

Feather light 14 oz. gun has no transformer. Reaches hard-to-get at spots easily. Tips will not deform. Heats and recovers instantly. Rugged, precision built. Tip and element assemblies changed easily.

Model	Tip Size	Max. Watts	Min. Watts	AC/DC Volts	Weight W/O Cord
214LT	1/4″	400	150	120	14 oz.
212LT	1/2″	500	300	120	24 oz.
TIP AND ELEMENT ASSEMBLY					
214TE	1/4″	400	150	120	6 oz.
212TE	1/2″	500	300	120	16 oz.



SPH Soldering Pencil Holder

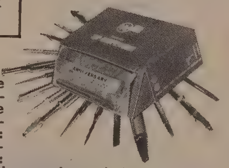
Adjusts to any angle
(SIH not shown)
SPH for up to 5/8” shaft
SIH for up to 1” shaft

CORDLESS

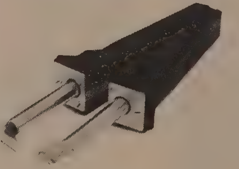
NICKEL CADMIUM BATTERY POWERED
Complete with recharger

Has built-in light. Compact - just 8” with tip. Weighs only 6 oz. Heats fast - about 5 seconds. One finger control. Small tip for pinpoint work. Recharges overnight. Can be used while recharging. Over 700°F tip temperature. Solders up to 100 joints per charge.

Tips and Tip Dispenser



Tip sizes from 1/8″ through 7/8″ in wide variety of configurations for specific industrial and commercial needs. Three grades — **Anniversary type:** Super finished, iron and chrome plated. **Wallklad:** Iron coated and chrome plated. For production and critical lab use. **Wallbrand:** Commercial, copper, nickel plated. Wall's own iron plating facilities produce high quality long-life tips. 1/8″ through 3/8″ iron plated or copper tips available in handy tip dispenser. Tips individually sealed in color-coded continuous belting, plastic envelope.



IC EXTRACTOR

Desolder and remove IC packs intact and salvageable. Desolder 2 and 3 lead components. Wall's new 500/IC Extractor goes where others can't . . . stays cool and comfortable . . . reaches operating temperature in 5 minutes. Factory pre-tinned. Chrome plated.

WALL-LENK MANUFACTURING COMPANY
BOX 3349 KINSTON, N. C. 28501 TEL. 919/527-4186

NOW – the

HEAVY DUTY IRON

638A-XLS

LIGHTWEIGHT PENCIL

A sturdy tool for high performance

FROM THE WALL RESEARCH LABORATORY COMES THIS INTERMEDIATE SOLDERING IRON FOR MANY USES

The Wall 638A-XLS is designed as a much-needed model between the heavy irons and the light pencils.

It provides a pencil-type handle on an iron that uses a ⅜″ diameter tip and will handle considerably heavier soldering operations than our 614XLS-HR (which has a maximum of 75 watts).

This is a lightweight pencil-type iron that is engineered to do heavy duty soldering.

ANOTHER ALL-AMERICAN DEVELOPMENT BY WALL

AMERICAN DESIGNED, AMERICAN MADE
BY SKILLED CRAFTSMEN

SPECIFICATIONS

WATTAGE: 80 and 100 watts at 120 volts. Other wattages and voltages are available on special order.

TIPS: Standard ⅜″ diameter plug type.

CORE: High temperature non-scaling material is used to eliminate tip set screw freezing and give long element life.

SHAFT: Stainless Steel.

HANDLE: Blue unbreakable polycarbonate — cool, comfortable. No metal liner. The element threads directly to the handle. Strong, secure, simple connection of element to the handle.

CORD: 2 or 3 wire neoprene.

SET SCREW: Stainless Steel.

ELEMENTS: The elements are industrial quality precision wound on highest quality mica. They are easily replaced in the field. The element is unscrewed from the handle and one screw and 2 wire nuts are removed to change the element.

abbott 60 ∿ industrial power transformers

specifications

INPUT PRIMARY: 115 VAC (50 to 65 Hz), 1 phase

REGULATION: 15% max. from no load to full load

SECONDARY VOLTAGE TOLERANGE: Within 5% of listed output voltage when measured at full load and 115 VAC input

INSULATION TEST: 1500 VAC

OPERATING TEMP.: 80°C maximum ambient

APPROXIMATE EFFICIENCY: Ranges from 80% to 90%

CONSTRUCTION: Commercial grade using Grain Oriented Silicon Iron for core and heavy insulated synthetic film magnet wire with class "B" rating. Vacuum impregnated with a high quality insulating varnish having a class "H" rating

For 230 VAC input (at no additional cost) add suffix "A" to standard model number. Example: 6B5-10A. Other outputs and/or inputs available on request.

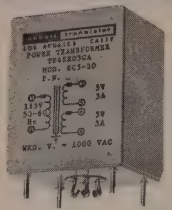
abbott 60 ~ MIL-T-27D power transformers



specifications

INPUT PRIMARY: 115 VAC, (50 to 65 Hz), 1 phase

REGULATION: 10% no load to full load

SECONDARY VOLTAGE TOLERANCE: Within 3% of listed output voltage when measured at full load and 115 VAC input

INSULATION TEST: 1500 VAC

OPERATING TEMP.: 90°C (194°F), maximum ambient

CONSTRUCTION: To MIL-T-27D, grade: 4, class "S", life "X" (10,000 hrs.), case: steel (see model No. for size)

WORKING VOLTAGE: 1000 VAC

EFFICIENCY: Ranges from 80% to 90% typical

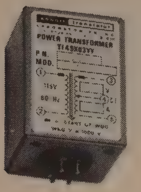
abbott 60 ∿ transformers



features

- Quality MIL-spec 60 Hz power transformers
- Hermetically sealed
- to meet MIL-T-27D
- 105°C ambient operation
- 5 to 5000 volts
- 5 to 300 watts

DELIVERY IS FROM STOCK

specifications

INPUT PRIMARY: 115 VRMS, 60 Hz ±5 Hz, 1 phase

INSULATION TEST: 1750 VRMS or 150% of secondary voltage (whichever is higher)

CONSTRUCTION: To MIL-T-27D, grade: 4, class: "S", life: "X" (10,000 hrs.) case: steel

ENVIRONMENT: 105°C maximum ambient temperature. Encapsulated to meet MIL-STD-810B for vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, sunshine, rain, explosion and altitude (to a vacuum)

WORKING VOLTAGE: 1000 VAC for all transformers with secondary voltages up to and including 1200 VAC; 80% of rated secondary voltage for all others

SECONDARY VOLTAGE TOLERANCE: Within 3% of listed output voltage when measured at full load and 115 VAC input

OUTPUT SECONDARY: See voltage and current of specific models listed. Standard models with outputs from 63 to 5,000 VAC are also available from stock. Contact our nearest office for your free copy of our complete brochure.

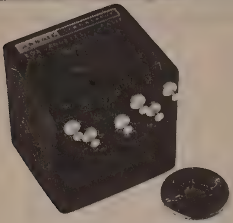
abbott 400 ∿ MIL-T-27D power transformers



Built to meet the specifications of MIL-T-27D, long life and reliability are major features of these hermetically sealed, ruggedly built power transformers. Encased in epoxy fiberglass and capable of operation at high temperatures, these units have a wide variety of uses in airborne, space and missile applications, and industry as well, where small size and dependability are prime factors. The model 4A series come in power levels of 7 watts, 10 watts, 25 watts, and 50 watts at any voltage between 5 and 120 VAC. The MIL-T-27D, type designation of these units is TF5SX03ZZ. Send us your special requirements.

features

- 105°C Ambient Operation
- Built to Meet MIL-T-27D
- 5 to 120 Volts
- 7 to 50 Watts

specifications

INPUT PRIMARY: 115 V, 400 Hz ±20 Hz, 1 phase

REGULATION: 10% no load to full load

SECONDARY VOLTAGE TOLERANCE: Within 5% when measured at full load and 115 VAC input

INSULATION TEST: 1500 VAC

CONSTRUCTION: To MIL-T-27D, grade: 5, class: "S", life: "X" (10,000 hrs.) case: smaller (see drawing)

ENVIRONMENT: Encapsulated to meet MIL-STD-810B, including vibration, temperature to 105°C, shock, sand, dust, humidity, saltspray, fungus, sunshine, rain, explosion, and altitude (to a vacuum). NOTE: For high altitude operation, encapsulate terminals

OUTPUT SECONDARY: See voltage and current of specific models listed

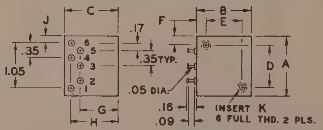
QUANTITY DISCOUNTS

1-4 pcs.	- price listed.
5-9 pcs.	- less 4% of the 1-4 piece price.
10-24 pcs.	- less 8% of the 1-4 piece price.
25-49 pcs.	- less 13% of the 1-4 piece price
50-99 pcs.	- less 19% of the 1-4 piece price.
Above 100 pcs.	- Contact nearest office for an exact quotation.

All Prices subject to change without notice.

Size	A	B	C	D	E	F	G	H	J	K
1	1.37	1.25	1.31	1.00	.87	.19	1.00	1.19	.16	4-40
2	1.50	1.37	1.37	1.12	1.00	.19	1.06	1.25	.22	4-40
3	1.75	1.50	1.56	1.25	1.00	.25	1.25	1.44	.35	6-32
4	2.00	1.62	1.81	1.50	1.12	.25	1.50	1.69	.47	6-32

DIMENSIONAL TOLERANCE = ±.02, EXCEPT F, G, H, J = ±.04



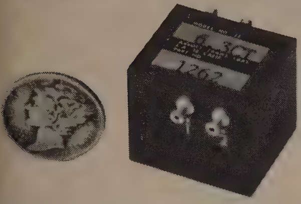
EASTERN OFFICE: 1224 Anderson Ave./Fort Lee, New Jersey 07024 (201) 224-6900

abbott transistor

5180 W Jefferson Blvd. / Los Angeles 90016
(213) 938-0155 Telex: 69-1398

TRANSFORMER DIVISION

abbott 400 ~ transformers



features

- Hermetically sealed
- 105°C operation
- To meet MIL-T-27D
- Designed exclusively for 400 Hz
- For aerospace application
- Molded diallyl phthalate

DELIVERY IS FROM STOCK

specifications

Input Primary
115V, 400 Hz ±20 Hz, 1 phase

Regulation
10% no load to full load

Secondary Voltage Tolerance
Within 5% when measured at full load and 115 VAC input

Insulation Test
2500 VDC or 150% of secondary voltage (whichever is higher)

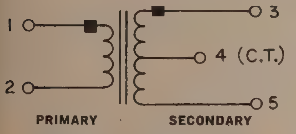
Construction
To MIL-T-27D, grade: 5, class: "S", life: "X" (10,000 hrs.) case: smaller

Environment
Encapsulated to meet MIL-STD-810B, including vibration to Proc. XII, temperature to 105°C, shock, sand, dust, humidity, saltspray, fungus, sunshine, rain, explosion, and altitude (to a vacuum)

Output Secondary
See voltage and current of specific models listed

Standard models with outputs from 350 to 5,000 VAC are also available from stock. Contact our nearest office for your free copy of our complete brochure.

TYPICAL CIRCUIT DIAGRAM



"■" refers to in-phase points

Standard models with outputs from 350 to 5,000 VAC are also available from stock. Contact our nearest office for your free copy of our complete brochure.

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

Applications:
As fixed and adjustable inductors for low frequency filters. As transformers for tone frequencies used in push button telephone oscillator circuits and data sets; coupling and impedance matching applications.

Features:
High and low profile units, p/c mounting, fine tuning, tuning adjustment at least ± 3% from nominal, TC matches polystyrene capacitors, high Q — custom designs, impregnated coils, for extreme environments.

data coils by Aladdin

Data Coils, Transformers, Inductors, Filters? We've Got Those Too!
We feature our latest innovations in coils, transformers, inductors and filters in a six-page *Magnetic Components for Telephony* booklet. Telephony applications and configurations are highlighted, making it easier for you to select components. No charge, of course!

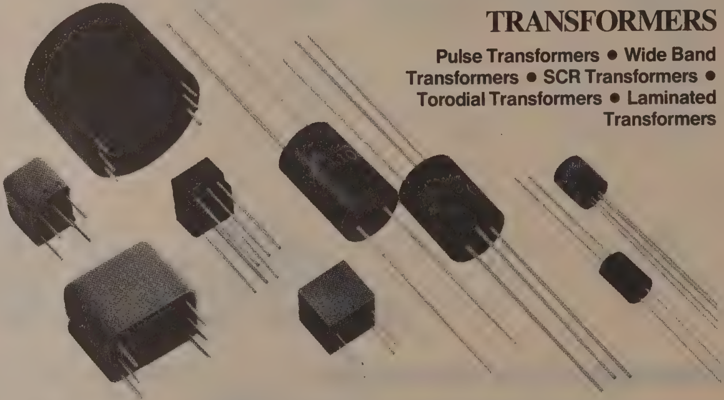
Aladdin ELECTRONICS

innovators in ferromagnetic components for data processing, data communications and precision industries

Write for your FREE copy of the AE "MINILOG" . . .

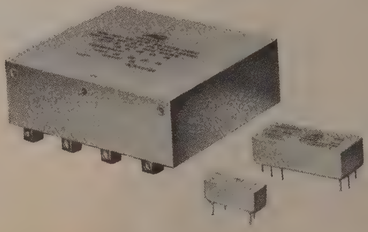
A concise catalog of Aladdin's most frequently ordered stock components—data coils, transformers, filters, inductors and strip delay lines. They're all available *from stock* (on a 48-hour shipping schedule in quantities up to 250). For your copy, write: Aladdin Electronics, P.O. Box 7263, Nashville, Tennessee 37210.



TRANSFORMERS

Pulse Transformers • Wide Band Transformers • SCR Transformers • Torodial Transformers • Laminated Transformers

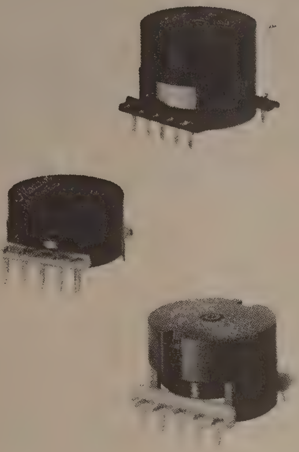
---



FILTERS

Low Pass Filters • High Pass Filters • Band Pass Filters • Band Reject Filters

AE can deliver small quantities of any of many filter designs in less than two weeks—or design filter units to meet assignment parameters and deliver evaluation prototypes in less than three weeks in most cases.



DATA COILS

Data coils in a complete spectrum of frequencies, all utilizing communication-grade ferrite pot cores to assure a high Q factor and excellent temperature stability of inductors while utilizing a small core area.

Applications: as fixed and adjustable inductors for low frequency filters . . . as transformers for tone frequencies used in push-button telephone oscillator circuits and data sets . . . coupling and impedance-matching applications.

Features: High and low profile units, p/c mounting, fine tuning, tuning adjustment at least ±3% from nominal, TC matches polystyrene capacitors, high Q—custom designs, impregnated coils for extreme environments.

INDUCTORS

Variable and fixed inductors for application in high Q tuned circuits such as filters and tank circuits . . . blocking decoupling and pulse circuits . . . frequencies of 20 kHz to 100 mHz.

introduces WAIT·A·BIT™ delay lines

What's a WAIT-A-BIT?

- New computer delay line technology—totally unlike conventional lumped or distributed parameter delay lines
- Shorter delays for pulse synchronization and pulse shaping in fast computing machines
- Can be cascaded for timing applications
- Tested automatically for delay time to a precision of ± 0.02 ns, rise time, prepulse distortion, and pulse top distortion
- Tested in conformance with the applicable paragraphs of MIL-D-23859 and MIL-STD-202. Sampled per MIL-STD-105, Level II, 0.4% A.Q.L.

MINIATURE PLUG-IN POWER TRANSFORMERS FOR PRINTED CIRCUIT APPLICATIONS
Standard Part Numbers — Stock Available

This series of power transformers includes units for transistorized control and instrumentation applications. Primaries are rated at 115 V, 50 to 500 Hz and dual secondaries provide voltages from 4 to 38 volts parallel connected, and 8 to 76 volts series connected. Load regulation will not exceed 20%.

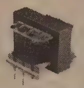
MINIATURE PLUG-IN AUDIO TRANSFORMERS FOR PRINTED CIRCUIT APPLICATIONS
Standard Part Numbers — Stock Available



This series of transformers covers input, output and driver applications with a broad frequency response of ±3db from 300-10,000 Hz. It features precision molded terminals for rapid insertion and the primary and secondary windings may be reversed. These units are ideal for impedance matching.

CONVERTER TRANSFORMERS

These Transformers are designed for use in self saturating DC to DC or DC to AC converters. They can be used at switching frequencies from 15 KHz to 50 KHz. Utilization of ferrite cores yields efficiencies up to 80%.

Douglas Randall manufactures specialty transformers and custom wound coils for special requirements and unique applications. Engineering assistance and rapid prototype service are available for new designs. Douglas Randall has perfected a special technique to produce molded coils with or without inserts in moderate quantities at low initial tooling costs. A few typical examples of these molded coils are illustrated above.

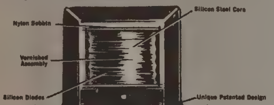
WALL PLUG-IN LOW VOLTAGE

CONVERTERS/INVERTERS/CHARGERS

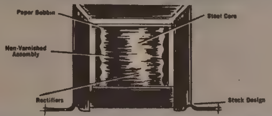
To insure high quality and top performance in our plug-in power supplies and chargers, we make our own low voltage

TRANSFORMERS

using superior materials in a smaller sized unit. The years of successfully satisfying the unique needs of the industry with specialty transformers is "at your service".



WHY IS THIS LOW COST DYNAMIC TRANSFORMER BETTER THAN THIS



STOCK TRANSFORMER COSTING MORE.

In addition to those advantages already pointed out, DYNAMIC TRANSFORMERS can be made to your SPECIFICATIONS in days and in most cases with NO COST for prototypes.

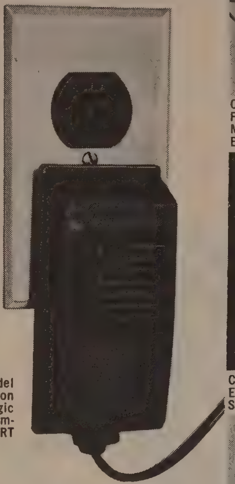
TRANSFORMERS FOR ALL REASONS

- ☐ Patented, U/L listed
- ☐ Internal or External
- ☐ Wall-mounted
- ☐ Fast-charging
- ☐ Power conversion
- ☐ Conversion/charging
- ☐ Printed circuit
- ☐ Sub-miniature
- ☐ Ferro-resonant
- ☐ Multi-input
- ☐ Multi-output

THE TRANSFORMATION OF POWER

A unique brochure explaining the many advantages and application possibilities of Dynamic's patented U/L listed transformers, converters, chargers and power supplies, technical data sheets and bulletins, are available on specific products. A request on your letterhead or phone our Sales Engineering Department WPX-1.

Designed to be listed under the U/L • CSA SPECIFICATIONS



Illustrated at right is the Model 3-1743 presently in production for use with a keyboard logic circuit. Suitable for minicomputers, calculators, remote CRT terminals, etc.

Dynamic Instrument Corp. has designed, developed and patented a complete range of low-voltage, filtered, transistor-regulated power supplies and chargers designed to supply the necessary power to a vast variety of Electronic equipment.

Utilizing a wall plug-in type unit eliminates or greatly reduces the problems involved with UL listing your product. They also remove the major heat source, reduce size and weight, and also greatly increase your design flexibility. The latest design applications of the Dynamic wall plug-in supplies are in conjunction with such sophisticated equipment as mini-computers, calculators, keyboard logic circuits, and remote CRT Terminals.

Just call or write: Dept. WPX-1.

Dynamic's product range and capabilities also cover:

POWER CONVERSION

AC-AC for products requiring low-level AC voltage. AC-DC for small electric motor driven products that do not use batteries.

SECONDARY BATTERY CHARGING

Dynamic Chargers for charging Nickel-Cadmium; Lead-Acid and Manganese-Alkaline Batteries.

AC-DC CONVERSION/CHARGING

Dynamic Converter-Chargers providing rechargeability or instant use of battery operated products.

FAST CHARGING SYSTEMS

Dynamic design and production capability relative to Fast Charging Systems.

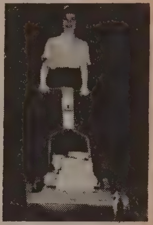
TRANSFORMERS

Internal, External and Wall-Mounted Dynamic Transformers.

SPECIALTY TRANSFORMERS

Dynamic Plug-In, Printed Circuit Transformers; Sub-Miniature Transformers; Ferro-resonant Transformers; Multi-Input Voltage and Multi-Output Voltage Transformers.

CONVERTER/CHARGER FOR PORTABLE MEDICAL-ELECTRONIC EQUIPMENT



CHARGER FOR BATTERY ELECTRIC-STARTER SYSTEMS

CHARGER FOR BATTERY OPERATED TOYS

CONVERTER/"FAST" CHARGER FOR MINI-CALCULATORS

CONVERTER/CHARGER FOR MOTER DRIVEN CAMERAS

AC CONVERTER FOR PORTABLE ELECTRONIC EQUIPMENT

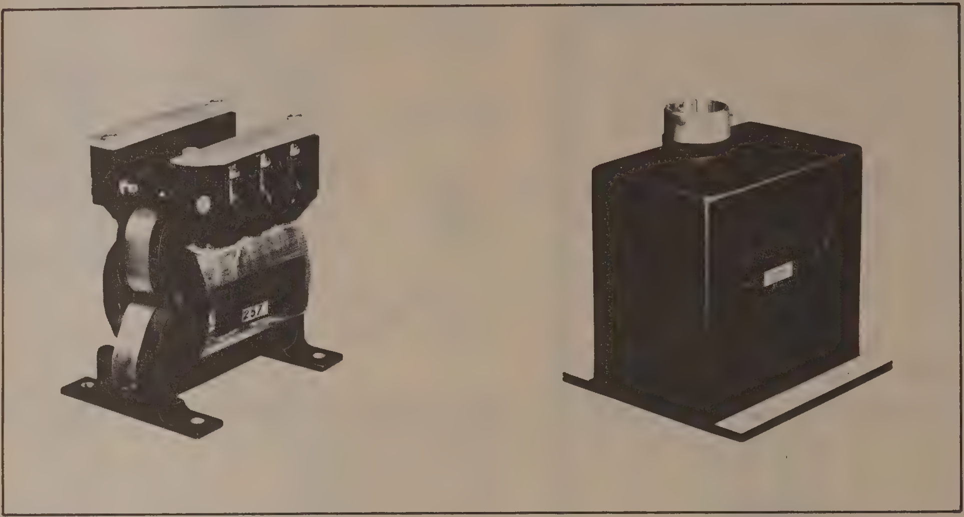
electrocube transformers

Aluminum Foil Wound



Electro Cube aluminum foil wound transformers are available in the standard models listed on the reverse and also to customer requirements as isolation or auto transformers for frequencies from 25 cycles into the kilocycle range. Units may be single or multi-phase. Open frame, shell enclosure and hermetically sealed configurations can be furnished.

Advantages of these foil wound transformers over conventional wire wound units include:

- higher operating efficiency
- reduced weight
- improved thermal efficiency
- higher temperature operation
- improved regulation
- internal losses
- improved volume efficiency

The ability of a transformer to dissipate heat affects its maximum rating. Electro Cube foil wound coils have the ability to dissipate large amount of heat because there is a direct metallic path to each end of the coil from any point within the coil. Special end treatment of the coil including attachment to a heat sink, can make possible significantly reduced operating temperatures.

Wire wound coils, by comparison, are more difficult to cool. As a result of a limited heat path a lower coefficient of heat transfer and increased resistance due to heat and vice versa, the heat is greatest in that part of the coil least capable of dissipating it. Heat generated by conductors deep within the coil must pass through many thermal barriers of the insulation between the wires.

In addition to thermal efficiency, the materials in Electro Cube foil transformers permit use with higher operating temperatures than are possible with wire coils with equivalent insulation ratings. This also contributes to reduced weight and volume.

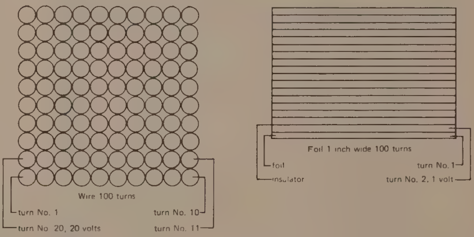


Figure 1. Typical coil sections with 100 volts excitation.

Figure 1 shows the relative difference in volume required for a 100 turn wire coil and an equivalent foil coil, and the relative use of space for insulation and conductors. It also shows voltage stress and insulation requirements for the two configurations. At 1 volt per turn there would be 20 volts between the 20th and first turn of the wire coil. When the top layer is finished, the last turn may lay against one of the first, resulting in a voltage difference of up to 100 volts. The foil coil never has more than 1 volt between any two conductors, or a 100 to 1 advantage over the wire coil, in this example.

The physical arrangement of the foil windings promotes a lower leakage reactance or power loss in the transformer, which contributes to efficiency and regulation. Together with the lower I^2R loss of the windings, this allows the use of fewer circular mils of conductor area to meet required efficiency and regulation requirements.

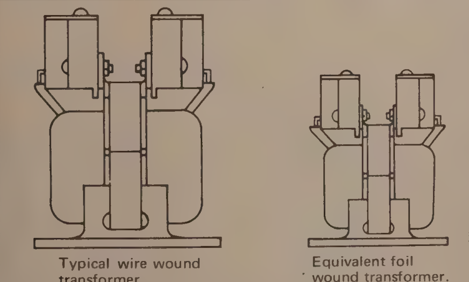
Construction: aluminum foil/Mylar insulation, epoxy impregnated.

Since it is not necessary to duplicate the circular mil area of a copper wire wound transformer and because of the efficient use of the winding area it is possible to use a smaller core volume to support the flux density required for any given load. The smaller core and the lighter weight of the aluminum foil all contribute to a reduction in weight and volume.

ADDITIONAL PRODUCTS AND CAPABILITIES:

Electro Cube manufactures wire wound and foil wound transformers, both laminated and C-core, toroids and special inductors. Through company funded development and testing, Electro Cube introduced the first commercially available autotransformers in 10KVA and lower ratings, and has developed processing techniques that make these devices reliable and economical. Electro Cube also can supply aluminum foil chokes with advantages similar to those of foil wound transformers. Electro Cube also manufactures precision film capacitors, EMI filters and RC networks.



Typical wire wound transformer.

Equivalent foil wound transformer.

FREED TRANSFORMER CO., INC.

SUB–MINIATURE TRANSISTOR AUDIO TRANSFORMERS

These high quality miniature transformers are high efficiency audio components featuring hermetic sealing for maximum protection against electrolysis and subsequent corrosion of fine wires caused by moisture penetration. The units are constructed in accordance with MIL-T-27 Specifications. Transistor transformers can also be supplied in an open or encapsulated type of construction.

MINIATURE AUDIO TRANSFORMERS

These high quality, miniature transformers feature hermetically sealed for maximum protection from moisture penetration with subsequent electrolysis and corrosion of fine wires. While primarily intended for non-military equipment, these units are constructed in accordance with MIL-T-27 Specifications.

Frequency response:
±2DB 30-20,000 Hz
* ±2DB 200-10,000 Hz
All units supplied in DM-20 cases

FREED TRANSFORMER COMPANY, INC. 1795 WEIRFIELD ST. (Ridgewood) Brooklyn, N. Y. 11227

FREED TRANSFORMER CO., INC.

TRANSISTORIZED CONVERTERS—TDC LINE

For DC/DC conversion from low voltage DC sources to high voltage DC output. Stock units are available in power capabilities to 45 watts with input voltages of 6, 12, 24, 28, and 48 volts.

All TDC converters are hermetically sealed and oil filled. Outputs are filtered with ripple less than .1%. Operating temperatures from −55°C to +70°C. They are ruggedly built to withstand shock and vibration.

DC TO AC TRANSISTOR INVERTERS—TAC LINE

115 volt outputs at 60 Hz at powers ranging from 50 VA to 350 VA.

Output wave form-square wave; Output frequency – 60 Hz ±1 Hz;

Hermetically sealed-oil filled; Maximum operating temperature – 70°C.

AVAILABLE TYPES:

CAT. #	NOM. VDC IN	OUTPUT VA	SIZE
TAC 6-50	6	50	4⅛ x 3½ x 4½
TAC 12-50	12	50	4⅛ x 3½ x 4½
TAC 12-90	12	90	4⅛ x 3½ x 4⅞
TAC 12-175	12	175	5 x 4⅛ x 6
TAC 28-50	28	50	4⅛ x 3½ x 4½
TAC 28-100	28	100	4⅛ x 3½ x 4⅞
TAC 28-175	28	175	5 x 4⅛ x 6
TAC 28-250	28	250	5½ x 5 x 6¾
TAC 28-350	28	350	5½ x 5 x 6¾
TAC converters are also available with 400 Hz outputs in three models:			
TAC 12-100-4	12	100	4½ x 3½ x 4½
TAC 28-150-4	28	150	4⅛ x 3½ x 4½
TAC 28-250-4	28	250	5 x 4⅛ x 6

DC TO AC TRANSISTOR INVERTERS—PTC LINE

A new line of DC/AC inverters for operation from a 12 volt D.C. source. Output is square wave, 115 volts RMS at 60 Hz. Regulated to ±2 Hz over an input voltage range of 10.5 to 13.5 VDC.

Efficiency on all units is 80% min. at full load. Ambient temperature to 55°C.

Available models listed below:

CAT. #	VA OUT	SIZE	MTG.
PTC 12-15	15	3 x 2½ x 4	1⁹⁄₁₆ x 1¹³⁄₁₆
PTC 12-50	50	3½ x 3 x 4¹³⁄₁₆	2 x 2¾
PTC 12-100	100	5⅞ x 4 x 5¼ HI	3¼ x 3⅛
PTC 12-175	175	7⅝ x 4¹³⁄₁₆ x 5¼ HI	6 x 3½

PTC 12-15 and PTC 12-50 are supplied with 4-terminal headers for input and output connections.

PTC 12-100 and PTC 12-175 use barrier strip terminals and in addition have an auxiliary output receptacle.

DC TO AC TRANSISTOR INVERTERS — VC LINE

A low priced efficient transistor inverter for applications not requiring frequency regulation closer than ±5 Hz is available in 15 VA and 100 VA output capabilities. Input nominal 12 V.D.C. Output square wave 115 volt.

Cat. #	Power	Freq.	Size
VC 12-15	15 watt	55-65 Hz	3 x 3⅛ x 3¾ Hi.
VC 12-100	100 watt	55-65 Hz	4½ x 3½ x 4½ Hi.

MCV – CONSTANT VOLTAGE TRANSFORMERS – MCV

(FERRO-RESONANT TRANSFORMERS)

The MCV line of constant voltage transformers provides accurate regulation against line and/or load variations, without the use of tubes or moving parts.

Input Voltage Range
95 to 130

Rated output within ± 2% of nominal value. Regulation automatically maintained within ± 1%. Regulation from 25% to full load ± 2%.

- MILITARY SPECIFICATIONS
- NO TUBES
- COMMERCIAL
- NO MOVING PARTS
- ACCURATE REGULATIONS
- FAST RESPONSE
- FULLY AUTOMATIC
- SUPPLIED WITH CONDENSERS

FREED TRANSFORMER CO., INC.

HERMETICALLY SEALED MINIATURE AND SUB-MINIATURE FILTERS TO MIL-F-18327

Freed Standard Filters are **Hermetically Sealed Miniature and Sub-Miniature** high performance components designed for both production and laboratory applications in the Communications and Electronic industry. In order to achieve attenuation requirements not obtainable with one single filter, one can combine several standard filters of different transmission characteristics. Wide Band Pass characteristics are obtainable by combining low and high Pass Units. The astatic construction of inductive components together with special shielding reduces the hum pick-up of the standard filters.

Low Pass Filters: The attenuation characteristics of Low Pass Filters are 6db or less at cut-off frequency • **ILP-ILM Interstage Low Pass Filter.** Characteristic impedance 10,000 ohms, in and out • **LLP-LLM Line Low Pass Filter.** Characteristic Impedance 500 to 600 ohms, in and out • **High Pass Filters:** The attenuation characteristics of High Pass Filters are 6db or less at cut-off frequency • **IHP-IHM Interstage High Pass Filter.** Characteristic Impedance 10,000 ohms, in and out. • **LHP-LHM Line High Pass Filter.** Characteristic Impedance 500 to 600 ohms, in and out • **Band Pass Filters:** The attenuation characteristics of Band Pass Filters are 2db or less at plus or minus 3% of center frequency • **IBP-IBM Interstage Band Pass Filter.** Normal input impedance — 10,000 ohms. Output impedance .5 megohms. Effective voltage step-up 2:1. (Output voltage to source voltage.) • **LBP-LBM Line Band Pass Filter.** Nominal input impedance 500 to 600 ohms. Output impedance .5 megohms. Effective voltage step-up 5:1. (Output voltage to source voltage.)

Special filters in all six types are available upon request.

NULL "T" FILTERS SERIES 1950

Standard models are available for 30, 60 and 120 cycles in a wide range of impedances. Each network will give a minimum of 50 db attenuation at the null frequency.

The null frequency is adjusted to a tolerance of ±2%.

All Null T Filters are hermetically sealed.

Prices on request.

FREED TRANSFORMER COMPANY. INC. 1795 WEIRFIELD ST. (Ridgewood) Brooklyn, N. Y. 11227

FREED TRANSFORMER CO., INC.

TOROIDAL INDUCTORS

Using the latest developments in the field of magnetic materials and new impregnation and molding techniques the Freed Transformer Co. makes available to the industry the most extensive line of toroidal inductors.

Freed toroids are available in three types of constructions. Open units coated with a special high temperature extremely low loss compound, hermetically sealed in metal cases or molded in special **Freed Epoxy Resin.** Both hermetically sealed and molded units meet the latest military specification MIL-T-27A(graded 1 or 4 and 2 or 5 respectively.)Freed toroidal inductors are supplied with either molypermalloy or carbonyl iron powder cores

1. Temperature Stabilization:

The molypermalloy and carbonyl iron powder cores have a temperature coefficient of inductance. Depending on the degree of temperature stabilization the cores have different temperature coefficients. The degree of stabilization is denoted by a two-letter code.

SF	Non-stabilized cores, ±2½% inductance variations from —55°C to +85°C.
SN	Non-stabilized cores, +2% inductance variations from —55°C to +85°C.
SE	Temperature stabilized cores, +0.1% to —0.4% inductance variations from —1.5°C to +54°C.
SB	Temperature stabilized cores, ±0.1% inductance variations from +13°C to +35°C.
SD	Temperature stabilized cores, ±0.1% inductance variations from —1.5°C to +54°C.
SW	Temperature stabilized cores, ±0.25% inductance variations from —54°C to +85°C.
SM	Temperature stabilized cores, ±.25% —65°C to +125°C.
SP	Temperature stable carbonyl iron cores, ±0.3% inductance variations from —55°C to +85°C.

The temperature (stabilization) coefficient of an inductor will depend upon the nominal inductance value, operating frequency and A.C. voltage across the coil. Under some unfavorable working conditions the temperature coefficient of inductance corresponding to a given stability characteristic may be exceeded.

Toroids with special requirements such as tapped toroids, toroidal transformers, molded and cased units with dimensions other than standard sizes and high temperature toroids can be supplied on request. Our engineering and laboratory facilities are available for consultation, research and development.

*TI-20 through TI-23 have a very low voltage coefficient and inductance will change very little with voltage. Because of high frequency application, the maximum voltage is limited rather by breakdown than by saturation.

$$\text{Normalized } V_{AC} = \frac{V}{F}\,\frac{1}{\sqrt{L_H}}$$

$$\text{Normalized } I_{AC} = I_{AC}\sqrt{L_H}$$

$$\text{Normalized } I_{DC} = I_{DC}\sqrt{L_H}$$

where F —operating frequency in Hz
L_H —inductance in henries
Iac—A.C. current in MA
Idc—D.C. current in MA
V —A.C. voltage across the core

FREED TRANSFORMER COMPANY, INC. 1795 WEIRFIELD ST. (Ridgewood) Brooklyn, N. Y. 11227

FREED TRANSFORMER CO., INC.

COMMERCIAL GRADE COMPONENTS

These components are designed to meet the demand for low-cost replacement parts for commercial electronic equipment.

The best commercially available materials have been utilized in the design of these units, to insure reliability and excellent performance characteristics. Vacuum impregnation with a non-hygroscopic varnish to prevent penetration of humidity are employed to give these units long life and trouble-free performance.

230-115 V, 50-60 C.P.S. Stepdown Transformers rated from 25 V A up to 5,000 V A Rating and line booster transformers are included in this series.

All units, with only a few exceptions, are uncased or of shell-type construction.

Isolation transformers and Stepdown transformers are equipped with line cord and receptacle.

Variac® Adjustable Autotransformers

VARIAC® MANUALLY OPERATED AUTOTRANSFORMERS

The General Radio Variac autotransformer is a continuously variable unit used to control AC voltage. Features the Duratrak® contact surface, a uniform silver-alloy coating to prevent injurious high-temperature oxidation and resultant brush-track deterioration — track will show no significant wear after 1,000,000 cycles of brush operation. Variac autotransformers are highly efficient, have high thermal capacity, can withstand very high short-term overloads, and do not affect waveform or power factor. Other features: Good regulation; smooth control; long life; linear output voltage; low maintenance; easy installation. All necessary mounting hardware is included with each unit. Portable types, indicated by T in Model No., have an overload protection reset switch, line switch, convenience outlet, and a 6-ft. two- or three-wire line cord. Manually operated and motor-driven Variacs are available in a wide variety of voltage and current ratings, with or without cases. All except portable units can be equipped with ball bearings at slightly higher prices; ball bearings, indicated by BB in Model No. of manually operated units, are included with 4- and 6-gang types. **Angle of Rotation:** 320°. **Line Frequency:** 50 and/or 60 Hz unless otherwise specified. **Input Voltages:** 120, 208, 240 or 280 volts. **Output Voltages:** 0-120/140, 0-208, 0-240/280, 0-480 or 0-560 volts, continuously adjustable. **Current Ratings:** 2 to 300 amps.

MODEL W50-P1 CHOKE FOR PARALLEL COMBINATIONS

When windings of identical Variacs are paralleled to obtain higher load ratings, it is recommended to use one or more chokes to limit excess circulating current in the event that brushes accidentally get out of line. Use 1 choke for 2 Variacs in parallel; 3 chokes for 3 Variacs; 4 chokes for 5 Variacs; 6 chokes for 6 Variacs. Parallel operation of units smaller than Model W30 is not recommended since the next larger unit is more economical. For W50 Series Variacs, the choke can be mounted directly on the terminal plates.

W-TYPE MANUAL THREE-PHASE GANGED MODELS

240-VOLT INPUT GANGED UNITS

All units listed require an input of 240 volts except W5LG3M. W5LG3, and W8LG3, which require 208 volts. All have an output range of 0-240 volts except types with H in Model No., 0-280 volts, and types with L in Model No., 0-208 volts. Ball bearings are included with 4- and 6-gang types; available for other types at extra cost.

* kVA ratings — normal input line voltage times maximum current; maximum current can be drawn at maximum voltage for line voltage connection only. † "Y"-circuit connected. ‡ For 60 Hz only; no overvoltage connection. § Open-delta circuit connected. ¶ Overvoltage connection not recommended. ▲ See previous page for W50-P1 Choke for parallel combinations. ↓ Depth behind panel except cased types (excluding knobs). # Also for single-phase 120-volts input.

SINGLE-PHASE PORTABLE VARIACS

Portable, metered, cased Variacs with 2-wire or 3-wire cord and receptacle, and convenient carrying handle. Meter accuracy is 3% of full scale except 5% for ammetered Model W20HMT3A. Power switch disconnects both sides of line. Meters are switchable under load. Types MT and MT3 have overvoltage connections and corresponding dial scales; line-voltage connections and dial scales on special order.

120-VOLT INPUT

All units have max, output voltage range of 0-140 volts except W5LMT3 which has 0-120 volts. Models W5MT and W10MT come in 2-wire version; all others in 3-wire version.

MOTOR DRIVEN MODELS

All W- and M-type Variac autotransformers, both single and ganged, can be supplied with motor drives. Motors are fully enclosed, two-phase gear-reduction servo types having very low moments of inertia; the motor mounting plate is attached to the base end of the autotransformer by means of four heavy corner posts. Gear coupling is used to facilitate precise alignment, eliminate phase shift problems, and permit a number of drive speeds by simple change of gears. Three basic internal-geared motor speeds are available which, with a selection of standard coupling gears, makes possible the assembly of units having nominal full-traverse (320°) speeds of 2, 4, 8, 16, 32, 64 or 128 seconds at 60 Hz (approximately 20% slower at 50 Hz). The 2- and 4-second units are intended for high-speed servo applications; slower speed models are primarily for remote positioning. Cases are available for most models as indicated. **All motor-driven Variacs are furnished complete with ball bearings, a 120-volt phase-shift capacitor, and an adjustable microswitch for setting traverse limits.**

HOW TO ORDER

```
W 5 H G 3      D 8 C K      M
A ——┘          B ——┘        C┘
```

A **Basic Unit Prefix:** Select from table below the desired basic Variac unit, as described elsewhere in these pages.

B **Motor Indicator Suffix:** Add appropriate suffix for each Variac as indicated by an X in columns below. Suffix indicates seconds for 320° traverse.

C **Case Suffix:** Add final suffix **M** if case available and desired. Case fully encloses both motor and Variac.

MINIATURE TRANSFORMERS

Extremely small rectifier transformers with single or dual secondary winding for electronic designers who wish to design their own solid state power supplies. 115 volt A.C. input, 55-450 cycles ratings below give D.C. outputs for rectifier circuits with condenser input.

SUBMINIATURE UNITS

Channel-frame (1⅜"x1⅛"x1").

Model	Sec. D.C., Volts	Sec. D.C., Current	Price
SM-1	10C.T.	80ma	$12.50
SM-2	15C.T.	60	12.50
SM-3	20C.T.	50	12.50
SM-4	30C.T.	30	12.50
SM-5	12, 12C.T.	30	16.00
SM-6	15, 15C.T.	25	16.00

DESIGN INFORMATION

CENTER TAP — All center-tapped units are specified C.T. The ratings, therefore, are for a full-wave circuit. All others are designed for a bridge circuit.

TEST VOLTAGE — 1000 volts, D.C. between primary and secondary, and between secondary windings.

INSULATION — Nylon bobbin; insulating paper between each layer.

LEADS — Flexible leads rated for 105°C.

DUAL SECONDARIES — Transformers shown with two output units give indicated current from each tap.

All transformers listed may be wound for 220 volts, A.C. input.

SPECIAL TRANSFORMERS

There is no extra charge to design transformers with output voltages similar to those shown on this page. Call us for our free estimate. You can rely on our prompt service.

HIGH CURRENT UNITS

Channel-frame (3"x2½"x2").

Model	Sec. D.C., Volts	Sec. D.C., Current	Price

ISOLATION TRANSFORMERS

Model	Sec. D.C., Volts	Sec. D.C., Current	Price
IH	115	170ma	$14.00

ENCASED TRANSFORMERS

All listed transformers are available fully encapsulated in a MIL-T-27 can.

The cost of such units is an additional $10.00 for single secondary transformers and $12.00 additional for dual secondary units.

Standard connectors are of the hooked solder pin type, mounted dead center on the stud side of the case.

POWER TRANSFORMERS AND HIGH CURRENT CHOKES

- Primary Voltage = 115 V RMS, 60 Hz (Will Operate to 400 Hz).
- Transformer Regulation is 5% No Load to Full Load.
- Transformers Rated for 45°C Temperature Rise.
- All Transformers Have Two Secondary Windings. They Can Be Connected for Parallel or Series Operation.
- Available Immediately from Stock.
- Secondary Voltages between the Standard Units Available.
- All Chokes Have Two Identical Coils. They Can be Connected in Parallel or Series.
- All Chokes and Transformers Rated for Class R Performance Per MIL-T-27C.

CURRENT TRANSFORMERS

FEATURE:

- Accurate and expedient method of measuring AC current to 1000 amps.
- Convenient and easy method to convert AC current to AC or DC voltage.
- Measures AC current with minimum interaction from metering circuits
- Transforms primary current in accordance to IpNp = IsNs
- Rated Class R (105°C) minimum per MIL-T-27C.
- Insulation Test Voltage: 1500 VAC @ 60 Hz.

SERIES DESCRIPTION

Series	Description
CT	60-400 Hz toroidal type. Primary is single turn provided by insulated conductor under test. Secondary drives 1A or 5A AC ammeter.
CMC	60-400 Hz EI type. Multiple-turn primary transforms AC current to proportional AC secondary voltage, Es across Rs, for AC or DC control.
CTA	60-3K Hz multi primary current range toroidal type. This Series conveniently converts low AC voltmeter range into AC current meter. Rs supplied per schematic.

ISOLATION TRANSFORMER

- Applied for UL listing*
- Built-in line cord and plug*
- Built-in voltage meter
- Built-in circuit breaker protection
- 60 Hz portable
- Electrostatic shield
- Low leakage current
- Hospital grade plug & receptacle available*

*Medical equipment

APPLICATION:
- Isolation Transformer

HOW TO ORDER

IT - 500 - XX

ISOLATION TRANSFORMER — IT
VA RATING — 500
SECONDARY VOLTAGE IF OTHER THAN 115 VAC — XX

Power Rating VA	Part No.	Voltage Primary VAC	Voltage Sec. VAC	Dimensions in Inches W	Dimensions in Inches D	Dimensions in Inches H	App. Wt. Lbs.
500	IT-500	115	115	6.00	7.00	5.00	20
1000	IT-1000	115	115	6.87	8.00	6.00	35

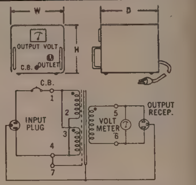
Leakage Current	
Input Polarity	Output (Term. 5) to Earth Gnd. Leak
Normal	5 μA Typ.
Reversed	5 μA Typ.

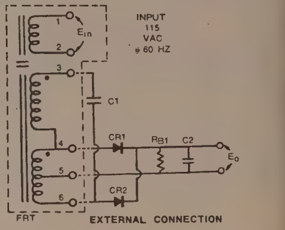


FERRO-RESONANT TRANSFORMER

Ferro-Resonant Transformer (FRT) provides a stable transient-free, regulated DC voltage with short-circuit protection and superior dynamic characteristic. A series of these FRT's are available from KGS ELECTRONICS at almost any output voltage.

FEATURE:
- Wide choice of output voltage from 6 VDC to 240 VDC and up to 500 VA, 20 Amps maximum.
- Designed for maximum efficiency for the given size.
- Line regulation is ±1% (See schematic).
- With an additional resonant capacitor to C1 (about 50%), ±1% line regulation is realized at 95 VAC input with slight increase in overall output voltage Eo.
- No load to full load regulation is 5% to 10% depending on the bleeder value.

APPLICATION:
- Replacement of conventional power transformer for transient suppression.
- Economical and reliable DC power supply, battery charger, etc.



STANDARD RATING AND SIZE

VA Unit	W (in.)	H (in.)	D (in.)	MW (in.)	MD (in.)	LAM (in.)	A (in.)	Wt. (lb.)	Suggested Value* C1 (μF)	Suggested Value* C2 (μF)	Suggested Value* RB1 (Watt)
50	3.13	3.78	2.75	2.62	2.13	1.12	13/64 x 21/64	5	1.0	10K	10
100	5.00	3.75	3.40	4.25	2.50	1.50	13/64 x 21/64	8	1.5	22K	20
200	5.25	5.75	4.00	4.38	2.25	1.12	9/32 x 9/16	12	2.0	40K	25

500	5.25	5.75	5.50	4.38	3.62	2.50	9/32 x 9/16	23	5.0	100K	100

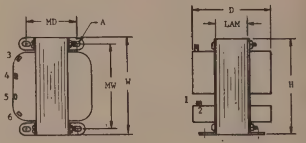
*1. C1 is a liq-filled AC capacitor, GE type 45F, 660 VAC, or equivalent (supplied at additional cost).

*2. C2 is an aluminum, Computer Grade electrolytic capacitor. K = 1000 WVDC = 1.3 Eo and the capacitance value is based on 25 VDC output voltage, Eo. Use the following equation for the output voltage, Eo other than 25 VDC:

$C2 = (5 \cdot \frac{VA}{Eo}) \cdot K$ — μF Where:
VA = VA rating of the output
Eo = DC output voltage

*3. R_{B1} is a recommended 10% bleeder load approximately calculated by $R_{B1} = \frac{10(Eo)^2}{(VA)}$ — Ohms

*4. Output voltage Eo, is held within ±2% of nominal with suggested values of C1, C2, and R_{B1}.



HOW TO ORDER (Sample shown)

FRT 200 28

Ferro-Resonant Transformer — FRT
VA Rating (See Table and Note) — 200
DC Output Voltage (6 VDC to 240 VDC) — 28

SQUARE CORE SWITCHING TRANSFORMERS

DESIGN FEATURE:
- Designed to meet: *MIL-T-27C

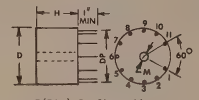
TF - 5 - S - X - — - ZZ

Encapsulated — 5
130°C Temp. — S
Life > 10,000 hrs. — X
Unrectified (01) Rectified (02) — —

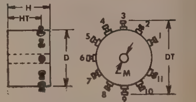
Vibration • Humidity • Altitude • High Shock

- Insulation Test Voltage: 500 VDC.
- Tolerance: ±5%.
- Switching efficiency of 95% attainable.
- Isolated feedback windings.
- Secondary can be connected in series or parallel.
- Output power greater than 50 VA should be driven from another stage.
- Terminals for general application.
- Pins for printed circuit installation.
- Nomenclature simplified for ease of design selection.

APPLICATION:
- DC to AC inverter.
- DC to DC converter.
- DC isolation to output AC or DC.
- DC to step-up or step-down.
- Volt-second support, saturable reactor.



P(Pin) Configuration
Tinned Copper Pin #22AWG except #20 AWG for S17 and S20 size



T(Terminal) Configuration
Not available in S8 & S10 size

*NOTE:
1. Add 20% to prices for 10 KHz switching
2. Add 10% to these prices for low profile (.2 inches below the standard height, H) available in Pin Configuration

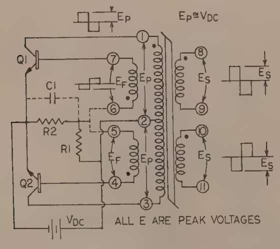
HOW TO ORDER
(Sample shown below)

- Refer to Table I for physical size and cost.
- Refer to Table II for secondary volt-ampere rating and switching frequency that correspond to Table I.
- Recommended % feedback range should be such that it will drive the base of the switching transistor by 1.5 to 2.0 V peak.
- Follow the nomenclature shown below to specify your requirements when placing an order.

S12 - 10 - 2.5 - 28 - 6 - 50 - T or P

Switching Transformer Size — S12
Power Rating in VA — 10
*Switching Frequency in KHz — 2.5
Nominal DC Input Voltage, Vdc ≅ E_P (50 VDC Max.) — 28
Feedback in Percent = $(E_F/E_P) \times 100$** — 6
Secondary Voltages, Es, in Peak (100 V Max.) — 50
Specify Configurations — T or P

$$^{**}E_F = \frac{\text{Feedback in Percent}}{100} \times Vdc$$



WE ALSO MANUFACTURE POT CORE INDUCTORS & WIDEBAND TRANSFORMERS.
ALL TECHNICAL DATA AND PRICES SUBJECT TO CHANGE WITHOUT NOTICE.
MINIMUM $25.00 PER ORDER. $10.00 PER ITEM. F.O.B., PASADENA, CALIFORNIA.

INDUCTORS

Hisonic has long been a leader in the custom development and manufacture of high Q precision inductors. Originally confined to MPP and PI toroidal types, capabilities have been expanded to include ferrite pot core and laminated alloy core types and cover virtually every known construction that applications may require.

Although Hisonic stocks several series (primarily toroidal) most are custom made to specific requirements which results in less compromise in your applications and usually lower cost.

STANDARD
UNCASED MOLDED METAL CASED

*Toroidal Series	Ind. Range	Max Q	Freq Range	DC R Ohms/MH	Uncased Size
J2	5.6MH to 3.3HY	90	Up to 30KHZ	.50	.620D x .30H

TRANSFORMERS

Hisonic has recognized capabilities in the design and manufacture of transformers, particularly for technically sophisticated custom applications. Thousands of Hisonic converter transformers are "flying" over the world, powering aircraft com/nav equipment. Special signal and matching transformers for both voice and wide video ranges are in use in communication systems.

Constructions include toroidal, pot core and laminated core to commercial and MIL specifications.

There are few "stock" items, but hundreds of designs and our engineering staff are ready to solve your transformer problems quickly.

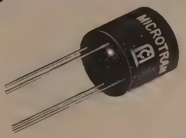
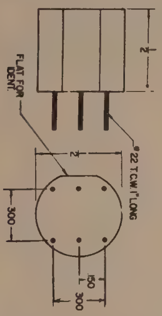
VERI & ULTRA MINIATURE TRANSFORMERS

The miniaturized design of this series offers a relatively high power level for condensed module and printed circuit packaging. The entire series is available in open frame and molded construction, thus making it adaptable to many design requirements. Manufactured in accordance with the requirements of MIL-T-27.

FULL TERMINAL ARRANGEMENTS AND COLOR CODE DESIGNATIONS SUPPLIED WITH EACH UNIT





MOLDED UM-M

ULTRA MINIATURE SERIES

To order add -M to Part Number, i.e. UM22-M. Wt.: .14 oz.

MIL DESIGNATION TF5RX††ZZ

††See Family Designation in Chart.

ULTRA-MINIATURE TRANSFORMERS — UM SERIES

Frequency Response ±2 db 300 to 10,000 Hz
Measured at Level Stated for 300 Hz

These units can be used as input, interstage, output, isolation and other impedance requirements. Primary and secondary windings may be interchanged to obtain required impedance matching. Note: This will result in slightly different impedance ratios than shown.

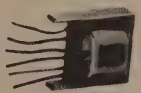
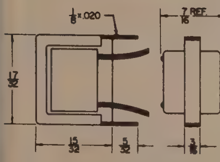
VM90	Magnetic Shield Mu-Metal slip-on can for VM-M Series. 20 db shielding.						

*Add either -FPB, or -M to Part No. to designate construction. See Photos.





PLUG-IN TAB MOUNTED CHANNEL VM-FPB

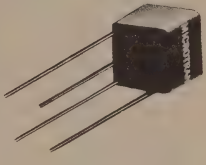
VERI-MINIATURE SERIES

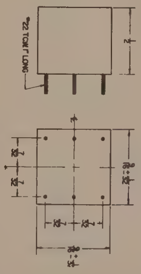
To order add -FPB to Part Number, i.e. VM2-FPB. Wt.: .2 oz. 4" color coded leads.

MIL DESIGNATION TF6RX††ZZ

††See Family Designation in Chart.

Available on special order without channel as VM-F, 7/16" x 7/16" x ½". Wt.: 16 oz.





MOLDED VM-M

VERI-MINIATURE SERIES

To order add -M to Part Number, i.e. VM2-M, VM9-M. Epoxy molded. Wt.: .25 oz.

MIL DESIGNATION TF5RX††ZZ

††See Family Designation in Chart.

PICO & SUB MINIATURE TRANSFORMERS

Pico Miniature Transformers — PM Series — are designed to provide maximum utilization of space in miniaturized printed circuit board applications. .10 grid dimensions conform to PC design standards. Installation of these units is accomplished without the additional use of brackets or clips. Manufactured in accordance with the requirements of MIL-T-27.

A variety of compact, low silhouette, constructions makes this series ideal for use in designs requiring maximum space utilization. Your mechanical and environmental considerations can be easily filled with the broad choice of open frame, hermetically sealed and molded constructions. All units in this series are manufactured in accordance with the requirements of MIL-T-27.

FULL TERMINAL ARRANGEMENTS AND COLOR CODE DESIGNATIONS SUPPLIED WITH EACH UNIT

PICO MINIATURE TRANSFORMERS — PM SERIES

Frequency Response ±2 db 300 Hz to 100 KHz†

These units can be used as input, interstage, output, isolation and other impedance requirements. Primary and secondary windings may be interchanged to obtain required impedance matching. Note: This will result in slightly different impedance ratios than shown.

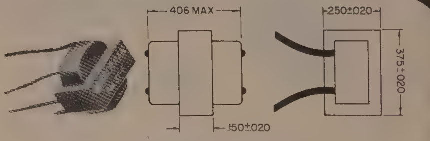
Power levels shown are for 15% maximum distortion, PM35-20%, PM37-25%.
Frequency response measured as stated power level above.
†PM3 and PM5 — 45 KHz.
•These items not available in open frame construction.

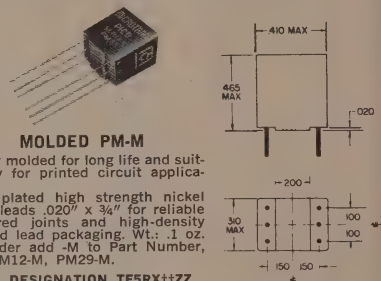


OPEN FRAME PM-F

Pico Miniature size. 4″ #30 plastic leads color coded. Thorough resin impregnation and baking assures reliable life. To order add -F to Part Number, i.e. PM33-F. Wt.: .05 oz.

MIL DESIGNATION TF6RX††ZZ

††See Family Designation in Chart.



MOLDED PM-M

Epoxy molded for long life and suitability for printed circuit applications.
Gold plated high strength nickel alloy leads .020″ x ¾″ for reliable soldered joints and high-density welded lead packaging. Wt.: .1 oz. To order add -M to Part Number, i.e. PM12-M, PM29-M.

MIL DESIGNATION TF5RX††ZZ

††See Family Designation in Chart.

SUB-MINIATURE TRANSFORMERS—SM & SMT SERIES

Primary and secondary windings may be interchanged to obtain required impedance matching. Note: This will result in slightly different impedance ratios than shown. These units can be used as input, interstage, output, isolation and other impedance matching requirements.

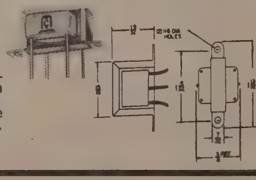
•These items not available in -AF case.

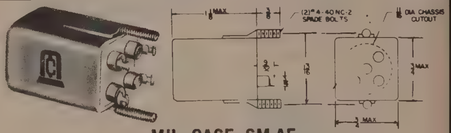
OPEN FRAME WITH CHANNEL SM-FB



To order add -FB to Part Number. i.e. SMT3-FB, SM1-FB. Wt.: ¾ oz. Leads #28 PVC 4″ long.
Available with plug-in tab mounted channel as type SM-FPB 29/32 mtg. centers on Special Order.
Available without mounting channel as type SM-F 9/16x7/8x¾. Wt.: .67 oz. on Spcial Order.

MIL DESIGNATION TF6RX††ZZ

††See Family Designation in Chart.

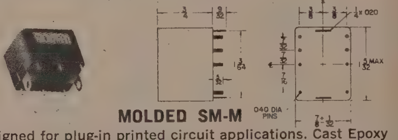


MIL CASE SM-AF

Grey Enamel Finish. Wt.: 1⅛ oz. Supplied with compression sealed ceramic terminals in MIL-T-27B-AF modified case. To order add -AF to Part Number, i.e. SM2-AF, SMT3-AF.

MIL DESIGNATION TF4RX††YY

††See Family Designation in Chart.

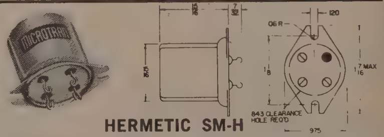


MOLDED SM-M

Designed for plug-in printed circuit applications. Cast Epoxy Resin provides highest resistance to extremes of ambient. Wt.: 1½ oz. To order add -M to Part Number, i.e. SM5-M, SMT5-M.

MIL DESIGNATION TF5RX††ZZ

††See Family Designation in Chart.



HERMETIC SM-H

Gray Enamel Finish. Wt.: 1 oz. High Compression Glass Terminals. To order add -H to Part Number, i.e. SM2-H, SMT3-H.

MIL-DESIGNATION TF4RX††YY

††See Family Designation in Chart.

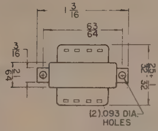
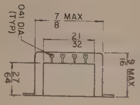
MICRO MINIATURE TRANSFORMERS

The low profile design of this series makes them ideal for use on plug-in printed circuit boards. They are highly suitable where sandwich design requires minimal spacing between modules. Available in a variety of open frame, hermetically sealed, and molded constructions. All units are manufactured in accordance with the requirements of MIL-T-27.

FULL TERMINAL ARRANGEMENTS AND COLOR CODE DESIGNATIONS SUPPLIED WITH EACH UNIT

MICROTRAN
1 2 3





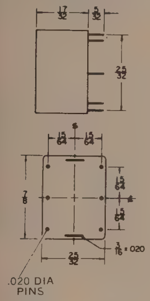
CONTOUR MOLDED MM-CM

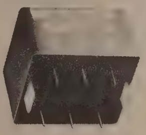
Special Order Only

Designed for chassis mounting with solder terminals on top of transformer. Epoxy contour molding provides greatest resistance to extremes of ambient in smallest possible package. Wt.: ½ oz. To order add -CM to Part Number, i.e. MM2-CM, MMT1-CM.

MIL DESIGNATION TF5RX††ZZ

††See Family Designation in Chart.



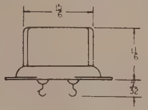


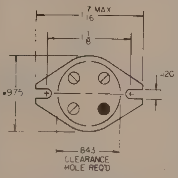
MOLDED MM-M

Designed for plug-in printed circuit applications. Cast Epoxy resin provides highest resistance to extremes of ambient. Wt.: ½ oz. To order add -M to Part Number, i.e. MM2-M, MMT2-M.

MIL DESIGNATION TF5RX††ZZ

††See Family Designation in Chart.



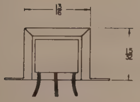


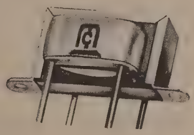
HERMETIC MM-H

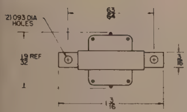
Grey Enamel Finish. High Compression Glass Terminals. Wt.: ¾ oz. To order add -H to Part Number, i.e. MM2-H, MMT3-H.

MIL DESIGNATION TF4RZ††YY

††See Family Designation in Chart.







OPEN FRAME WITH CHANNEL MM-FB

To order add -FB to Part Number, i.e. MMT3-FB, MM1-FB. Leads #28 PVC 4″ long.

Available with plug-in tab mounted channel as type MM-FPB, 23/32″ mounting centers on Special Order.

Available without channel as type MM-F ¾″ x 7/16″ x 13/32″. Wt.: .38 oz. on Special Order.

MIL DESIGNATION TF6RX††ZZ

††See Family Designation in Chart.

MINIATURE AUDIO MINIATURE TRANSISTOR TRANSFORMERS

This group of transformers is often referred to as "the designers series." It offers an extensive range of open frame, hermetically sealed, plug-in, printed circuit, contour molded and plug-in molded construction.

In this series, MICROTRAN offers the widest spectrum of electrical and mechanical specifications. ALL TRANSFORMERS LISTED ARE AVAILABLE IN THE CONSTRUCTIONS ILLUSTRATED. All units are manufactured in accordance with the requirements of MIL-T-27.

FULL TERMINAL ARRANGEMENTS AND COLOR CODE DESIGNATIONS SUPPLIED WITH EACH UNIT

MINIATURE TRANSFORMERS — M & MT SERIES

All items shown in charts below are available in any of the mechanical packages shown. These units can be used as input, interstage, output, isolation and other impedance matching applications. Primary and secondary windings may be interchanged to obtain required impedance matching. Note: This will result in slightly different impedance ratios than shown.

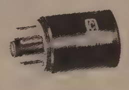
‡For telephone line coupling or hybrid telephone line.
•These items not available in -PC construction.

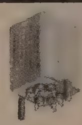


OCTAL PLUG-IN M-P

Sealed Plastic Housing. Wt.: 2 oz. To order add -P to Part Number, i.e. MT3-P, M1-P. Diameter 1$\frac{13}{32}$". Height above mtg. surface 1$\frac{15}{32}$".

MIL DESIGNATION TF6RX††ZZ

††See Family Designation in Chart.

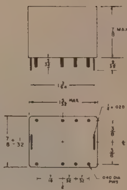


MIL CASE M-AG

Grey Enamel Finish. Wt.: 2⅜ oz. Supplied with compression sealed ceramic terminals in MIL-T-27B AG case (modified). To order add -AG to Part Number, i.e. M2-AG, MT3-AG.

MIL DESIGNATION TF4RX††YY

††See Family Designation in Chart.

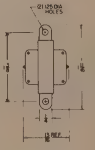


MOLDED M-M

Designed for plug-in printed circuit applications. Cast Epoxy resin provides highest resistance to extremes of ambient. Wt.: 1¾ oz. To order add -M to Part Number, i.e. M2-M, MT3-M.

MIL DESIGNATION TF5RX††ZZ

††See Family Designation in Chart.



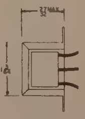
OPEN FRAME WITH CHANNEL M-FB

Wt.: 1.13 oz. To order add -FB to Part Number, i.e. MT3-FB, M1-FB. From stock. Leads 4" long. #28 PVC.

Special Order

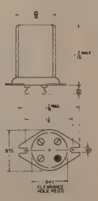
Available with plug-in tab channel, 1$\frac{1}{32}$ mounting centers as type M-FPB.

Available without channel as type M-F ¾"x1"x1$\frac{3}{16}$". Wt.: 1 oz.



MIL DESIGNATION TF6RX††ZZ

††See Family Designation in Chart.



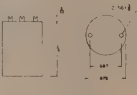
HERMETIC M-H

Grey Enamel Finish. Wt.: 1¼ oz. High Compression Glass Terminals. To order add -H to Part Number, i.e. M2-H, MT3-H, from stock.

.120 holes instead of slots, available **Special Order Only.**

MIL DESIGNATION TF4RX††YY

††See Family Designation in Chart.

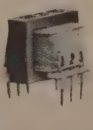


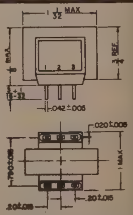
ALUMINUM CASED M-A

Supplied with 2-56 screws. Wt.: 1.25 oz. To order add -A to Part Number, i.e. MT3-A, M1-A.

MIL DESIGNATION TF3RX††YY

††See Family Designation in Chart.





OPEN FRAME PRINTED CIRCUIT M-PC

Wt.: 1.2 oz. To order add -PC to Part Number, i.e. MT3-PC, M3-PC.

MIL DESIGNATION TF6RX††ZZ

††See Family Designation in Chart.

MT21-PC, MT33-PC, MT35-PC have 8 — .025 x .015 pins on .150 centers.

MINIATURIZED INDUSTRIAL & MIL TOROIDAL INDUCTORS

ULTRA-MINIATURE TOROIDAL INDUCTORS — QE-M SERIES

Affords new application opportunities in high density packaging. Ultra miniaturized with low height design. Exceptionally high "Q" and wide frequency range. Available on special order with ±1% inductance tolerance. Frequency range of QEL Series 1 to 300 kHz; QEM, 3 to 500 kHz. Accuracy, ±2%. Molded in epoxy resin with .020″ x 2″ gold-plated nickel alloy leads. Size: .450″ dia. x .285″.

DECI-MINIATURE — FOR PRINTED CIRCUITS LOW LEVEL INPUT TRANSFORMERS

DECI-MINIATURE TRANSFORMERS — DCM SERIES

Frequency Response 200-15,000 Hz + 2 db

These units can be used as input, interstage, output, isolation and other impedance requirements. Primary and secondary windings may be inter-changed to obtain required impedance matching. Note: This will result in slightly different impedance ratios than shown.

DECI-MINIATURE DCM-SERIES

New Industrial/Commercial grade miniature printed circuit transformers. Rigid terminals provide fixed mounting centers usually found in expensive molded transformers. Wt.: .5 oz.

LOW LEVEL CHOPPER INPUT TRANSFORMERS

Used in Servo, measuring, and coupling circuits as an Input Transformer for low level amplifiers. Efficiently transfers 30 to 500 C.P.S. transducer or thermocouple signals to instrument amplifiers at signal levels from .5 Mu V to .5V. Low hum pick-up assured by three Mu-Metal shields. High permeability core provides high efficiency and low distortion. Resin potted to minimize magnetostrictive microphonics. Electrostatic shield brought out to external ground connection to eliminate chassis currents.

*M8030 is designed as a replacement for Ampex No. 1733-1
†M8032 and M8033 mates with sockets on many RCA amplifiers.

SHIELDED PLUG-IN

M8030-1 have 8 pins. M8023-3 have 9 pins. Matches many amplifiers.

SHIELDED CASED

Mounting Centers, 1¾₁₆″ 6-32 x ⅜″ studs.

IN-LINE MICROPHONE

Single Mu-Metal shield, electrostatic shield, 20″ shielded cable is to be terminated with desired connector.

MICROPHONE/TRANSDUCER INPUT TRANSFORMERS

FOR: PROFESSIONAL SOUND STUDIOS — BROADCAST MIXING CONSOLES — CONTROL AND INSTRUMENT AMPLIFIERS

EQUIVALENT TO IMPORTED EUROPEAN STUDIO GRADE TRANSFORMERS

Additional Ratings Available On Special Order

FEATURES:

- **WIDE BANDWIDTH — BROAD FREQUENCY RESPONSE:** Provided by special gapless lamination construction.
- **EXTREMELY LOW DISTORTION:** Provided by high nickel alloy magnetic core material.
- **NEGLIGIBLE HUM PICK-UP:** Due to nested Mu-Metal shields and unique gapless core construction.
- **SUBMINIATURE SIZE:** Permits close spacing to adjacent circuitry.
- **EASE OF MOUNTING AND ORIENTATION:** Single stud mounting of S100-S Series permits rotation for minimum hum pick-up.
- **POLARIZING VOLTAGE FOR CONDENSER MICROPHONES:** Primaries with split windings or center tap permit simplex +48V powering or +9 to +12V parallel or simplex powering arrangement.
- **LOW MICROPHONICS:** Resin potted to minimize magnetostrictive microphonics normally experienced in low level circuitry.
- **ELECTROSTATIC SHIELDING:** Electrostatic shield brought out to external ground connection eliminates chassis currents.

LOW LEVEL INPUT TRANSFORMERS

Power level range up to +0 dbm. Other impedance ratios available on special order — contact factory.

S100-FB	Right angle mounting bracket for S100-S Series					-FB	

†Designed for optional bridging termination use to provide additional 6 db output voltage gain.
‡Frequency response measured with source equal to nominal primary impedance and with unloaded secondary except 100K load on S105 and S107 Series.
*Special order only. Contact factory.
**Designed to couple record head to F.E.T. input.

MICROTRAN
S101-S

Fig. -S

SINGLE THREADED STUD MOUNTING

Double Mu-Metal shielding. 3" color coded leads. 5/16" Dia. stud provided with nut. 5/8" Dia. x 13/16" Ht.

PRINTED CIRCUIT MOUNTED

Double Mu-Metal shielded. 3/4" Dia. x 1 1/16" Ht. 7-.040 pins 1/8" Ht.

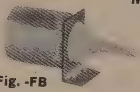

Fig. -FB

RIGHT ANGLE MOUNTING BRACKET

For low profile horizontal mounting of -S Series stud mounted transformers. Supplied with two #2-56 x 1/4" self-tapping screws. M.C. 3/8".

TELEPHONE COUPLING TRANSFORMERS

FOR INTERCONNECT OF VOICE/DATA MODEM TERMINALS TO TELEPHONE LINES

Designed to meet telephone company requirements for data and voice access arrangements. Provides line isolation and matching — prevents line imbalance. Permits optimum use of voice-grade telephone lines for broadband data signals. Wide dynamic signal level capability — low distortion.

- **FREQUENCY RESPONSE:** 300-3500 Hz ±0.5 db
- **LEVEL:** −45 dbm to +7 dbm
- **LONGITUDINAL BALANCE:** 45 db Min.
- **DISTORTION:** 0.5% Max.
- **IMPEDANCE MATCHING:** ± 10% over entire frequency range
- **RETURN LOSS:** 26 db Min.

‡Supplied with 4-40 nylon mounting screw and nut in center hole.

▲Full wave and C.T. loads may be simultaneously drawn, but for continuous duty, total V.A. output should not be exceeded.

■For positive and negative voltage supply as utilized in op-amp and similar circuitry, use secondary circuit #10.

*Output when used with suggested schematic. **Based on approximately 1 volt drop per rectifier. †Frequency depends on load and bias conditions.

ALL TRANSFORMERS ARE SUPPLIED WITH ENGINEERING BULLETIN, LISTING COMPONENT VALUES & SCHEMATICS

PLUG-IN PRINTED CIRCUIT POWER TRANSFORMERS

115V & 115/230V 50/60 Hz PRIMARY

- **Compact Design for Miniaturized Solid State Circuitry**
- **Precision Spaced Molded-in Terminals**

For applications such as power supplies, instruments, and control equipment. Constructed per MIL-T-27 Grade 6 Class R. Class S available on special order.

Dual secondaries may be parallel connected to obtain twice the current, or series connected to give twice the voltage of one winding.

Lugs on PC2000 Series provide for 115/230V primary voltage options without changes in PC board.

PLUG-IN PRINTED CIRCUIT POWER TRANSFORMERS

FOR LOGIC & OP AMP POWER SUPPLIES

PLUG-IN PRINTED CIRCUIT POWER TRANSFORMERS FOR +5V, AND ±15V, DC POWER SUPPLIES

For construction of low cost, miniaturized, regulated and unregulated DC power supplies for latest solid-state digital and linear circuitry. Permits packaging flexibility unobtainable with prepackaged power supplies. Low-profile, miniaturized construction permits close stacking of PC boards. Precision spaced molded-in terminals.

Dimensions/Figs. on Facing Page.

ALL TRANSFORMERS ARE SUPPLIED WITH ENGINEERING BULLETIN LISTING SUGGESTED COMPONENTS

Bulletin provides typical schematics and suggested components for low-cost, miniaturized, unregulated and regulated power supplies. Regulated units have short circuit, thermal overload and overvoltage protection, and have the following typical specifications: Input 105-125V; Output Voltage ±.1V; Load and Line Regulation .1% each; Ripple 1mV RMS.

PC/PCT6200 & PCT6900 Series — 8 Pins
PC6900 Series — 6 Pins

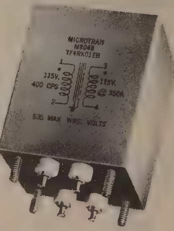
60 Hz POWER TRANSFORMERS

Designed for solid-state and low voltage applications. All units shown are manufactured in accordance with the requirements of MIL-T-27.

FULL TERMINAL ARRANGEMENTS AND COLOR CODE DESIGNATIONS SUPPLIED WITH EACH UNIT

HERMETICALLY SEALED
PER MIL-T-27
MIL DESIGNATION TF4RX01XX
Also available in open frame construction, see next page.



METHOD OF APPROXIMATING SECONDARY AC CURRENT REQUIREMENTS

Since transformers may be used in many possible configurations, the current ratings shown above are AC-RMS secondary winding currents. When selecting the "Secondary Amp" rating, the conversion chart shown below may be helpful. For exact values of secondary current requirements, use curves prepared by O.H. SHADE "Proc of IRE7/43 Analysis of Rectifier Operation."

Rectifier Type	Filter Type	Approx. Secondary RMS Current
Full Wave Center-Tap	Choke Input	.7 Times DC Current
Full Wave Center-Tap	Capacitor Input	1.2 Times DC Current
Full Wave Bridge	Choke Input	Equal to DC Current
Full Wave Bridge	Capacitor Input	1.8 Times DC Current

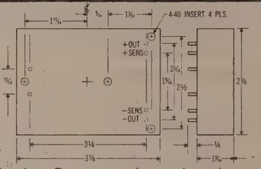
REGULATED DC POWER SUPPLIES

MODEL 452

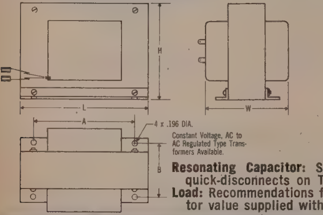
Input: 105-125 VAC. 60 to 400 Hz.
Output: 5 VDC +/− 1% 0- 1 amp.
Temp. Range: −20C to +70°C.
Load Reg: 0.1%.
Line Reg: 0.1%.
Ripple: 5 MV Max.
Stability: +/− 0.1% after warmup.
Temp. Coeff: 0.02%/°C.
Overload Protection: Current Limit Fold Back.



Remote Sensing: To use remote sensing, +sense is connected to +output at the load, and −sense is connected to −output at the load. If the remote sense feature is not used +sense must be connected to +output, and −sense must be connected to −output at the output pins.
Over Volt. Option: SCR Crowbar.

MODEL 453 is rated for 15 VDC, 0 to .33 amps, 15 MV ripple.
MODEL 454 is rated for 5 VDC, 45 VA, larger volume, write for detail spec.
MODEL 455 is rated for 15 VDC, 45 VA, larger volume, write for detail spec.

SELF REGULATING TRANSFORMERS
REGULATED DC OUTPUT



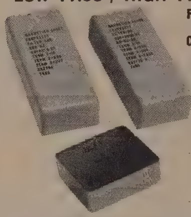
H
L
W
A
B
4 x .196 DIA.
Constant Voltage, AC to AC Regulated Type Transformers Available.

Application: For operation into external FWB with capacitor filters.
DC Voltages: Fixed, from 5 to 30 VDC.
Line Reg: ±1% DC for 115 ±10% VRMS, 60 Hz input.
Ripple: RMS, 10% of DC average.
Load Regulation: ±10%.
Resonating Capacitor: Supplied for connection to quick-disconnects on TFMR.
Load: Recommendations for diodes and filter capacitor value supplied with units.

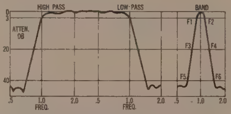
Magnetico Part No.	Max. DC Volt-Amps	Dimensions in Inches				
		L	W	H	A	B
52005	20	3⅜	1 15/16	2⅞	2 15/16	1½
52006	40	3⅜	2 11/16	2⅞	2 15/16	2¼
52007	60	4⅛	2 7/16	3⅝	3 9/16	1¾
52008	80	5	2¼	3⅝	4¼	1⅞
52009	150	5 1/16	3	4 7/16	4⅜	2

Resonating capacitor requires 1½ x 2¼ x H mounting volume. Recommended DC output voltages 5, 6, 12, 24, 30. Order by part number (for rated VA) followed by DC voltage desired such as 52005-12 for 12 VDC @ 20 VA Rated.

LC FILTERS
LOW PASS / HIGH PASS / BAND PASS / BAND STOP



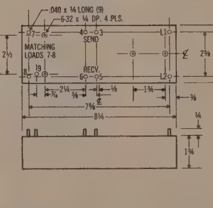
Filters: All types of filters, 200 Hz to 30 MHz, including high performance elliptic function filters.
Computer aided design, with worst case tolerance studies, provide optimum performance, less critical component choice, and makes custom units as simple as "Standards."



For prompt quote provide: Type, Insertion Loss, Desired Attenuation Characteristic, Source Z and Load Z, Quantity and delivery requirements.

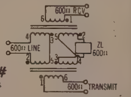
AUDIO HYBRID

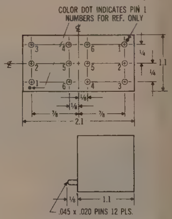
PART #
50819



Imped.: 600 ohm or 900 ohm.
Freq. Response: +/− 0.2 dB — 100 to 4000 Hz.
Longitudinal Bal.: 60 dB Min. — 200 to 3600 Hz.
Insertion Loss: 5 dB Max. — 300 to 3400 Hz.
Trans. Hybrid Loss: 50 dB Min. — 300 to 3400 Hz.
Return Loss: 26 dB Min. — 200 to 3600 Hz.
Operating Level: −30 to +10 DEM.
Maximum Current DC at which unit meets all specs: 0 to 150 MADC to terminals 1 to 2 either polarity.

PART #
51084





Freq. Resp.: ±0.5 dB 300 to 3500 Hz.
Long. Bal.: 45 dB Min.
Distortion: 0.5% Max.
Imped. Match: ±10% 300 to 3500 Hz.
Return Loss: 26 dB Min.
Trans-Hybrid Loss: 45 dB typical.

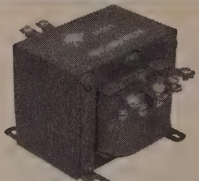
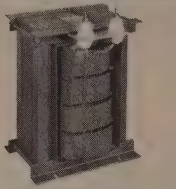
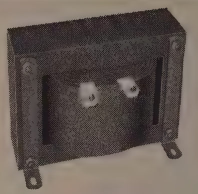
AIR CORE REACTORS



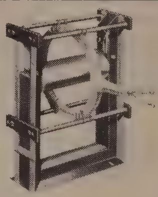
Instrument transformers, current and potential, 1-10,000 amperes, 1-50,000 volts. High accuracy, through type, bus bar, indoor and outdoor.



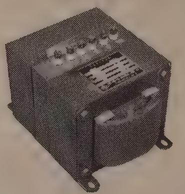
Plate, audio and modulation transformers in sizes from 50 VA to 100 KVA and up to 100,000 volts.



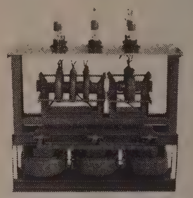
Chokes, linear and swinging. 0.1 millihenry to 10 henry.



Filament transformers, single and multiple. Up to 100,000 volts, dry and oil types.



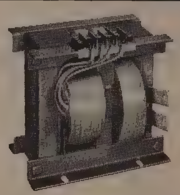
Saturable Core Reactors, from 50 VA to 500 KVA. Single and 3 phase.



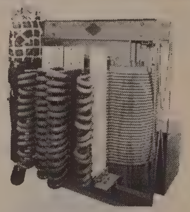
Rectifying transformers and supplies, 1, 2 or 3 phase. 1 to 3,000 amperes, up to 500 KVA.

Oil filled specialty and high voltage transformers up to 300 KVA.

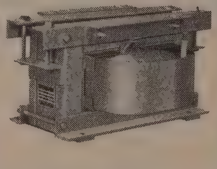
Heating transformers for resistance and induction furnaces. All types. Up to 1200 KVA.



High impedance type transformers, from 50 VA to 50 KVA and up to 10,000 volts.



High power and high current water-cooled transformers.



Reactors, 50 VA to 500 KVA. AC and DC. Linear and swinging.

Solid State SCR Power Controllers.

SPECIAL PULSE TRANSFORMERS AND INDUCTORS FOR
TECHNOLOGY MARKETING, INCORPORATED

******** *CORE MEMORIES* ********

As a prime supplier to TECHNOLOGY MARKETING, INCORPORATED, NPI has developed many pulse transformers and inductors for the latest core memory designs. This new generation of memory systems uses "time shared" electronics to increase system speed and greatly reduce the system cost. These transformers play a major part in achieving memory design goals of 800–900 ns cycle time for a 32k, single card memory with a manufacturing system cost of less than 0.2 cents/bit! NPI pulse transformers provide outstanding reliability, temperature stability, and fast response and recovery (permitting double pulse operation at up to 80% duty cycle–without external damping resistors). They are available in a variety of turns ratios and inductance values and are supplied in industry-standard 16 pin DIP or Dual In-line (DIL) case styles. For more information on applying these pulse transformers to your system, contact NPI or: TECHNOLOGY MARKETING, INC., 3170 Red Hill Avenue, Costa Mesa, California 92626, Phone: (714) 979-1100, TWX: (910) 595-1717.

EL-RAD

MANUFACTURING COMPANY

HIGH QUALITY INDUCTIVE COMPONENTS FOR COMPUTER AND INDUSTRIAL APPLICATIONS

Coils
Inductors
Delay Lines
Transformers

El-Rad has been an important supplier of the electronics industry since 1944, the very beginning of the industry's most rapid and exciting growth period.

Constantly building on a policy of product quality, carefully controlled, El-Rad for years has been a prime source of critical components such as coils, delay lines, and pulse transformers; for instruments, radar, computer, and military applications; even miniature but rugged assemblies destined for outer space.

El-Rad engineers, with their skilled know-how, work closely with your own engineering department on all design requirements. The result—design solutions in a minimum of time.

At your command is a sample service that is backed by a well-equipped laboratory, and a very capable model shop. There, working with the most accurate of test and measuring instruments, the emphasis is on practicality, so that the sample you choose can be easily produced in large quantities when desired.

Volume production of critical units and assemblies, requires a stable and skilled work force, which El-Rad provides. El-Rad can give you unusually quick service no matter where you are.

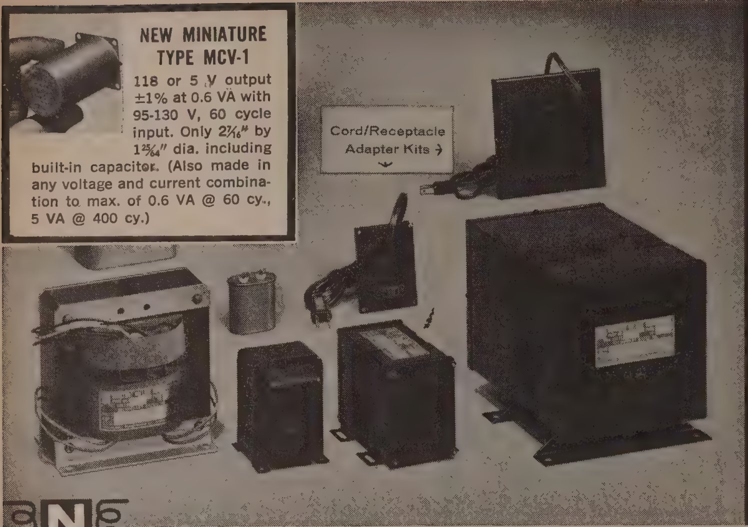
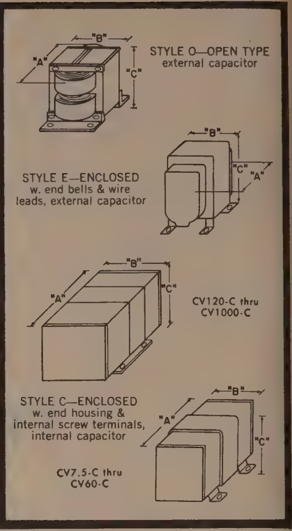
NTC

Furlong, Pennsylvania 18925
Call (215) 794-7411



NEW MINIATURE TYPE MCV-1

118 or 5 V output ±1% at 0.6 VA with 95-130 V, 60 cycle input. Only 2 7/16" by 1 25/64" dia. including built-in capacitor. (Also made in any voltage and current combination to max. of 0.6 VA @ 60 cy., 5 VA @ 400 cy.)



NTC

CONSTANT VOLTAGE TRANSFORMERS

STATIC-MAGNETIC VOLTAGE REGULATING TRANSFORMERS

NORMAL HARMONIC TYPES

- Output capacity from 0.5 to 3,000 VA
- Instantaneous, continuous voltage regulation
- No tubes or manual adjustments
- Ratings made to order at low cost
- Compact, single-unit design
- Low-cost open types for component applications
- Heavy-duty, enclosed types for accessory uses
- Single or multiple secondaries

NTC constant voltage transformers maintain output voltages within one percent with input voltage fluctuations up to 15 percent. Regulation is instantaneous, continuous and completely automatic. Operating on principles of ferroresonance, the transformers have no tubes, moving parts or separate saturable reactors.

Most important, the design of NTC constant voltage transformers enables their outputs to be made exactly to your specifications—and at decidedly low cost even in small quantities. With only a few basic lamination configurations and windings, virtually any output voltage/current combination can be obtained. *Since the transformers are designed to your specific requirements they often eliminate costly circuitry and expensive components.*

POWER SUPPLIES, too . . . Neshaminy's engineering skills are at your service for the design and quantity production of complete, regulated power supplies in any capacity and rating. Let us discuss your next requirement.

CV1000—C	118	95-130 or 190-260	1000	4¾ x 6⅛	14⅞ x 7 7/16 x 6	56	C

TYPICAL STANDARD MODELS

1% output regulation. Closer regulation to order. Output contains approx 14% total rms harmonic content. SPECIAL MODELS can be made quickly to exact requirements in any step-up or step-down ratio of voltage to current within the desired VA rating and with single or multiple secondaries, with or without centertaps. CV models also available for 50 cycles, and MCV models for 50 or 400 cycles.

NOTES

1. Cord/Receptacle kits, similar to that shown in illustration are available on all "C" style transformers of 118 VAC output rating.
2. Specify required input voltage range on CV transformers from 250 to 1000 VA.
3. To specify output voltage required (6.3 or 118 VAC) add voltage to model number (Example — 15 VA cased transformer with 118 VAC output would be model #CV15-118).
4. "C" style units have built-in capacitors. Styles "E" and "O" have external capacitors.

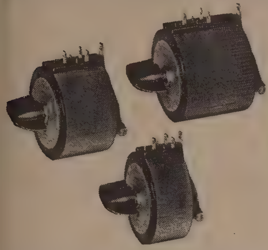
NESHAMINY TRANSFORMER COMPANY

Furlong, Pa. 18925
(215) 794-7411

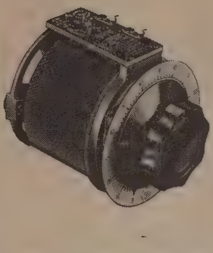
NTC is a division of the Neshaminy Electronic Corporation

Prices and specifications subject to change without notice

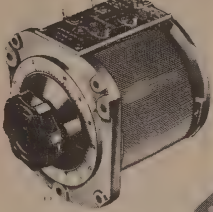
OHMITE® variable transformers



VT1, VT02, VT3 SERIES, SINGLE UNCASED
The VT1, rated 1 ampere, is the smallest commercial variable transformer available.



VT5 SERIES, SINGLE, UNCASED



VT10 SERIES, SINGLE, UNCASED

VT25 SERIES, UNCASED

Unique for the design innovations they incorporate, Ohmite "OHMITRAN" v.t.® variable transformers include exclusive field-proven features. They offer long, low maintenance operation with excellent regulation at any voltage setting within the rated load plus an output free of waveform distortion. (Ratings shown at right are for use in free air.) Enclosed units, units with meters, 2 & 3 in tandem and 3 phase models are available in most models in the basic series.

FEATURES

- Positive current transfer — specially designed brushes are connected through high conductivity contact arms to large slip ring which contacts a wide area of the collector ring.
- Adjustable shaft extends from either side.
- Mounts interchangeable with virtually all other comparable types.
- Direct reading, two scale dial — calibrated for overvoltage connection on front, line voltage connection on reverse side.
- Overvoltage options available.
- UL and CSA listings available in certain models.
- Easily replaceable brushes
- Clockwise or counter-clockwise operation on Series VT5, VT10 and VT25

ENCLOSURES

Type	Available for:	Features
B	VT25	EXPOSES TRANSFORMER'S TERMINAL RANGE & MOUNTING BASE
E	All	FOR PERMANENT MOUNTING ON PANEL, ETC.
F	All	STANDARD PORTABLE LINE CORD, OUTLET SOCKET, FUSE
G	VT8 VT25	DELUXE PORTABLE CIRCUIT BREAKER, OVERVOLTAGE — NO OVERVOLTAGE SELECTOR, HANDLE DOUBLES AS EASEL
Metered	VT8 VT25	VOLTMETER VOLTMETER + AMMETER VOLTMETER + WATTMETER

Series Catalog No.	Wt. Lbs.	Dimensions

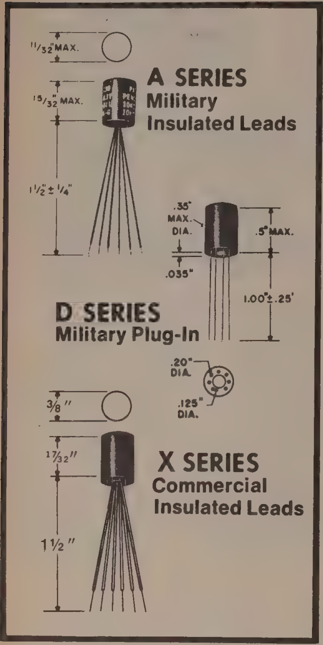
PICO's ultra-miniature transformers



SPECIFICATIONS

- MIL-T-27 . . . .
  All **MILITARY** Units Are Designed to MIL-T-27 and Are Hermetically Sealed in a Metal Case
  Transformers are Type TF5R21ZZ.
  Inductors are TF5R20ZZ.
- FREQUENCY RESPONSE: . . . . .
  ±3 db, 300 Hz - 100 KHz At 1.0 Milliwatt
- MAXIMUM DISTORTION: . . . . . .
  5% With Rated Power Level at 1 KHz
- DIELECTRIC STRENGTH: . . . . .
  All Units Tested at 200 V RMS
- INSULATION RESISTANCE: . . . . .
  Greater than 10,000 Megohms at 300 V DC
- WEIGHT: . . . .
  1/10 Ounce
- OPERATING TEMPERATURE: . .
  -55° c to 105° c (All Units Can Be Supplied to Class S Requirements 130° c maximum)
  Commercial Units have maximum operating temperature of +85°C
- TERMINALS: . . . .
  Solid .016 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D
- THERMAL SHOCK: . . . .
  25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

PICO's
ultra-miniature transformers

B SERIES
Military Insulated Leads

C SERIES
Military Plug-In

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS

(All PICO Products are patented)

INDUCTORS

TWO VALUES OF INDUCTANCE, EACH AT A PARTICULAR VALUE OF DC CURRENT, ARE LISTED FOR EACH INDUCTOR. ALL INDUCTORS WITH SPLIT WINDINGS HAVE MEASUREMENTS LISTED FOR BOTH SERIES CONNECTIONS AND PARALLEL CONNECTIONS.

SINGLE WINDINGS

PICO PART NUMBER		INDUCTANCE HENRIES	DC CURRENT ma	DC RESISTANCE OHMS	PICO PRICES 1-9 *

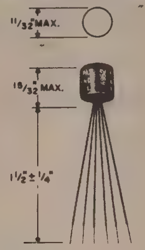
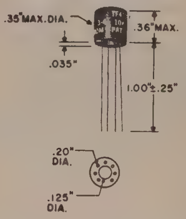
PICO's ultra-miniature transformers

B SERIES
Military Insulated Leads



C SERIES
Military Plug-In



SPECIFICATIONS

- MIL-T-27: . . . .
  All Units Are Designed to MIL-T-27 and Are Hermetically Sealed in a Metal Case
  Transformers are Type TF5R21ZZ.
  Inductors are TF5R20ZZ.
- FREQUENCY RESPONSE: . .
  ±3 db, 400 Hz - 100 KHz At 1.0 Milliwatt
- MAXIMUM DISTORTION: . .
  5% With Rated Power Level at 1 KHz
- DIELECTRIC STRENGTH: . .
  All Units Tested at 200 V RMS
- INSULATION RESISTANCE: .
  Greater than 10,000 Megohms at 300 V DC
- WEIGHT: . . . .
  1/15 Ounce
- OPERATING TEMPERATURE:
  -55° c to 105° c (All Units Can Be Supplied to Class S Requirements 130° c maximum)
- TERMINALS: . . . .
  Solid .016 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D
- THERMAL SHOCK: . . . . .
  25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

PICO's
ultra-miniature transformers

A SERIES
Military Insulated Leads

D SERIES Military Plug-In

X SERIES
Commercial Insulated Leads

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS

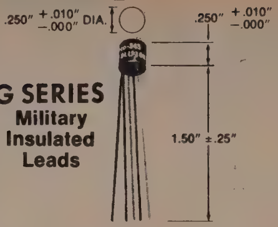
PICO's ultra-miniature AUDIO: transformers

1/4"x1/4"

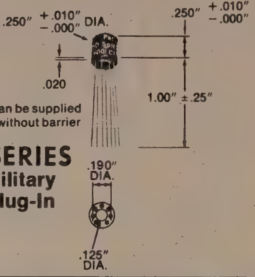
FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

TRANSFORMERS



G SERIES
Military Insulated Leads



Unit can be supplied without barrier

F SERIES
Military Plug-In

SPECIFICATIONS

- MIL-T-27:
  All Units Are Designed to MIL-T-27 and Are Hermetically Sealed in a Metal Case
  Transformers are Type TF5R21ZZ.
  Inductors are TF5R20ZZ.
- FREQUENCY RESPONSE:
  ±3 db, 400 Hz - 250 KHz At 1.0 milliwatt
- MAXIMUM DISTORTION:
  5% With Rated Power Level at 1 KHz
- DIELECTRIC STRENGTH:
  All Units Tested at 200 V RMS
- INSULATION RESISTANCE:
  Greater than 10,000 Megohms at 300 V DC
- WEIGHT:
  1.1 GRAMS
- OPERATING TEMPERATURE:
  -55° c to 105° c (All Units Can Be Supplied to Class S Requirements 130° c maximum)
- TERMINALS:
  Solid .012 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D. Lead Spacing is 7 Leads 45° Apart on a .19" Diameter Circle.
- THERMAL SHOCK:
  25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

PICO's ultra-miniature PULSE transformers

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- BUILT TO MIL-T-21038
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

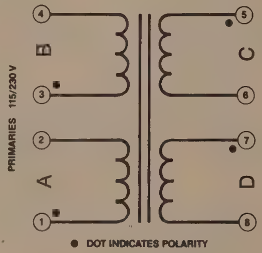
■ 115/230 V INPUT ■ 50/60HZ and 400 HZ OPERATION ■ 7 VA and 13 VA RATING ■ LOW RADIATED FIELD ■ COMPUTER GRADE CONSTRUCTION ■ 7 OZ. WEIGHT ■ 0.85 IN. MAX. HIGH ■ 40° C TEMPERATURE RISE



These low profile printed circuit mounting, computer grade, power transformers are rated at 7VA (13VA at 400 HZ). Optimum power ratings for the low temperature rise are made possible by over-winding primaries and secondaries, and the use of high quality lamination steel.

The winding configuration minimizes radiated field effects and assures efficient coupling of primary to secondary. Isolated secondaries allow for positive regulators to be employed.

Special designs are available on request. Customization of input/output ratios, operating frequency and operating temperature classification is possible. The unique bobbin design permits the addition of winding taps (up to 4) and electrostatic shielding when required.

POWERSTAT® Variable Transformers

New epoxy-coated POWERKOTE Coils make the POWERSTAT line the most outstanding value in variable transformers today. *Without increase in price, size or weight,* only POWERSTAT Variable Transformers give an average of 20% higher current ratings, 10:1 greater overload capability, longer life, greater resistance to fungus, salt spray and other contaminating atmospheres. POWERKOTE Coil commutator bars are embedded in place preventing steady-state operating temperature and severe overloads from distorting the commutator.

POWERSTAT Variable Transformers are designed to deliver continuously adjustable voltage from a-c power lines. They introduce no waveform distortion and feature rugged construction, precious metal plated commutators, excellent regulation, high efficiency and conservative ratings. All manually operated types listed in the charts except the 10B-12, EN116B-EN216B and EN117B-EN217B Series are available with motor drives if desired. Motor-driven speeds are 5, 15, 30 or 60 seconds for full range travel on all except types having -4, -5, or -6 suffixes which do not offer the 5-second speed. Single types in the 116B-216B, 117B-217B, 126-226 and 136B-236B Series are also offered with 2- or 3-wire cord-plug sets. 1156D-1256D Series types are available in ratings to 244 kva.

ADJUSTABLE SPEED DRIVES

All motor-driven units i
the 116B-216B, 117B-217B
126-226, 136B-236B an
146-246 Series are avail
able with adjustable spee
drives which permit the output voltage of th
transformer to be controlled over the full rang
of zero to maximum output voltage at speed
ranging from 5 seconds to 200 seconds. All co
trol circuitry is solid-state and adaptable fo
present speed systems. The Adjustable Spee
Control Potentiometer BHP65455-G1 can b
remotely located from the variable transforme

†Also available with open construction. Suffix U when ordering.
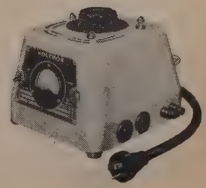
§Requires also one paralleling choke type T5000B.
§§Requires also one paralleling choke type T6053.

VOLTBOX® A-C POWER SUPPLY

Contains POWERSTAT Variable Transformer, voltmeter, three output receptacles, two 5-WAY Binding Posts, "on-off" switch, line-load meter switch, fuse and six-foot cord-plug. Type UC1MB ratings are 120 volt, single phase 50/60 hertz input and 0-140 volt 10 ampere, 1.4 kva output.



POWERSTAT® *Variable Transformers*

WITH POWERKOTE® COILS

40-VOLT SERIES

Meet high current, low voltage requirements of low voltage power supplies and a wide range of transistor circuit applications. Manually-operated and motor-driven single, 2- and 3-gang single phase types available.

TYPE 10B-40

When units of the LC series are used as limited range adjustable transformers the input voltage is the output voltage shown in the above chart and the output voltage is the input voltage shown in the above chart.

OIL-COOLED AND EXPLOSION-PROOF

Oil-cooled units substantially increase ratings above equivalent air-cooled types and provide a measure of safety. Explosion-proof models are Underwriters' Laboratories listed for Class 1, Group D service. Both are manually operated only.

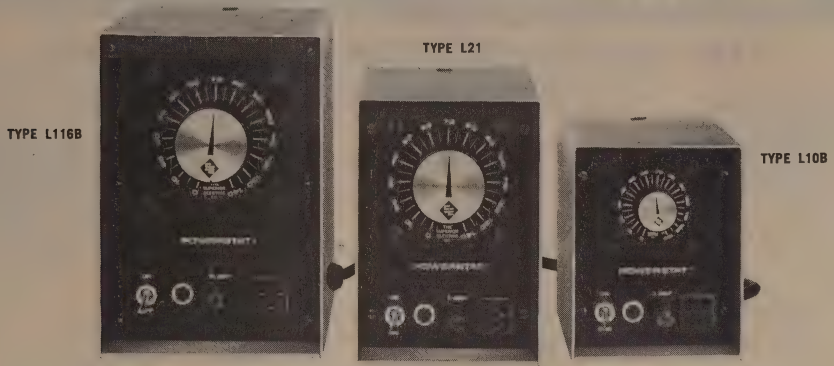
THE SUPERIOR ELECTRIC COMPANY
1000 MIDDLE STREET • BRISTOL, CONN. 06010 • PHONE: (203) 582-9561

TOTALLY ENCLOSED L SERIES POWERSTAT® Variable Transformers



Designed to meet OSHA requirements. For maximum protection and safety, all models are equipped with a grounded NEMA cord-plug assembly, on-off switch, pilot light, grounded output receptacle and fuse. Type L116B has an integrally designed nonprojecting handle. Controls on the panel are recessed for protection from accidental bumping. All models have slots at the rear to accept wall hanger brackets. They may be hung anywhere and easily removed for use in another location. Type L21 and L116B have POWERKOTE coils.

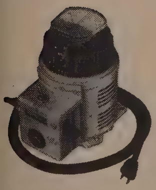
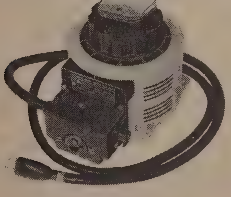
STATIONARY METERED KNOB POWERSTAT® Variable Transformers

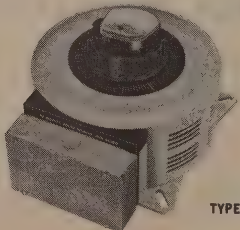
- FOR BACK-OF-PANEL OR GENERAL UTILITY MOUNTING
- ACCURATE VOLTMETER REMAINS STATIONARY INSIDE KNOB RIM. . . DOES NOT TURN WITH THE KNOB
- AVAILABLE IN TYPES TO 4 KVA
- MAXIMUM APPLICATION FLEXIBILITY
- SAVES PANEL SPACE, WIRING AND INSTALLATION COSTS



TYPE VS116B



TYPE VS3PN126



TYPE VS146T

TYPE VS150

GENERAL UTILITY MOUNTING – Single units (those listed in charts without -2 or -3 suffixes) in the 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 series are also available with knobs incorporating direct-reading voltmeters. Voltmeters remain stationary as the knob rim is turned, have an accuracy of ±3% of full scale and are insensitive to stray magnetic fields. When ordering, add VS prefix to the type number given in the charts.

BACK-OF-PANEL MOUNTING – Standard cataloged POWERSTAT Variable Transformers in the 21-22 through the 146-246 series designed or adaptable for back-of-panel mounting can be combined with Metered Knob Assemblies. Models for 120 volt service require Metered Knob Assembly VS150 having a 0-150 volt scale and units for 240 volt use require Metered Knob Assembly VS300 having a 0-300 volt scale. Existing models can be retrofitted also.

SPRAGUE PULSE TRANSFORMERS

TYPE 11Z TRIGATE® PULSE TRANSFORMERS

- Specifically designed for commercial and industrial SCR triggering applications where low cost and excellent performance are required.
- Single-ended pulse transformers are designed with leads especially intended for mounting on printed wiring boards; these units are self supporting.
- Balanced pulse characteristics and energy transfer between windings.
- Minimum saturation effect to allow operation where increased pulse widths are required.
- Fast pulse rise time and increased current capability to prevent SCR di dt failure.
- Operating temperature range of —10 C to +70 C.
- For complete technical data, see latest issue of Sprague Engineering Bulletin 40,003.

TYPE 66Z SCR TRIGGER TRANSFORMERS

- Pre-molded construction permits slightly lower cost than fully-molded units without sacrifice in humidity resistance.
- Small size for use on pc boards and in encapsulated modular packages. Case measures .400″ W. x .785″ L. x .312″ H.
- For complete technical data, refer to latest issue of Sprague Engineering Bulletin 40,004.

*CORRESPONDS TO 30% REGULATION, I.E., NO LOAD SECONDARY VOLTAGE IS 30% HIGHER THAN FULL LOAD.

Signals "LP" series of PC plug-in power transformers offer the main advantage of 0.850 inch height with a 6VA rating at 50/60 Hz. This allows its use in PC boards stacked with 1 inch centers.

Construction is semi-toroidal (hum bucking) which results in a reduced radiated magnetic field and balanced windings. All materials used are at least class S in rating.

The dual primary and secondary windings offer a large diversity of output combinations with a 115/230V input. The voltages and currents are deal for power applications in semi-conductor control and instrumentation such as single or dual output DC supplies and isolated control circuit and reference supplies.

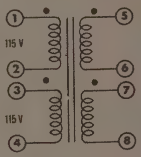
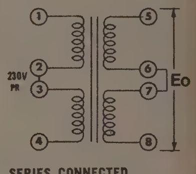
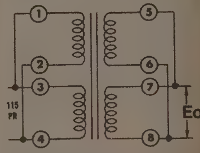
DUAL 115/230V PRIMARY
TYPE DPC-8 PINS



BASIC SCHEMATIC



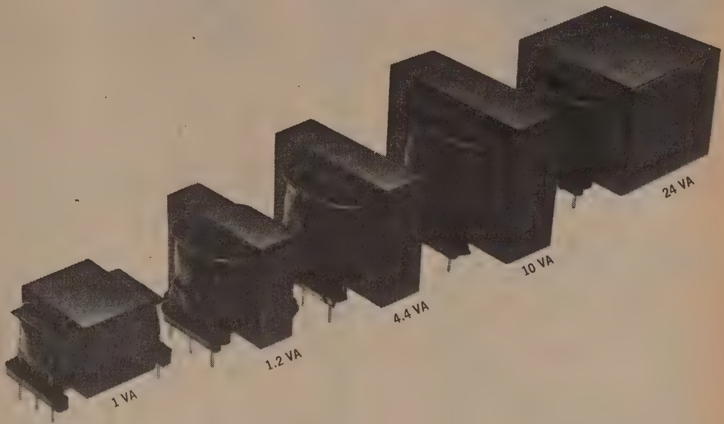
SERIES CONNECTED



PARALLEL CONNECTED

SIGNAL TRANSFORMER CO., INC. / 1 JUNIUS STREET / BROOKLYN, NEW YORK 11212 / (212) 498-5111 / TELEX 12-5709

for printed circuit applications



Signal has the most complete and diversified selection of miniature plug-in power transformers. All items are stocked in depth for immediate off-the-shelf delivery.

Primary ratings of 115V (Style PC - 6 Pin) or Dual 115/230V (Style DPC - 8 Pin) are standard for the entire line.

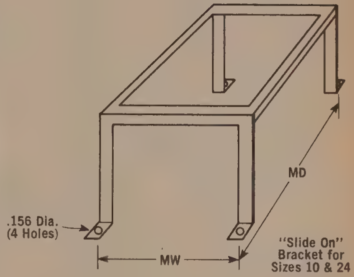
Size 1.0 is used extensively where height is a limiting factor since its height of 0.83 inches allows 1 inch spacing of PC boards. Size 24 is unusual since 24 watt PC transformers are not readily available, especially with a height of 1⅜ inches.

The RMS current ratings are based on a load regulation of 15-20% and **not** on temperature rise (except for the largest item, size 24). Therefore, these ratings may be exceeded without overheating, if the additional drop in full load voltage is acceptable. There is, of course, a limit and it would be best to check with our engineering department on specific units.

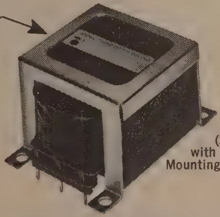
DIMENSIONS

SIZE (VA)	L	W	H	A-6 (6 Pin)	A-8 (8 Pin)	B	WT. (oz.)	OPTIONAL BRACKET* No.	MW	MD
1.0	1	1⅜	0.83	0.250	0.200	1.200	2.5	—	—	—
1.2	1⅜	1⅛	1³⁄₁₆	0.312	0.200	1.000	3	—	—	—
4.4	1⅝	1¼	1⅜	0.400	0.250	1.100	5	—	—	—
10	1⅞	1⁷⁄₁₆	1⅝	0.400	0.250	1.300	9	10-BR	1⁴¹⁄₆₄	1⅛
24	1⅝	2¼	1⅜	0.400	0.250	2.100	12	24-BR	1⅜	2

*An optional "Slide On" Mounting Bracket is available for sizes 10 and 24. The brackets do not use up any extra "Floor Space" but add ¹⁄₃₂" to the height of the transformer.



"Slide On" Bracket for Sizes 10 & 24



Size 24 (24VA) Unit with 24-BR Slide-on Mounting Bracket.

METHOD OF DETERMINING SECONDARY CURRENT RATINGS

Rectifier Type	Filter Type	RMS Secondary Current
Full Wave Center-Tap	Choke Input	.7 x DC Amps
Full Wave Center-Tap	Capacitor Input	1.2 x DC Amps
Full Wave Bridge	Choke Input	= to DC Amps
Full Wave Bridge	Capacitor Input	1.8 x DC Amps

CUSTOM VARIATIONS

Signal has the facilities to provide rapid quotations and delivery of prototypes of your special PC transformer needs. Large quantity runs can be scheduled with reasonable lead times. Please submit your requirements and be assured of our prompt response.

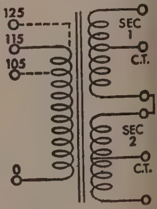
PARALLEL CONNECTED SECONDARIES



SERIES CONNECTED SECONDARIES

All transformers are designed conservatively for a max of 45°C rise above ambient, for use on 115V power line from 50-500 cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers and chokes are rugged in construction, well-insulated, and have a consistently uniform appearance. All ratings are at full load current continuous operation.

Electrical ratings have been chosen to cover a wide range of applications. All transformers have two center-tapped secondary windings.

filter chokes 0.5 to 1000 amps

Signal's line of filter chokes is the most extensive available. It is designed to complement the selection of Rectifier Power Transformers so that a set may be specified for power supplies using inductive filters.

The inductance ratings given are minimum values guaranteed at full DC current. All resistance ratings are maximum values. Special variations or intermediate values of inductance, current, or resistance can be supplied promptly and accurately.

Signal's Dual Chokes are supplied with 2 windings which may be series or parallel connected with rating shown on chart. This line is basically designed for applications requiring lower inductance values at high currents, such as low voltage, DC supplies or SCR filters. Ideal for use to reduce ripple in our ferro-resonant (CDC) line.

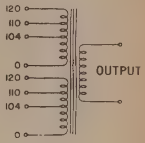
As shown on the schematic diagram dual primaries are provided. This permits parallel connection for 104, 110, or 120 volts or series connection for 208, 214, 220, 230, and 240 volts. Frequency range is 50 to 500 cps.

It is important to note that primary taps may be used to adjust the secondary voltages. Line voltages up to 125V (parallel) or 250V (series) may be used on the lowest primary tap. Nickel plated screw terminals are provided on a heavy phenolic board for easy primary connections



3 phase HIGH CURRENT RECTIFIER TRANSFORMERS

At higher power loads (above 2-3 KVA) it becomes inefficient to use single phase 115 or 230 volt standard lines. With this in mind, our engineering staff has developed a line of 3 phase transformers for use off 208 or 220V 3 phase power lines. These offer the significantly higher conversion efficiency and lighter power line drain of 3 phase systems.

Since the principal application of these items is in high power dc power supplies, output ratings are given in dc voltage and current assuming the use of a 3 phase full wave rectifier.

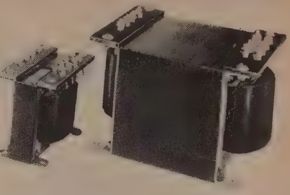
SIGNAL TRANSFORMER CO., INC. / 1 JUNIUS STREET / BROOKLYN, NEW YORK 11212 / (212) 498-5111 / TELEX 12-5709

industrial grade step-up or step-down power isolation-auto transformers

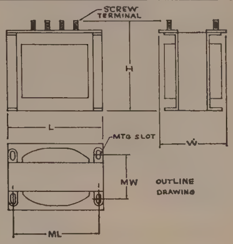


HIGH DEGREE OF VERSATILITY OFFERS MANY POSSIBLE VOLTAGE RATINGS

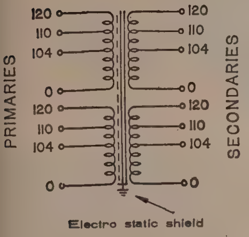
AVAILABLE FROM STOCK FOR IMMEDIATE SHIPMENT

The "DU' and "SU" lines are designed for a maximum of 55°C rise above ambient for use on standard power lines from 50 to 500 Cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers are rugged in construction, well-insulated and have a consistently uniform appearance. All ratings are at full load current, continuous operation.

Heavy ¼ inch phenolic terminal boards are provided with plated brass screws and flat washers (10-32 on ¼ and ½ KVA, ¼-20 on larger sizes). Connections can be easily made with a nut driver. It is also simple to alter the inter-connections to change transformer ratings. **Electro static shields are provided grounded to the core.** The connection is made with a lug to ground and may be opened if an ungrounded shield is desired.



DU series 110/220 Dual Primary to 110/220 V. Dual Sec. (Primary & Secondary may be reversed)



As shown on the schematic diagram the "DU" line is designed with dual primaries and secondaries. All four windings are identically rated at 0/104/110/120 volts. This permits series or parallel connections on either primary or secondary. Therefore, a nominal 110 to 110 volt, 220 to 220 volt, 110 to 220 volt, or 220 to 110 volt transformer can be set up. The winding taps permit intermediate series ratings such as 208, 214, or 230 volts.

It is also possible to make auto-transformer connections by connecting a primary group in series with a secondary group. Such nominal ratings as 440 to 220 volts or 220 to 440 volts can be set-up, in addition to the standard ratings described above. A further advantage to auto-transformer connection is the fact that the KVA rating of a particular type is **doubled.**

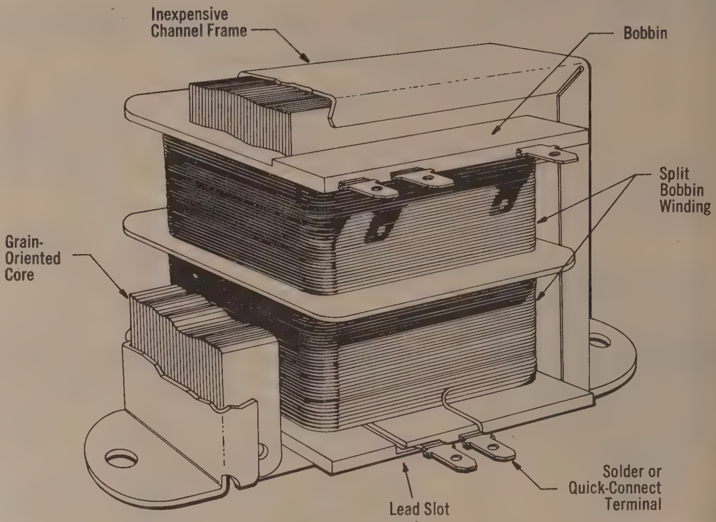
cut weight, size and cost with

Until the advent of Signal's "2-4-1" Series not much had been done in the design and development of small power transformers to reduce weight and cost.

By incorporating a number of factors into the design of these types we have succeeded in developing a line where for a given VA rating, size, weight, and price are all reduced almost 50%. Hence the name "241" line.

The following features were incorporated into the "241" Series designs:



Inexpensive Channel Frame
Bobbin
Split Bobbin Winding
Grain-Oriented Core
Solder or Quick-Connect Terminal
Lead Slot

Grain-Oriented Core: By using this type of transformer lamination, with higher saturation flux density and lower core losses, it is possible to reduce the amount of steel and copper required for a given VA rating. Result—less space and weight—lower cost.

Bobbin Winding: Gives more effective utilization of winding area so that the space required for winding is reduced. Automated bobbin winding operation reduces winding time. Again — less space and weight — time savings — lower cost.

Split Bobbin: This special design "splits" the primary and secondary so that they are wound side by side, separated by a bobbin wall. They are not wound concentrically. The result is a better performing design which saves on assembly cost. There is no cross-over of primary and secondary leads, no taping is required over the primary to insulate it from the secondary, a "lead slot" in the bobbin wall eliminates the need to tape start leads. Aside from saving labor costs, the added isolation between windings reduces the capacitance and coupling and minimizes the need for an electro-static shield. 2500V hipot is standard.

Special Terminals: Which are in the bobbin wall can be used as 3⁄16 (.187) quick-connects or as solder lugs. This can solve user application problems.

Class "S" Insulation: Rated 125°C maximum total temperature means these designs can be used continuously in ambient temperatures up to 85°C.

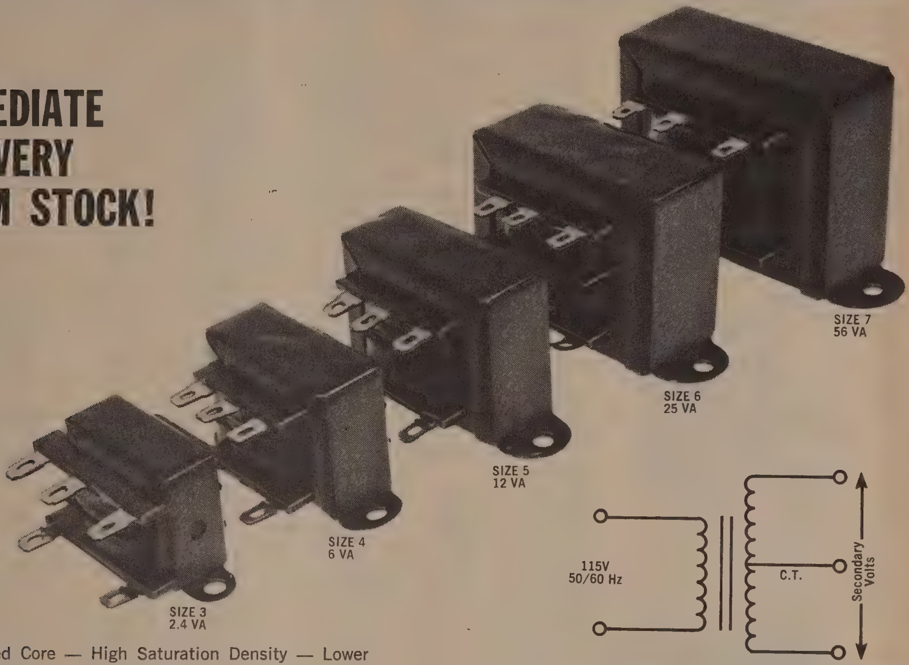
SIGNAL TRANSFORMER CO., INC. / 1 JUNIUS STREET / BROOKLYN. NEW YORK 11212 / (212) 498-5111 / TELEX 12-5709

“2 for 1” series of small power transformers

IMMEDIATE DELIVERY FROM STOCK!



- Grain-Oriented Core — High Saturation Density — Lower Core Loss — Less Steel and Copper.
- Bobbin Wound — Maximum Utilization of Winding Area — Space and Size Reduced.
- Split Bobbin — Non-Concentric Winding — Lower Capacitance — Better Insulation — 2500V Hipot — No Need for Electro-Static Shield.
- Special Terminal — Solder or Quick-Connect.

METHOD OF DETERMINING SECONDARY CURRENT RATINGS WHEN USED IN RECTIFIER CIRCUIT

Rectifier Type	Filter Type	RMS Secondary Current
Full Wave Center-Tap	Choke Input	.7 x DC Amps
Full Wave Center-Tap	Capacitor Input	1.2 x DC Amps
Full Wave Bridge	Choke Input	= to DC Amps
Full Wave Bridge	Capacitor Input	1.8 x DC Amps

CUSTOM VARIATIONS

Signal is equipped to quote on custom variations of our “241” Types. This service is restricted to designs with a single primary and single secondary, with or without center-tap (a maximum of 5 terminals). The power limit is approximately 60 to 70 VA.

We answer requests promptly and can deliver prototypes in one to three weeks. Production runs can be scheduled with very reasonable lead times.

Note 1 —
SM Series are two hole mounting with holes on center line. #4-40 Pem nuts are fastened to the bracket.

Note 2 —
#6-32 Pem nuts on bracket are standard.

Note 3 —
#8-32 Pem nuts on bracket are standard.

- All primaries 380-1000 cps
- Dielectric test voltages:
  PRIMARIES 1500 Volts RMS
  SECONDARIES 1500 Volts RMS
- Epoxy resin used as encapsulant
- Prices subject to change without notice

transistor transformers

STERLING
TRANSFORMER

UNIVERSAL DC POWER MODULE TRANSFORMERS

High reliability transformers having a tapped primary and single or dual secondary windings which may be connected F.W. bridge or F.W. center tap so as to obtain a wide range of DC voltages and current ratings.

INPUT PRIMARY 115 volts 50-500 cps

STERLING TRANSFORMER CORP.
510 DRIGGS AVENUE • BROOKLYN, NEW YORK 11211 • TELEPHONE: (212) 782-4200

STACO *variable transformers*

The most versatile and reliable voltage controls available today are variable autotransformers. They are widely used as basic components in the control of voltage, current, power, heat, speed, light and electro-mechanical force in many industrial and laboratory applications.

Staco Variable Autotransformers deliver continuously adjustable output voltage from AC power lines without introducing any wave form distortion or SCR generated noise. All STACO variables offer precious metal-plated commutators, excellent regulation, high efficiency, conservative ratings and feature extremely rugged construction which includes a high temperature foundation material for the commutator surface. This material provides a transformer with a greater tolerance to transients and short term overloads, effectively increasing the reliability of the transformer.

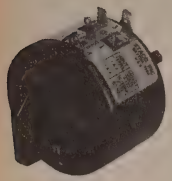

FIG. A

Models are available in various configurations from 1.75 to 300 ampere rating. Choose from panel mounted units, cord and plug types, ganged and/or motor-driven metered models and fully portable deluxe models with or without metering.

Your STACO distributor is capable of assisting you in selecting the particular transformer best suited for your application. Should you require a special or non-standard product for your particular need, STACO's Engineering staff will respond quickly with solutions to your requirements. Often it just requires minor revisions to standard components enabling STACO to keep your costs at a minimum.

Prices shown are List Prices. Contact your STACO distributor or Representative for quantity discount schedule.

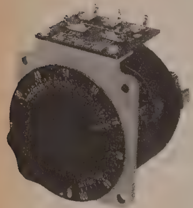

FIG. B

120 VOLT INPUT SINGLE PHASE PANEL MOUNTING

Available in cased or uncased units designed for mounting on panels 1/4" to 5/8" thick. Most units also can be bench mounted.

FIG. G

120 VOLT & 240 VOLT INPUT METERED CORD & PLUG TYPES

Staco's new series of Metered Cord & Plug type variable transformers eliminate the need for separate metering. Featuring an accurate, high quality pivot and jewel meter conveniently located atop the enclosure for easy, accurate readout. 120V models have 0-150V meter, 240V models have 0-300V meter.

MFG. TYPE NO.	FIG.	INPUT VOLTS	OUTPUT VOLTS	OUTPUT AMPS	KVA	SIZE (INCHES) H x W x D	WT. LBS.	PRICE

FIG. H

120 VOLT INPUT VARIABLE ISOLATION TRANSFORMERS

An exclusive by STACO, for use where the safety of isolation is required. The output voltage is completely isolated from the power line (input voltage). Additional outputs are available on uncased models. These outputs include voltage doubler, series and non-isolated when hooked to the proper terminal supplied.

MFG. TYPE NO.	FIG.	OUTPUT VOLTS	OUTPUT AMPS	KVA	SIZE (INCHES) H x W x D	WT. LBS.	PRICE

FIG. J

DELUXE VARIABLE TRANSFORMERS

Fully portable deluxe models, available with or without metering. Suitable for use in any industrial, classroom or laboratory application. All units supplied in a ventilated case of extruded aluminum and baked-epoxy painted steel. Permanent etched legends, convenient carrying handle, control knobs with positive stops, output receptacles and switches on front panel, pilot lights, circuit breakers, and full view meters.

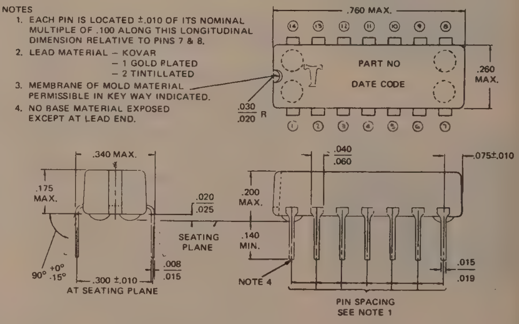
DUAL-IN-LINE PACKAGING

Up to four pulse transformers can be mounted on a common lead frame and encapsulated by transfer moulding. This new concept is compatible with the "DIL" packaging of the Integrated Circuit Industry. The lead frame has no exposed base metal. Optimum pin arrangements and elevated seating plane of the case allow maximum clearance above pad area to enhance board cleaning after assembly and to accommodate other circuits without danger of shorting to the case pins. Controlled manufacturing processes and automatic selection and grading of cores provides maximum reliability. Improved features of the new DIL packages include automated handling for test and insertion, increased PC board packing density, uniform and repetitive PC board hole layout, and minimum ultimate cost.

Specialists in pulse transformers and completely transfer molded, welded DIP delay lines under 3/16" high — to 250 ns.

14 LEAD — TECO #166-2100-245 — (See Note 2)



NOTES
1. EACH PIN IS LOCATED ±.010 OF ITS NOMINAL MULTIPLE OF .100 ALONG THIS LONGITUDINAL DIMENSION RELATIVE TO PINS 7 & 8.
2. LEAD MATERIAL – KOVAR
   – 1 GOLD PLATED
   – 2 TINTILLATED
3. MEMBRANE OF MOLD MATERIAL PERMISSIBLE IN KEY WAY INDICATED.
4. NO BASE MATERIAL EXPOSED EXCEPT AT LEAD END.

ELECTRICAL CHARACTERISTICS

L_m — UP to 2.0 mh maximum for 1:1 turns ratio.
UP to 8.0 mh maximum for inductors.
"Special Dip"
UP to 5.0 mh maximum for 1:1 turns ratio.
UP to 20.0 mh maximum for inductors.

L_L — As low as 0.02% of L_m for the highest permeability cores when C_I is not critical.

C_I — As low as 3.0 pfd for the highest permeability cores when L_L is not critical.

$L_L \times C_I$ — Lowest $L_L \times C_I$ product available in the industry.

POWER

"ET" ratings up to 7.0 volt μsec. for an L_M = 1.0 mh.

"Special Dip" "ET" ratings up to 15 volt μsec. for an L_M = 2.0 mh.

Specialists in pulse transformers and completely transfer molded, welded DIP delay lines under 3/16" high — to 250 ns.

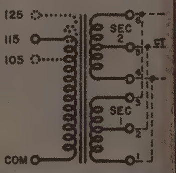
PARALLEL HOOKUP



TODD SYSTEMS "HIGH CURRENT TRANSFORMERS & CHOKES" are designed for use in high power rectifier circuits, and high current A.C. applications. "TODD ENGINEERED" designs feature a nominal temperature rise of 45°C., at full load, thus providing outstanding overload capacity. All designs utilize extremely low regulation, varying from 10% in the smallest to 1% in the larger units.

Four styles . . . select the type best suited for your lab, test rigs, OEM or production equipment

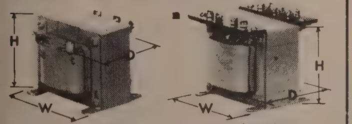
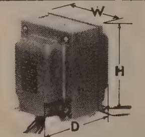
Add 3/16 to H W D for Style BE

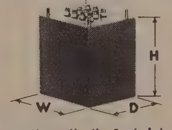


STYLE B:
- "Open Frame" Bracket Mounted
- Double Vacuum Varnish Impregnated

STYLE BE:
- Conforms to MIL-T-27B
- Epoxy Encapsulation added to Style B



STYLE V:
- Fully Enclosed in Metal Shells
- Ease of "Wiring with Leads"
- Attractive Appearance
- Dbl Vacuum Varnish Impregnated



STYLE CM:
- Hermetically Sealed to MIL-T-27B
- Environment Proof
- Attractive Gray Finish
- Permanent Name Plate

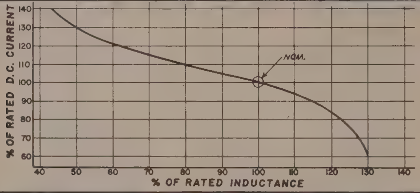
HIGH CURRENT CHOKES

50/500 HERTZ | DIMENSIONS REFER TO HIGH CURRENT XFMR SKETCHES



- **Matching styles complement high current transformers**
- **Wide variety of compatible current ratings**

INDUCTANCE VARIATION

Graph indicates typical variation of inductance (%) when used at D.C. currents (%) other than the rated values.

Chokes operated at D. C. currents higher than rated value must be run on an intermittent basis to avoid overheating.

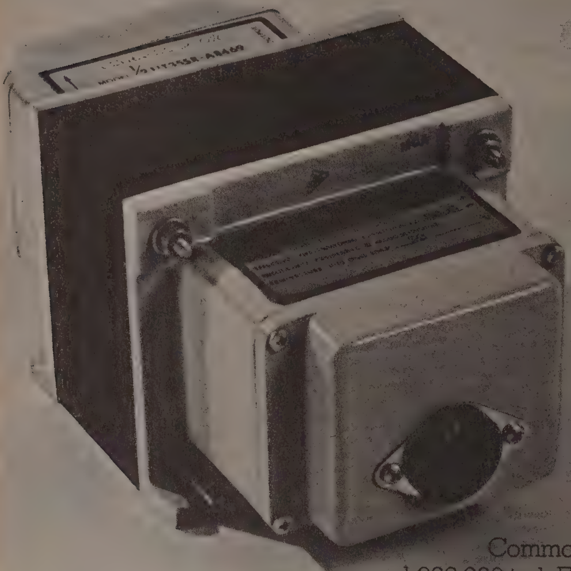
Topaz Ultra-Isolation Transformers will solve your power line noise problems. We guarantee it.



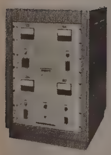
Pete Jorgensen, Magnetics Production Manager at Topaz, was asked recently why the performance of Topaz Ultra-Isolation Transformers is so exceptional. He answered by saying, "Because we have people who have been winding and shielding transformers for 10 years, and they do it unusually well."

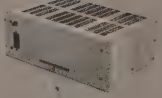
Topaz Ultra-Isolation Transformers protect electronic equipment from noisy power lines and protect clean power lines from noise-generating equipment. The unique Topaz box shielding techniques and the meticulous care taken during manufacturing guarantee the effectiveness of Topaz transformers.

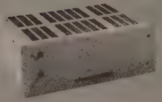
Common-mode noise is attenuated by more than 1,000,000 to 1. Effective capacitance between windings is less than 0.0005 picofarads.

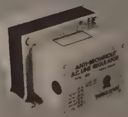
So if power line noise is your problem, write or phone. We'll prove that Topaz Ultra-Isolation Transformers will solve your problem. We guarantee it — or your money back.

Or your money back.









Other Products • Uninterruptible Power Systems • Inverters • Frequency Changers • AC Line Regulators

Topaz is also a major supplier of **custom** power conversion equipment. Contact us.

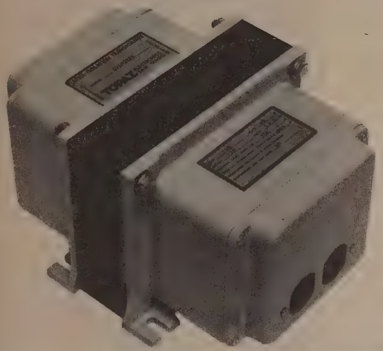
ULTRA-ISOLATION TRANSFORMERS

For eliminating power line noise problems associated with sensitive equipment



TOPAZ ULTRA - ISOLATION TRANSFORMERS are available in single-phase and three-phase versions, from 125 VA to 45,000 VA, and in step-up and step-down configurations, some with provisions for use on several different power line voltages. They are especially designed for these applications:

1. For isolating sensitive instrumentation from noisy power lines.
2. For isolating sensitive power lines from noisy equipment.
3. For isolating noisy equipment from noise-sensitive equipment when both share the same AC power source.
4. For maximum attenuation of common-mode noise (noise between ground and power lines).
5. For excellent attenuation of transverse-mode noise (line-to-line output noise) caused by common-mode noise at the input.
6. For completion of electrostatic guarding of equipment which is protected by an electrostatic shield.
7. For applications in which leakage currents must be kept below critical low levels.

TYPICAL SPECIFICATIONS

Common-Mode Noise Rejection:
.005 pF—greater than 125 dB
.001 pF—greater than 140 dB
.0005pF—greater than 146 dB

Common-Mode to Transverse-Mode Noise Rejection:
Greater than 125 dB at 1 kHz

Electromagnetic Noise:
Less than 0.1 gauss (-20 dB) at 18 in. radius

Standard Voltage Ratings:
120 (for 110, 115, 120 V lines*)
240 (for 208, 220, 230, 240 V lines*)
480 (for 360 440, 480 V lines*)
*Maximum current = VA rating ÷ Nominal Voltage Rating

Operating Voltages:
To 110% of nominal

Operating Frequency:
57 to 63 Hz

Featuring. . .
- **Excellent Common-Mode Noise Rejection**
- **Very Low Leakage Current**
- **Unique Box-Shielded Design**
- **Single-Phase and Three-Phase Models**
- **50Hz, 60Hz and 400Hz Models**
- **Money-Back Guarantee**

STANDARD 60 Hz SINGLE-PHASE STOCK MODELS

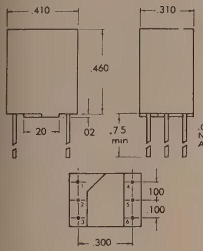
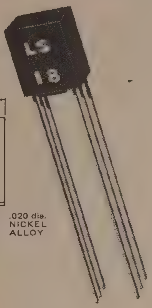
SUBMINIATURE AUDIO TRANSFORMERS

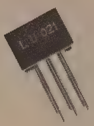
PROTOTYPES IN 48 HOURS UPON REQUEST

LT & LS SERIES

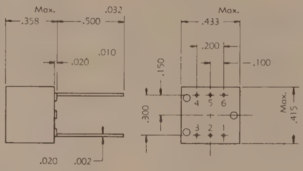


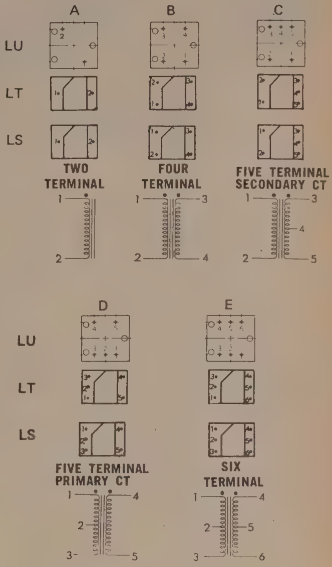


LU SERIES



Wt. 0.1 oz.





The LS Series is electrically and mechanically the same as the LT Series except for phase relationships between terminals.

LS, LT, and LU Series transformers have successfully passed the rigid requirements of MIL-T-27B, Class R, Grade 5.

Subminiature in size, weighing less than 0.1 ounce, these transformers have tenth inch grid spacing between terminals and are ideally suited for transistor circuit applications which utilize printed circuit board design. All three series have risers on mounting surfaces to facilitate inspection and board cleaning, and also to prevent moisture traps.

A wide range of standard designs are available which meet the requirements of most common applications and allow for rapid delivery of prototype quantities. Special designs are also available in all three types.

The new LU Series exhibits the same electrical characteristics as the LS and LT Series but has been packaged in a "thin line" configuration to allow for closer board spacing for "card cage" applications or where height dimensions are critical.

MAGNETIC SHIELDING

LS and LT Series transformers are available with magnetic shields when required. Overall dimensions of transformers with the magnetic shield added are .365 max. x .465 max. x .531 max.

To order transformers with shields installed add 500 to dash numbers shown in the table below. For example: to order an LS-22 with shield, specify LS-522.

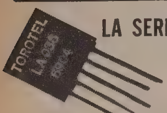
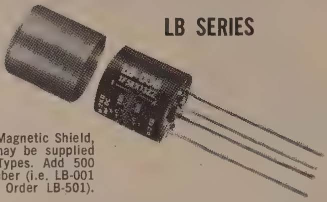
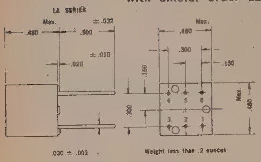
LA SERIES

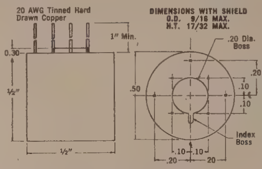


LB SERIES



The LB-500 Magnetic Shield, as shown, may be supplied for all LB Types. Add 500 to Dash Number (i.e. LB-001 with Shield. Order LB-501).





Torotel LA and LB Series Transformers are manufactured to MIL-T-27B, Grade 5, Class S specification. These series have 0.1 grid spaced terminals for printed circuit application. Both types have risers on mounting surfaces to prevent the formation of moisture traps and to facilitate cleaning of board assemblies.

The LA Series is electrically the same as the LB Series, but is packaged in a .460 inch cube with smaller outline dimensions for application where this configuration is more suitable.

Leads are made of 20 AWG Tinned Hard Drawn Copper. Units utilizing Dumet Wire are available on special request.

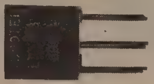
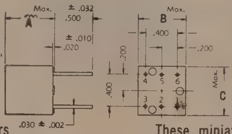
AUDIO TRANSFORMERS LL & LR SERIES





Series	A	B	C
LL	.600	.590	.590
LR	.925	.800	.710

These tiny, versatile "LL" transformers are provided with .020 risers and 0.1 grid spacing for printed circuit board applications and are manufactured to MIL-T-27, Grade 5, Class S specifications.

RESPONSE: ±1 db 200 to 50,000 Hz
DISTORTION: 10% Max. at rated power, 200 to 50,000 HZ
WEIGHT: 0.4 OZ

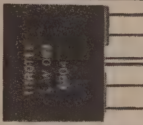
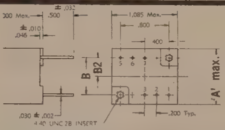
AUDIO TRANSFORMERS LW & LY SERIES





Series	A	B	B_2
LW	.900	.600	.300
LY	1.125	.800	.400

"LW" series transformers are manufactured to MIL-T-27, Grade 5, Class S specifications. Riser areas and 0.1 grid spacing make these units ideal for printed circuit board applications.

RESPONSE: ±1 db 100 to 10,000 Hz
DISTORTION: 1.5% Max. at 60 MW, 200 to 10,000 Hz
WEIGHT: 2.0 OZ.

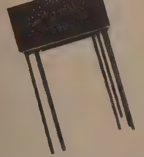
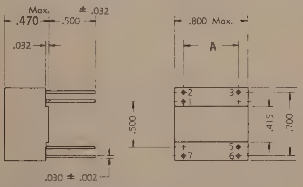
AUDIO TRANSFORMERS — LH & LK SERIES





"LK/LH" Series transformers are the ultimate in compactness and their .470 HT and 0.1 grid spacing provide a most efficient .5" board spacing unit. Designed to meet MIL-T-27C, Grade 5, Class S.

RESPONSE: ±1 db 200 to 10,000 Hz
DISTORTION: 10% Max. at rated power, 200 to 10,000 Hz
WEIGHT: 0.75 OZ

* May vary with circuit components, load requirements, etc. † Has additional winding for bias in SSB transmitters.

CONTROL TRANSFORMERS

6, 12, 24 volt secondaries

For use with relays, solenoids, small motors, speed changers, pumps, heating elements, control valves for fluids and gases, fans and blowers, electronic tubes, automatic assembly equipment, recording devices, elevators, door openers, low voltage lamps and similar applications.

- **UP TO 1.5 GHz BANDWIDTH**
- **12.5 TO 600 OHM IMPEDANCE RANGE**
- **BALANCED AND UNBALANCED CONFIGURATIONS**

Their small size, easily solderable or weldable planar ribbon leads, and high performance/high reliability design makes the FP Series transformers ideal for MIC substrate and conventional printed circuit applications.

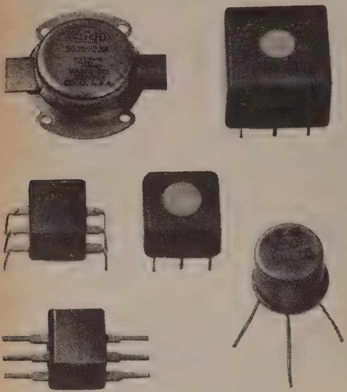
WIDE BAND TRANSFORMERS

Z-MATCH



Applications include: Impedance Matching and Interstage Coupling in wide band solid-state circuits, Phase Detection, Voltage/Current Step-up or Step-down, and Pulse Transformation. Available in three figurations, they have become a standard in the industry and are on numerous spec. control drawings for high-reliability military and industrial equipment. They are qualified to MIL-T-55631 and are recommended for a temperature range of −55°C to +85°C. VSWR is 1.3:1 maximum to within one octave of the upper and lower 1 dB bandwidth limits. Midband insertion loss .5 dB maximum. Power handling ability for the HF and LF types is 2 watts (tending to increase toward the high end of the range) and 1 watt for TO and DP types, except for units which have the model number preceded by *. These are rated at .5 watt max.

HF and LF types are epoxy-encapsulated and have terminals of phosphor bronze, silver plated. Packaging techniques employed have been evolved over 20 years of continuous production experience, and, although improvements are being investigated constantly, quality is the primary consideration in evaluating the effects of any innovation in methods. TO and DP types, housed in transistor and DIP packages respectively, have the same 100% encapsulated features. Write for applicable bulletins.

NOTE: New Model Number System

To avoid confusion in specifying and/or ordering, we have adopted a new model numbering system as shown in the tables. We ask that the new numbers be used except in cases where the old number is already on a drawing or spare parts list, in which case we will make the translation in our Sales Department.

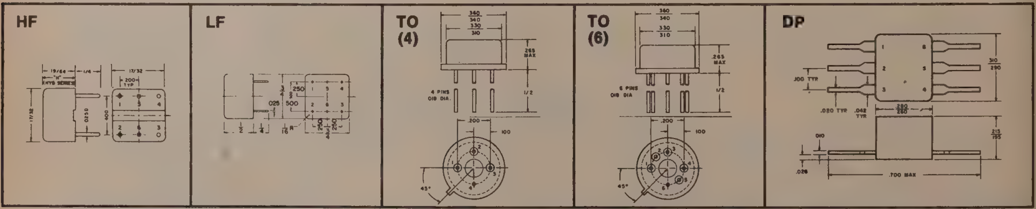

FIGURE 1 WIDE BAND TRANSFORMER OUTLINE DRAWINGS

LOW FREQUENCY TYPES

The wide range of applicability of the Z-Match line of high frequency wide band transformers attracted the attention of customers who, in addition to R.F., were working in the high audio, super-sonic, and ultra-sonic regions. As a result of their continued requests we designed the LF series presented below using the same time-proven construction techniques and high reliability features. Power handling ability, VSWR, and insertion loss figures are approximately the same as the HF series described above. Write for applicable bulletins.

Please order LF transformers by the new model number shown, for new designs.

FIGURE 2 SCHEMATICS

POWER WIDE BAND TRANSFORMER

This series was developed for solid state applications in transmitters to permit the cascading of power transistors. The shape was made microstrip compatible and provided with a wide mounting skirt for heat dissipation. They have been used as antenna couplers and for interstage coupling in Class A linear amplifiers. Per Fig. 3, they will handle up to 50 watts at room temperature, derating ½% per °C at higher temperatures. Write for applicable bulletins.

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

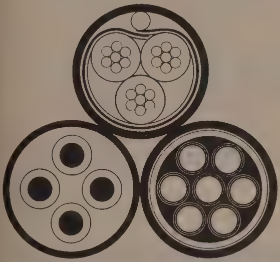
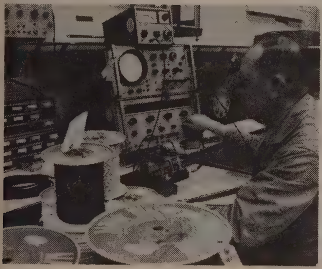
QUICK CUSTOM CABLE

The special or prototype cable you need – From one foot to production requirements – Manufactured and delivered faster than you ever thought possible.



QCC IS

- THE AVAILABILITY OF THE THOUSANDS OF IN-STOCK ITEMS IN THIS CATALOG TO CONSTRUCT THE CABLE YOU NEED.
- THE KNOW-HOW THAT COMES FROM 51 YEARS IN MANUFACTURING
- THE ESSENTIAL MILITARY, COMMERCIAL AND UL APPROVALS.
- THE SPECIALIZED EQUIPMENT TO MANUFACTURE CUSTOM CABLE OF THE HIGHEST QUALITY.
- THE EXPERIENCED PERSONNEL TO HELP YOU IN DESIGNING YOUR CABLE.



A specially prepared customer cable specification sheet may be obtained from Alpha. We can also work from your sketch or blueprint.

Our QCC design department is anxious to work with you in designing cable for maximum efficiency at minimum cost.

QUICK — Alpha can manufacture and deliver special cable constructions faster than you ever thought possible — overnight in some instances. CUSTOM — we can make virtually any type of cable you need — and in quantities from one foot to thousands of feet. And the QC part of QCC means just what it says — **QUALITY.** All cable is thoroughly tested for all electrical, mechanical and appearance parameters by our fully equipped quality control laboratory.

Alpha offers you more in-stock military specification and UL wire and cable conductors than any other source in the world. Combine this with our cable engineering manufacturing and test facilities, and you have the answer to all your special, prototype and custom cable needs.

Hook-Up Wire

Type MW-Uncovered PVC-MIL-W-76B

DESCRIPTION:
Solid or extra flexible stranded tinned copper, color coded **medium wall** polyvinylchloride insulation. **(Nom. wall thickness .016″.)**

CHARACTERISTICS:
Temperature rating −40°C to +80°C, Voltage rating 1000 volts. Resistant to acids, alkalis, oil, flame, moisture and fungus.
Passes FR-1 vertical flame test.

Type LW-Nylon Jacket MIL-W-76B

DESCRIPTION:

Stranded tinned copper, color coded **light wall** polyvinylchloride insulation, clear nylon (polyamide) jacket overall. Nominal jacket thickness, .002″. (**Nom. wall thickness .010″.**)

CHARACTERISTICS:

Temperature rating −40°C to +90°C. Voltage rating 300 volts. Resistant to acids, alkalis, oil, flame, moisture and fungus.

Type HW-Uncovered PVC MIL-W-76B

DESCRIPTION:

Stranded tinned copper, color coded **heavy wall** polyvinylchloride insulation.

CHARACTERISTICS:

Temperature rating −40°C to +80°C. Resistant to acids, alkalis, oil, flame, moisture and fungus.

Passes FR-1 vertical flame test.

Type B-Pre-Bonded Conductor MIL-W-16878D

DESCRIPTION:

Each strand of the conductor is double tinned and then heated, which bonds the individual strands together for easy stripping. Color coded .010″ polyvinylchloride insulation. The insulation meets requirements of MIL-W-16878D.

CHARACTERISTICS:

Temperature rating −55°C to +105°C. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents, and fungus.

Passes FR-1 vertical flame test.

APPLICATION:

A pre-bonded conductor is the ideal construction when leads are to be cut and stripped for point to point wiring. The pre-bonded conductor maintains much of the flexibility of an ordinary stranded wire but reduces processing and handling costs on soldering, retwisting of strands after stripping and hand tinning operations. Since the individual strands are bonded, expensive induction heating equipment is unnecessary.

ALPHA WIRE CORPORATION

Ribbon Cable MIL-W-16878D

MIL-W-16878D—TYPES B & C—UL-FR-I ROUND CONDUCTOR, FLAT BONDED

DESCRIPTION:
Round conductor,flat bonded ribbon cable has all the advantages of a flat compact profile plus ease of termination and stripping. Saves space, simplifies cable identification, simple to separate and terminate individual conductors. With all standard wire connectors, jacks, pins and terminations. Each conductor, stranded tinned copper, color coded PVC insulation, conductors specially bonded into flat configuration.

Passes FR-1 vertical flame test.

CHARACTERISTICS:	**Type B**	**Type C**
Voltage Rating:	600 Volts	1000 Volts
Temp. Rating:	−55°C to +105°C	−55°C to +105°C

Unshielded Aircraft Wire

Shielded Aircraft Wire

MIL-W-5086A

DESCRIPTION:
MIL-W-5086A — Type I — AN-22 thru AN-12 — Single conductor stranded tinned copper, white polyvinylchloride insulation, clear nylon, (polyamide) jacket overall.
MIL-W-5086A — Type II — AN-22 thru AN-12 — Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, clear nylon (polyamide) jacket overall.
MIL-W-5086A — Type II — AN-10 thru AN-0000 — Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, flame retardant nylon lacquered nylon braid overall.

CHARACTERISTICS:
Temperature rating: −55°C to +105°C. Voltage rating: 600 volts. Resists effects of water, oil, aircraft fuels, hydraulic fluid, skydral, ethyleneglycol, alcohol, dilute acids, alkalis, fungus and abrasion.

UNJACKETED SHIELDED CABLE (MIL-C-7078A Type 1)
Base Wire MIL-W-5086A Type 1

DESCRIPTION:
Each conductor stranded tinned copper, color coded polyvinylchloride insulation. Clear nylon jacket on each conductor, cabled, braided tinned copper shield overall. 85% coverage per Type 1 MIL-5086A, Type 1 MIL-C-7078A.

CHARACTERISTICS:
Temperature rating: −55°C to +105°C. Voltage rating: 600 volts. Resists effects of water, oil, aircraft fuels, hydraulic fluid, skydral, ethyleneglycol, alcohol, dilute acids, alkalis, fungus and abrasion.

ALPHA WIRE CORPORATION

RX-7000 Irradiated — Heat Resistant Hook-Up Wire MIL-W-16878 D -UL-1429, 1430, 1472

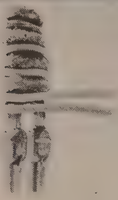
- HIGH RELIABILITY
- SOLDER IRON RESISTANCE
- INCREASED STRENGTH
- ELIMINATES PRODUCTION DAMAGE

For:
- Appliances
- Computer wiring
- Business Machines
- Instrumentation and control systems

RX-7000 is a newly developed hookup wire with an insulation made of irradiated Polyvinylchloride compound (PVC). The Irradiation process results in an insulation far superior to ordinary PVC.

Passes FR-1 vertical flame test.

RX-7000 withstands higher temperatures than ordinary PVC and, even in direct contact with a soldering iron, will not shrink back, melt, blow or deform. Because of this ability to resist solder iron heat, it is the ideal material to use where high reliability is essential and is particularly valuable in the wiring of tight, high-density systems.



RX7000 and vinyl hook-up wire wrapped over tip of heated solder iron. RX7000 does not burn or char.

Tefzel Computer Wire

150°C — 300 VOLTS

Passes FR-1 vertical flame test.

EXTREMELY RUGGED AND FLEXIBLE WIRE-WRAP WIRE

Description: Solid silver-plated OFHC copper conductor. Tefzel insulation (copolymer of ethylene and tetra fluourethylene)

Characteristics: Tefzel is a newly developed insulation that provides a high temperature, thin-wall wire suitable for wire wrap insulation. Tefzel has high cut-thru and abrasion resistance and long flex life. The material has a low dielectric constant of 2.6. Temperature range is from −100°C to +150°C continuous.
Like Teflon, Tefzel is chemically inert, with no known solvent and is rated non-burning or self-extinguishing.

Application: Computer wire, aircraft instrumentation, point-to-point wiring in all compact packaging modules.

Kynar Wire

— 125°C — 300 VOLTS

Passes FR-1 vertical flame test.

FOR WIRE WRAP CONNECTIONS.

Description: Solid, silver-plated, oxygen-free, high conductivity (OFHC) copper conductor, extruded Kynar® (Polyvinylidene fluoride) insulation.

Characteristics: Operating temperature though 125°C continuous (U.L. rated at 105°C).
Extremely tough; high cut-through resistance.
Self-extinguishing; will not support combustion.
Resistant to most chemicals and solvents.
Excellent ultra-violet and weathering resistance.

Applications: Designed for use in automatic wire wrapping equipment for applications in the computer and related industries.

Unshielded Intercom Cable

PAIRED CONDUCTORS — PLASTIC JACKET

Passes FR-1 vertical flame test.

DESCRIPTION: Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted into pairs, gray polyvinylchloride jacket overall. Suitable for outdoor installations.

APPLICATIONS: Balanced intercom systems. Annunciators. Telephones. Nurses call systems. Control circuit cable. Electronic computer cable. Multiple speaker cable. Signal systems. Alarm systems.

CHARACTERISTICS: Suggested operating temperature: —20°C to +80°C. Suggested operating voltage: 200 volts.

MULTI-CONDUCTOR — PLASTIC JACKET

Passes FR-1 vertical flame test.

DESCRIPTION: Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted, gray polyvinylchloride jacket overall. Suitable for outdoor installations.

APPLICATIONS: Intercoms. Interconnecting cables. Remote control circuits. Telephones. Telemetering connecting cable. "Baby Sitter" intercom.

CHARACTERISTICS: Suggested Operating Temperature: −20°C to +80°C.

DESCRIPTION: Passes FR-1 vertical flame test. Each conductor stranded tinned copper, color coded polyvinylchloride insulation, conductors twisted, gray polyvinylchloride jacket overall. Suitable for outdoor installations.

APPLICATIONS: Unbalanced intercom systems. Low voltage relay control cable. P.A. systems. Electronic computer cable. Interconnecting cables. Remote control circuits. Telephones. Telemetering connecting cable. "Baby Sitter" intercom.

CHARACTERISTICS: Suggested Operating Temperature: −20°C to +80°C.

Unshielded Control & Audio Cable

INNER CONDUCTORS — 600 VOLTS — 80°C

DESCRIPTION: Passes FR-1 vertical flame test.

Each conductor, stranded tinned copper, color coded PVC insulation with mylar wrap, chrome gray PVC jacket overall. Working voltage — 600 volts. Operative temperature −20°C.-+80°C. Inner conductors meet UL Style 1011.

APPLICATION:

Used as industrial control cable for telemetry and automatic control. Widely used as a heavy-duty communications and signaling cable.

ALPHA WIRE CORPORATION

Foil Shielded Jacketed Cable

UL STYLE 2092, 2093 & 2094 *

MYLAR SUPPORTED ALUMINUM FOIL SHIELD

DESCRIPTION:
Each conductor stranded tinned copper, color coded polyethylene insulation, conductors cabled, wrapped mylar supported aluminum foil shield, 100% coverage with drain wire laid parallel, aluminum foil facing outward to provide maximum ground, gray pvc jacket overall.

CHARACTERISTICS:
Operating temperature: −20°C to +60°C. Operating voltage: 400 volts. Light weight, reduces cable diameter, and provides 100% shield coverage.

Miniature Foil Shielded Cable

TWO 22 GAUGE CONDUCTORS.

DESCRIPTION:
Each conductor tinned solid or stranded copper, color coded polypropolene insulation, aluminum/Mylar foil shield, drain wire, gray vinyl jacket overall.

APPLICATIONS:
Designed for space-saving in miniature and sub-miniature instrumentation and audio applications.

200 volts, −55°C — +105°C

Foil Shielded Audio & Data Cable

INDIVIDUALLY SHIELDED MULTIPLE PAIRS — PLASTIC JACKET

DESCRIPTION:
Each conductor, tinned copper, color coded, high density polypropolene conductors twisted into pairs. 20 gauge tinned copper drain wire. Mylar-supported aluminum foil shield, aluminum facing inward. Chrome Gray PVC jacket overall.

CHARACTERISTICS:
Mutual conductance between conductors of a pair, 25 pf/ft. Capacitance of a single conductor to shield, 45 pf/ft.

APPLICATIONS:
For audio, R.F. and pulse applications requiring superior circuit isolation.

Spiral Shielded Plastic Jacketed Cable

DESCRIPTION: Passes FR-1 vertical flame test.
Each conductor stranded or solid tinned copper, color coded polyvinylchloride insulation, conductors twisted, spiral wrapped copper shield, gray polyvinylchlodide jacket. Nominal jacket thickness .020.

CHARACTERISTICS:
Use of spiral shield makes pigtailing off extremely simple and fast. Excellent for production line work. Provides 95% shielded coverage for audio and RF frequencies. Suggested operating temperature: −20°C to +80°C.

Braided Shielded Jacketed Cable

DESCRIPTION: Passes FR-1 vertical flame test.
Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted, braided copper shield, gray polyvinylchloride jacket overall. Suitable for outdoor installations.

CHARACTERISTICS:
A conventional type of braided shield providing approximately 75% coverage is particularly desirable where flexibility is required. The copper shield allows ease of pigtail soldering. Shield construction provides additional cable strength. Operating temperature: −20°C to +80°C. Nominal jacket thickness .020.

APPLICATIONS:
For public address and sound systems, ideal for recording studios, amateur radio transmitters, shielded power or electronic circuits, wherever an economical shielded cable is required.

Shielded Microphone Cable

PLASTIC JACKET UL STYLE 1150*

DESCRIPTION:

1702-1706: Single conductor, stranded tinned copper, white polyethylene insulation, braided or spiral wrapped tinned copper shield, gray polyvinylchloride jacket overall.

1709-1712: Each conductor stranded tipped copper, color coded polyethylene insulation, cabled with fillers, wrap, braided or spiral wrapped tinned copper shield, gray polyvinylchloride jacket overall.

APPLICATIONS:

1702-1706: All high impedance microphones, lapel, ribbon, velocity, crystal contact, hi-fi interconnecting cables.

1709-1712: All low impedance microphones — carbon, condenser, dynamic.

CHARACTERISTICS:

Suggested operating temperature: −20°C to +80°C.

Shielded Microphone Cable

RUBBER AND NEOPRENE JACKETS

DESCRIPTION:

Each conductor stranded tinned copper, color coded rubber insulation, wrap, braided tinned copper shield, cotton wrap, tough black rubber or neoprene jacket overall.

APPLICATIONS:

1248-1449: All high impedance microphone, broadcast and heavy duty studio use, communication and audio systems.

1250-1450/16: All low impedance microphone, broadcast and heavy duty studio use. Can also be used for control circuits, video and audio interconnection cable, and as electronic power cables.

CHARACTERISTICS:

Suggested operating temperature: −20°C to +60°C.

Rubber jacketed cable suited for standard duty indoor use.

Neoprene jacketed cable suited for heavy duty outdoor use and direct burial. Will resist oil, acid, sunlight, aging and abrasion.

Low Capacitance Shielded Microphone Cable

CELLULAR FOAM POLYETHYLENE INSULATION — PLASTIC JACKET

DESCRIPTION:

Single conductor, stranded tinned copper, white foam polyethylene insulation, braided tinned copper shield, chrome gray polyvinylchloride jacket.

Two conductors, stranded tinned copper, color coded foam polyethylene insulation, 1 white and 1 black, cabled with fillers, textile wrap, braided tinned copper shield, chrome gray polyvinylchloride jacket.

CHARACTERISTICS:

Suggested operating temperature: −20°C to +80°C. Low loss foam polyethylene provides lower capacitance and attenuation than standard solid polyethylene microphone cables, thereby increasing the effective length of usable cable without loss of signal.

SHIELDED & UNSHIELDED COMBINATIONS FOR AUDIO & INSTRUMENTATION

DESCRIPTION:

Each conductor stranded, tinned copper, color coded PVC or polypropolene insulation, braided, tinned or aluminum mylar over conductors forming shield. Unshielded conductors paired. Foil shielded cables have solid tinned copper drain for grounding.

APPLICATIONS:

For all station-to-station wiring where shield is necessary to eliminate cross-talk. Used in instrumentation wiring or in various circuits requiring parted or total signal isolation.

CHARACTERISTICS:

Suggested operatng temperature: −20°C to +80°C. 350 volts.

Telephone Station Cable

Description:

Solid, annealed 22-gauge bare copper conductor, color coded polyethylene insulation, conductors cabled with PVC jacket overall. Jacket designed to resist weathering and abrasion.

Application:

Telephone and intercom installation. May be used in building duct or outside installations. Cable may be easily installed to baseboards or walls with staple gun or clamps.
Insulation thickness .015″.

Hi-Fi and Stereo Interconnecting Cable Phono Wire

DESCRIPTION

1115 and 1116:

Each conductor stranded tinned copper, color coded polyvinylchloride insulation, conductors twisted.

1101-1107:

Each conductor stranded tinned copper, color coded polyvinylchloride insulation, conductors twisted with an extra tight lay for flexibility. When shielded the overall shield has been specially designed for extreme limpness so as not to impede the movement of the phono arm when tracking.

CHARACTERISTICS:

Suggested Operating Temperature: 55°C to +105°C.

HEAVY-DUTY MULTI-CONDUCTOR RUGGED NEOPRENE JACKET — 600 VOLTS

DESCRIPTION:
Each conductor stranded bare copper, color coded rubber insulation, cabled with fillers where necessary, wrap over conductors, heavy duty black neoprene jacket overall. 600 volt operating voltage.

APPLICATIONS:
Remote control of automatic electrical equipment and sub-stations, telemetering, voltage pressure and motor control, signal transmission. Flexible heavy duty neoprene jacketed cable, recommended for outside installation, cable resists oil, ozone, sunlight, moisture, abrasion and impact.

ALPHA WIRE CORPORATION

Teflon Cables Shielded

Fire Resistant for Alarm Systems

Braid over Shield

UL 1212, 1213 CONDUCTORS / MIL-W-16878 D / TYPE E

DESCRIPTION:

Each conductor stranded silver plated copper, Type E extruded TFE .010″ insulation, color coded, cabled, braided silver plated copper shield, 90% coverage, braided white fused Teflon impregnated, fiberglass braid overall.

CHARACTERISTICS:

Temperature rating −65°C to +200°C. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus. Passes FR-1 vertical flame test.

FEP Extruded Jacket over Shield

DESCRIPTION:

Each conductor stranded silver plated copper, Type E extruded TFE insulation color coded, cabled, braided silver plated copper shield 90% coverage, extruded FEP white Teflon jacket overall.

CHARACTERISTICS:

Temperature rating −65°C to +200°C. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus. Extruded FEP Teflon jacket is tough and abrasion resistant. Passes FR-1 vertical flame test.

ALPHA WIRE CORPORATION

15/5 PVC Nylon Control Cable 600 Volts 90° C

UL

PT-N

MEETS UL, ASTM, IPCEA S-61-402

DESCRIPTION:
Bare stranded copper conductor, .015 PVC insulation, .005 nylon jacket over each conductor, moisture resistant tape, black PVC jacket overall. Conductors color coded per IPCEA.

APPLICATION:
Widely used for all types of control and signal circuits. Moisture resistant, suitable for underground burial.

20/10 PE Nylon Unshielded Station Control Cable

HEAVY-DUTY MULTI-CONDUCTOR PLASTIC JACKET—600 VOLTS

DESCRIPTION:
Each conductor stranded bare copper, .020 polyethylene insulation,* .010″ polyvinylchloride jacket over each conductor, color coded, cabled with filters where necessary, moisture resistant tape, black polyvinylchloride jacket overall. 600 volt operating voltage.

APPLICATIONS:
Remote control of automatic electrical equipment, recording and relaying devices, telemetering, switchgear operations and indicators, substation operation, temperature voltage, pressure and motor control, dimensional tolerance on automatic quality control.

14 & 12 gauge — .020″ Polyethylene Insulation

NON-CANCELLABLE

COLOR CODE: The color code of Plastic - jacketed control cables conforms to I.P.C.E.A standards either with full color code or surface printed with color name and number.

All items this page available cut to customer's length requirement. Minimum order 25 ft. per item. All orders non-cancellable.

ALPHA WIRE CORPORATION

Irradiated Conductor Cable 600 Volts 105°C

IRRADIATED INNER CONDUCTORS WILL NOT MELT OR CHAR AT SOLDER IRON HEAT RESISTS ABRASION. Passes FR-1 vertical flame test.

DESCRIPTION: Stranded tinned copper conductors, color-coded, irradiated PVC (RX-7000) insulation, (braided, tinned copper shield,) white PVC jacket overall.

A miniature shielded cable with both military specifications and UL listings. Ideal for application on crowded circuit boards where terminals must be soldered. Prevents shrink-back, melting or charring when used in production line soldering. RX-7000 insulation is far tougher and more abrasion-resistant than ordinary non-irradiated PVC.

Computer Cables

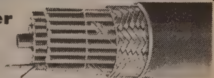
Passes FR-1 vertical flame test.

Computer Cable

UL STYLE 2343
DESCRIPTION:
Each conductor stranded tinner copper. Color coded 80°C PVC insulation. Cabled with PVC fillers, .001″ clear mylar wrap. Braided tinned copper shield (85% coverage). Gray PVC jacket.
APPLICATION:
Interconnection of computer modules.

Alpha No.	No. of Cond.	Cond. Gauge	Strand	Wall Thick. (In.)	Jacket Thick. (In.)	Nom. O.D. (In.)
2458	6	18	16/30	.016	.062	.394

Computer Coaxial Cable



UL STYLE 2386 — DESIGNED FOR INTERCONNECTION OF DATA SYSTEM COMPONENTS

Individual mini. coax cables, grouped together under common overall shield (where indicated) and jacket.

Individual miniature coax cables consist of #26 AWG solid silver-plated copper conductor, air-spaced, flame-retardant polyethylene dielectric (.025″ polyethylene thread helically wound around conductor; overall .018″ polyethylene tube) spiral-wrapped 29 AWG tinned copper drain wire, braided tinned copper shield, overall .016″ PVC jacket. Nom. diam. .155″.

The completed cable is constructed of the miniature coaxial cables (described above) cabled with PVC fillers, clear mylar wrap, overall gray PVC jacket.

Shielded cables employ braided tinned copper shields with spirally-wrapped #26 AWG solid copper alloy drain wires.

APPLICATION:
These cables are specifically designed for the most widely used computer systems. Used for interconnection of modules and data transmission.

CHARACTERISTICS OF COAXIAL CONDUCTORS
Nom. Imped., 95 ohms; Attenuation at 400 MC Max., 10.2 db/100 ft.; Velocity Propogation, 83%; Voltage 750 volts max.; Jacket Thick., .085″.

Micro-Miniature Coaxial Cable

50, 75, 100 OHM IMPEDANCES FOR COMPUTER, INSTRUMENTATION AND ULTRA-COMPACT WIRING
DESCRIPTION:
Center conductor, solid silver-plated copper with 40 micro-inch minimum plating. Cellular polypropylene or FEP *Teflon dielectric. Aluminized Mylar shield, 30 AWG, solid silver-plated copper drain wire — parallel to center conductor. Flame-retardant Vylex (laminated Mylar*) blue-colored jacket overall. Dielectric mat'l. cellular polypropylene #9450, FEP.
CHARACTERISTICS:
Extremely small and flexible with high cut-through resistance. Provides uniform characteristic impedance, low losses and low propogation delays. Cross-talk kept to minimum.
APPLICATION:
Computer wiring, high density packaging, point-to-point wiring, micro miniature systems.

Neoprene Welding Cable

DESCRIPTION:
Stranded bare copper conductor, tape wrap, black neoprene rubber insulation.

CHARACTERISTICS:
Lightweight, flexible cables with high resistance to abrasion, impact, flexing, and twisting.

RECOMMENDED CABLE SIZES:
The sizes of cable recommended by the Machine Group of the NEMA Electric Welding Section for standard hand welding equipment based on lengths up to 90 ft. that is, 45 ft. of welding cable and 45 ft. of return cable, are as follows:

100 — Ampere Welder — 4 AWG
150 — Ampere Welder — 3 AWG
200 — Ampere Welder — 2 AWG
300 — Ampere Welder — 1/0 AWG
400 — Ampere Welder — 2/0 AWG
500 — Ampere Welder — 2/0 AWG
600 — Ampere Welder — 3/0 AWG

Telemetering & Supervisory Shielded Control Cable

DESCRIPTION:
Each conductor bare solid copper, high molecular weight polyethylene insulation, color coded, twisted into pairs, cabled with a non-hygroscopic binder tape .008″ aluminum shield, black polyethylene jacket overall. Operating voltage 300 volts.
Double jacketed types, (3903-4060 below) same except for additional inner black polyethylene jacket over binder, and .005″ copper shield.

APPLICATIONS:
Remote control of rocket recording data and test-firing control, transmission of signals which telemeter temperature, voltage pressure, etc. control of multiple circuits, measuring devices, quality control equipment, radar antenna. For aerial, duct and conduit installations.
Double jacketed types have higher dielectric strength and suited for direct burial installations.

Tinned Copper Braid

TO MIL SPEC QQ-B-575A, ASTM-B-33

FLAT

DESCRIPTION: A woven tinned copper braid which is manufactured completely round as outlined in Mil Spec QQ-B-575. Each strand of the braid is soft drawn tinned copper wire. The braid is self-supporting and maintains its round configuration. The percentage of shielding coverage is 95% or more when placed over a mandrel of an equivalent diameter to the inside braid diameter.

APPLICATIONS: Maximum shielding against electrostatic interference for wires, cables and other components. Also as a protective covering against mechanical abrasion and stresses.

TUBULAR

DESCRIPTION: A woven braid, composed of tinned copper strands, which is rolled flat at time of manufacture to a specific width depending upon construction.

APPLICATIONS: Flat braid is usually employed for its current carrying capacity and its extreme flexibility. It is generally used as a high current conductor at low voltages. Battery grounding is typical of this application. It is also used as a bonding strap in vehicles and aircraft to help eliminate ignition interference. Because of its extreme flexibility it can be used in confined areas or as electrical connections on moving parts.

FLAT BRAID

APPLICATIONS: A woven braid, composed of tinned copper strands, which is rolled flat at time of manufacture to a specific width depending upon construction.

ALPHA WIRE CORPORATION

Low Leakage Medical Safety Cable

UL
SJT

300 VOLTS 66% LESS LEAKAGE THAN CONVENTIONAL SJT POWER CORD LOW MUTUAL CAPACITANCE

DESCRIPTION

A specially designed low leakage power cable that greatly reduces danger of electrical shock in medical and dental applications. Each conductor stranded and annealed copper. Insulation color coded FEP Teflon . Low dielectric constant polyethylene fillers provide wider conductor spacing. Paper tape wrap over core with red PVC jacket overall. Maximum leakage, 10 ft. length at 120 V is 6 microamperes to green, 16 microamperes through jacket.

APPLICATION

The inherent danger of electrical shock due to faulty internal or power connections on medical test and analytical equipment is greatly reduced by use of this cable. The wider conductor spacing necessary for low leakage is obtained by utilization of the special low dielectric constant fillers and core.

Replacement Cord Sets

– 300 VOLTS – 7 AMPS.

DESCRIPTION: Heavy duty, abrasion resistant replacement cord sets. Conductor bare copper, vinyl or rubber, color coded insulation, cotton fillers, rubber or vinyl jacket overall. One end fitted with molded two or three conducter male plug, one end jacket stripped back, 1½ inches with ⅝ inches bare conductors exposed.

APPLICATION: TYPE SV - SVT
For small tools, business machines and light-duty equipment.
TYPE SJ - SJT
For heavier duty tools, electric saws, small motors, grinders, saws and sanders.

UL
SV - SVT
SJ - SJT

PACKAGING: All cords sets available in individual boxes or coiled and tied in bulk packages.

Extension Cord Sets

U.L. AND C.S.A. LISTED

DESCRIPTION:
Extension cord sets manufactured for lasting service with a flexible 2 or 3 conductor quality black rubber cord. This rugged cord has a black molded plastic male and female plug on either end to fit conventional sockets and plugs. Extension cords have a 300 volt rating

APPLICATION:
Small business machines, vacuum cleaners, lamps, movie projectors, or any other home appliance. 3 conductor cord used when 1 conductor requires grounding.

PVC Retractile Communication Cords

RETRACTED LENGTHS 1, 2, 3 & 4 FEET EXTENDED LENGTHS 6, 12, 18 & 25 FT.

DESCRIPTION:

Durable, long lasting plastic retractile coil cords. Economically priced, but offering maximum flex resistance and long life. Each conductor is stranded tinned copper P.V.C. insulation and P.V.C. jacket over all.

CHARACTERISTICS:

Suggested operating temperature: —20°C to +60°C. 23 AWG conductor — 21/36 strands, 120 volts, 1 amp.

ALPHA WIRE CORPORATION

Test Lead Wire

DESCRIPTION:

Single conductor, extra flexible stranded tinned soft annealed copper, separator, color coded rubber insulation, smooth satin finish. Available in black, red. No. 1639 also available in green.

APPLICATIONS:

As test leads in analyzers, oscillators, multi-meters, and all other types of testing apparatus or wherever an extra flexible insulated wire is required. Heavy duty type designed for television, therapeutic equipment, analyzers, oscillators, etc.

Suggested operating temperature: −20°C to +60°C.

Measuring and Coiling Machine

EASY TO USE – HAND OPERATED

The ideal unit for in-plant or distributor use for measuring and dispensing small coils of wire from larger spools or coils.

Set-up consists of a heavy-duty measuring unit with capacity to 10,000 feet. Digital register accurately indicates feet and inches dispensed in large, easy-to-read numerals. Measuring unit has spring-loaded rollers that are easily set for proper tension by adjusting control knob. All type of wire and cable, from small gauge hook-up wire to large cables, may easily and accurately be measured. Unit has capacity up to one inch O.D. wire and cable.

Wire winder has adjustable arms that may be set to the desired size coil. After coiling, arms open to flat position so coil may easily be removed.

Dispensing reel designed to hold all diameters of spools, reels or coils. Alpha No. W-MD-I

Cable Clamps

FOR WIRE, CABLE, TUBING — DURABLE, LIGHTWEIGHT, NON-ABRASIVE

ETHYL CELLULOSE CLAMPS: −65°F to +175°F.

An all-purpose clamp that has excellent corrosion, moisture and shock-resistant properties. Specially treated with ultra-violet inhibitor compound for long-lasting outdoor as well as inside applications.

NYLON CLAMPS: MIL-C-21565 (NAS), MIL-P-17091-B, MIL-P-20693, MIL-STD-24E −60°F to +175°F.

Ideal for high temperature applications, for application to surfaces subject to vibration or mechanical stress. Inside surfaces are smooth, with rounded edges to prevent jacket chafing and damage.

ALPHA WIRE CORPORATION

Alpha can supply you with all your tubing needs... Ready to use! Cut & marked!

These catalog pages contain the industry's largest selection of tubing — all available in standard packages from your Alpha stocking distributor. Alpha also offers you the opportunity to save both time and cost by purchasing these same items through your distributor, **specially cut to size or marked.**

Markings are hot stamped in accordance with UL specifications. We can print circuit numbers, letters, company names or any other identifying information you require in choice colors.

Automatic precision equipment can cut your tubing to the exact length necessary to simplify your production or installation requirements.

These services are available at nominal charges with prompt delivery. Contact your Alpha sales representative or see your local Alpha distributor for full details.

The chart provided can help you specify your requirements. Use this chart to determine how many feet you will need of any tubing to produce the required number of tubing pieces. For further information or specifications call your Alpha rep.

Everything in tubing in all sizes, colors, packages-marked & cut to your specifications

Estimator Chart for Cut Tubing Pieces

Chart relates the length of tubing required, to the necessary footage to make 1,000 pieces; and to number of individual pieces that can be cut from 1,000′ of material.

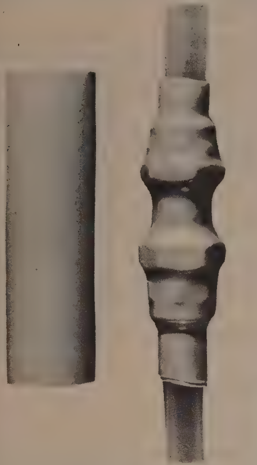
Irradiated Polyolefin Shrinkable Tubing

FIT®-221
POLYOLEFIN



MIL-I-23053/5
UL RECOGNIZED COMPONENT*
AMS-3636B, 3637B

The single most widely used type of FIT Shrinkable Tubing, FIT-221 is manufactured from irradiated cross-linked polyolefin. FIT-221 is an all-purpose tubing with excellent physical, chemical and electrical properties. It meets the most stringent military and industrial requirements for a highly reliable, thin wall insulation.

CHARACTERISTICS:
High resistance to fungus and chemicals. Self-extinguishing. Will not crack or peel.

APPLICATIONS:
General purpose insulation, strain relief, jacketing material and as component insulation. Material is easily and permanently marked.

SPECIFICATIONS:
Operating Temperature—55° C to +135° C. Shrinkage Temperature: 135° C. Tensile strength: 2500 psi. Ultimate elongation: 400%. Longitudinal shrinkage: 5% maximum. Dielectric strength: 1300 volts/mil. Non-flammable—self-extinguishing. Specific gravity: 1.3 maximum.

Irradiated Vinyl Shrinkable Tubing

FIT-105
VINYL

MINIMAL LONGITUDINAL SHRINKAGE
MIL I-23053/2, AMS 3582

A specially formulated polyvinylchloride tubing, that is mechanically strong, extremely flexible and significantly different from non-irradiated heat shrinkable tubing. Unlike non-irradiated PVC tubing, FIT-105 shrinks evenly and will not split when shrunk. Non-irradiated tubing has a much greater waste factor, with longitudinal shrinkage approximately 20%. FIT-105 will shrink less than 10% of its original length.

CHARACTERISTICS:

Extremely flexible. Will not cold flow or melt. Easily marked.

SHRINKAGE RATIO:

To 50% of original size (2:1) when temperature of 175°C (347°F.) is applied.

Controlled shrinkage within seven seconds at 166°C (325°F.)

LONGITUDINAL SHRINKAGE

Less than 10%.

APPLICATIONS:

Jacketing of cable harnesses, insulation and covering of components, bus bar insulation, tab disconnects; jacketing of cable cores with many of the qualities of the finest extruded plastic jackets.

SPECIFICATIONS:

Temperature operating range: —35°C. to +105°C. Minimum shrink temperature: 175°C. Tensile Strength: 2600 psi. Elongation: 250%. Dielectric strength: 750 volts/mil. Flame resistance: Non-burning. Fungus resistant. Fluid Resistant to: Hydrocarbons, solvents, aqueous solutions, acids, bases.

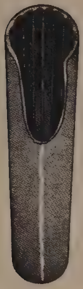
Shrinkable Cable and Connector Sleeves

FIT-700

ASTM-D 2671



FIT-700 sleeves are made with an inner pre-coating of moisture-resistant mastic. When heated, the tubing shrinks down while the mastic flows to totally encapsulate the wire splice or connector and the cable insulation.

Two types available: **Standard Wall Sleeves**—used in most general applications where wall thickness is adequate—for use up to cable rated at 600 volts. **Heavy wall sleeves**—for applications where extra mechanical protection or minimum wall thickness is needed or where Western Underground Specifications must be met.

CHARACTERISTICS:
Tough—ideal for URD direct burial installations. Provides exceptional mechanical protection. Excellent electrical insulation and environmental sealing. Protects against moisture penetration. Corrosion resistant.

SHRINKAGE RATIO:
To 1/3 of original size when temperature of 132°C. (275°F.) is applied.

APPLICATIONS:
Protection of underground or overhead cables, splices, crab joints, distribution assemblies, coaxial cables, telephone connectors. Usage in many applications having large diameter differences between cable OD's and connector OD's.

SPECIFICATIONS:
Temperature operating range:—40°C. to +135°C. Minimum shrink temperature: 132°C. (275°F.) Tensile strength: 2400 psi. Dielectric strength: 300 volts/mil.

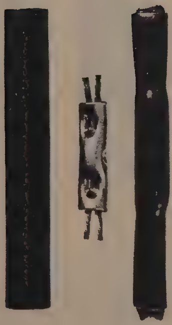
Irradiated Polyolefin Adhesive-Lined Shrinkable Tubing

FIT-750
ADHESIVE LINED POLYOLEFIN

For Sealing, Protecting Electronic Components and Splices



FIT-750 is a newly developed polyolefin tubing with a specially designed adhesive lining that melts as the tubing is shrunk. The thermoplastic adhesive adheres to a wide variety of plastic, rubber and metal surfaces. When heated to 121°C, the tubing shrinks to one-half of its supplied size while the adhesive melts and completely coats the object.

CHARACTERISTICS: Protects parts form moisture and corrosion.

SPECIFICATIONS: Tubing—Tensile strength: 1500 psi. Elongation: 200% minimum. Low temperature flex:—55°C. Heat aging: 336 hr/175°C, 150% elongation. Dielectric strength: 500 volts/mil. Fungus resistance: Does not support growth. Water absorption: 24 hr/25°C, 0.5% maximum. Adhesive—Peel strength: Polyethylene, 20 lb/in. width; Neoprene, 10 lb/in. width; PVC, 30 lb/in. width; Lead, 5 lb/in. width; Steel, 15 lb/in. width; Thickness applied, .005 in.

ALPHA WIRE CORPORATION

FIT-300
SURFACE IRRADIATED POLYOLEFIN

Irradiated Polyolefin Shrinkable Tubing

MIL-I-23053/4, AMS 3664
OUTER WALL AREA SHRINKS—INNER WALL AREA MELTS

A unique one piece, surface irradiated heat shrinkable tubing made from irradiated cross-linked polyolefins upon heating. As the inner area of the wall melts, and is forced into crevices and interstices the outer area of the tubing wall shrinks. Upon cooling, the entire mass becomes a rigid, tough homogenous molding.

CHARACTERISTICS:
Semi-rigid. Encapsulates. Moisture-proofs.

SHRINKAGE RATIO:
As high as 6 to 1, shrinks when temperature of 135°C (275°F) is applied. Less than 10% longitudinal shrinkage.

APPLICATIONS:
Moisture-proof encapsulation of components, electrical cable junctions and splices; mechanical shield for covering rough surfaces; vibration shield.

SPECIFICATIONS:
Temperature Opearating Range:—55°C to +110°C. Minimum Shrink Temperature: +135°C. Tensile strength: 2,500 psi, Elongation: 400%. Dielectric strength: 1,100 volts/mil. Flame Resistance: Not flame retardant. Fluid Resistance: Hydrocarbons, solvents, aqueous solutions, acids, bases.

FIT-600
NEOPRENE

Irradiated Neoprene Shrinkable Tubing

MIL R-46846 TYPE 1, CLASS 1
MIL I-23053/1, AMS 3623

A highly flexible, durable, heavy wall, heat shrinkable neoprene tubing. Manufactured from a specially formulated neoprene that provides a unique combination of outstanding physical properties.

CHARACTERISTICS:
Rugged—highly abrasion resistant. Shrinks to approximately 50% size. Will not split or crack when shrunk over irregularly shaped objects. Inert.

SHRINKAGE RATIO:
To approximately 50% of original size when temperature of 175°C. (346 F.) is applied. Less than 10% longitudinal shrinkage.

APPLICATIONS:
Fabrication of in-house short-run cables and harnesses, prototypes, repairs, and where special protection from abrasion is required over individual wires or jacketed cables.

SPECIFICATIONS:
Minimum shrink temperature: 175°C. (346°F.) Tensile strength: 1,800 psi. Elongation: 250%. Dielectric strength: 300 volts/mil. Self-extinguishing. Resistant to fungus, chemicals, solvents.

One Size Fits Most Applications / 4½ to 1 Shrinkage Ratio
Meltable Inner Wall Encapsulates Terminal in Tough Moisture-proof Sleeve

FIT-521 is a flame-retardant polyolefin tubing that has been selectively cross-linked. When heat of 135°C is applied, the inner wall melts while the outer wall shrinks down. As a result, terminal is completely encapsulated and insulated in a hard, tough, molding Because of its enlarged shrinkage ratio, FIT-521 may be used over irregularly shaped objects and easily slips over most common wire terminals, including ring, spade and lug types.

FIT-295

SEMI-RIGID TUBING

UL — SAE — AMS LISTED / For Maximum Strength At All Stress Points / MIL-1-23053/6

Alpha FIT-295 Shrinkable Tubing is designed to provide maximum mechanical strength at stress or connection points. An extremely strong, heavy wall, abrasion-resistant, extruded tubing FIT-295 is supplied in expanded form and easily slips over the object to be covered.

When a temperature of approximately 275°F (135°C) is applied, Alpha FIT-295 immediately returns to its predetermined size (approximately ½ smaller) and forms a permanent tight-fitting mechanical bond. Longitudinal shrinkage is less than 5% when completely recovered.

Controlled shrinkage to the correct predetermined size takes place within seven seconds at 275°F to 300°F.

FIT-200

TERMINAL INSULATION / 4 SIZES FIT MOST CONNECTORS / UL LISTED

Shrinks 2.3 to 1 (58% Shrinkage) / 125°C 600 Volts / Four Sizes Fit Most Electrical Connectors

FIT-200 is an irradiated semi-rigid industrial grade polyolefin that is designed primarily as a strain relief and insulation for electrical terminals of all types. FIT-200 is available in black only.
Because of its 58% shrinkage ratio, the four sizes of FIT-200 will easily fit over most of the common electrical terminations in use today.
FIT-200 shrinks at a temperature of 275°F to 300°F. Longitudinal shrinkage is 10% maximum, FIT-200 provides excellent insulation and mechanical relief and may be easily marked or cut to size.
Available in 4′ Lengths — 6″ Lengths or ready to use pre-cut 1″ pieces.

FIT-500

HIGH TEMPERATURE TEFLON

— CONFORMS TO: MIL-I-23053/12

Continuous Operating Range −67°C, +250°C / Outstanding Chemical and Solvent Resistance
Non-Flammable / High Mechanical Strength and Lowest Coefficient of Friction

FIT-500 heat shrinkable tubing has the same high resistance to chemical and corrosive agents as ordinary Teflon tubing (Alpha TFT-200 and TFT-250). It is non-burning non-corrosive and has excellent electrical characteristics that remain stable throughout its electrical range.

When a temperature of 327°C is applied to FIT-500, the tubing shrinks to approximately 65% of its supplied size returning to its original pre-determined diameter. Longitudinal shrinkage is less than 10%.

FIT-500 forms a tight, flexible, protective covering for wires, and electronic components, is recommended for use as a mechanical shield and is ideal for friction-proofing.

FIT-400

FEP. TEFLON REQUIRES LESS HEAT / 400°C OPERATING TEMPERATURE

Shrinkage Ratio, 2:1 (50% Shrinkage) / Designed for Use with Heat-Sensitive Components

All of the outstanding electrical, chemical and mechanical advantages of Teflon* tubing are now available in FEP tubing, without the drawback of high shrinkage temperature requirements.

Heat-sensitive components, solid state devices, solder joints, may now be insulated with FEP Teflon* without damage. FEP tubing is applied as a natural, transparent tubing and requires heat of 200°F-350°F to shrink.

FIT-100

NON-IRRADIATED — INDUSTRIAL GRADE — ECONOMICALLY PRICED

FIT-100 is a flexible, thin-wall PVC tubing that shrinks to 50% of its diameter when heated to 200°F. After shrinking, FIT-100 forms a smooth, tight-fitting mechanical and electrical insulation. FIT-100 has high strength and good dielectric properties and resists most chemicals and oils. The material is resistant to sunlight, moisture and fungus. Longitudinal shrinkage is 20%.

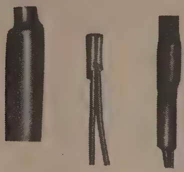
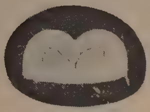
ALPHA WIRE CORPORATION

Heat Shrinkable Tubing Products — Fit® Caps and Boots

FIT-CAP-P





FIT-CAP-P COMPLETELY POTS CONNECTIONS / ASSURES ABSOLUTE ELECTRICAL PROTECTION

Type P potting FIT-CAPS offer an inexpensive method of encapsulating crimped electrical connections. When heated with any Alpha heat tool, the outer jacket quickly shrinks, forcing the meltable inner wall to flow into every irregularity of the crimp.

Absolute electrical protection is assured since it is impossible to produce Type P caps with pinholes or weak areas. Type P caps have proven quick and easy to apply in comparison with tape wrapping and slip-on tubing. P-Caps can be applied in half the time as consumed by other insulating methods.

Typical Dielectric Strength — 1100 volts per MIL. **Volume Resistivity — 10^{16} ohm-cm. minimum.**

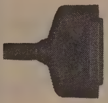
FIT-BOOTS



FIT-BOOTS — FOR D-SUBMINIATURE CONNECTORS* SHRINKS TIGHT OVER CONNECTOR SHELLS

Designed specifically for subminiature rectangular connectors manufactured by ITT-CANNON, CINCH and Amphenol-Borg. FIT-BOOTS replace metal molds and plotting forms used on molded harnesses. FIT-BOOTS provide a strain relief, a convenient handle, and seal out contaminents. The boots are molded of a heat shrinkable, modified polyolefin compound with excellent physical and electrical properties. Any Alpha Heat Gun may be used to shrink boots.

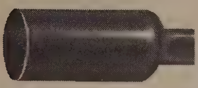
FIT-CAPS



IRRADIATED POLYOLEFIN FIT-CAPS

Made of flame resistant, extremely tough, abrasion-resistant polyolefin tubing, the caps shrink and seal the ends of one or more wires, making a firmly encapsulated, moisture-resistant termination. Controlled shrinkage to the correct predetermined size takes place within seven seconds at 275°F to 300°F. Shrinkage Ratio 2:1.

DIMENSIONS CHART — Standard Package: 100, 1000 Pieces

SELF-ENCAPSULATING FIT-CAPS

Molded caps are made of a molded, heat shrinkable, cross-linked polyolefin with two inserts. The insert at the closed end of the cap melts and flows between the splice forming a moisture proof encapsulation. The insert near the open end acts as a dam, preventing the molten material from flowing out beyond the cap. Cap shrinks and melts at 275°F.

ALPHA WIRE CORPORATION

MOISTURE RESISTANT FEEDTHROUGH SEAL

IRRADIATED HEAT SHRINKABLE TUBING

MEETS MIL-1-81765, MIL-E-917, MIL-STD-454

- **Only five sizes covers cables from .38"—2½"**
- **Reduces installation time and costs**

Alpha's FIT-Seals are a molded heat-shrinkable part that provides a moisture-proof, strain-relieved feedthrough with maximum simplicity and reliability.

FIT-Seals may be used for ship-board, aircraft, instrument electrical, control box, or cabinet applications. The FIT-Seal replaces more complex feedthroughs that require many sizes to cover a complete range and several parts. Fit-Seals may be used with plastic jacketed or armored cables or piping. The seal contains two parts, a sealing boot and a retaining ring. Installation requires access to only one side of an enclosure and quick shrinkage may be accomplished with any Alpha heat-gun.

Heat causes the molded boot to shrink tightly against the cable while a pre-coated adhesive melts and flows to fill all voids and establish a moistureproof seal.

Performance meets or exceeds requirements established for U.S. Navy and Coast Guard Vessels.

FIT-JACS

Fit-Jacs are preformed shapes that provide excellent mechanical, environmental and electrical protection for solid state devices. A convenient and easy way to protect delicate and valuable components. Fit-Jacs shrink instantly to their predetermined size and configuration when only the extended lower "skirt" is heated. Shrinking may be accomplished by use of hot air gun or soldering iron.

Fit-Jac material remains clear after shrinkage so that printed nomenclature on devices may easily be identified.

SPECIFICATIONS:

Fit-Jac 1-5

Operating Temp.: 135°C; Dielectric Strength: 1300V/Mil; Shrink Temp.: 275°F.

Fit-Jac 6, 7

Operating Temp.: 175°C; Dielectric Strength 1500V/Mil; Shrink Temp.: 350°F.

FIT-KITS

THE IDEAL R & D, OR PROTOTYPE SAMPLERS

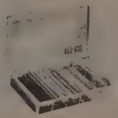
FIT-KIT-1

Contains more than 70 - 6" lengths of 7 widely used types of Fit-Tubing in a variety of colors. A compartmented clear plastic box allows easy storage and quick identification. KIT-1 includes lengths of FIT-105, FIT-221, FIT-295, FIT-300, 350, FIT-CAPS and FIT MARKERS. Box measures 6½" x 11" x 2".

FIT-KIT-2

Contains all the items in FIT-KIT-1 **plus** 6" lengths of FIT-200, FIT-400, FIT-500, FIT-600, FIT-700, and 1" cut pieces of FIT-200 and FIT-521. This kit is the complete engineering, prototype, or laboratory inventory of all Alpha Fit-Tubing products.

KIT-2 consists of two 6½" x 11" x 2" compartmented clear plastic boxes packed in cardboard sleeve.



ALPHA WIRE CORPORATION

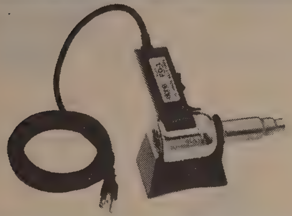
Miniature Hot Air Gun FG-1

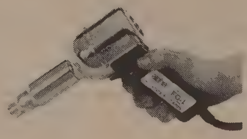
A new miniature heat gun that has been developed for shrinking all fit tubing. A durable, electric motor driven unit that delivers a high volume of air to the nozzle. Easily replaceable heat elements. 3 position rocker switch. Lightweight — Use as bench or hand unit. Heating element, part no. HS-1 is easily replaced.

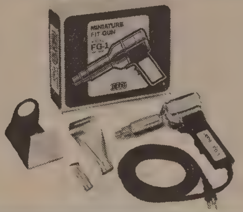
AMPERAGE RATING — 7
OPERATING VOLTAGE — 115 AC
WEIGHT OF GUN — 1½ lbs.

TYPICAL TEMPERATURES
175°C (347°F) without adapter
205°C (401°F) with adapter only
230°C (446°F) with tubing reflector
Temperatures will vary with fluctuations in line voltage.

Operation: For optimum shrinking, an initial 60-second warm-up time is recommended. For longer element life, run 30-seconds with cooling on, before switching gun off.







Hot Air Gun

TURBO FAN — PROVIDES TEMPERATURES UP TO 1000°F. HG-1 TO 500° F HG-2 750° TO 1000°F.

DESCRIPTION:
Flameless, quiet operating, hot air torches that may be used for portable operations or secured permanently to a bench by means of a mounting bracket.
Heavy duty construction to withstand continuous operation use, the HG-1 is the recommended tool for shrinking ALL FIT tubing, except FIT 500 Teflon tubing. Both have adjustable air intake to control temperature and a double jacketed housing of die cast aluminum. Equipped with an 8 ft. neoprene jacketed 3-wire cord and plug and adaptor for 2 prong receptacle.

HG-1 & HG-2

SPECIFICATIONS:	
Voltage	115v, AC/DC
Amperage	14 amp
Air Volume	35 CFM at 3000 FPM velocity
Overall height	8″
Nozzle length	4″
Overall length	11″
Nozzle diameter	1 5/32″
Base plate	5¾″ each side (triangular shaped)
Power cord	8′ neoprene jacketed 3 conductor cord with adaptor for 2 prong receptacle.

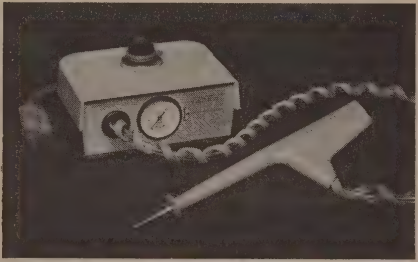
Hot Air Pencil FG-4

CONTROLS AIRFLOW TEMPERATURE, VELOCITY AND DIRECTION

Designed specifically for precise selective heating of smaller diameter tubing and sleeves. Heat may be concentrated exactly where it is required resulting in labor saving installation and repair.

Allows operator to work in crowded circuit areas without damaging heat-sensitive components and wire with a minimum of fatigue. Utilizes factory or shop compressed air supply.

Unit complete with stand, regulator, needle point tip, sleeve reflector, and tubing reflector.
Input Power — 120 VAC, 4 AMP.
Airflow — 60 PSIG MIN., 4 CFM.



HOT AIR PENCIL FG-4

Infra-Red Heat Gun FG-5

SHRINKS TUBING SAFELY — IN SECONDS!
UTILIZES INFRARED ENERGY — NO MOVING PARTS — NOISELESS

Used for all shrinkable tubing products. Just press the switch and a burst of infrared energy shrinks tubing in seconds. May be used as a hand gun or as a permanent bench tool. Ellipsoidal reflector focuses heat from a quartz iodine lamp onto the tubing. Most of visible light is optically filtered to eliminate eyestrain. Reflectors designed to allow operator to observe the entire shrinking process, minimizing faulty installation.

The gun is noiseless, light-weight and eliminates annoying heat buildup. Unit comes with easily interchangeable tubing reflectors and small sleeve reflector. Replacement parts are readily available.

Input Power — 105-120 VAC, 50-60 HZ, 4.2 AMP.
Normal Lamplife — More than 1000 hours (intermittent).
Weight — 1.6 lbs.

Flame Torch Kit FG-10

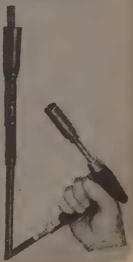
IDEAL PROPANE TORCH FOR IN-FIELD USE
SUPPLIES SOFT YELLOW FLAME FOR SHRINKING TUBING WITHOUT DAMAGE

The FG-10 flame torch has been specifically designed for shrinking tubing without scorching or damaging encapsulated material, wire or cable. The FG-10 provides a flame of even temperature without the hard blue flame present in ordinary propane units.

FG-10 Includes:
- 1 — Pistol grip torch.
- 1 — Valve assembly with control knob for attachment to ordinary propane bottle (not supplied). Assembly includes belt clip and torch holding hook.
- 1 — 6′ L.P.G. propane hose*.

> NOTE:
> FG-10 Flame Torch, as all flame devices, should be used only where safety regulations and working conditions permit.

*(Other lengths of L.P.G. hose may be used. Available from local suppliers.)



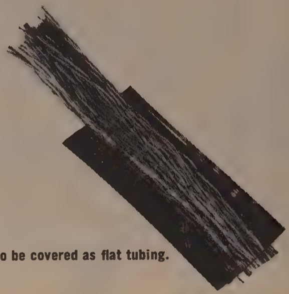
ALPHA WIRE CORPORATION

Alpha Zipper Tubing

UL Recognized Component — Easy To Use
Ideal for Prototypes — Short Run Cables
Adds Extra Mechanical Protection
Eliminates Tape-Wrapping or Other "Make-Do" Jacketing Material

Alpha zipper tubing allows you to jacket any group of wires or cables in just seconds. It is the ideal jacketing material for all short run and prototype cable applications. Zipper tubing is ideal for use in the plant, on the job, in the field or anywhere where extra protection or a short run or prototype cable jacket is needed.

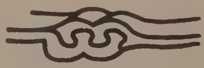
Zipper tubing is supplied on a spool and consists of a plastic jacket with matching tracks on each side. When the zipper tubing is formed into a circular shape, the two tracks at each end interlock to form a continuous and circling cable jacket. Closure of zipper tubing is simplified by use of a slide that matches the track and will lock continuously as it is pulled. The end result is a permanent jacket or protective cover.



Place wire to be covered as flat tubing.

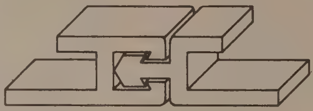
Standard Track

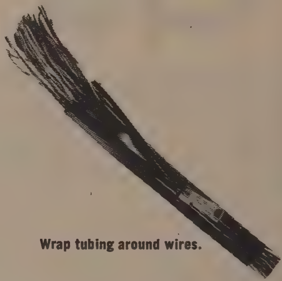
Standard track allows the material to be easily opened at any point to make breakouts, or bring other lines into the cable line being jacketed.



Loc-Trac®

Alpha has developed a new type of track, Loc-Track®, that provides a permanent, flex-resistant seal. This track will not pop open even when the jacketed material is bent in a U-shape. It requires no sealant or any adhesive to hold together.





Wrap tubing around wires.

Specifications for all types of Alpha Zipper Tubing

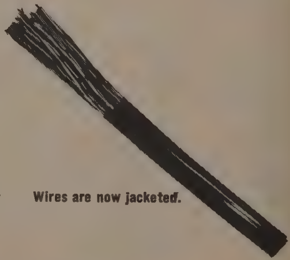
Material:	Polyvinylchloride
Track Thickness (when closed):	Std. .095" Loc-Trac® .150
Dielectric Strength V/mil:	759
Tensile Strength P.S.I.:	3810
Ultimate Elongation:	255%
Operating Temperature Upper Limit:	106°C
Cold Brittleness:	−86°C
Fungus-proof:	Will Not Support Fungus
Flammability:	Self-extinguishing
Lateral Pull Strength (unsealed):	42.7 pounds/inch
Lateral Pull Strength (permanently sealed):	59.8 pounds/inch

Zip up with slider provided.

Accessories

PB-200 (Seals Standard Track Zipper Tubing) —Special Compound Liquid Sealer. Available in sizes: 1 oz., 2 oz., 4 oz., 1 pt., 1 pt., 1 gal. Each container is supplied with a brush for easy application of the sealer. 4 oz. of PB-200 will seal approximately 1000 ft.

AB-295 — Standard Track. **AB-395** Loc-Trac® Metal Sliders. 1 supplied free with every 25 feet. Additional sliders may be ordered separately.



Wires are now jacketed.

PVC-105 Polyvinylchloride Plastic Tubing

UL LISTED ASTM D-876, D-9222 MIL-I-6310 TYPE F, FORM U, GRADE C, CLASS 1, CATEGORY 1

DESCRIPTION: The superior mechanical, thermal, and electrical properties of Alpha PVC-105, coupled with its economical cost have led to an ever increasing use of this all-purpose insulating material. Another major advantage of Alpha PVC-105 is its high degree of flexibility, which is maintained even under severe environmental conditions.

Rated for temperatures as high as 105°C, PVC-105 has a high dielectric strength that remains unaffected by increasing temperature throughout its range. PVC-105 maintains a high resistance to the agents of heat, oil, chemical corrosion and fungi with no loss in tensile strength, or flexibility. Other features include an exceptional resistance to abrasion and indefinite shelf life.

Alpha PVC-105 is compounded with first quality, non-migratory resinous type plasticizers. Carefully selected stabilizers and modifiers added in the manufacturing process, counteract chemical and environmental degradation. Under adverse conditions Alpha PVC-105 retains its flexibility which permits it to cling to and protect irregular shapes. An unusually simple to handle insulating material, PVC-105 "snakes" well under all environmental conditions.

APPLICATIONS: Designed and manufactured for general electronic, aircraft and electrical applications involving temperatures as high as 105°C. Especially useful to protect wires and cables subject to abrasion or where a flexible tubing with a high degree of resistivity to oil, chemicals or solvents is necessary.

Cut-Pieces

Pre-cut, ready to use tubing pieces in ½" and 1" lengths are available from stock. Cut pieces are available from stock in packages of 100, 500, 1000 pieces. When ordering specify Alpha number, add suffex CP, length of cut piece, ½" or 1" and quantity (100, 500, 1000).

PVC-80 Extruded Low Temperature Vinyl Tubing

LOW TEMPERATURE VINYL — MIL-I-7444C CLASS I, TYPE I (Clear), TYPE III (Black) −67.8°C TO +80°C

PVC-80 tubing maintains its flexibility and brittleness resistance to −67.8°C. An ideal insulating material where adverse temperatures and weathering conditions prevail. It is easily marked and cut. Has good corrosion resistance and fungus resistant characteristics.

CHARACTERISTICS: Operating temp. −67.8°C to +80°C. Highly flexible. High cut-through resistance. Flame resistant.

APPLICATIONS: All harnessing, component and cable protection where extreme low temperature conditions prevail.

SPECIFICATIONS: Tensile strength 2000 psi. Min. vol. resistivity 10^9 ohmcm. Dielectric constant max. at 1 KC—4.5.

ALPHA WIRE CORPORATION

Teflon Extruded Tubing

DESCRIPTION: Alpha Teflon Tubing is unmatched by any other type of tubing for use in electrical applications at high frequencies and temperatures. Teflon is rated for continuous operation at 250°C, and retains an exceptional toughness and its flexibility throughout its temperature range.

Alpha Teflon Tubing has the further advantage of a high degree of resistance to flexural fatigue and repetitive stresses; coefficient of friction lower than that of any other known solid; and a dielectric constant and power factor lower than that of any other known solid. This tubing will not crack or become brittle during aging.

Because of its resistance to soldering iron temperature, Alpha Teflon Tubing will not shrink back during the soldering process. Alpha Teflon Tubing will not melt and flow as do conventional thermoplastic materials. At high frequencies, its dielectric strength is many times that of other insulating materials.

Alpha Teflon Tubing is chemically inert, has zero moisture absorption and its insulation resistance properties are unaffected by heat aging or temperature use up to 250°C.

APPLICATIONS: A thin flexible insulation, Alpha Teflon tubing permits a miniaturization and compactness of design never before possible. Invaluable in any application where a high heat resistant, flexible, non-flammable, chemical solvent and corrosion-resistant material is required.

ALPHA WIRE CORPORATION

TFT 200-250-300-400 Extruded Teflon Tubing (TFE)

MIL-I-22129C, AMS-3651B, 3655, 3653 — FED. SPEC. P-403A
−65°C TO +260°C OPERATING TEMPERATURE

Alpha Teflon Tubing offers all the unique thermal, electrical and mechanical properties of Teflon. Teflon Tubing is rated for continuous operation at 260°C and retains an exceptional toughness and flexibility throughout its range. At high frequencies, the dielectric strength of Teflon is many times that of other insulating materials. Teflon Tubing is completely inert and has zero moisture absorbtion. Standard wall Teflon (TFT-250) has the same characteristics as thin wall tubing (TFT-200) but is used where higher dielectric values and additional mechanical strength is required.

CHARACTERISTICS: Operating temperature, −65°C to +260°C. High dielectric strength. Chemically inert. Zero moisture absorbtion.

APPLICATIONS: Insulation of components, connectors, all electrical and electronic apparatus requiring high thermal insulation and superior dielectric qualities.

SPECIFICATIONS: Tensile strength 5000-75000 PSI. Completely non-flammable. Min. Vol. Res. 10^{17} Ohm-cm. Ultimate elongation — 300-500%. Dielectric strength — 1400 V/Mil. Dielectric constant — 2.2. Abrasion resistance — fair.

ALPHA WIRE CORPORATION

Lacing Cords and Tapes

MIL-T-713 & MIL-T-43435

TYPES OF LACING CORD

Flat Braided Tape: This tape has been specifically designed to create a wider contact area with the insulation, so that it does not flow away from the contact point. It is more flexible and easier on the user's hands. When knotted it will not slip, and is recommended for all types of harness work.

Round Twisted Cord: This type, while it may be used for plastic and rubber insulated wire, is particularly suited for wire having a secondary insulation or those utilizing a textile as an insulating material.

MATERIALS

Nylon: Synthetic fiber, resistant to: Fungus, flame, acids, abrasion. Excellent tensile strength, lightweight, small size.

Dacron: Retains all the above characteristics of nylon, plus: less elongation, better resistance to acids, no appreciable discoloration.

FINISHES

ge: A synthetic rubber-like resin formulated with a non-mercuric compound which lends the finish fungicidal properties. This finish permits easier handling and better knot retention. This finish has a melting point in excess of 190°F and will soften, but not flow, at 140°F.

mw: A micro-crystalline wax with a melting point above 130°F compounded with a fungicide which does not contain either copper or mercuric materials. Excellent knot retention, yet finish does not have too great a "waxy" feel to the user. MW is soft, pliable, easy to tie and meets Government Spec. MIL-T-713.

am: A thermoplastic synthetic resin with a melting point above 350°F for use where a "wax-free" type is specified. It is non-dusting or flaking, dry finish with good knot tying qualities.

sr: A special continuous coating of fungistatic synthetic rubber containing no corrosive compounding ingredients. Knots tied with this finish will not slip. It is extremely pliable and soft and will not injure the user's hands. This finish will not flake or dust.

Teflon Coated Fiberglass Lacing Tape

A braided flat tape that is easy to handle and will remain securely tied even when subject to shock, vibration and continued handling. Teflon lubricated glass fibers minimize end fray. Operating temperature to 550°F — up to 1,000°F for shorter periods.

CHARACTERISTICS:

Operating temperature −350°F to +550°F. Self-extinguishing. No elongation, creep or tension relaxation. High tensile strength. Resists all chemicals and contaminants.

APPLICATIONS:

For bundling and harnessing wires and cables subject to high temperature environments.

Spiral Wrap Tubing

FOR PERMANENT OR TEMPORARY WIRE AND CABLE HARNESSING AND BUNDLING

AVAILABLE IN FIVE TYPES TO FIT ALL APPLICATIONS

- Easy to Apply
- Meets Military and UL Specifications
- Holds Wire Bundles Securely
- Permits Leadoffs or Tapoffs at Any Point

Wire harnessing, cabling and bundling work is simplified with the use of Alpha's SW Series spiral wrap tubing. SW tubing clings tightly to the wire and cable being bundled, yet is flexible and simple to apply. All types maintain elasticity even when bent around sharp edges or subject to repeated handling.

Breakouts or tapoff connections may be made through the openings of the wrap. SW spiral wrap is constructed from several semi-rigid tubing types and then cut on a continual spiral.

POLYETHYLENE

For general use. Meets Fed. Spec. L-P 390, MIL-I-631D, Type A MIL-P-26692, MIL-E-16400, MIL-P-3803, MIL-E-5400F.

NYLON

Higher temperature to 240°F (121°C). Meets MIL-M-20693A, MIL-17091B.

FLAME-RESISTANT POLYETHYLENE

Self-extinguishing. Meets ASTM D635, UL-70, MIL-E-500F.

TEFLON

Temperatures to 250°C non-flammable. Meets MIL-I-22129C, AMS 3653C.

ULTRA VIOLET RESISTANT POLYETHYLENE

Heavy duty, abrasion resistant. For outdoor use, resists effects of sunlight and weathering.

PIF-150

MIL-I-3190C, GRADE C-1, NEMA TYPE 6, CLASS F INSULATION +155°C

Alpha's PIF-150 sleeving is a Class F (155°C) electrical insulation made of a closely woven fiberglass, thoroughly impregnated, then coated with modified acrylic resins. Extremely tough and flexible, AIF tubing can be knotted, bent or formed into any shape without loss of dielectric.

CHARACTERISTICS: Continuous use at 155°C. Won't blister or flow at 225°C for 15 minutes. Extremely tough and flexible. Compatible with most insulating and encapsulating materials.

APPLICATIONS: Motor leads, transformer leads, insulation over terminations, coils and components.

SPECIFICATIONS: Abrasive resistant, in accordance with MIL-T-5438. Rate of burning, NEMA-VSI-1962 and MIL-I-3190C. Min. volume resistivity, 10^{10} (OHM-cm). Dielectric constant, max. at 1 KC. 2.5 Corona resistance, good. Resistant to oils, acids and alkalis.

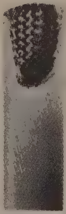
Vinyl Impregnated Fiberglass Sleeving

PIF-130

MIL-I-3190B, CLASS B, GRADE B (130°C)

Woven fiberglass braid impregnated with a heat resistant, extremely tough and flexible plastic insulation. Fiberglass treated to remove all organic matter and resist fraying. Completely compatible with all insulation and conductor types.



CHARACTERISTICS: Resistant to bending, knotting and twisting. Fray resistant. Will not support combustion. High chemical resistance. Simple to "pushback." Fungus resistant.

APPLICATIONS: Motor, generator and transformer leads. Component protection.

SPECIFICATIONS: Max. low temperature flexibility, −20°C. Dielectric strength, 4000 volts. Oil resistant. Tensile strength, 1500 PSI, min. Ultimate elongation, 350%.

Silicone Rubber Coated Fiberglass Sleeving

PIF-200

MIL-I-3190C, MIL-I-8057, NEMA TYPE 5, CLASS H (200°C), GRADE A (800V)

A closely woven (braided) fiberglass, uniformly coated with silicone rubber. Provides extreme flexibility to −85°C and heat protection to 200°C. The fiberglass sleeving material is heat set, cuts clearly and will not fray. PIF-200 is easy to handle and extremely tough with superior physical and electrical properties. Easy to "pushback" and form over components, connections and cables.

CHARACTERISTICS: Highly flexible—without loss of dielectric strength. Abrasive resistant. Flame resistant — meets NEMA and ASTM standards. Superior resistance to weather, fungus, ozone and sunlight. Compatible with all insulating materials.

APPLICATIONS: Insulating electrical connections, motor leads, transformer leads, components and connections in appliances, instruments and all types of electrical apparatus.

SPECIFICATIONS: Heat aging, 1000 hours at 250°C without dielectric change. Maximum brittle point, 70°C. Cut-through resistance, excellent. Insulation resistance, 1,000,000 meg-ohms/ft. Tensile strength, 800-1000 PSI. Dielectric constant, 3.2 maximum at 1 KC.

Braided Fiberglass Sleeving

PIF-240

CLASS C (240°C) INSULATION, NEMA VSI-1962

An extremely flexible, abrasion resistant sleeving, ideal for applications necessitating insulation to operate at 240°C (1200°F). Heat treated to remove all organic matter and to render the glass braid fray-resistant. Completely compatible with all insulation and conductor types.

CHARACTERISTICS: Extreme flexibility. Fray resistant. Flame resistant. Chemical resistant. Fungus resistant.

INSTRUMENTATION CABLES

Instrumentation cable provides the vital communications link between sensing devices and read-out equipment. Because of the many and diverse conditions of environment and stress under which instrumentation cables must transmit information—in usuable form, without distortion or change—cable characteristics should always be carefully matched with the specific requirements of the particular application.

The scientific, medical and industrial uses of instrumentation cable are vast and ever growing. Some of the common uses for instrumentation cable are in the measurement of pressure, speed, resistance and temperature.

Belden manufactures a wide variety of precision instrumentation wire using several types of insulating materials, conductors and shields to meet a wide variety of electrical, physical and thermal requirements.

Many Belden Instrumentation Cables are unique in the field and have been engineered for specific application problems.

	8766•	15	Solid	.013	.045	.540	40	77	100, 500, 1000

22 AWG Tinned copper, vinyl insulated, twisted pairs, each pair and its drain wire under BELDFOIL aluminum-polyester shield, overall chrome vinyl jacket. 300 Volts suggested working voltage.

Insulation resistance between shields. 100 megohms/M' nom.
Capacitance between adjacent shields. . . . . .115 pF/ft nom.
Voltage breakdown between adjacent shields. 1500 volts nom.
Working voltage between adjacent shields. . . .50 volts max.

Underwriters' Laboratories, Inc. Listed (Style 2464)

Vinyl insulation is used for ease of stripping and soldering. Recommended for audio frequency applications requiring excellent circuit isolation.

	9777•	15	18 (16x30)	.016	.070	.830	30	55	500, 1000

Tinned copper, polypropylene insulated, twisted pairs, each pair and its stranded tinned copper drain wire (22 AWG on 22 AWG and 20 AWG series, 20 AWG on 18 AWG series) under BELDFOIL aluminum-polyester shield, overall chrome vinyl jacket. 300 volts suggested working voltage for 22 AWG; 350 volts for 20 AWG; 400 volts for 18 AWG.

Insulation resistance between shields 100 megohms/M' nom.
Capacitance between adjacent shields. . . . . .115 pF/ft nom.
Voltage breakdown between adjacent shields. 1500 volts nom.
Working voltage between adjacent shields. . . .50 volts max.

Recommended for audio, pulse and radio frequency applications requiring superior circuit isolation. Polypropylene insulation is used for excellent high frequency properties and mechanical toughness.

★New Item ☐ **Passes the FR-1 vertical flame test.** *•Belden U.S. Patent 3,032,604.*

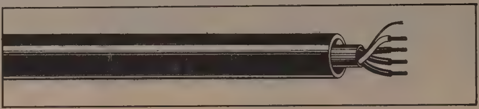
**Capacitance between conductors.* ***Capacitance between 1 conductor and other conductor connected to shield.*

BELDEN

direct burial, audio and data cables
mil-w-16878 shielded cables

DIRECT BURIAL CABLES

Most Belden standard or special cable can be supplied in matching conduit for direct burial installations. This means a lower initial cost than cable and conduit purchased separately, plus it eliminates the expense of pulling cable. Conduit manufactured with black, high molecular weight polyethylene that meets REA and ASTM requirements.



MULTIPLE PAIR INDIVIDUALLY SHIELDED DIRECT BURIAL, AUDIO AND DATA CABLE

Description	Trade Number	No. of Pairs	AWG & (Stranding)	Insulation Thickness (Inch)	Jacket Thickness (Inch)	Nom. O.D. (Inch)	Nom. *Cap. (pF/ft)	Nom. **Cap. (pF/ft)	Standard Spool Lengths in ft

MULTI-CONDUCTOR SHIELDED CABLES

MIL-W-16878-TYPE B SHIELDED CABLES
All of these cables have passed the FR-1 vertical flame test

Suitable for general purpose use in communications and instrumentation applications. Cables have excellent resistance to moisture, weather, ozone, acids, alkali and flame.

Stranded silver coated copper conductors, insulated with Type E extruded TFE TEFLON, color coded, cabled, braided silver plated copper shield, white TFE TEFLON tape wrapped jacket.
MIL-SPEC: MIL-W-16878 Type E
TEMPERATURE RATING: —65°C to 200°C
VOLTAGE: 600 Volts (RMS)

Manufactured to Current Government Specifications and Subsequent Revisions. ☐ **Passes the FR-1 vertical flame test.**

*Capacitance between conductors. **Capacitance between one conductor and other conductors connected to shield.

Tinned copper, 8751 and 9753 vinyl insulated, 8752 polypropylene insulated, twisted pairs, BELDFOIL aluminum-polyester shield overall, 22 AWG (7x30) stranded drain wire, chrome vinyl jacket. 200 Volts suggested working voltage.

For color coding information on 8751 and 8752 write for Technical Data Bulletin T/8-4.
For color coding information on 9753 write for Technical Data Bulletin T/8-22.

SPECIAL DATA, INSTRUMENTATION AND COMPUTER CABLES

These cables are intended for those applications with special requirements such as miniature size, low capacitance for minimum signal distortion or good electrical characteristics. They are recommended for both analog and digital systems. Special cable designs are available to satisfy unique physical and electrical requirements.

	Trade Number	No. of Cond.	AWG & (Stranding)	Insulation Thickness (Inch)	Jacket Thickness (Inch)	Nom. O.D. (Inch)	Cond. Color Coding	Percent Shield Coverage	Nom. *Cap. (pF/ft)	Nom. **Cap. (pF/ft)	Suggested Working Voltage	Standard Spool Lengths in ft

Solid copper, GEOSOL™ insulated (solderable—no stripping required), conductors cabled, 3 conductor group shielded from 2 conductor group (Patent No. 3,291,891), overall BELDFOIL aluminum-polyester shield, white vinyl jacket. **105°C maximum operating temperature.**

This miniature 5 conductor cable which consists of a shielded pair and a shielded triplet is ideal for use in instrumentation work where miniaturization is required. The patented construction offers circuit isolation between groups as well as overall shielding from external noise sources making it adaptable to low level signal circuits.

unshielded paired sound and control cables

MULTIPLE PAIR UNSHIELDED SOUND AND CONTROL CABLES

All of these cables have passed the FR-1 vertical flame test.

TYPICAL APPLICATION: Balanced line sound systems.
Made with 80°C vinyl plastic compounds for high dielectric strength and the best physical properties, such as free stripping, small diameter and tear resistance. It also resists the effects of water, sun, oil, grease and ozone. The conductors are paired with a short-lay twist for conductor balance, providing a quiet circuit, free from cross talk.

ELECTRICAL POWER AND CONTROL CABLES—MIL-C-3432

Electrical power and control cables intended for use in electrical and electronic applications. These cables are intended for military applications to transmit power and control signals. These medium duty cables are suitable for small portable tools, sound equipment, radio receivers and motor leads. The tough flexible jacket is resistant to the mechanical abuse and extreme humidity and temperature conditions normally encountered in the intended applications.

microphone and shielded power supply cables

MICROPHONE CABLES

Belden Microphone Cables are designed for flexible service at audio frequencies. They are used not only for microphones, but also for home entertainment equipment, instruments, tape recorders and shielded power supplies.

Shielded single conductor cables are used in high impedance systems, while multiple conductor cables are used in low impedance applications.

All cables are precision-engineered and manufactured to transmit clear signals and to cancel out hum pick-up and crosstalk interference. They are designed to withstand the flexing and normal abuse of studio, laboratory and home usage.

CONDUCTOR COLOR CODING: (1) Clear, (2) Black, (3) Red, (4) Green, (5) Blue ■*Trademark of DuPont.*

▨ **Passes the FR-1 vertical flame test.**

PLASTIC CABLES RECOMMENDED FOR: Lower capacitance, lower loss, greater ozone and oil resistance, lighter weight, smaller diameter.
RUBBER CABLES RECOMMENDED FOR: Greater abrasion and impact resistance and extra limpness so cable will lie flat on stage or studio floor.
NEOPRENE AND HYPALON CABLES RECOMMENDED FOR: Outside use, cold weather applications. Resistant to effects of sun, oil and ozone.

*Capacitance between conductors. **Capacitance between 1 conductor and remaining conductors (if any) connected to shield.

retractile cables and cords

BELDEN

RETRACTILE CORDS

Retractile cords keep telephone and microphone cables from tangling and cluttering desk tops, communications consoles and the front seats of motor vehicles. Belden manufactures a full line of high quality retractile coiled cord products for a wide number of applications.

Belden retractile cables and cords are used for telephone equipment; ham and citizen band radios; hand and desktop microphones; language lab equipment; musical instruments; mobile controls and mobile communications equipment and for a variety of assorted industrial applications.

The specially designed conductors and shields of Belden retractile cords are constructed to withstand rugged use and to minimize replacement frequency.

Belden's full line of rectractile cords shown in this catalog will meet most of your requirements. For any custom or unusual cord and cable application contact Belden's Special Custom Design Center

	9442	4	31 (Tinsel)	.010	.031	.195	¾	48	25	1,15

Tinsel conductors, vinyl insulated, vinyl jacket. One end stripped 7", spade terminals attached and hook strain relief clamped over jacket. Other end has red and black conductors pulled out of jacket and cut to 3" length, spade terminals attached, molded plastic strain relief, 6¾" jacket remains on 2 white conductors, spade terminals attached.

Jacket colors available in black, light beige or white.

75 OHM PRECISION VIDEO CABLES

The 9231 is a precision 75 ohm Video cable manufactured with rigid control of concentricity and all dimensional tolerances offering superior return loss characteristics; a quality Video transmission cable which provides exceptional picture definition and eliminates problems resulting from periodicity. It has a non-contaminating vinyl jacket for more flexibility. The double braid 8281 75 ohm Video cable is made to tight tolerances for excellent return loss performance. Our 8279, miniature 75 ohm Video cable is for applications where space is critical. The gray vinyl and black polyethylene jackets are made of non-contaminating, non-migratory compounds.

Typical Application: Video signal transmission in Color and Monochrome TV studios.

100% SWEEP TESTED

high temperature wire and cable

TEFLON

TEFLON is a fluorinated thermoplastic with outstanding thermal, physical and electrical properties. However, the basic resin and the processing costs are relatively high, therefore, TEFLON is generally restricted to applications requiring its special characteristics.

Belden TEFLON wire products are highly recommended for miniature cable applications, because of their superior thermal and electrical properties. TEFLON is especially suitable for internal wiring—soldering applications where insulation melt back is a specific problem. Belden wiring products, insulated with TEFLON are outstanding in their resistance to oil, oxidation, heat, sunlight, flame and their ability to remain flexible at low temperatures. They all have excellent resistance to ozone, water, alcohol, gasoline, acids, alkalis, aromatic hydrocarbons and solvents.

TYPE E—MIL-W-16878 TEFLON—600V—200°C HOOK-UP WIRE

All Of These Hook-Up Wires Have Passed The FR-1 Vertical Flame Test.

Rated 2500V peak for electronic circuits.

MIL-W-16878 HOOK-UP WIRE

Covers insulated wire for the internal wiring of meters, panels and electrical or electronic equipment at temperatures ranging from 105°C to 200°C. The many types available in different voltages and thermal ratings are listed on the following pages to meet your individual requirements. For 200°C wire and cable, see Belden pages 8 & 23. Multi-conductor Mil-Spec cables can be found on pages 7, 8 & 14.

TYPE B—MIL-W-16878—VINYL—600V-105°C

All of these hook-up wires have passed the FR-1 vertical flame test.

Description	Trade Number	Type Designation	AWG & (Stranding)	Insulation Thickness (Inch)	Nom. O.D. (Inch)	Stock Colors on Standard Spools

▨ **Passes the FR-1 vertical flame test.**

Manufactured to current Government specifications and subsequent revisions.

THREE CONDUCTOR POWER SUPPLY CORDS

TYPE SJO NEOPRENE (RETRACTILE)

CONVENIENCE AND SAFETY. Dangling cords can be messy, troublesome and unsafe. Retractile cords stay neat, allow free movement of the appliance or tool, and prevent accidents. Rubber insulation and neoprene jackets retain full retracting memory through thousands of stretching cycles.

Tan Flag Label.

Certified to C.S.A. Standards

NEMA 5-15P

MOLDED VINYL GROUNDING PLUG PH-185

OUTER JACKET STRIPPED 1½", CONDUCTORS STRIPPED ½" AND TINNED

Trade Number	Retracted Length (inches)	Practical Extended Lgth. (ft.)	AWG (Stranding)	Nom. O.D. (inches)	Rating	Type of Cordage	Color
17447	12	6	18 (41x34)	.360	1250 Watts 10A-125V	SJO Neoprene	Black

NEMA 5-15P

MOLDED VINYL GROUNDING PLUG PH-173

OUTER JACKET STRIPPED 1½", CONDUCTORS STRIPPED ½" AND TINNED

Trade Number	Retracted Length (inches)	Practical Extended Lgth. (ft.)	AWG (Stranding)	Nom. O.D. (inches)	Rating	Type of Cordage	Color
17448	12	6	16 (65x34)	.370	1625 Watts 13A-125V	SJO Neoprene	Black

THREE CONDUCTOR BUSINESS MACHINE CORD AND RECEPTACLE

Information and Application

TYPE SVT VINYL

For use on U.S. and Canadian electronic instruments, business machines, test equipment, desk top computers and appliances. Federal Stock No. FSN-6150-351-3405. Connector mates with 17252 or Switchcraft EAC-301

Blue Flag Label   Certified to C.S.A. Standards

★17252 RECESSED POWER RECEPTACLE

The recessed power receptacle mates with the 17250 cord set. May be used for equipment for use in the U.S., Canada and European countries. Rating: 250V, 6 AMPS.

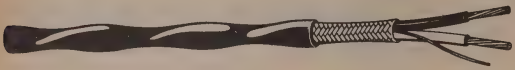
SHIELDED AUDIO CABLE

BRAID SHIELD, PVC JACKET, DRAIN WIRE



Stock Color: Black jacket.

Construction: Tinned copper conductors, color-coded PVC insulation, conductors cabled, tinned copper braid shield, tinned copper drain wire, PVC jacket overall.

Specifications: −20°C to +60°C. Passes FR-1 vertical flame test.

Color Code: Black, Red.

Applications: Shielded cable for recording studios, radio transmitters, sound systems, broadcast use.

Put-up: 100′, 500′ and 1000′ spools (other Put-ups also available).

Columbia No.	No. of Cond.	Size AWG	Stranding	Nom. Insul. Thck.	Nom. Jkt. Thck.	Nom. O.D. In.

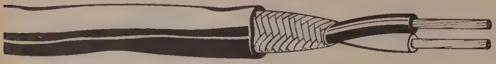
BRAID SHIELD, PVC JACKET



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded PVC insulation, conductors cabled, tinned copper braid shield, PVC jacket overall.

Specifications: −20°C to +60°C. Passes FR-1 vertical flame test.

Color Code: Black, Red, White, Green.

Applications: Shielded cable for recording studios, radio transmitters, sound systems and electronic circuits where shielding is required.

Put-up: 100′, 500′ and 1000′ spools (other Put-ups also available).

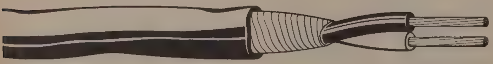
SPIRAL SHIELD, PVC JACKET



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded PVC insulation, conductors cabled, tinned copper spiral wrapped shield, PVC jacket overall.

SPIRAL SHIELD, PVC JACKET (CONT'D)

Specifications: −20°C to +60°C. Passes FR-1 vertical flame test.

Color Code: Black, Red, White, Green, Yellow, Blue.

Applications: Cable for recording studios, radio transmitters, sound systems and electronic circuits where shielding is required. Spiral shield allows ease of pigtail soldering.

Put-up: 100′, 500′ and 1000′ spools (other Put-ups also available).

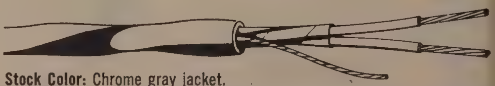
MYLAR/ALUMINUM FOIL SHIELDED AUDIO CABLE



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded polyethylene insulation, conductors cabled, wrapped with Flexfoil® mylar supported aluminum foil shield with foil facing to outside, stranded tinned copper drain wire, PVC jacket overall.

Specifications: −20°C to +60°C. Jacket only passes FR-1 vertical flame test.

Color Code: Black, Clear, Red, Green.

Applications: 100% shielded cable for recording studios, broadcast sound systems and electronic circuits where RF shielding is required.

Put-up: 100′, 500′ and 1000′ spools (other Put-ups also available).

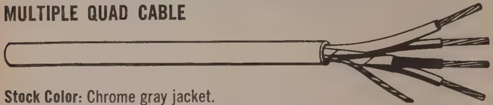
SHIELDED INSTRUMENTATION/COMMUNICATION MULTIPLE QUAD CABLE



Stock Color: Chrome gray jacket.
Construction: Tinned copper conductors. Cat. No. 1340 color-coded polypropylene insulation. Cat. No. 1331 color coded PVC insulation. Cat. No. 1343 color coded polyethylene insulation. Flexfoil® aluminum foil/polyester shield (foil facing to outside) over 2 conductors, stranded tinned copper drain wire (Cat. No. 1340 - 24 gauge, Cat. No. 1331 and 1343 - 22 gauge), one shielded pair and 2 singles cabled on common axis to reduce O.D., PVC jacket overall.
Specifications: −20°C to +60°C. Suggested working voltage: Cat. No. 1340 — 200V, Cat. No. 1331 and 1343 — 350V, Cat. No. 1331 entire cable passes FR-1, Cat. Nos. 1340 and 1343 jacket only passes FR-1.
Color Code: Shielded – Black Red; Unshielded – Green White.
Applications: Special cable for audio, communications and instrumentation use.
Put-up: 100′, 250′, 500′ and 1000′ spools (other Put-ups also available).

INDIVIDUALLY SHIELDED MULTIPLE PAIR AUDIO/DATA CABLE

Stock Color: Chrome gray jacket.
Construction: Tinned copper conductors, color-coded polypropylene insulation, cabled in pairs, each pair and its drain wire under Flexfoil® aluminum foil/polyester shield, PVC jacket overall.
Jacket: +60°C. Conductors: +105°C. Suggested working voltage: 22 gauge — 300V; 20 gauge — 350V: 18 gauge — 400V. 100 Megohms/M insulation resistance between shields. 115PF/FT. capacitance between adjacent shields. 1500V voltage breakdowns between adjacent shields. 50V working voltage between adjacent shields. 22 gauge and 20 gauge series — 22 gauge drain wire; 18 gauge series — 20 gauge drain wire. JACKET ONLY PASSES FR-1 VERTICAL FLAME TEST.
Color Code: Chart II Page 2•1915
Applications: For audio RF and pulse applications requiring superior circuit isolation. The use of polypropylene insulation results in excellent high frequency properties and mechanical durability.
Put-up: 100′, 500′ and 1000′ spools.**

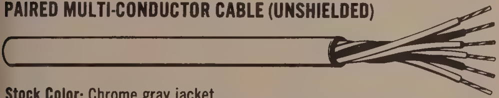
PAIRED MULTI-CONDUCTOR CABLE (UNSHIELDED)



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded PVC insulation, conductors paired with a short lay twist for conductor balance providing a circuit free from cross talk, pairs cabled, PVC jacket overall.

Specifications: —20°C to +60°C. Passes FR-1 vertical flame test.

Color Code: consult factory.

Applications: Heavy-duty intercom and audio cable for intercom systems, signal systems, annunciators, nurse's call systems, multiple speaker systems, control circuit cables.

Put-up: 100′, 500′ and 1000′ spools.**

DUAL CHANNEL AUDIO CABLE SHIELDED

PVC JACKET

Stock Color: Chrome gray jacket.

Applications: Each conductor 3 strands tinned copper, 4 strands tinned copperweld, color-coded polyethylene insulation over each conductor, each conductor individually shielded with tinned copper spiral shield, conductors laid parallel, PVC jacket overall, red conductor ridged for polarity identification.

Specifications: —20°C to +60°C.

Construction: Dual channel audio cable for language laboratories, audio laboratories and head sets. Rip-type construction for easy separation of conductors when split apart.

Put-up: 100′, 250′ and 500′ spools. (Other put-ups also available.)

Cat. No.	No. of Cond.	Cond. Size	Cond. Strand.	Nom. Insul. Thck. (In.)	Nom. Jkt. Thck. (In.)	Nom. O.D. (In.)	Nom. Cap.* PF/Ft.
01375	2	25	7/33	.020	.020	.110 x .220	35 each channel

*Capacitance between conductor and shield.
This cable also available with aluminum foil Mylar (and individual drain wires) in lieu of spiral shield.

2	Red

COLUMBIA ELECTRONIC CABLES • • 11 Cove St., New Bedford, Mass. 02744 • Phone: 617-999-4455 • TLX: 92-9411

TWO-CONDUCTOR MICROPHONE CABLE

SPIRAL SHIELD

Stock Color: Silver gray jacket.

Construction: Tinned copper conductors, color-coded polyethylene insulation, cabled with fillers, textile wrap, spiral tinned copper shield, high gloss Flexlife® jacket.

Specifications: −20°C to +60°C.

Color Code: White, Black.

Applications: For use with low impedance microphones. Flexlife jacket provides extreme flexibility, high abrasion resistance and outstanding appearance.

Put-up: 100′, 250′, 500′ and 1000′spools (other Put-ups also available).

Columbia No.	Impedance	AWG (Stranding)	Nom. Insul. Thick. In.	Jkt.Thick. In.	Nom. O.D. In.
1323	Low	22 (16/34)	.025	.025	.225
1328	Min. Low	24 (10/34)	.016	.030	.190

BRAIDED SHIELD

Stock Color: Silver gray jacket.

Construction: Tinned copper conductors, color-coded polyethylene insulation, cabled with fillers, textile wrap, braided tinned copper shield, high gloss Flexlife jacket.

Specifications: −20°C to +60°C.

Color Code: White, Black.

Applications: For use with low impedance microphones. Flexlife jacket provides extreme flexibility, high abrasion resistance and outstanding appearance.

Put-up: 100′, 250′, 500′ and 1000′spools (other Put-ups also available).

Columbia No.	Impedance	AWG (Stranding)	Nom. Insul. Thick. In.	Jkt. Thick. In.	Nom. O.D. In.
1322	Low	22 (16/34)	.025	.025	.235

ONE-CONDUCTOR MICROPHONE CABLE

SPIRAL SHIELD

Stock Color: Silver gray jacket. (Cat. No. 01359 available in black jacket.)

Construction: Single conductor 3/33 strands tinned copper, 4/33 strands tinned copperweld, white foam polyethylene dielectric, spiral tinned copper shield, high gloss Flexlife® jacket.

Specifications: −20°C to +60°C.

Applications: For use with high impedance microphones and hi-fi interconnecting cables. Flexfoam dielectric (foam polyethylene) provides as much as 35% lower capacitance than the best standard solid polyethylene dielectric microphone cables. Flexfoam cables are the most flexible plastic microphone cable available, with limpness almost equal to rubber and with better abrasion resistance.

Put-up: 100′, 250′, 500′ and 1000′spools (other Put-ups also available).

Columbia No.	Microphone Type	Thick. In. Insulation	Thick. In. Jacket	Nom. Cap. MMF/Ft.	Nom. O.D. In.

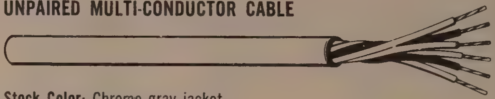
1395	Crystal	.075	.030	11	.245
1314*	Crystal	.040	.020	25	.155

* Solid polyethylene dielectric.

UNPAIRED MULTI-CONDUCTOR CABLE



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors (Cat. Nos. 02754 and 02755 are bare copper), color-coded PVC insulation, PVC jacket overall, conductors cabled.

Specifications: −20°C to +60°C. All items pass FR-1 vertical flame test.

Color Code: Chart III.

Applications: PA systems, unbalanced intercom systems, interconnecting cables, remote control circuits, telephones, low-voltage relay control cables.

Put-up: 100′, 500′ and 1000′ spools (other Put-ups also available).

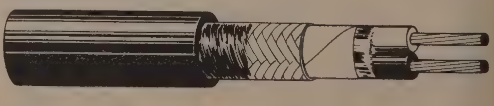
SHIELDED CONTROL CABLE



Stock Color: Black jacket.

Construction: Tinned copper conductors, color-coded rubber insulation, cabled, filled where required, clear mylar wrap, tinned copper braided shield, cotton wrap, neoprene jacket or rubber jacket.

Specifications: −20°C to +60°C. Suggested working voltage 350V.

SHIELDED CONTROL CABLE (CONT'D)

Color Code: Chart IV.

Applications: Control circuits, video and audio interconnecting cables, broadcast and studio use. Precision engineered to prevent cross-talk and eliminate hum pick-up. Neoprene and rubber jackets are resistant to impact and abrasion and have extra limpness. For outside installations, neoprene is recommended being resistant to oil, ozone, moisture and sunlight.

Put-up: 100′, 500′ and 1000′ spools (other Put-ups also available).

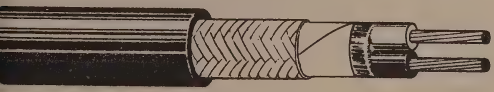
OLYETHYLENE INSULATION AND PVC JACKET



tock Color: Chrome gray jacket.

onstruction: Tinned copper conductors, color-coded polyethylene insulation, cabled, filled where required, clear mylar wrap, tinned copper braid shield, PVC jacket overall.

pecifications: −20°C to +60°C. Suggested working voltage 600V. Jacket only passes FR-1 vertical flame test.

olor Code: Chart IV.

pplications: Low capacity cable for control circuits, video and audio interconnecting cables, broadcast and studio use. Precision engineered to prevent cross-talk and eliminate hum pick-up. Low capacitance, light weight.

ut-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

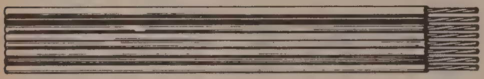
CONTROL CABLE MULTI-CONDUCTOR FLAT RIBBON
PVC INSULATION



Stock Color: See table below.
Construction: Tinned copper conductors, color-coded PVC insulation per MIL-W-16878 Type C, conductors bonded to form flat ribbon cable.
Specifications: −55°C to +105°C. Suggested working voltage 1000V.
Applications: Circuit connections, interconnecting assemblies; wiring harnesses for sliding drawers, drop panels and racks. Reduces installation time, space and weight. Conductors easily separated for termination. Resistant to oil, flame, acids, moisture, fungus and solvents. Contact factory for custom designed ribbon cables consisting of different gauge sizes and number of conductors.
Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

UL HOOK UP WIRE STYLE 1015, CSA TYPE TEW

Stock Colors: See table below.
Construction: Tinned copper conductor, color-coded PVC insulation.
Specifications: —40°C to +105°C, 600V. Resistant to acids, oil, alkalis, flame, moisture and fungus.
Color Code: Chart VI.
Applications: Internal wiring of electronic and electrical equipment.
Put-up: 100′ and 1000′ spools (other Put-ups also available).

RUBBER TEST LEAD WIRE

Stock Colors: See table below.
Stock Color: Black or Red. (Other colors available on special order.)
Construction: Extra flexible stranded tinned soft annealed copper conductor, color-coded rubber insulation.
Specifications: —20°C to +60°C. All breakdown voltages and suggested working voltages are AC RMS values.
Applications: Test lead wire for use in multimeters, analyzers, oscillators and other applications requiring extra flexible insulated wire.
Put-up: 250′, 500′ and 1000′ spools (other Put-ups also available).

Columbia No.	Color*	AWG (Stranding)	Nom. Insul. Thick. In.	Sug. Working Voltage	Nom. O.D. In.

* Available in red or black; please specify.

PLASTIC TEST LEAD WIRE

Stock Color: Black or red. (Other colors available on special order.)
Construction: Extra flexible stranded tinned soft annealed copper conductor, color-coded extra flexible, high gloss Flexlife® plastic insulation.
Specifications: —20°C to +60°C, 5000V. Insulation resistant to acids, oil, alkalis, flame, moisture and fungus. All breakdown voltages and suggested working are AC RMS values.

PLASTIC TEST LEAD WIRE (CONT'D)

Applications: Test lead wire for use in multimeters, analyzers, oscillators, and other applications requiring extra flexible insulated wire. Flexlife plastic insulation is durable and has a high-gloss finish.

Put-up: 250′ and 500′ spools (other Put-ups also available).

Columbia No.	Color*	AWG (Stranding)	Nom. Insul. Thick. In.	Sug. Working Voltage	Nom. O.D. In.

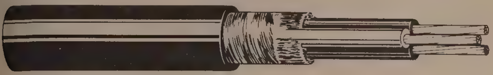
PORTABLE SERVICE AND POWER CORD



Copper: Bare soft annealed. Stranding per ASTM-B-174 and ASTM-B-173.

Insulation of inner conductors: Synthetic Rubber (SBR) per IPCEA Pub. No. S-19-81 (4th Edition) Part 3.7.1 (SBR); N.E.M.A. Publication No. WC-3-1964; and UL Subject 62, Class 3.

Temperature Range: 60°C (140°F) to −37°C (−35°F).

Color Code Conductors: 2 conductor — Black, White; 3 conductor — Black, White, Green; 4 conductor — Black, White, Green, Red.

Foundation: Conductors twisted together with fillers to make a round core: separator over core.

Neoprene Jacket: Black Neoprene: 60°C (140°F to −37°C (−35°F) per IPCEA Pub. No. S-19-81 (4th Edition) Part 7.7.5.1; NEMA Pub. No. WC-3-1964; ASTM D-752; and UL Subject 62, Class 15.

Rubber Jacket: Black Synthetic Rubber (SBR) 60°C (140°F) to −37°C (−35°F) per IPCEA Pub. No. S-19-81 (4th Edition) Part 7.7.5.1; NEMA Pub. No. WC-3-1964; and UL Subject 62, Class 6.

Jacket Marking: All sizes surface printed* showing gauge, number of conductors, voltage and type.

Neoprene Use: For heavy (SO) and light (SJO) service such as tools, power extensions, motor and welding leads, portable machinery, floor polishers and sanders, battery chargers, portable stage light, garage portable lights, sound equipment, washing machines, refrigerators, sewing machines, and other electrical equipment. Type SVO — for vacuum cleaners, home food mixers, office equipment, and other light duty requirements.

Rubber Use: For heavy (S) and light (SJ) service such as tools, power extensions, motor and welding leads, portable machinery, floor polishers and sanders, battery chargers, portable stage lights, garage portable lights, sound equipment, washing machines, refrigerators, sewing machines, and other electrical equipment. Type SV — For vacuum cleaners, home food mixers, office equipment, and other light duty requirements.

Neoprene Environment: For use in areas where exposed to oil, ozone, grease, chemicals or solvents.

Rubber Environment: Useful cord life is reduced where exposed to oil, ozone, grease, chemicals or solvents. Cords to be used in such environments are Neoprene SO.

PLASTIC JACKET CONSTRUCTION

Copper: Bare soft drawn annealed, Class K stranding per ASTM-B-174 and ASTM-B-173.

Insulation: Polyvinyl chloride, resistant to oils, water, acids, alkalies and ozone. 60°C — UL Class II. Black, gray and white SVT.

Temperature Range: 60°C (140°F) to −20°C (−4°F).

Color Code Conductors: 2 conductor — black, white.
3 conductor — black, white, green.

Foundation: Conductors twisted together with fillers to make a round core; separator over core.

Jacket: 60°C. Black, gray or white (SVT) or black (SJT) UL Class II, non marking 60°C (140°F) to −20°C (−4°F) polyvinyl chloride, resistant to oil, water, acid, alkali, ozone and abrasion. Jacket meets specifications per ASTM-D-1047. SVT jacket ribbed to help cord remain clean.

FOR EVERY ELECTRONIC NEED...
CONSOLIDATED
OFFERS THE PROPER WIRE OR CABLE

CYPRUS HOOK-UP WIRES

Thermoplastic insulated electronic wires approved to 105°C ratings.

CYPRUS TYPE CT-B

Meeting IPCEA-NEMA Standards for use on both AC and DC circuits.

CYPRUS INSTRUMENTATION CABLES

Specifically designed to transmit low pulse signals for a variety of electronic applications.

High quality wires, manufactured by Cyprus Wire & Cable Company, Rome, New York, represent the highest quality in electronic wiring applications. Manufactured under the strictest quality control checks by the best craftsmen in the industry, these products are your assurance of consistently dependable performance. The quality of the products from Cyprus has established them as one of the leading manufacturers of all major electronic applications.

Consolidated will serve your every electronic need. Our distribution center is stocked with a large variety of wire constructions—and we can meet your special specifications, too.

We welcome your inquiry and assure you that our highly trained staff will carefully study your particular needs. If you have a request for a special construction, call on Consolidated. Specify Cyprus... it assures you of unfailing performance.

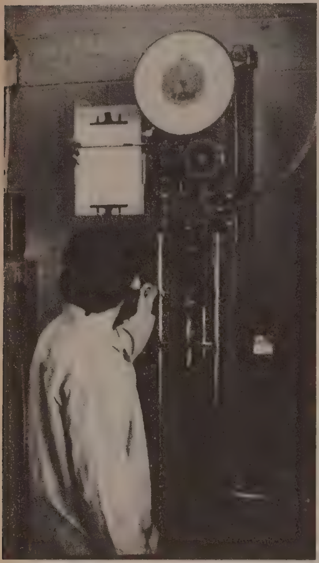
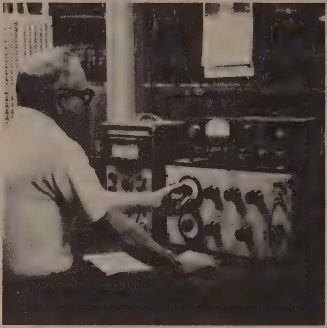
RESEARCH AND DEVELOPMENT...



Research and Development, along with constant quality control checks on the physical, electrical and dimensional characteristics of wire and cable, gives assurance of a consistently reliable product.



This infra-red spectrophotometer characterizes organic materials used in the manufacture of wire and cable by measuring the radiation absorbed at various wave lengths.

At Cyprus Wire & Cable Company, research and development is a day-in, day-out program, assuring you of a thoroughly developed, uniformly high-quality product.

Consolidated's recognized reputation for high-quality merchandise and its own engineering and testing facilities are supported by the modern research and development laboratories at Cyprus' R&D Center. Here metallurgists, electrical engineers, chemists and scientists of many disciplines combine their talents to develop better products for you.

The never-ending search for new and better materials for Consolidated Wire products is a way of life at Cyprus' R&D Laboratories. This is where the quality control we're so proud of begins.

Supporting this program of research and development at the laboratory level, every foot of wire that leaves the plant must pass rigid inspections. These products meet or exceed all relevant Underwriters Laboratories, IPCEA, NEMA and other standards.

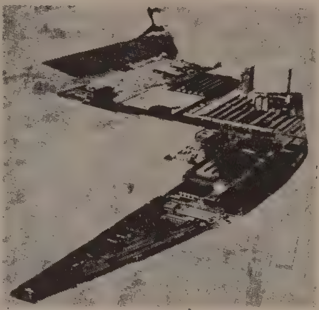
CONSOLIDATED

PRODUCTION...

Production by modern wire producing and processing facilities guarantees you a dependable source of supply.

The latest plastic insulating materials, tested in the Cyprus labs, are integrated into the manufacturing facilities to insure Consolidated's customers of the most modern materials for the finished product. As new materials and techniques are developed, they are integrated into the line. The Cyprus/Consolidated coalition represents years of experience and know-how in wire and cable manufacture.

Cyprus Wire & Cable facilities comprise all the necessary equipment for the processing of wire from refined copper bar rod and aluminum to a variety of finished products. Consolidated's own enviable position of providing superior service is strengthened by the facilities of Cyprus Wire & Cable. Here is a plant that never stands still. As newer and more sophisticated equipment and manufacturing methods are developed, Cyprus modernizes. Modernization and expansion programs for Cyprus' facilities, mean that you can count on prompt and reliable service from Consolidated.



Here's the more than 236 acres of Cyprus Rome plant, research laboratories and executive offices in Rome, New York.

Metallurgical microscope gives visual analysis and permits photo micrography of the crystalline structure of electrical conductor and other metal samples used in the manufacture of wire and cable.

A Brabender Plasti-Carder and a laboratory extruder in Research and Development assure that the best possible extrusion techniques are employed resulting in the manufacture of a superior product.

Underwriter's Laboratories, Inc. Listed — Equal to MIL-W-16878 Type "B".

YNAR INSULATED HOOKUP WIRE FOR WIRE WRAP APPLICATIONS

Especially suited for computer, business machine usage and other areas where space is limited. (For automatic point to point application.)

The conductor is OFHC (Oxygen Free High Conductivity) Annealed Copper, Silver Plated.

The insulation is Kynar, a Vinylidene Fluoride Plastic with unique characteristics.

Mechanically Tough; Operating Temperature Up to 125°C Continuous, Assigned U.L. Rating 105°C.

Catalog Number	AWG Size	Stranding	Insul. Thick. (Inch)	Nom. O.D. (Inch)	U.L. Style

SHIELDED TEFLON CABLES — MIL-W-16878

Each conductor stranded silver plated copper Type E extruded Teflon .010" insulation — 90% braided silver copper shield, also supplied with either a Teflon impregnated Fiberglass braid or Teflon fused tape overall jacket.

Temperature rating −65°C to +260°C. Voltage rating 600 volts.

TELEPHONE AND COMMUNICATION CABLE

AERIAL AND DUCT INSTALLATION — MEETS REA-PE-22

DESCRIPTION: Each conductor bare solid copper, color coded polyethylene insulation, insulated conductors paired, pairs cabled with non-hygroscopic tape wrap, .008″ corrugated aluminum shield, black polyethylene jacket overall.

CHARACTERISTICS: Average mutual capacitance — .083 microfarads/mile. Minimal cross talk.

APPLICATIONS: A tough, long lasting communication cable that can withstand moisture, ultra-violet and weathering.

DIRECT BURIAL INSTALLATION — MEETS REA-PE-23

DESCRIPTION: Each conductor bare solid copper, color coded polyethylene insulation, insulated conductors paired, pairs cabled with non-tygroscopic tape wrap, polyethylene inner jacket, .005″ corrugated copper, or .010″ corrugated aluminum shield, black polyethylene jacket overall.

CHARACTERISTICS: Average mutual capacitance .166 microfarads/mile. Minimal cross talk.

APPLICATIONS: Impervious to moisture, abrasion resistant, suitable for direct burial.

TELEMETERING AND DATA SHIELDED CONTROL CABLE

DESCRIPTION: Each conductor bare solid copper, high molecular weight polyethylene insulation, color coded, twisted into pairs, cabled with a non-hygroscopic binder tape .008″ aluminum shield, black polyethylene jacket overall. Operating voltage 300 volts.

Double jacketed types (8306-8420 below), same except for additional inner black polyethylene jacket over binder, and .005″ copper shield, or .010″ aluminum shield.

APPLICATIONS: Remote control of rocket recording data and test-firing control, transmission of signals which telemeter temperature, voltage pressure, etc. control of multiple circuits, measuring devices, quality control equipment, radar antenna. For aerial, duct and conduit installations.

Double jacketed types have higher dielectric strength and suited for direct burial installations.

Inner conductor: [1+0.00218 (t-68)]
Outer conductor: [1+0.00224 (t-68)]

SWEEP TESTING — STRUCTURAL UNIFORMITY

Each length of Consolidated Unifoam CATV cable is checked for structural uniformity over the frequency range of 5 - 220 MHz. This includes the 88 - 105 MHz FM band and the 105 - 174 MHz band, as well as all 12 VHF TV channels. Factory acceptance standards require that each length of cable have a Structural Return Loss (SRL) at least 28 db. down at any frequency within this range. The 28 db. value is not subject to any frequency weighting factors.

Consolidated Unifoam CATV cable

Inner Conductor: High purity (99.9% minimum) soft, uncoated copper

Dielectric: Cellular polyethylene

Outer Conductor (sheath): High purity (99.6% minimum) seamless aluminum

Jacket (when specified): Black, high molecular weight polyethylene

CYPRUS CONTROL CABLES TYPES CT-B and CT-C

TYPES CT-B/CT-C

Meeting IPCEA-NEMA standards for use on both AC and DC circuits, these control cables are designed to handle a wide range of applications. Lighter in weight, smaller in diameter and more flexible than conventional rubber insulated multi-conductors cables, Cyprus CT Thermoplastic insulated control cables are easy to handle, store and install.

Cyprus/Rome CT control cables are available with various types of copper, bronze or copper clad stainless shielding to provide electrostatic or electromagnetic protection. Shielding also provides added physical protection and acts as a positive deterrent against rodent or insect attack.

Synthinol (polyvinylchloride) is used for jacketing individual conductors as well as for an over-all jacket. Synthinol provides added resistance to heat and to chemical and corrosive attack. It also provides mechanical protection and is a flame retardant barrier for the cable insulation.

600 volt rated Type CT-B cables are primarily for use in general applications, while 1000 volt rated Type CT-C cables are more frequently used in connection with heavy magnetic trip devices, where induced over-voltages may occur.

Both CT-B and CT-C are made with bare stranded copper conductors, individually insulated and fully color-coded. These cables are suitable for all types of installations — aerial, conduit, duct, tray, direct burial — in wet or dry locations.

USES:

In power generating stations and substations as wel as throughout industry in both manufacturing and processing plants.

RATINGS:

For AC and DC circuits. Type CT-B is rated 600 volts. Type CT-C, 1000 volts. Both are recommended for operation at 90°C. maximum continuous conductor temperature.

INSULATION:

Polyethylene insulation is used on individual conductors since it has proven superior to many other dielectric materials used on solid insulated cables. This material is particularly well suited for DC circuits in moist locations where electro-osmosis may be a problem.

Along with its important outstanding electrical properties, polyethylene also resists acids, alkalies and oils. It is thus capable of standing up well under many hazardous environmental conditions.

UNSHIELDED STATION CONTROL CABLE

HEAVY DUTY MULTI-CONDUCTOR PLASTIC JACKET — TYPE CT-B CONTROL CABLE — 600 VOLTS

DESCRIPTION: Each conductor, stranded bare copper, .020″ polyethylene insulation, .010″ polyvinylchloride jacket over each conductor, color coded, cabled with fillers where necessary, moisture resistant tape, black polyvinylchloride jacket overall. 600 volt operating voltage. Approved per IPCEA-NEMA standards.

SHIELDED AND UNSHIELDED—"CONCO-FOAM"
(Low Loss Foam Polyethylene All Channel Color TV Cable)

Conco-Foam assures excellent VHF, UHF, Color and B/W TV reception in uncongested and fringe regions. Will provide far greater signal than any other unshielded twin lead cable. Assures highest efficiency even when exposed to weathering and atmospheric conditions.

Conco-Foam assures excellent VHF, UHF, Color and B/W TV reception in crowded areas where reception is critical. Mylar-aluminum shielding provides strong and clean signals, eliminating electrical noise and ghost signals. Conco-Foam can be attached to mast, installed in gutters, conduit, or underground.

AWG and Stranding	Color	Nom. O.D. (Inches)	Nom. Velocity of Propagation	Nom. Cap. (Mmf/Ft.)	Nom. Attenuation Per 100′	Spool Put-Up*

PROTECTA-METAL SPOOLS

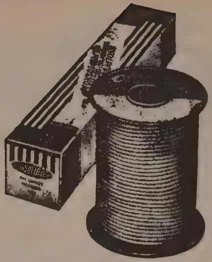
Popular, profitable specialty wire packaged for easy selling in radio-electrical, scientific, specialty and hardware.

Wide variety of sizes and insulations.

Keeps stock in perfect order, always saleable.

Supplied on spools as shown and in heavier weights.

Here is a handy and convenient way to stock small quantities of wire. It prevents wire from matting or tangling.



MAGNET WIRE No. 2000

The correct wire for practically any application. Magnet wire is indispensible in the manufacture and repair of both radio and audio frequency coils, transformers, chokes, speaker field coils, short wave coils, tuners, transmitters, etc. Also widely used in the construction and repair of motors, generators, dynamos, etc.

Larger Quantities At Same Per Pound List

SPECIAL MAGNET WIRES

In addition to the standard listing shown here, we maintain an extensive stock of all other sizes in round rectangular and square magnet wire.

ANNUNCIATOR (BELL) WIRE

ELECTRIC AND RADIO WIRE CABLE CORPORATION
CHICAGO ILLINOIS
CONSOLIDATED CORPORATION

SUPPLIED IN ASSORTED COLORS
An all around utility wire consisting of a single and two conductors of No. 18 wire, plastic insulation.

Catalog Number	Type
1450	Single Conductor
1445	Two Conductor Twisted

STANDARD SPOOL PUT-UP:
¼ LB., ½ LB., 1 LB., 7 LB.

PHOSPHOR BRONZE DIAL CABLE

BRAIDED phosphor bronze over a pure black linen, lubricated core for exceptional strength and wearing qualities.

Cat. No.	Size (Ins.)	Stranding	Dia. (Ins.)
1436	⅛	16x36	.125

STRANDED phosphor bronze over a concealed white nylon core for exceptional flexibility. Manufactured to highest precision standards, insuring utmost accuracy.

Cat. No.	Size (Ins.)	Stranding	Dia. (Ins.)
1440	⅛	42x35	.125

STANDARD SPOOL PUT-UP:
25 FT., 100 FT., 500 FT., 1000 FT.

PHOSPHOR BRONZE

Recommended for short wave and transmitting aerials.

Tested and used by Army and Navy.

Amazing improvement for reception and transmission.

Phosphor bronze is recognized as the most efficient, practical wire obtainable for short wave and transmitting aerials. It will not stretch or sag and is superinductive.

HIGH VOLTAGE AND ANODE LEAD CABLE

Flame Retardant Polyethylene Plastic Insulation for high voltage leads to cathode-ray tubes in television receivers, oscilloscopes, power supplies and other uses, requiring a high-voltage cable. Special features: minimum surface leakage, corona resistance and high dielectric strength.

STANDARD SPOOL PUT-UP: 25 FT., 100 FT., 250 FT., 500 FT., 1000 FT.

U.L. STYLE 3239 (FR-1)

Catalog Number	Size	Stranding	Description	Ins.	Working Volts	Nom. O.D. (Inches)
4601	20	7x28	Extra flexible tinned copper wire; Flame retardant Polyethylene Plastic Insulation; red cellulose acetate yarn braid with 2 white tracers; lacquer coating.	.035	10,000	.136
4611	20	7x28	Same as No. 4601 except heavier insulation; solid red braid.	.065	20,000	.198
4616	20	10x30	Extra flexible tinned copper flame retardant polyethylene insulation, white.	.035	10,000	.108
4621	20	10x30	Same as No. 4616 except heavier insulation, white and red.	.065	20,000	.168

4626*	22	7x30	Same as 4624	.045	40,000	.160

* Can also furnish pre-bond overcoat and topcoat conductor on catalog numbers 4624, 4625, and 4626.

HOOK-UP WIRE

STA-PUT PUSHBACK

STRIPS AND REMAINS BACK FOR CLEAN TERMINAL

Seven colors for each: Black, Blue, Brown, Green, Red, Yellow, White. Be sure to specify color when ordering. Packaged in handsome 3-color display carton for easy merchandising by dealer.

Catalog Number	Size	Stranding	Specifications	Finished O.D. (Inches)
1048	18	16x30	Tinned copper conductor; cotton serve and cotton braid thorough paraffin impregnation.	.072
1101	20	10x30	Same as 1048	.068
1091	22	7x30	Same as 1048	.066

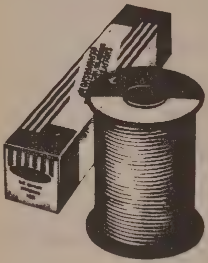
1106	20	Solid	Same as 1048	.067
1096	22	Solid	Same as 1048	.065



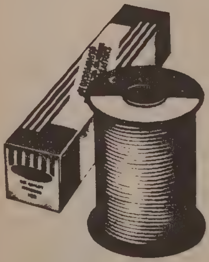
HI-Q LO-LOSS PUSHBACK

High efficiency wire ideal for use where high conductivity with negligible loss is essential.
Push-back insulation will not creep.
7 colors: Black, Blue, Brown, Green, Red, Yellow, White.

Catalog Number	Size	Stranding	Specifications	Finished O.D. (Inches)
1051	22	7x30	Tinned pure copper; serve of cellulose acetate yarn; cotton braid overall with high gloss lacquer.	.065
1056	20	10x30	Same as 1051	.066
1061	22	Solid	Same as 1051	.064
1066	20	Solid	Same as 1051	.065

STRANDED RUBBER HOOK-UP AND LEAD-IN WIRE

Catalog Number	Size	Stranding	Specifications	Insulation Thickness (Inches)	Finished O.D. (Inches)
1121	20	10x30	Highly flexible, tinned copper, paper served, live non-cracking wall of black rubber insulation.	1/32	.102
1126	18	16x30	Same as 1121	1/64	.085
1131	18	16x30	Same as 1121	1/32	.115
1111	18	16x30	Soft drawn tinned copper wire; cotton wrap; colored rubber overall insulation.	1/64	.090



EXTRA FLEXIBLE AC-DC ANTENNA CORD

Recommended for use as an antenna wire for AC-DC radio sets, for antenna loops and all other purposes where an extremely flexible covered wire is required. May be used for replacement purposes or original installations.

Catalog Number	Size	Stranding	Specifications	Insulation Thickness (Inches)	Finished O.D. (Inches)
1161	24	16x36	16 strands No. 36 tinned copper wire, covered with a brown vinyl plastic insulation.	.010	.050

STANDARD SPOOL PUT-UP: 25 FT., 100 FT., 1000 FT.

COMMUNICATION AND ELECTRONIC CONTROL CORDS

ALL JACKETING NEOPRENE
ALL CORDS 48″ RETRACTED, APPROX. 25′ EXTENDED

Multi-conductors stranded communication cord No. 23 AWG, tinned copper wire. Lengths can be cut to exact requirement. Maximum working voltage 120 volts. Current carrying capacity 1 ampere Nom. cond. resistance .022 ohms per linear foot.

Catalog Number	Condr. AWG	Stranding	Cordage O.D. (Inches)	Coil O.D. (Inches)

CORD SETS

TV POWER SUPPLY (CHEATER) PLASTIC CORD

Underwriters' Approved

Extra flexible parallel cord type SPT-1 (P.O.T.). Soft molded connector and attached soft molded cap.

No. 2506 6 Ft. Cord Set
No. 2509 9 Ft. Cord Set
No. 2516 6 Ft. Cord Set—"Polarized"
No. 2519 9 Ft. Cord Set—"Polarized"

CUBE TAP EXTENSION CORD

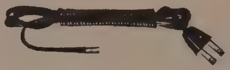
Underwriters' Approved

3-way extension tap Type SPT-1 (P.O.T.). Flexible cord and soft molded-on cap.

No. 2706 6 Ft. Cord Set
No. 2709 9 Ft. Cord Set
No. 2712 12 Ft. Cord Set
No. 2715 15 Ft. Cord Set

REPLACEMENT POWER CORD SET

Underwriters' Approved

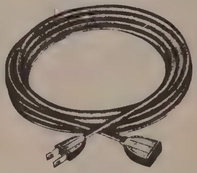


Extra flexible parallel cord type SPT-1 (P.O.T.) and soft molded-on cap—hanked—ends of cord stripped and tinned.

No. 3006 6 Ft. Cord Set
No. 3008 8 Ft. Cord Set

POWER EXTENSION CORD

WITH MOLDED-ON CAP AND CONNECTOR



UL LISTED CORD

Modern design extension power cords with approved molded-on caps and connector. Packed in individual clear plastic bags for easy identification. Consolidated power cords for both indoor and outdoor.

AERIAL KITS FOR EVERY RADIO RECEIVER

Consolidated Aerial Kits are made up with the same painstaking care that has always featured our assemblies. All materials and parts are of highest standard and are guaranteed as to Length, Weight, Size and Count as Specified. If your needs are not answered in the stock listings below, write us regarding your special requirements.

50 FOOT SERIES

THE PRICE LEADER No. 506	50 feet 7x26 Bare Copper Aerial Wire 25 feet No. 16 Rubber Covered Lead-in Wire 1 Adjustable Ground Clamp 2 Porcelain Insulators 2 Porcelain Nail Knobs 1 Window Lead-in Strip Installation Instructions
No. 507	Contains 1 Underwriter Approved Lightning Arrestor, otherwise same as No. 506
A SUPER VALUE No. 501	50 feet 7x26 Bare Copper Aerial Wire 35 feet No. 16 Rubber Covered Lead-in Wire 1 Adjustable Ground Clamp 2 Porcelain Insulators 2 Porcelain Nail Knobs 1 Window Lead-in Strip Installation Instructions
No. 502	Contains 1 Underwriter Approved Lightning Arrestor, otherwise same as No. 501
DE LUXE AERIAL No. 512	50 feet 7x22 Tinned Aerial Wire 35 feet No. 16 Rubber Covered Lead-in Wire 1 Underwriter Approved Lightning Arrestor 2 Porcelain Insulators 2 Porcelain Nail Knobs 1 Shur Grip Ground Clamp 1 Duco Window Lead-in Strip Installation Instructions

60 FOOT SERIES

No. 516 PRICE KIT	Contains 60 feet 7x26 Bare Copper Aerial Wire, otherwise same as No. 501.
No. 517	Contains 60 feet 7x26 Bare Copper Aerial Wire, 1 Underwriter Approved Lightning Arrestor, otherwise same as No. 501.
No. 518 AERIAL	Contains 60 feet 7x22 Tinned Aerial Wire, otherwise same as No. 512.

75 FOOT SERIES

75 FOOT SPECIAL No. 531	75 feet 7x26 Bare Copper Aerial Wire 25 feet No. 16 Rubber Covered Lead-in Wire 1 Adjustable Ground Clamp 2 Porcelain Insulators 2 Porcelain Nail Knobs 1 Window Lead-in Strip Installation Instructions
No. 532	Contains 1 Underwriter Approved Lightning Arrestor, otherwise same as No. 531.

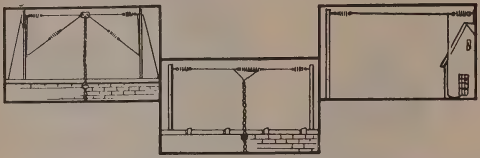
100 FOOT SERIES

EXTRA VALUE No. 541	100 feet 7x26 Bare Copper Aerial Wire 25 feet No. 16 Rubber Covered Lead-in Wire 1 Adjustable Ground Clamp 2 Porcelain Insulators 2 Porcelain Nail Knobs 1 Window Lead-in Strip Installation Instructions
No. 542	Contains 1 Underwriter Approved Lightning Arrestor, otherwise same as No. 541.
No. 551	Contains 100 feet 7x24 Copper Aerial Wire, otherwise same as No. 541.
No. 552	Contains 100 feet 7x24 Aerial Wire, 1 Underwriter Approved Lightning Arrestor, otherwise same as No. 541.

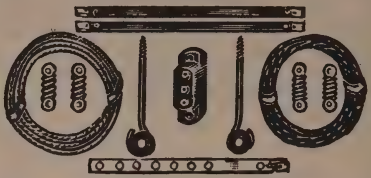
No. 615 UNIVERSAL LIMITED ALL-WAVE ANTENNA SYSTEM

WITH BALANCED TRANSMISSION



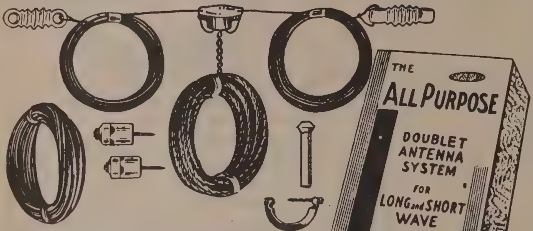
The various types of Marconi and Doublet Antenna systems which may be erected with this kit are all extremely efficient, being based on advanced antenna design which permits uniform reception on the short wave bands and eliminates local noise interference which is so prevalent at the higher frequencies. Effectively eliminates interference set up by power transformers, street cars, and other electrical equipment. The kit provides complete parts for the erection of practically every type of limited antenna of double or other design. An instruction sheet packed with each kit gives detailed instructions for the various type of aerials that may be erected.

LIST OF PARTS



1—100 ft. coil Bare Aerial Wire
1—50 ft. coil Twisted Rubber Covered Transmission Line
4—Porcelain Insulators
1—Doublet Lightning Arrestor
1—Doublet Window Lead-in Strip
1—Ground Clamp
Installation Instructions
Attractive 3 Colored Carton

No. 635 LIMITED ALL-PURPOSE DOUBLET ANTENNA KIT



FULLY ASSEMBLED — ATTRACTIVELY PACKAGED

The Super Limited All-Purpose Doublet Antenna System is sold as a completely assembled unit. The coils of double wire are joined and soldered to the twisted transmission lead-in. Insulators are also attached ready for instant installation.

A TRUE DOUBLET — FOR BOTH SHORT AND LONG WAVE RECEPTION

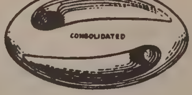
A scientifically designed, high efficiency doublet, all wave antenna system for limited world-wide reception. Kit is complete in all details, ready assembled for quick, convenient installations. Only the finest parts are used in its assembly, assuring utmost efficiency in operation. On all modern types of superheterodyne receivers tuning two or three bands, this limited All-Purpose Doublet antenna will show a marked improvement in reception. Also provides a remarkable pick-up in signal strength on the short wave 16-49 meter band. Both units of the doublet, because of their length and method of assembly are tuned to the opposite ends of the short wave range, providing for uniform pick-up efficiency on all intervening frequencies.

COMPLETELY ASSEMBLED SYSTEM

2—30 ft. coils 7x24 Bare Copper Wire
1—50 ft. coil Twisted and Braided overall Transmission Wire
3—3-inch Porcelain Insulators
1—10 ft. coil Ground Wire
1—Ground Clamp
2—Porcelain Nail Knobs
1—Instruction Sheet

RADIO SPECIALTIES

AIRPLANE INSULATOR



No. 1581

A specially designed insulator that provides great tensile strength. A valuable accessory for the serviceman who specializes in antenna installation. Made of highly glazed porcelain, shaped to shed moisture.

PORCELAIN INSULATOR

No. 1600

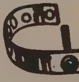
A sturdily constructed insulator at a price that defies competition. Made of the highest grade porcelain, with a high gloss finish that sheds moisture.

DUCO LACQUERED LEAD-IN-STRIP

No. 1504

Made of soft drawn flexible copper, covered with a heavy black cotton braid. The braid is thoroughly weatherproofed, with a number of coats of Duco Lacquer. Made extra thin to assure its use on snug fitting casements. Highly polished finish — absolutely weatherproofed. Contains a Fahnestock clip at each end.

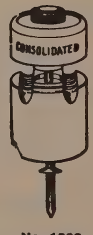
ZINC STRAP CLAMP



No. 1517

A well made zinc clamp which provides positive contact with a permanent connection. Regularly finished with a strong, over-sized copper nut and bolt. A Fahnestock clips is provided for the lead-in connection. For use in all sizes of pipe up to 2 inches in diameter.

PORCELAIN NAIL KNOBS



No. 1602

Porcelain Nail Knobs are a necessity for aerial lead-in and for all types of outside wiring. They are made of durable porcelain with correctly grooved jaws that hold firmly with a bulldog grip, without piercing the insulation. Nail is rust-resisting and provided with a stop to prevent separation of the units. Top buffer pad prevents breakage during installation.

DAFLEX 105 PLASTIC TUBING

105°C POLYVINYLCHLORIDE (PVC) MEETS MIL-I-631D SPECS

Specifically compounded vinyl resins for superior all around performance. UL approved for 105°C, conforms to Spec MIL-I-631D Type F, Form U, Grades A and C. Class 1 and 2, Category 1. Resistant to heat, oil, water, chemical corrosion, fungi and aging. Very hi abrasion resistance. Will retain its flexibility. Suitable for covering and protecting wires and cables. Designed for electrical, electronic and aircraft applications. Non-flammable. Meets ASTM—D876, ASTM—D922.

D105 compounded with non-migratory resin type plasticizors. Retains its flexibility, permitting it to cling and protect irregular shapes. D105 snakes well under practically all conditions.

DAPRENE™ HEAT SHRINKABLE NEOPRENE TUBING

This tubing meets or exceeds MIL-R-46846 and MIL-I-23053B/I. Shrinks down 50% of its supplied inside diameter, upon exposure to heat of 160°F — will remain elastomeric — with no cracks. Longitudinal shrinkage 15% upon complete shrinkage. Partial shrinkage begins at 130°F. Will protect solder joints, terminals, fittings, pipes; used for harnessing, and jacketing wires, medical equipment, etc. Resists corrosion, chemicals, flame; good mechanical and electrical strength. Available in expanded sizes from ¼" through 4". **COLOR:** Black. Tubing must be stored below 100°F.

PROPERTIES:

ELECTRICAL
Dielectric Strength: Min. 200 V/Mil.
Volume Resistivity: Ohm/Cm, 10^{10} Min.

CHEMICAL
Solvent Resistance: Excellent.
Corrosion Resistance: Good.
Water Absorption: 1.0% Max.
Flammability: Self Extinguishing 15 Sec.

PHYSICAL
Temperature Range: −67°F to 212°F.
Elongation: 300% Min.
Tensile Strength: Min. 1800 PSI.
Specific Gravity: 1.40 Max.
Heat Resistance: 212°F for 96 Hrs.
Heat Shock: 301°F for 5 Hrs. No Cracking.
Hardness: Shore A Durometer 85±5.

STORAGE INSTRUCTIONS
For Maximum Dimensional Stability:
1 Month Under 100°F, 12 Months
Under 70°F. Avoid Direct Sunlight.

DABURN SHRINKABLE HEAVY WALL POLYVINYLCHLORIDE TUBING

This heavy wall PVC tubing shrinks 50% in diameter when heated to 200°F for one minute or less, and has the same characteristics as the DAFLEX SH-265 All Purpose Series, except for its heavier wall. The heavier wall allows for additional protection where industry requires. DAFLEX SH-267 Tubing meets or exceeds the performance requirements of MIL-I-20353/2 Class 2 but **not** the dimensional requirements because of the wall thickness. It meets or exceeds UL specs, including FR-1.

DABURN SHRINKABLE POLYVINYLCHLORIDE ALL PURPOSE

SHRINKABLE RATIO: 2:1 (50%)

Flexible, shrinks 50% on heat application, approximately 15% longitudinal contraction. Suitable for insulating components and cables in varying shapes and diameters. Has a higher resistance to oils than low density polyethylene. Conforms to MIL-I-631D, Type F, Form U, Grade A and C, Class 1 and 2, Cat. 1. Controlled shrinkage on application of heat to predetermined size takes place at temperatures below 200°F (one minute or less). For maximum dimensional stability: Store under 100°F for 1 month; under 85°F for 4 months; under 70°F for 12 months. Meets or exceeds MIL-I-23053B/2 Class 2. File No. E-51336. UL approved. **OPERATING TEMP.:** −20°C to +105°C.

SHRINKABLE IRRADIATED POLYOLEFIN TUBING

This series is designed for maximum mechanical strength at stress or points of connection. It is strong and abrasion resistant and is supplied in expanded sizes. It insulates, jackets, splices, encapsulates, weatherproofs components, connectors, cables and irregular shaped objects. When exposed to heat (300°F) the tubing shrinks 50% in diameter, 5% longitudinal contraction. Controlled shrinkage to exact requirement takes place. Meets or exceeds MIL-I-23053B/5 Class 1 and 2. Available with UL approval. UL File No. E-51336. AMS 3636B 3637A.

DAFLEX MELTABLE LINER

DAFLEX Meltable Liner Series. DML, in conjunction with heat shrinkable tubing, allows the encapsulation of one end, of both ends, or of the entire unit. It will prevent corrosion and moisture penetration. DML is economical because only the amount actually necessary to seal, need be used. DAFLEX DML is a thermoplastic tubing which flows, melts and sticks to most low temperature plastics, fabrics and many metals, upon the application of heat. It begins to melt and flow at 175°F.

NOTE: **End Caps** may be made relatively inexpensively by slipping a piece of DML into shrinkable tubing, placing both over an object and heating. While the tubing is still warm, simply punch one end with a pair of pliers and allow to cool. Note: This liner is to be used **in conjunction with** shrinkable tubing.

DAFLEX SHRINKABLE TEFZEL* TUBING

DAFLEX SH-300 Shrinkable Tefzel Tubing is the new high-temperature polymer designed to offer an unusual combination of ruggedness, chemical resistance and dielectric properties, over a very wide temperature range. While Tefzel is much like Teflon*, it is superior in mechanical ruggedness. It shrinks 30% and is non-flammable in air. It shrinks down at 300°F (150°C) and will operate up to 230° for short periods. **Operating Temperature:** —54°C to +180°C.

DAFLEX HEAT SHRINKABLE IRRADIATED KYNAR® TUBING

DAFLEX KYNAR, a semi-rigid shrinkable polyvinylidene fluoride tubing, is free from flaws, pin holes, seams, cracks or inclusions. It is a tough, high temperature, thin wall tubing with high cut through and abrasion resistance. It shrinks 50% in diameter and 10% longitudinally when heated to approximately 347°F. DAFLEX Shrinkable KYNAR tubing will not cold flow, melt or split when shrunk over irregularly shaped objects. Conforms to MIL-I-23053/8. **Operating Temperature:** —55°C to +175°C.

HEAT SHRINKABLE TEFLON* TUBING • FEP • TFE • DUAL WALL

DUAL-WALL TEFLON* ENCAPSULATING SHRINKABLE TUBING

NEW DAFLON SM-450 is a new dual wall shrink and melt Teflon tubing which gives a tight, moisture-proof seal. It is made from two types of Teflon. The outer wall is TFE Teflon and the inner lining is FEP Teflon. When heated to 400°F the FEP melts and at 621°F the TFE shrinks tightly. The FEP is squeezed into a solid or near solid mechanical encapsulation. DAFLEX SM-450 tubing protects against most environmental hazards involving pull, vibration, moisture, chemicals, etc. It may be used over wires, terminals, splices, connectors and as a strain relief and end cap.

Operating Temperature: 450°F.

**Will fully close off.

DAFLON SH-400 (FEP)

Made with Modified TEFLON‡ FEP will shrink over inserted objects upon exposure to moderate heat. Heretofore, many joints, parts, components, devices could not be protected because of hi temperature required for shrinkage. FEP TEFLON‡, which has a continuous service temperature of 400°F., will shrink at 300°F. Supplied in natural (transparent) color. Complete shrinkage at 350°F. Now, many heat sensitive products can use the permanent protection of TEFLON.* Will not burn or support flame, long lengths available. Will not split or melt. Extruded. Meets MIL-I-23053/11.

DAFLON SHRINK SERIES SH-621

TFE TUBING MIL-I-23053/12

Made of modified TEFLON‡ polytetrafluorethylene will shrink when heated to 621°F. Suitable where hi temp protection is required. Extruded. Will not support combustion, dielectric strength (20 Mil Wall) 850 V/M, low temp. brittle point −66°F, superior chemical resistance.

†Stock sizes.

DAFLEX 4:1 SHRINKABLE PTFE TUBING

DAFLON SH-421 Shrinkable Teflon Tubing recovers to approximately 25% of its expanded size when heated to the gel point (621°F). Thus it is now possible to use shrinkable Teflon tubing, with its excellent chemical and physical properties, over objects which require more than the standard 2:1 shrinkdown ratio (see SH-621).

NOTE: Tubing should be allowed to recover **at least 50%**.
Conforms to MIL-I-23053/12 and AMS-3584. **Operating Temp.:** −85°F to +500°F.

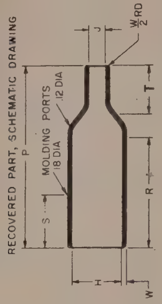
DAFLEX SHRINKABLE MOLDED PARTS

DAFLEX SHRINKABLE MOLDED PARTS are made from expanded, irradiated polyolefin. When heated to 275°F they recover (shrink) to a pre-determined configuration. These parts provide a tough outer covering with excellent electrical, mechanical, and thermal insulation as well as affording cosmetic appearance to assemblies and terminations.



DAFLEX STRAIGHT SHRINKABLE BOOTS

They are larger at one end so that they can accommodate electrical connectors and terminations.

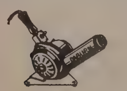
HOT AIR GUN AND ACCESSORIES

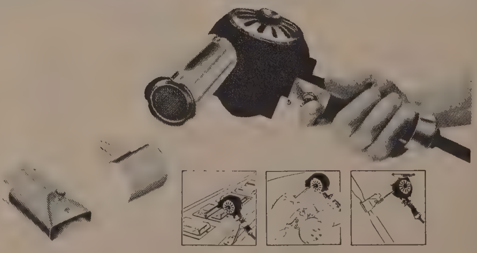
FOR DAFLEX SHRINKABLE TUBING



DABURN Cat. No.

- **HG1** — For SH-162, SH-265, SH-267, SH-275, SH-290, ST-275, SH-300 Series.
- **HG2** — For SH-400, SH-421, SH-621, SH-450, SH-350 Series.

A flameless heat source; light in weight; portable and/or permanent mounting.



ADAPTOR HGA-02

Concentrates heat and allows use of baffle.

BAFFLE PLATE HGB-01

For tubing up to 1¼" O.D. Made to concentrate hot air.

SUBMINIATURE TEFLON* HOOK-UP WIRE
PER MIL-W-16878D — TYPE ET — 250 VOLTS, 200°C

Thin miniature hook-up wire is suitable in miniature slip ring assemblies, as interconnecting wire between wafers in microminiature electronic circuitry, instrument wire, medical wire, subminiature thermo-couple lead wire, strain gauge wire, etc. Provides lighter weight, greater flexibility and hi temperature resistance. Size Nos. 32 thru 20 conform to MIL-W-16878D type ET 250 volts, 200°C. Silver plated copper conductor.

MIL-W-16878D INSTRUMENTATION—SHIELDED • UNSHIELDED

DESCRIPTION: One or more conductors, each conductor silver plated concentrically stranded copper wire, Type E Extruded TFE .010" insulation. When shielded, braided silver plated copper shield over conductor(s), 90% shield coverage. When covered, either a TEFLON* impregnated fiberglass braid or a .010" TEFLON* fused, double reversed tape jacket overall. Fungus, solvent, moisture, flame, acid, alkali and oil resistant Multiconductors are twisted.

TEMPERATURE RATING: −65°C to +260°C. **VOLTAGE RATING:** 600 Volts

H FILM KAPTON* WIRE — DALITE™

HIGH TEMPERATURE HOOK-UP AND AIRFRAME WIRE 200°C CONTINUOUS TEMPERATURE RATING (a)

INSULATED WITH DUPONT KAPTON* POLYIMIDE FILM WITH TEFLON* — FEP HEAT SEALED COATING CONFORMS TO MIL-W-60904 & MIL-W-81381.
CHARACTERISTICS: Dalite™ insulated wire provides high temperature stability, low temperature flexibility, high radiation resistance, resistance to cold flow, impervious to most chemicals, high dielectric strength, low dielectric constant, smaller diameters and lighter weight than any other comparable wire used for continuous operation up to 200°C. This hook-up wire meets the test requirements of MIL-W-16878 for 300 V, 600 V and 1000 V with **smaller wall thicknesses, weight and dimensions.**
(a) Temperature based on lowest temperature rating of materials in the insulation — FEP 200°C. Will pass 96 hour heat age tests at 250°C per MIL-W-16878.
DESCRIPTION: Single conductor, silver plated annealed copper conductors, Type H* Polyimide film with Teflon* FEP coating tape wrapped.

KYNAR® HOOK-UP WIRE— UL APPROVED

300V — 125°C

Suitable for wire-wrap applications. High cut through resistance. Self-extinguishing. Resistant to most chemicals and solvents. Ultra-violet and weather resistant.

DESCRIPTION: Solid, silver plated, oxygen-free, high conductivity (OFHC) copper conductor, extruded Kynar (polyvinylidene fluoride insulation. To UL Style #1422.

TEFZEL* COMPUTER WIRE

300V — 150°C

Suitable for high temperature, thin wall wire-wrap computer applications. It has high cut-through, abrasion and chemical resistance, a dielectric constant of 2.6 Tefzel passes IEEE Standard 383-1974 vertical flame test for cables in nuclear power plants suitable for use in computers, aircraft instrumentation and wirewrap applications.

DESCRIPTION: Solid silver plated, oxygen-free, high conductivity (OFHC) copper conductor, Tefzel (a modified copolymer of ethylene and tetrafluoroethylene) overall.

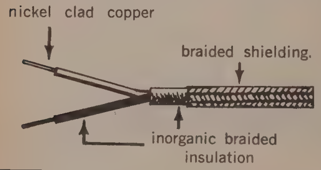
DABURN HIGH TEMPERATURE LEAD WIRE

Small Diameters and High Temperature performance make an outstanding combination for these unique constructions. Basic wire conforms to MIL-W-3861 spec. shielding per MIL-N-46026A. 600V RMS.

800°F TEMPERATURE RATING



One conductor high temperature aircraft and missile lead wire for operation between 500°F and 800°F. Nickel clad copper conductors with glass braided fiber insulation impregnated with silicone varnish. Multiconductor and shielded construction will be manufactured to customer's specifications.

DABURN Cat. No.	Size	Strand	CMA	Nom. O.D.

STANDARD PUT-UP: 500 Ft., 1000 Ft.

1500°F TEMPERATURE RATING

One conductor high temperature radiation resistant aircraft and missile lead wire for operation between 800°F and 1500°F. Nickel clad copper conductors with inorganic, braided insulation. Useful up to 1500°F providing moisture resistance is not required. Multiconductor and shielded construction can be made to customer's specs.

* Types WS-16/U Black, WS17/U Red Per MIL-W-13169.

STD. PUT-UP: 100 Ft., 500 Ft., 1000 Ft.

PLASTIC KINKLESS TEST LEAD WIRE

Soft formulation vinyl maximum flexibility. Temperature stability from −80°C to +115°C. Exceed requirements for MIL-I-3930A Type JP (PVC). Suitable for test leads, etc. Resistant to gasoline and oil. Excellent abrasion Resistance.

DESCRIPTION: One conductor tinned copper stranded, special formulation vinyl insulation — smooth surface.

OPERATING TEMPERATURE: −80°C to +115°C, 5000V rating.

COLORS: Black, Red, Yellow, Green, White, Blue.

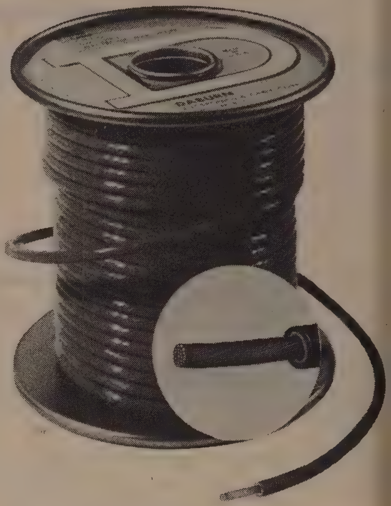
WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

HI-VOLT CORONA RESISTANT TEFLON* CABLE©

Voltage Rating at Sea Level • Voltage Rating at 80,000 feet, approximately 1/3 lower

• Minimum life expectancy: 10,000 hours.



SMALL SIZE:
You do not need bulky, thick, insulation jacketing as used with silicone rubber and polyethylene insulations to get your hi-voltage requirements. Wire used is MIL-SPEC QQ-W-343 and MIL-W-16878D. Insulation used conforms to and surpasses MIL-SPEC-W-16878D

AVOID CORONA PROBLEMS:
Corona resistant Teflon construction is specifically designed to retard and prevent corona penetration.
Temperature variations from −60° to +300°C have no life effect on the corona resistant Teflon. In addition, there is no stress or crack failure under severe, adverse conditions including mechanical strain, moisture, corona or chemical conditions.

DESCRIPTION:
Single Conductor, Stranded Silver Plated Copper, Corona Resistant Teflon* Insulation.

TEMPERATURE RATING:
−90°C to +250°C.

VOLTAGE RATING:
Based on insulation thickness.

AVAILABLE COLORS:
White, Black, Red, Green, Yellow, Lt. Blue, Brown, Orange, Gray, Violet. (Also available in tracer colors)

PUT-UP: 250′, 500′, 1000′

DABURN

DABURN electronics & cable corp.

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

NEW FLAT RIBBON CABLE • TYPES B & C PER MIL-W-16878D•UL FR-1

SOLID COLORS

DESCRIPTION: Each conductor is stranded T.C. with extruded PVC insulation, bonded together to form a flat ribbon cable. Conductors separate easily for clean terminations with standard wire connectors, jacks and pins. Ribbon cable saves space and time on circuit interconnecting assemblies, wiring harnesses, sliding drawers and drop assemblies and simplifies identification. Resists acid, alkalis, flame, moisture, oil, solvents and fungus.

TEMPERATURE RATING: −55°C to +105°C. Insulation meets or exceeds UL FR1 vertical flame test.

Per MIL-W-16878D — TYPE B — 600 V

AUDIO & DATA SHIELDED CABLE
INDIVIDUALLY ALUMINUM MYLAR FOIL SHIELDED PAIRS
STRANDED CONDUCTOR

DESCRIPTION: Each conductor **stranded,** copper tinned, hi density polyethylene insulation, color coded, conductors — twisted pairs. #22 **stranded** tinned copper wire. Aluminum foil mylar shield over each pair and copper tinned drain wire. Overall chrome grey PVC jacket. Nom. cap. between conds. of a pair, 25 PF/FT. Capacitance of a single conductor to shield, 45 PF/FT.

Sugg. Working Voltage: 300V.

ALUMINUM MYLAR FOIL SHIELD PLASTIC JACKETED CABLE

Extremely light in weight, provides 100% shield coverage — small diameters. Each cond. tinned copper, stranded color coded polyethylene insulation, twisted, drain wire, aluminum mylar foil shield, gray polyvinylchloride jacket overall. Drain wire provides quick and easy grounding.

OPERATING TEMPERATURE: −20°C to +60°C. **OPERATING VOLTAGE:** 400 Volts.

CONDUCTOR COLOR CODE: 1—Black, 2—Red; 3—White, 4—Green.

SHIELDED CABLE
PLASTIC JACKETED BRAIDED COPPER SHIELD

Suitable for P.A. and sound systems, installation in schools, hospitals and institutions, transmitters, electronic circuits, etc. Construction allows ease of pigtailing. Shield provides additional strength for cable. Each conductor tinned copper, PVC insulation, color coded, twisted, braided T-C shield, gray PVC jacket overall. Suitable for outdoor installations.

OPERATING TEMPERATURE: −20°C to +60°C.

STD. PUT-UP: 500 Ft., 1000 Ft.

SHIELDED PLASTIC MICROPHONE CABLE

Will withstand abuse and is resistant to oil, moisture, aging. Have low capacitance, Hi insulation resistance and low attenuation. Will not strain or mark.

2772 — For hi impedance microphone

2773 — For crystal, ribbon, etc. mikes. All are suitable for hi-fi interconnecting cables.

2774 — For hi impedance lapel mikes.

OPERATING TEMPERATURE: −20°C to +60°C.

SHIELDED MICROPHONE CABLE ONE CONDUCTOR

Uses tinned copper spiral shield — for ease in soldering — extremely flexible-plastic.

SHIELDED ULTRA LOW CAPACITY MICROPHONE CABLE
Plastic Jacket — Cellular Foam Polyethylene Insulation
BRAIDED SHIELD

DESCRIPTION: Constructed with white foam polyethylene insulation, braided tinned copper shield, chrome gray vinyl jacket. The low loss foam polyethylene construction has lower capacitance and attenuation than standard polyethylene mike cables as much as 50%. This increases the effective length of cable as much as 50% without signal loss.

OPERATING TEMPERATURE −20°C to +60°C.

PLASTIC JACKETED AUDIO AND MULTICONDUCTOR CABLE
SPIRAL WRAPPED COPPER SHIELD

Suitable for P.A. and sound systems, schools, hospitals, institutions, recording studios, paging and call systems. Each conductor copper tinned, plastic insulation, color coded. twisted, spiral wrapped tinned, copper shield, gray plastic jacket. Temp.: −20 to +60°C. Simplifies pigtailing. Provides almost 100% shielding coverage.

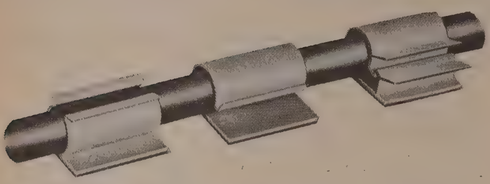
DABURN FASTENING DEVICES

STIK KLIPS™ • TENSION CLIPS • COMPONENT CLIPS • WIRE TIES

DABURN STIK KLIPS™ — SELF ADHESIVE



For fast secure mounting on smooth surfaces. No need to screw, nail or staple in place. Fastens in a flash — just peel off the protective backing and press in place on a clean, dry surface. For best results allow a few seconds for adhesive to set before applying lead.

These plastic clips are insulating, strong and elastic. They have many uses, such as keeping telephone wires off the floor, holding wire, cable, tubing, rods, etc. in position.

Material: PVC
Color: Gray
Temp. Range: −10°F to +175°F

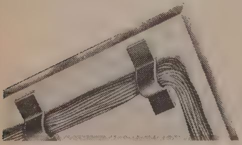
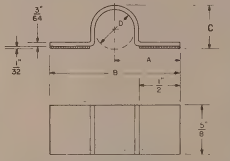
OVER-THE-TOP STIK KLIP™

MATERIAL: PVC
COLOR: Black
TEMP. RANGE: −30°F to +170°F





Daburn's "over-the-top Stik Klip" is a fast and convenient self adhesive clip. Simply remove the protective paper backing of the adhesive tape and press into place. The unique configuration of the Stik-Klip allows for channeling of wire or tubing bundles up to ½″ in diameter.

RIBBON CABLE STIK KLIPS™

COLOR: Gray
TEMP. RANGE: −30°F to +170°F

Daburn Ribbon Cable Stik Klips are designed for holding laminated or round conductor ribbon cable in place between components. This plastic, self-adhesive clip has a serrated edge which prevents slippage and allows runs of ribbon cable horizontally, vertically or diagonally. Maximum recommended thickness of cable is .245″.

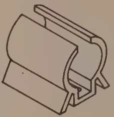
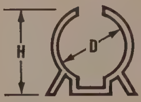
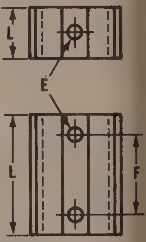
DABURN COMPONENT CLIPS







Hold and insulate, electrical and electronic components, accessories — spare parts. Holds firmly and still permits fast and easy insertion. Convenient for fastening clips and retainers for transistors, batteries, fuses, capacitors, resistors, lamps, etc. These Daburn clips are made of black vinyl (polyvinylchloride). Has high dielectric strength. Can be mounted with screws, rivets or other fastening means.

MATERIAL: Rigid Vinyl.
TEMPERATURE RANGE: −20° to +165°F.
STANDARD PACKAGE: 100, 1000.

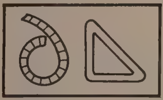
NEW DAFLEX FLEXIBLE CONTINUOUS GROMMETS — SOLID OR SERRATED



With only Five sizes you can finish and protect regularly and irregularly shaped openings from causing abrasion and cut-through damage to wires, cables, etc. Just cut the continuous grommet to your desired circumferential length (see the chart below) and slip it on to the edge of the hole. It stays in place securely.

Daflex continuous grommets are available in natural polyethylene* and natural nylon**, solid or serrated. They are packaged in convenient 50 foot and 100 foot put-ups.

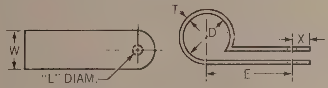
NYLON CABLE CLAMPS



MADE OF DU PONT "ZYTEL" 101 NYLON RESIN

Meets MIL-P-26093A and MIL-P-17091A Amend. 2

Light and tough these nylon cable clamps are used as a clamp, strain relief, clip hanger, fastener or strap. Smooth non-abrasive surfaces, rounded edges will not cause shorts or grounds in cable. Insoluble in solvents, gasoline, oils, hydraulic fluids, alcohol, acids, alkalies. Temperature range −60°F to +300°F. Does not support combustion. Inside matte finish. Prevents slippage and is self aligning. Snaps on cable. Meets MIL-P-20693A specs. fungus resistant.

HOT AIR GUN AND ACCESSORIES

FOR DAFLEX SHRINKABLE TUBING

DABURN Cat. No.

HG1 — For SH-162, SH-265, SH-267, SH-275, SH-290, ST-275, SH-300 Series.

HG2 — For SH-400, SH-421, SH-621, SH-450, SH-350 Series.

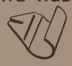
A flameless heat source; light in weight; portable and/or permanent mounting.

ADAPTOR HGA-02

Concentrates heat and allows use of baffle.

BAFFLE PLATE HGB-01

For tubing up to 1¼″ O.D. Made to concentrate hot air.

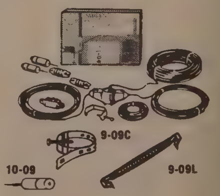


DABURN ALL-WAVE ASSEMBLED ANTENNA KIT

Designed for reception of overseas radio signals & programs. Utilizes the Hertz principle — balanced line consists of:

2—30′ coils 7/24 copper wire (2366/16)
1—40′ coil transmission cable (2996)
1—Center insulator (10-68)
2—Porcelain insulators (10-06)
2—Lead-in strips (9-09L)
1—Ground clamp (9-09C)
2—Nail-on knobs (10-09)

DABURN Cat. No.		Standard Package
9-09	All Wave Kit	12
10-09	Nail-on Knob, Glazed	100
9-09L	Lead-in Strip	50
9-09C	Ground Clamp	50



DABURN ELECTRONICS & CABLE CORP. • 2360 HOFFMAN ST., BRONX, N.Y. 10458 (212) 295-0050 TWX 710-593-4145

■ **WE STOCK** one of the most comprehensive inventories of wire, cable and insulation in the United States. In most cases we can ship your needs within 24 hours.

Dearborn will also custom fabricate to your specifications. Our services include Special Cables, Neoprene Jacketing, Striping, Marking, Numbering, Lettering, Cutting and Stripping, Terminating, Harness Assemblies, Molded Plugs and Cord Sets, and Cabling. Any combination of conductors with special braids or shields can be made into a cable to your exact requirements by our special order department.

We will be pleased to quote on your blueprints, sketches, or job specifications.

■ **YES. WE HAVE IT!**

The vast selection of merchandise listed on the following pages represents only a partial amount of the thousands of wire, cable and insulation items stocked by Dearborn.

Our 52 page catalog will give you full details on the complete Dearborn line. Send for it, or call us for information on stock or special constructions.

U.L. TEFLON* HIGH TEMP LEAD WIRE

- U.L. Style 1180 — 300 v. — 200°C — .015" TFE Insulation
- U.L. Style 1199 — 600 v — 200°C — .020" TFE Insulation

CONSTRUCTION

Conductors: Conductors are silver plated stranded copper wire. Solid conductors available upon request.
Insulation: Insulation is TFE Extruded Teflon.*

APPLICATIONS

Used where high temperatures and space are a problem. Good abrasion resistance and small O.D.'s at voltage and temperature specified conserve space.

CORONA RESISTANT HIGH VOLTAGE WIRE

- **High Dielectric Strength**
- **Abrasion Resistant**
- **Flame Retardant**
- **Easy to Strip**

CONSTRUCTION

Conductors: All conductors are tinned copper, flexible stranding. Also available on special order with: silver plated copper conductors, nickel plated copper conductors and pure nickel conductors. Pure nickel increases rating to 260°C (500°F).
Insulation: High temperature, high voltage silicone rubber for easy stripping. High dielectric strength, flame retardant.

APPLICATIONS

Recommended for stoves, heaters, furnaces, dryers, motors, therapeutic devices, signs, lighting fixtures and special electronic devices where high temperatures are incurred. Military applications include use on jet aircraft, atomic submarines and related equipment.

COLOR: Natural.

DEARBORN

MIL-SPEC MIL-W-16878D HOOKUP WIRE TYPES B & C

Single conductor, stranded tinned copper

TYPE B
Insulation PVC .010″ wall thickness, color coded. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 600 volts.

TYPE B — NYLON
Same as above but with clear nylon jacket (.003″ wall) over PVC insulation increasing temperature rating to +115°C.

TYPE B — PREBONDED
Double tinned strands are heated which fuses the individual strands together in order to prevent fraying. Allows easy stripping and insertion in holes in lugs, circuit boards, etc. Color coded .010″ PVC insulation to MIL-W-16878D. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 600 volts.

TYPE C
Insulation PVC .017″ wall thickness. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 1000 volts.

TYPE C — NYLON
Same as above but with clear nylon jacket which increases temperature rating to +115°C.

TYPE C — SHIELD AND NYLON JACKET
Basic type C with 90% coverage braided tinned copper shield and clear nylon .005″ jacket overall.

COLOR CODE ON HOOKUP WIRE: 0—Black • 1—Brown • 2—Red • 3—Orange • 4—Yellow • 5—Green • 6—Blue • 7—Violet • 8—Grey • 9—White • 90—White/Black • 91—White/Brown • 92—White/Red • 93—White/Orange • 94—White/Yellow • 95—White/Green • 96—White/Blue • 97—White/Violet • 98—White/Gray

THE XLV IS ESPECIALLY SUITABLE FOR AEROSPACE, MILITARY AND INDUSTRIAL ELECTRONIC EQUIPMENT

Dual service hook-up wire insulated with a polyvinyl chloride which has been cross-linked by an irradiation process. This process changes the linear molecular configuration of the PVC and connects molecules through a network of chemical bonds. This specially processed insulation "XLV" becomes extremely burn-thru and heat resistant. The shrinkback or heat flow normally encountered when applying a hot soldering iron does not occur when using "XLV" hook-up wire.

This resistance to heat also prevents distortion of the insulation when the wire is subjected to temporary overloads and high temperatures.

Cross linking the PVC by irradiation also increases the abrasion resistance and makes it much superior to regular vinyl insulations.

The table below lists both the UL and military specifications to which "XLV" wire is manufactured.

Note that since the military and U.L. specifications vary, the temperature and voltage ratings assigned differ for the same wire as per the chart.

SPECIFICATIONS	MAX. OPER. TEMPS.	MAXIMUM VOLTAGE
MIL-W-16878/1 TYPE B	105°C	600 V. RMS
U.L. AWM STYLE 1429	80°C	Voltage not specified for general appliance hook-up usage. 300 volt peak for electronic use only.
MIL-W-16878/2 TYPE C	105°C	1000 V. RMS.
U.L. AWM STYLE 1430	105°C	300 VOLT RMS 600 VOLT PEAK For electronic use only.

See other U.L. & CSA products starting with page 21.

DEARBORN

MIL-W-16878D TEFLON* HOOKUP WIRE

TYPE E, 600 VOLT
Single conductor, stranded or solid silver plated copper, extruded TFE Teflon insulation. **Voltage rating:** 600 volts. **Temperature rating:** −65°C to +200°C.

TYPE EE, 1000 VOLT
Same as Type E, except for insulation thickness and voltage rating of 1000 volts.

TYPE E, SPIRAL WRAPPED FUSED TEFLON
Same as Type E — 600 volt but with spiral wrapped fused Teflon insulation.

TYPE EE, SPIRAL WRAPPED FUSED TEFLON
Same as Type EE, but with spiral wrapped fused Teflon insulation.

TYPE E, SPIRAL WRAPPED FUSED TEFLON

MIL-W-16878D SHIELDED TEFLON* CABLES

- **NO OUTER COVERING OVER SHIELD**
- **TEFLON IMPREGNATED BRAID OVER SHIELD**
  Braided natural or white Teflon impregnated fiberglass braid overall.
- **FEP EXTRUDED JACKET OVER SHIELD**
  Tough abrasion resistant extruded white FEP Teflon jacket overall.
- **TEFLON TAPE WRAP JACKET OVER SHIELD**
  Sintered wrapped white Teflon tape jacketed overall.

Each conductor stranded silver plated copper, Type E extruded TFE Teflon .010″ color coded insulation. Braided silver plated copper shield, 90% coverage. **Voltage rating:** 600 volts. **Temperature rating:** −65°C to +200°C. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus.

*Dupont T.M.

DEARBORN

UNSHIELDED AUDIO CABLE

MULTICONDUCTOR PLASTIC JACKETED

Stranded or solid tinned copper conductors. Color coded polyvinylchloride insulation. Conductors cabled and covered with a gray PVC jacket overall. Suitable for outdoor usage. Recommended for P.A. systems, intercom connecting cables, remote control circuits, relay circuits, telephones, and telemetering circuits.

All inner conductors are U.L. styles as follows: No. 22 - Style 1061, Nos. 20, 18 and 16 are Style 1007, No. 14 and No. 12 are Styles 1335 and 1336.

Temperature ratings

On Style 1061 and 1007 are −10°C to +80°C; on Styles 1335 and 1336 ratings are −10°C to +90°C.

UNSHIELDED PAIRED CONDUCTORS INTERCOM CABLES

PAIRED CONDUCTOR, PLASTIC JACKETED CABLES

Stranded or solid tinned copper conductors. Color coded polyvinylchloride .010″ insulation. Conductors are twisted into pairs, cabled and jacketed overall with a gray PVC jacket. Temperature rating: −20°C to +80°C. Conductors are **U.L. Style 1061.** Suitable for outdoor usage. Recommended for remote control circuits, relay circuits, balanced intercom systems, multiple speaker cable, telephones, call systems, etc. **Suggested operating voltage:** 300 volts maximum.

KYNAR

INSULATED HOOKUP WIRE FOR WIRE WRAP APPLICATIONS

Especially suited for computer, business machine usage and other areas where space is limited. (For automatic point to point application.)

The miniaturization of computers and business machines has created special problems in the wiring of components and associated programming equipment. Essentially there is a need for wire with a tough insulation that is resistant to abrasion and cold flow. It should function at operating temperatures up to 125°C. The Wire-Wrap type of termination requires a high conductivity low corrosive surface on the conductor. Dearborn Kynar insulated wire fulfills these needs.

U.L. PARALLEL LAMP CORD

Stranded extra-flexible bare copper, parallel conductors, insulated with Rubber, (SP-1), or Polyvinyl (SPT-1 -SPT-2) or Neoprene (HPN). JACKET OVERALL. Slit in jacket between conductors for ease in separation. Applications: Small appliances, radios, clocks; the HPN is suitable for coffeemakers, fry pans, soldering irons, etc. **Temperature Rating:** 20°C to +60°C. **Suggested Operating Voltage:** 300 V.

EXTENSION CORD SETS

Flexible, 2 or 3 conductor, high quality black rubber cords. Black molded plastic male plug on one end, molded plastic female plug on other end. Will fit conventional sockets and plugs. **Voltage rating:** 300 volts. The 3 conductor cord is used where 1 conductor requires grounding, such as for hand tools, garden edgers, etc.

* This item supplied in grey

REPLACEMENT CORDS

Flexible high quality black Rubber, Plastic and Neoprene Cords. Types SV and SJ are rubber insulated and jacketed. Types SVT and SJT are plastic insulated and jacketed. Type SJO is rubber insulated and neoprene jacketed. One end has molded black plastic straight plug (either 2 prong or 3 prong depending on 2 or 3 conductor cable). The other end of the jacket is stripped back 1½″ with ⅝″ of the conductors stripped. **Voltage rating:** 300 volts. The 3 conductor cord is used where 1 conductor is required for grounding.

* This item supplied in grey.

AIR CONDITIONER EXTENSION CORDS

Flat, parallel 3 conductor SPT-3, grey plastic cord with a molded 3 blade right angle plug on one end and a female 3 wire U ground connector molded on the other end. **Rating:** 125 volts, 15 Amps.

SHIELDED MICROPHONE, SOUND, AND INTERCOM CABLES

SOUND AND INTERCOM CABLES

Each conductor is solid or stranded tinned copper (See Chart), insulated with color coded polyvinylchloride. Conductors are twisted and shielded with either a spiral wrapped tinned copper shield or a tinned copper braided shield −20°C to +60°C. Ideal for all types of public address or sound work, recording studios, and other types of audio circuits requiring shielding. Sizes 16 thru 22 rated at 350 V working voltage. Sizes 14 and 12 are rated at 450 Volts working voltage. **.020″ nom. jacket**, thk. of chrome PVC.

DEARBORN

MULTI-CONDUCTOR UNSHIELDED CONTROL CABLE

NEOPRENE OR PLASTIC

PLASTIC JACKETED 15/5 CONTROL CABLES, 600 VOLT, VN20, 90°C

Stranded bare copper conductors, insulated with .015″* PVC color coded insulation and .005″ Nylon jacket over each conductor; cabled with fillers. Moisture resistant tape, and a black Polyvinylchloride jacket overall. Used for controlling temperature, voltage, pressure and relay circuits and many other electronic and electrical circuits. **All conductors color coded to IPCEA Standards (see bottom, this page).**

* .020″ on sizes 14 and 12; .015″ on size 16.

RUBBER INSULATED CONDUCTORS, NEOPRENE JACKETED

Stranded bare copper conductors, with color coded rubber insulation; cabled with fillers; cotton wrapped; tough Neoprene jacket overall. Used for remote control circuits. Flexible stranding and heavy duty Neoprene jacket combined, make this cable suitable for outdoor usage under extreme conditions. Neoprene jacket resists sunlight, oil, moisture, ozone, abrasion and impact.

DATA AND AUDIO CABLE • MINIATURE SOUND CABLE

INDIVIDUALLY SHIELDED MULTIPLE PAIRS

Tinned copper conductors, either stranded or solid (see tables), insulated with high density color coded *.010″ Polyethylene, conductors twisted into pairs. Along with a †22 gauge stranded tinned copper drain wire, each pair is shielded with a Mylar supported aluminum foil shield. Covered with a Grey PVC jacket overall. Used for all circuits requiring isolation between pairs. Especially suitable for multiple audio and data control circuits. Mylar Wrap between shields and jacket.

* .016″ on #18 gauge † #20 on #18 gauge

FOIL SHIELDED, PLASTIC JACKETED, MULTI-CONDUCTOR CABLE

Stranded tinned copper conductors, insulated with .015″‡ thick color coded Polyethylene insulation. Conductors are cabled and, along a No. 22§ tinned copper stranded drain wire laid parallel, are shielded with aluminum foil Mylar backed shield. Gray PVC jacket overall. This type of shielding provides 100% effective shielding and is suitable for audio and data work where cross talk must be reduced to a minimum. **Temperature rating:** −20°C to +60°C. **Operating voltage rating:** 400 volts.

§ No. 20 on No. 18, No. 16, No. 14.
‡.025″ on No. 16, .032″ on No. 14.

2 PAIR MINIATURE AUDIO AND SOUND CABLE

Tinned copper, .009″¶ Polypropylene insulation on 970001. 1 pair of black and red shielded with Mylar aluminum shield. Other pair of white and green twisted, not shielded. Both pairs twisted with #22 stranded T.C. drain wire and chrome vinyl jacket overall.

¶ .015″ PVC on 970002

■ **POLYVINYL CHLORIDE "SM" 105°C U.L./MIL** This is a high temperature tubing meeting both U.L. and MIL-I-631C, Type F, Form U, Grade C, Class 1, (FUNGUS RESISTANT), Category 1 requirements. **Temperature rating:** −20°C to +105°C. **Specs:** MIL-I-631C, ASTM D-922 Grade C. U.L. File number on request.

■ **TFE TEFLON TUBING** Extruded TFE Teflon in three Wall Thicknesses. Lightwall: (.006″ to .012″), Thinwall: (.009″ to .015″), Standard: (.010″ to .020″).
Operating Temperature Range: −65°C to +250°C. Unaffected by soldering iron temperatures. Dearborn extruded Teflon tubing is chemically inert, has zero moisture absorption and its dielectric strength at high frequencies surpasses other types of insulation even at maximum operating temperatures.
These three wall thicknesses offer an excellent choice for use in miniaturization and compactness of design, especially where high heat, and a chemical solvent and corrosion resistant material is desired.
Meets requirements of— MIL-I-22129B, MIL-P-14077, MIL-P-14078, AMS-3651, AMS-3653.
COLOR CODE: 1—Clear or Natural • 2—Black • 3—Red • Other colors available on Special Order.
* Du Pont Trademark.

STYLE ST-301 POLYOLEFIN HEAT SHRINKABLE TUBING TO MIL-I-23053B/5, U.L. APPROVED

Dearborn Style ST-301 Heat Shrinkable Tubing is an irradiated, thermally stabilized, polyolefin product which meets or exceeds MIL-I-23053B/5, AMS 3636B and AMS 3637B. ST-301 shrinks to 50% of diameter at 121°C (250°F) in 7 seconds, and has an operating temperature range of −55°C (−67°F) to +135°C (+275°F).
MIL-I-23053/5 — CLASS I (COLORED INSULATION)
MIL-I-23053/5 — CLASS II (CLEAR INSULATION)

All sizes are shown and supplied in expanded inside diameters. Stock Colors: Black, Red, White and Clear. Clear is Non-Flame Retardant. All other colors are Flame Retardant under MIL-I-23053B/5. Additional colors available on special order. Supplied in either 4 Ft. or 6 Inch lengths, and 6 Inch Assortments. Suitable for all military applications as well as industrial and commercial uses.
ST-301 Kit Assortments Available in 6″ lengths, Assorted colors AST-301-1-6 — 3/64″ thru 3/16″ (30) Lengths. AST-301-2-6 — 1/4″ thru 3/4″ (16) Lengths.

Detects Faulty Circuits Instantly!

CIRCUIT MONITOR

HELPS PREVENT FIRE DAMAGE, AND LOSS!

The Circuit Monitor detects whether or not proper ground and AC polarity are available from 115 Volt 3 wire power outlets for safe operation of power tools, appliances, office machines, lab and other electrical equipment. It does the job instantly and accurately without the inconvenience of handling probes and meters.

Dearborn No.	Description
5102B	Circuit Monitor in Box.
5012C	Circuit Monitor on Card for Display Rack.

EASY TO USE. Simply plug into 3 wire receptacle and lights on Circuit Monitor will indicate the following:

O & K	Circuit Okay
O only	Improper Ground
K only	Improper Neutral
O & X	Reversed Polarity
K & X	Reversed Ground
None	Power is OFF

DEARBORN

MIL-W-3861 TYPE S, QQ-W-343 TYPE S, ASTM B-33 UNINSULATED TINNED OR SILVER PLATED COPPER WIRE

FLAT BRAID

Tinned copper strands, woven and rolled flat to specific width depending on construction, number of strands, etc.
Used for bonding, straps, grounding, or connecting moving parts. Recommended for high current usage.

TUBULAR BRAID

Tinned copper braid woven in completely round configuration as outlined in MIL-SPEC QQ-B-575. All strands soft drawn tinned copper. Shielding is 95% or more when placed over equivalent diameter mandrel to the inside diameter of the tubular braid. Used as both shielding and protective covering.

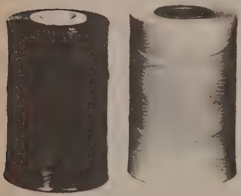
LACING TAPES & TWINE MEETING AND EXCEEDING MILITARY AND COMMERCIAL SPECIFICATIONS.

NYLON LACING TAPE MIL-T-43435 TYPE I



- **INDUSTRIAL PRICING!**
- **SAME DAY SHIPMENT!**

Designed to Meet and Exceed MIL-T-713D, Type P, and MIL-T-43435 Types I, II, and IV, also AMS 3815, AMS 3816, AMS 3817.

FINISHES AND COATINGS

- **W — WAX, MIL SPEC "B"**

A microcrystalline fungicidal wax which exceeds military specifications, provides excellent knot retention and is suitable for either lacing or spot ties.

- **G — SYNTHETIC RUBBER, MIL SPEC "C"**

A special continuous coating of fungicidal synthetic elastomer (rubber) which exceeds Mil Spec requirements, ties easily and exhibits outstanding knot holding characteristics.

- **A — SYNTHETIC RESIN, MIL SPEC "E"**

A synthetic rubber-like resin formulated with fungicidal ingredients. Handling characteristics are excellent, knot retention is outstanding; meets or exceeds Mil Spec requirements. Operational Temperature Ranges: −67°F to +250°F on all items.

NYLON LACING TWINE MIL-T-713D TYPE P
Round twisted nylon fiber impregnated with microcrystalline fungicidal wax.

POLYESTER LACING TAPE MIL-T-43335 TYPE II
Flat braided polyester yarn impregnated with special finishes to military specifications. **Available in 500-yard spools.**

NYLON LACING TAPE MIL-T-43435 TYPE I
Flat braided high-tenacity nylon yarn impregnated with microcrystalline fungicidal wax or impregnations to meet military specifications. **Available in 500-yard spools.**

NYLON LACING TAPE MIL-T-43435 TYPE I

Flat braided high-tenacity nylon yarn impregnated with microcrystalline fungicidal wax or impregnations to meet military specifications. Available in 500-yard spools.

LOW LOSS FOAM COAXIAL CABLE ASSEMBLIES

For Amateur, Commercial, Marine and Citizens Band Installations

Ready to use assemblies offering amazing new levels of performance. Special tarnish proof finish on PL-259 Connectors defies the elements. The low loss Polyfoam dielectric used in the core of these coaxial cables cuts transmission and receiving losses up to 35%, effecting coverage over greater distances.

NOTE: 50′, 100′ and 250′ cables have PL-259 Connectors attached to both ends. 6′, 15′ and 20′ cables have PL-259 Connector on one end and spade lugs at the opposite end.

MIL SPEC MIL-W-76B HOOKUP WIRE

Single conductor stranded tinned copper.

Insulation: PVC with and without shield, with and without lacquered glass braid or nylon jacketing. **Temperature rating:** −40°C to +80°C (90°C with nylon jacket). Resistant to acids, alkalis, oils, flame, moisture, solvents and fungus.

TYPE MW — GLASS BRAID

Insulation thickness .016 with glass braid overall. Voltage rating 1000 volts.

TYPE MW — SHIELDED — NYLON

PVC insulation .016, braided shield 90% coverage, and clear nylon jacket overall.

TYPE MW — GLASS BRAID — SHIELD

Insulation thickness .016 with glass braid and shield overall.

TYPE HW

Insulation thickness .031 on sizes No. 22 thru No. 16, .045 on sizes No. 14 thru No. 6. For voltage rating see chart.

TYPE HW — GLASS BRAID

Same as HW with addition of lacquered glass braid overall.

TEFLON* INSULATED AIRCRAFT, MISSILE AND ELECTRONIC WIRE AND CABLE

MIL-W-16878D, TYPE ET

Voltage rating: 250 volts. **Temperature rating:** −65°C to +200°C. Single conductor stranded silver plated copper, extruded TFE Teflon insulation.

MIL-W-7139B, CLASS I WIRE

Voltage rating: 600 volts. **Temperature rating:** −65°C to +200°C. Silver plated copper, insulated with layers of TFE Teflon, interspersed with layers of Teflon impregnated fiberglass. Color is white with blue tracer. Teflon impregnated fiberglass braid overall.

MIL-W-7139B, CLASS II WIRE

Voltage rating: 600 volts. **Temperature rating:** −65°C to +260°C. Nickel coated copper, insulated with layers of TFE Teflon, interspersed with layers of Teflon impregnated fiberglass. Color is white with orange tracer. Teflon impregnated fiberglass braid overall.

- **All Teflon wire and cable listed here is resistant to acids, alkalis, oil, flame, moisture, solvents, fungus, aircraft fuels, hydraulic fluid, skydral, ethylene glycol and alcohol.**

MIL SPEC AIRCRAFT WIRE

MIL-W-8777B - MS 25471 SILICONE AIRCRAFT WIRE

These wires are intended for installation in aircraft electrical systems where potential does not exceed 600 volts (RMS). Temperature limits are −55°C to +200°C. Single conductor silver plated copper, silicone rubber insulation, glass and dacron braid impregnated with high temperature lacquer and a white dacron braid and high temperature lacquer overall. Resistant to aircraft fuels, hydraulic fluid, oils, water, skydral, ethyleneglycol, dilute acids, alcohol, alkalis, fungus and abrasion.
